

# Vasogen Silicone

## —for skin protection in cases of bedsores, napkin rash cracked skin, itching and other skin disorders

Vasogen Silicone has high water repellent properties and protects the skin from irritants induced or aggravated by contact with aqueous liquids, body fluids and exudations. It is effective also in the treatment of sore buttocks, excoriation, plaster sores, maceration, some conditions of eczema and can be used after colostomy. Vasogen Silicone is easy to apply and is almost invisible on the skin. It provides an acceptable protective barrier that is maintained effectively for lengthy periods.

## Obstetrics in General Practice

*To be published soon*

This book is made up of a series of articles printed in the "Current Practice" section of the **BRITISH MEDICAL JOURNAL**. It is designed to give a lucid and practical account of obstetrics as it is carried out in the patient's home or in a maternity unit, with special emphasis on the role of the general practitioner and his relationship to the consultant obstetrician and the hospital. The principal authors are consultant obstetricians, but to ensure that the general practitioner's own view and special experience should be represented the consultant contributors were asked to prepare their articles in collaboration with general practitioners. The book as a whole is a product of such co-operative effort. It will prove a useful guide to this important branch of medical practice.

# Hydroderm

REGD

Eczema and other common skin conditions, whether wet or dry, usually respond rapidly to treatment with 'Hydroderm' ointment. It provides the anti-inflammatory, anti-allergic and antipruritic actions of hydrocortisone; and the antibacterial cover of neomycin and bacitracin, which are effective against most common skin pathogens.

Moreover, there is only one base and one strength of 'Hydroderm' ointment — an added advantage when prescribing.

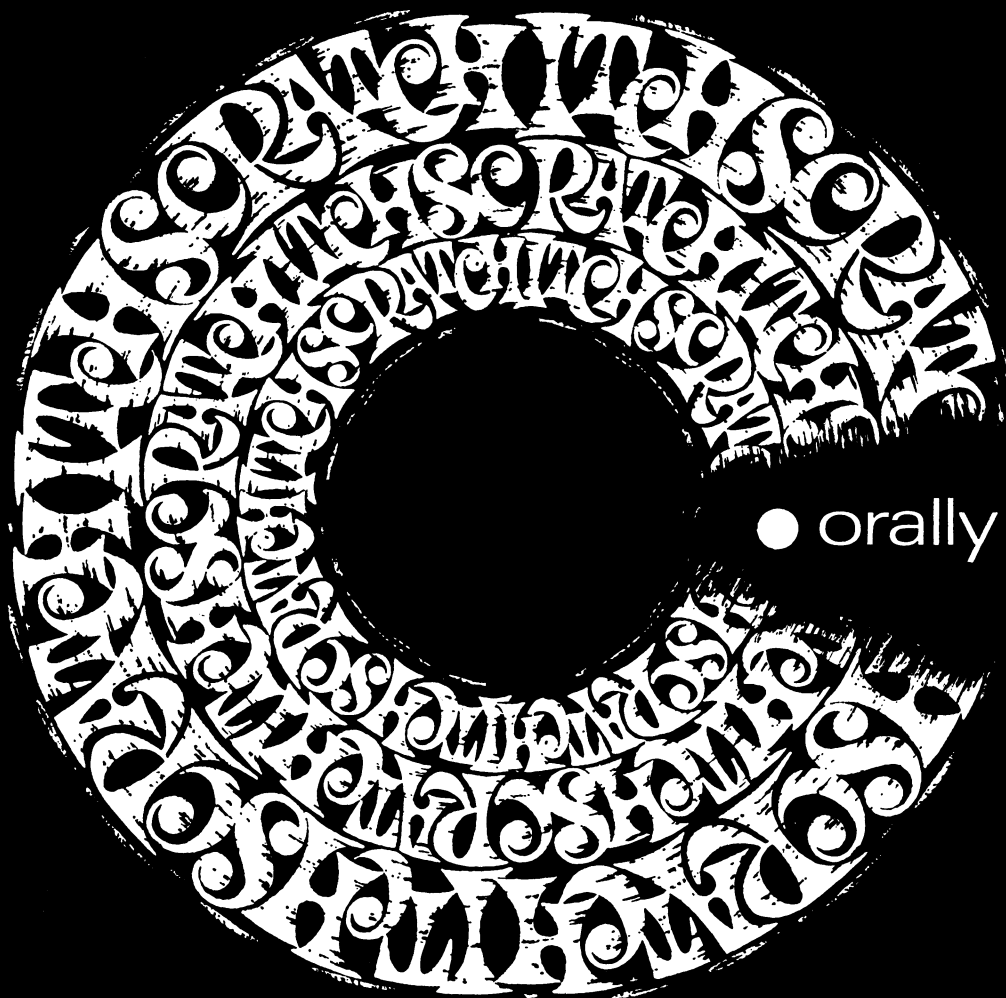

Each gramme contains 10 mg hydrocortisone, 5 mg neomycin sulphate and 1000 units zinc bacitracin. Detailed information is available to physicians on request.

