

The SPENCERFLEX for Men

- ★ Co-relates back and abdominal support
- ★ Allows complete freedom of action
- ★ Protects scar following upper abdominal surgery

Individually designed, cut and made for each patient, this support provides pelvic control, abdominal uplift, freedom for muscular action. Thus, at work or play, or during convalescence, the Spencerflex favourably influences better posture and body mechanics.

Safe because it will not yield or slip under strain. Comfortable because it is made according to the prescribed needs of each patient.

The extra width at back gives exceptional back support. It is light and flexible, with no pressure on prominent part of hip bones.

Designed as an adjunct to treatment following upper abdominal surgery. Especially helpful in early ambulation and where drainage has been maintained for a considerable period. Completely covers and protects the scar without "digging-in" at lower ribs. Relieves fatigue and strain—even that caused by deep breathing and coughing—on tissues and muscles of the wound area. *We know of no other abdominal support for men which provides these benefits.*

RASTINON tolbutamide BP

The diabetic's treatment extends, at the moment, throughout his lifetime. The long-term safety of the preparations used is just as important as their ability to maintain satisfactory blood levels. Rastinon has a record of safety exceeding that of any comparable preparation. Its effectiveness is such that during the last 8 years over three million of the world's diabetics have been stabilized on Rastinon. This is why Rastinon is the first choice in initiating and continuing treatment of diabetes.

patient acceptance

'Sequens', the first of the "second-generation" oral contraceptives to achieve world-wide acceptance, inhibits ovulation without appreciable alteration of the normal menstrual pattern. Mestranol, an oestrogen, is introduced early in the cycle, followed later by a combination of mestranol with the progestogen chlormadinone acetate.

The more physiological approach with 'Sequens' explains why there are fewer side-effects than with earlier agents which combine oestrogen and progestogen throughout the cycle.