# 'VALLERGAN'

breaks the itch-scratch-itch cycle

By breaking this cycle and hence encouraging the healing of lesions, 'Vallergan'\* brand of Trimeprazine Tartrate B.P.C., the M&B oral antipruritic, has proved extremely effective in a wide variety of dermatological conditions and in more general disorders.

For adults, three or four tablets daily are usually sufficient, although in intractable cases up to ten tablets daily may be given.

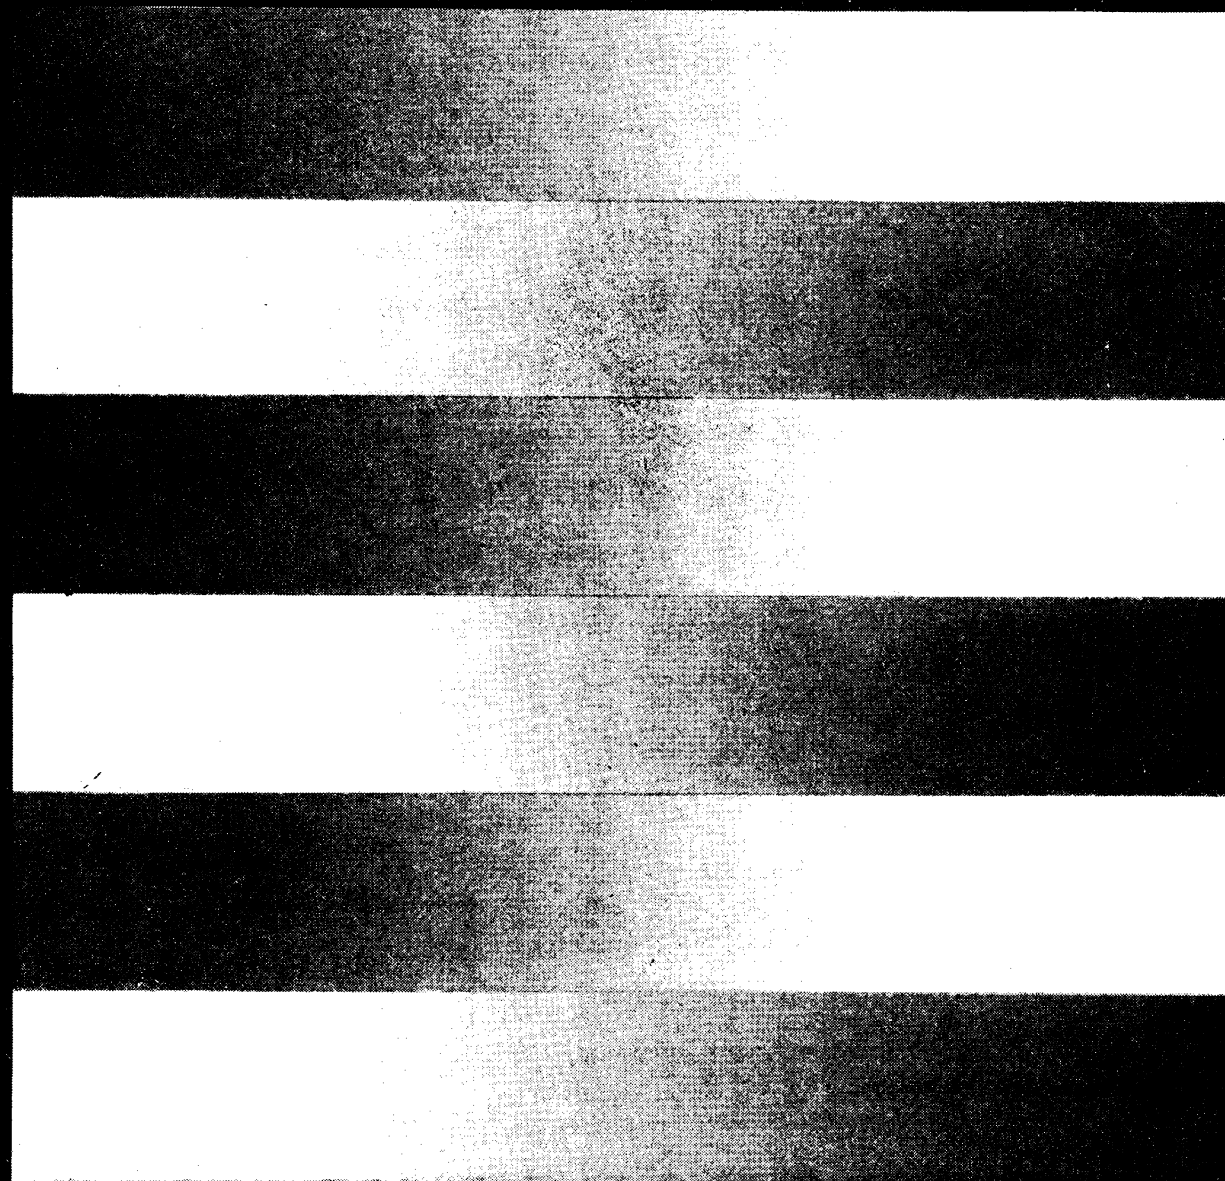

For children, one or two small teaspoonfuls of syrup (7.5 mg. per 3.6 ml.) are usually sufficient, although up to 22 mg. three times daily has been used in cases of infantile eczema.

*Presentations:* Tablets of 10 mg.; Syrup, 7.5 mg. per small teaspoonful (3.6 ml.); Forte Syrup, 22 mg. per small teaspoonful (3.6 ml.)

**A Study of the Population Movement in Nine Swedish Subpopulations in 1800-1849 from the Genetic-Statistical Viewpoint**

By C. H. ALSTRÖM and R. LINDELIUS, Stockholm

44 pp., 3 fig., 11 tab., 1966 (Supplementum ad "Acta Genetica et Statistica Medica", Vol. 16, 1966). 19s. 3d.

An earlier investigation (Alström 1958) has shown that cousin marriage frequency in Sweden was influenced more by social attitudes and could not provide estimates of possible genetic isolates. The best estimate of the gene flow in human populations, calculated from accessible data, is made with S. Wright's "neighbourhood" method, taking into consideration the isolation by distance factor, based on parent-childern birthplaces. Nine small subpopulations (parishes) in Sweden are studied for two periods; marriages contracted in 1800-24 and those in 1825-49.

VIII+347 pp., 232 fig., 31 tab., 1966. £5 13s. 9d.

The Proceedings of the First World Congress on Ballistocardiography and Cardiovascular Dynamics, Amsterdam 1965, particularly deal with ballistocardiography in relation to other methods of research in the cardiovascular field.

56 lectures delivered during this congress elucidate the clinical, physiological and physical aspects of ballistocardiography. As the ballistocardiogram gives a good overall impression about the mechanical functioning of the blood circulation, this method is the outstanding one suitable to provide us with data about the actual condition of the circulation. The great advantage of the ballistocardiographical examination is that it does not imply a single intervention on the patient.

**M. Joseph**, M.D., M.R.C.P., Physician, Children's Department, Guy's and Brompton Hospitals, and  
**R. C. MacKeith**, D.M., F.R.C.P., Physician, Children's Department, Guy's Hospital.

The recent development of paediatrics over the past twenty years is surprising in that a quarter of the population are children and the rewards of promotion of their good physical and mental health can last a lifetime. This book examines the state of the child health service today, current problems, organisation, and the attitudes of paediatricians, G.P.s, hospitals and local authorities. It also points out the possible and probable future of this service which the authors believe has, as yet, unrealised potentiality for improvement.

## SAVING WHEN YOU WANT TO SAVE

Life Assurance Savings Bonds enable you to save when you want to. Unlike ordinary insurance with which you must make regular payments in each year, you can buy Life Assurance Savings Bonds at any time.

## A GUARANTEED VALUE WHEN YOUR BONDS MATURE

Life Assurance Savings Bonds mature exactly 10 years after you buy them. Their value at the end of this 10 year period is guaranteed. Every Bond that you buy for £25 is GUARANTEED to be worth at least £37 10s. 0d. at the end of 10 years. BUT IN ACTUAL FACT, EVERY BOND WILL BE WORTH MORE THAN THIS. WHY? Because, from time to time, during the 10 year period, special 'bonuses' will be declared. When

all these bonuses are added up, it is estimated that each £25 Bond may be worth £42 or more—in other words you will see your money grow by at least 50% in value—WITH COMPLETE PROTECTION TO YOUR ORIGINAL INVESTMENT.

## LIFE ASSURANCE PROTECTION FOR YOU AND YOUR FAMILY

Remember, these are LIFE ASSURANCE Savings Bonds. Should you die at any time during the 10 year period, a cash sum of £100 for every £25 Bond that you have purchased, would become immediately payable. This means that as well as providing security for your own future, THESE LIFE ASSURANCE SAVINGS BONDS CAN PROTECT THE FUTURE OF YOUR FAMILY AS WELL.

**LIFE ASSURANCE SAVINGS BONDS GIVE BETTER VALUE, GREATER SECURITY AND 'BUILT-IN' LIFE ASSURANCE PROTECTION WITHOUT ANY DANGER FROM A FALL IN EQUITY SHARE PRICES**

## When bronchospasm takes him unawares—Aerotrol brings him rapid relief

With the Aerotrol controlled-dose nebuliser in his pocket he can feel confident of dealing, swiftly and unobtrusively, with bronchospasm whenever it may occur. Aerotrol minimises the fear and distress associated with attacks of bronchospasm—prevents what should be minor medical emergencies from becoming major crises. **Indications:** Bronchospasm in asthma and other respiratory conditions where bronchospasm is a feature such as chronic bronchitis, tracheobronchitis and pneumonia.

**Administration and dosage:** Each dose delivers .125 mg. of isoprenaline hydrochloride.

**Doses for adults:** One or two controlled-dose inhalations (Aerotrol should not be used more than six times in twenty-four hours except on medical advice).

**Doses for children:** One controlled-dose inhalation.

To minimise undesirable side effects such as palpitations, dizziness and tachycardia the correct dose should be established

for each individual patient.

**Aerotrol** is available for oral inhalation as an aerosol in a 15 ml. controlled-dose nebuliser containing approximately 300 measured .125 mg. doses.

## RESTORES EQUANIMITY

Benvil restores equanimity in acute and chronic anxiety states—so encouraging the patient to come to terms with life.

Benvil relaxes tension, calms agitation, and restores well-being in the moody, dejected patient. In clinical trials with this new compound, relief of symptoms was either complete, or more marked than with other psychotropic agents. Notable improvement occurred in cases where the results of previous medication were considered to be equivocal.

Published studies also report less sedation than with chlordiazepoxide, meprobamate, phenothiazines or barbiturates; in addition, reports suggest freedom from habituation or addiction. When prescribing Benvil, it is nevertheless advisable to follow the precautions normally applying to these compounds.

**Dosage:** One capsule three times a day and one at bed-time. (This may later be adjusted to 3-6 capsules per 24 hours.)

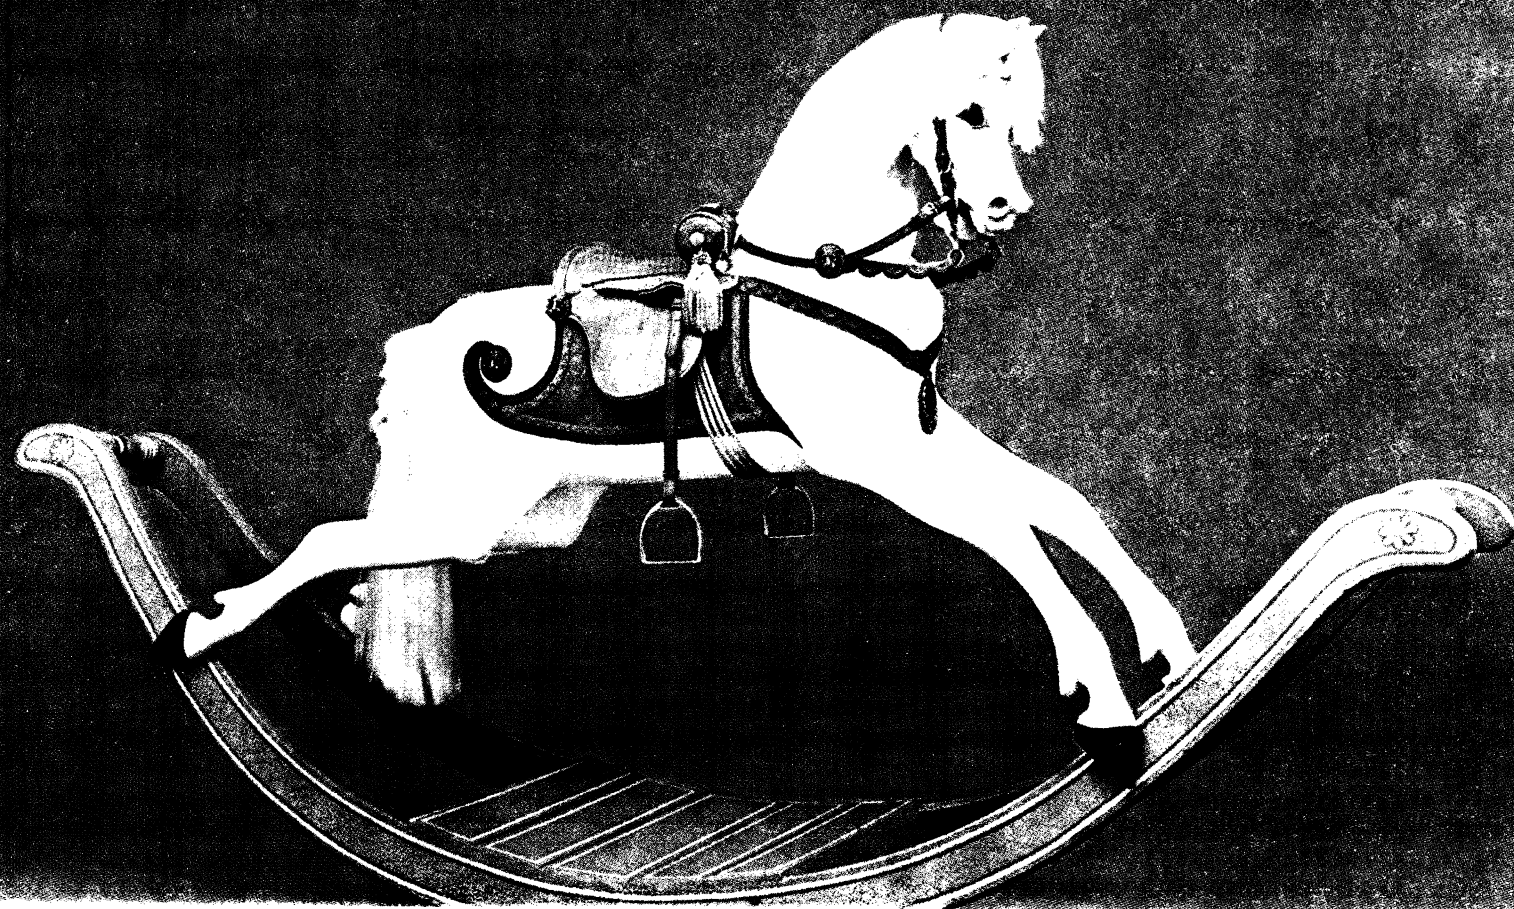

Available as blue/white capsules each containing 350mg. tybamate, in canisters of 50 and 250.

# For children **PENBRITIN** is the safer broad spectrum antibiotic

—the only one which is both oral and bactericidal, with the additional advantage of safety for all ages.

Whenever broad spectrum therapy is required, from the neonate to the older child, Penbritin affords the safety of a penicillin. No interference with the calcification of teeth and bone, or significant change in blood picture has been reported in over 700 published papers on Penbritin.

Penbritin is effective

because it is bactericidal, highly active against a wide range of pathogens and well absorbed after oral administration giving high blood, tissue and urine levels.

These factors mean outstanding effectiveness in the treatment of recurrent chest infections, bronchitis, pneumonia, tonsillitis, otitis media, cystitis, pyelonephritis and other bacterial diseases.

And acceptable

because Penbritin Syrups are palatable, pleasant tasting liquids, well liked and well tolerated by children of all ages. Crushable paediatric tablets are also available.

## To minimise the danger of potassium depletion during long-term diuretic therapy...

... Glaxo have added a generous potassium supplement to the reliable bendrofluazide diuretic Neo-NaClex. The newer preparation, known as Neo-NaClex-K, is presented in a unique two-tier tablet. The tablet is designed to overcome the problems of gastric disturbance and possible small bowel ulceration which are sometimes associated with a potassium supplement. Shortly after the tablet is swallowed, bendrofluazide is released from one tier; the diuretic dose is therefore promptly available. Thereafter, the potassium supplement is released very slowly from the second tier; this will usually ensure that most of the potassium passes the stomach before dissolving and that no great local concentration of potassium is reached on its passage through the intestine.

### Neo-NaClex-K

When a potassium supplement is unnecessary, plain Neo-NaClex will provide smooth, sustained diuresis on one dose a day.

# Severe infection Urgent action needed

## Ceporin cephaloridine

When severe undiagnosed infection requires urgent treatment it is vital to use a safe, bactericidal, broad-spectrum antibiotic which is effective against penicillin-resistant staphylococci. Ceporin is such an antibiotic—with the further advantage of safety in the penicillin-hypersensitive patient.

# allegron

nortriptyline hydrochloride

**quickly relieves depression in any guise**

The true condition of the depressed and anxious patient may often be hidden behind a variety of misleading symptoms until her appearance in the surgery becomes a problem in itself.

## **Allegron simplifies treatment**

It is one drug especially suited to treating those mental and emotional states often associated with refractory physical symptoms.

## **Allegron acts quickly**

It lifts the underlying depression, calms any anxiety and relieves psychosomatic symptoms by removing their cause.

## **Allegron is well tolerated**

It is without the restrictions of the MAOI's, and is one of the safest of psychotropic drugs.

Usual adult dosage: 25 mg. three times daily.

Tablets of 25 mg. (No. 1011) and 10 mg. (No. 1010) base equivalent. Liquid 10 mg. base equivalent per 5 ml. (No. 5010).

SERENID\* (oxazepam, Wyeth) is a new and versatile agent which enables you to achieve *prompt and effective* control of all the symptoms of stress. Patients on SERENID begin to feel better from the start of treatment and you can reasonably expect complete symptom control—relief of anxiety, tension, agitation etc., and thus in many instances a lightening of associated depression—in three to seven days. What's more, at effective dose levels SERENID causes few side effects—undue sedation and ataxia are rarely problems—making it particularly suitable for those patients who must remain alert and active or for the elderly and debilitated. Available as 15 mg. and 10 mg. scored tablets in bottles of 100 and 500.

## continuous drip control of ulcer by tablet

---

---

PRODEXIN tablets give all the benefits of continuous intragastric drip therapy<sup>1</sup> without any of its disadvantages.

The slow suck down tablets are specially formulated to give prolonged antacid buffer effect, unaffected by stomach emptying rate.<sup>2</sup>

Immediate relief of pain is achieved by rapidly raising pH to 2 neutralising excess acid and controlling the acid secretion by slowly building up the pH to a desirable level of pH3.5 and pH4.5

### DOSAGE:

For continuous therapeutic effect one tablet at a time should be sucked slowly.  
For peptic ulcer one or more tablets an hour.

# Almost anything can cause eczema

## and almost any eczema may be infected...

### although not apparently so

Investigations have shown that a high proportion of cases of eczema and psoriasis harbour 'hidden' infection which can only be detected on culture. Remiderm, being a combination of a modern corticosteroid, triamcinolone acetonide, and a new antibacterial/antifungal agent, halquinol, can eliminate this risk of 'hidden' infection and treatment time is shorter than when a corticosteroid alone is applied.

Remiderm ointment and cream: triamcinolone acetonide 0.025% and halquinol 0.75%: 15gm. tubes, basic NHS price 7/9. Remiderm spray: triamcinolone acetonide 4.95mg. and halquinol 31.2mg. in a 75gm. canister, basic NHS price 16/-.

# In Gout and other hyperuricaemic conditions 'Zyloric' Allopurinol has a radically new mode of action

---

'Zyloric' lowers serum and urinary uric acid levels by inhibition of xanthine oxidase, an enzyme important in uric acid formation.

'Zyloric' prevents the deposition of urates in the tissues, relieves chronic joint pain, increases joint mobility and has the great advantage that it also inhibits urinary urate stone formation.

'Zyloric' is therefore indicated especially in gouty nephropathy, in patients who form urate stones, and in those with unusually severe disease.

# IRON *with all its advantages and few of its drawbacks*

In the treatment of iron-deficiency anaemia by the oral route in adults or children, PLESMET—chelated iron in tablet or syrup form has been suggested as a *most effective preparation* because of a low incidence of gastro-intestinal symptoms.

*The Practitioner, 1960, 184, 792.*

The above is one of numerous clinical references to Plesmet, which is rapidly absorbed and utilized to provide an adequate increase in haemoglobin levels and is, moreover, economical in both dosage and cost.

## ... Rauwiloid and the screw

Efficient, dependable, both have stood the test of time—the screw for more than 500 years, *Rauwiloid* since 1953. Gradual reduction of blood pressure to normal levels and steady maintenance at those levels, very simple dosage, low cost and freedom from tolerance—these characteristics of *Rauwiloid* still make it the ideal first choice for mild to moderate essential hypertension. Even in more severe cases, *Rauwiloid* can be of considerable value in combination with more potent agents.

**19-24 hours relief** In many allergic conditions the antihistamine triprolidine, as 'Pro-Actidil', brings rapid yet prolonged relief. 'Pro-Actidil' acts within 10-30 minutes, but due to the special formulation of the tablet this action is maintained for up to 24 hours.

**in hay fever** and rhinitis, angioneurotic oedema, seborrhoeic eczema, pruritus, allergic asthma and allergic dermatoses the response to 'Pro-Actidil' is exceptional. In view of the excellent results that may be occasionally obtained, 'Pro-Actidil' is also worth a trial in solar dermatoses (*Practitioner* (1964) **193**, 434).

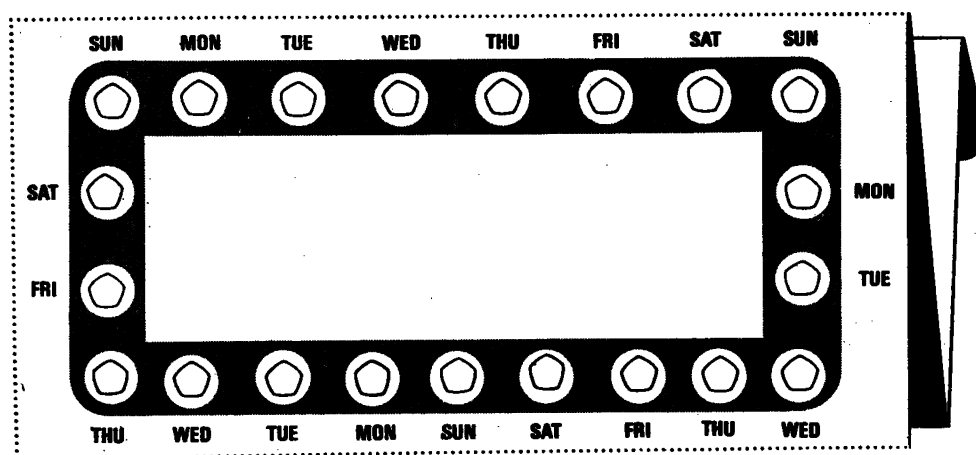

**with one tablet** Only one 10 mg. tablet a day alleviates the misery of allergic manifestations. If taken before retiring any drowsiness induced will occur during normal sleeping time.

For greater simplicity in  
oral contraception...  
Ovulen—the low dose  
oral contraceptive—now  
comes in this 3week wallet

Ovulen (brand of ethynodiol diacetate with mestranol) is the oral contraceptive with a progestin content of only 1 mg. per tablet. The new 3-week wallet means that Ovulen now combines the benefits of low dosage with a simple 3-week administration schedule. *This routine can be easily explained to the patient in a few minutes.*

**SIMPLICITY** The patient takes one tablet a day for 3 weeks, waits one week, then starts her next course of tablets. The complete 4-week cycle makes it easier for her to remember her 'pill routine', because her *starting day* will always be the same day of the week. Ovulen's low progestin content is consistently associated with a very low incidence of side effects.

**If she rejects  
support stockings  
because  
they're  
too thick—  
recommmend  
Supp-hose®  
(they're *sheer*)**

Only her face will show that she's wearing Supp-hose. Many women reject support stockings because they think that such a stocking is thick and unattractive. Consequently they are prepared to sacrifice their health for the sake of their appearance. But this is where Elbeo Supp-hose stockings have a tremendous advantage; they look scarcely any different from everyone else's nylon stockings. They are made in fashionable colours—seamed or seamfree. They are sheer, unbelievably sheer for the strong support they give. Yet they give as much relief as the thicker type of support stocking and are entirely acceptable from a medical point of view.

**Medically beneficial.** Made in nylon yarn, specially coiled, twisted and fixed before the stockings are knitted, Supp-hose

stockings provide adequate compressive elastic support which is maintained over months of wear and washing. This makes them suitable for venous states of the lower extremities causing oedema and requiring elastic support. Supp-hose stockings will relieve, significantly, the symptoms associated with varicose veins, the post-phlebitic phenomenon or chronic venous insufficiency. Supp-hose can also be recommended to patients suffering from the condition termed 'tired legs', particularly during pregnancy.

**Thousands of women are wearing Supp-hose stockings.** Each year we receive dozens of enthusiastic testimonials. A report on clinical trials—and information about sizing—will gladly be sent on request. Write to Dept BM3, Elbeo House, Woodborough Road, Nottingham.

## Triominic

Oral Nasal Decongestant

WANDER

'Triominic' timed-release tablets and orange-flavoured syrup contain antihistamines and a decongestant in balanced proportions to ensure relief from symptoms of nasal allergy for between 6 and 8 hours. The active constituents of 'Triominic'—the original oral decongestant—reach the nasal mucosa systemically. This obviates the rebound congestion which may follow the topical use of vasoconstrictors.

### Formula per timed-release tablet.

Phenylpropanolamine hydrochloride.....	50 mg.
Mepyramine maleate B.P.....	25 mg.
Pheniramine maleate.....	25 mg.

ST. ANDREW'S HOSPITAL  
NORTHAMPTON

FOR NERVOUS AND MENTAL  
DISORDERS

President: The Earl Spencer  
Medical Superintendent:  
James Harper, M.B., F.R.C.P.(Edin.), D.P.M.

This private hospital receives patients, both  
male and female, suffering from nervous and  
mental disorders, including alcoholism and  
senile illnesses. The fees range from eighteen  
guineas per week. Private rooms with special  
nurses can be provided, either in the hospital  
or in one of the villas in the grounds. The  
hospital is situated in 130 acres of pleasant  
grounds which provide all recreational facili-  
ties. These include a nine-hole golf course,  
sports ground, tennis courts, etc. A Recre-  
ation and Occupation Centre, known as  
Gloucester House, was opened in 1962,  
which comprises an occupational therapy de-  
partment, a swimming pool, a squash court  
and a library with an adjoining reading  
room.

## WANTAGE HOUSE

This is a separate reception unit to which  
patients may be admitted. It is equipped  
for the complete investigation of nervous and  
mental disorders by the most modern  
methods. All forms of treatment are avail-  
able.

## MOULTON PARK

Some two miles from the main hospital is  
the farm of approximately 600 acres. Occu-  
pational therapy is a feature of this branch.  
For terms and further particulars apply to  
the Medical Superintendent (Telephone No.:  
34354 Northampton), who can be seen in  
London by appointment.

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”*

Med. Times, N.Y., 1958, 1, 74

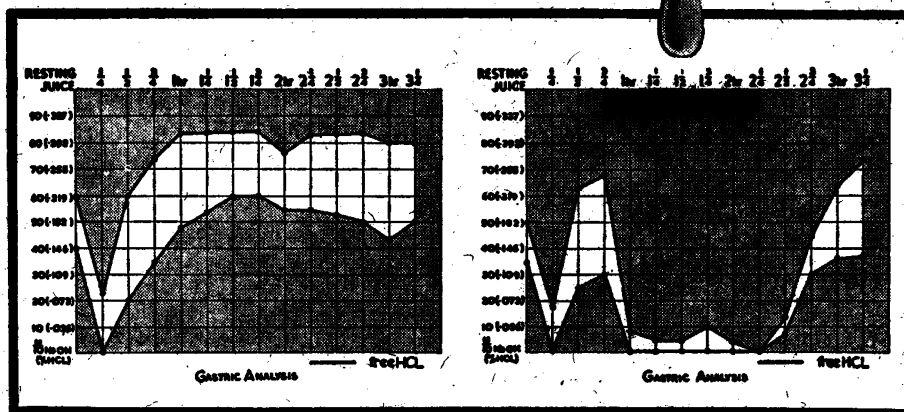

## Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.
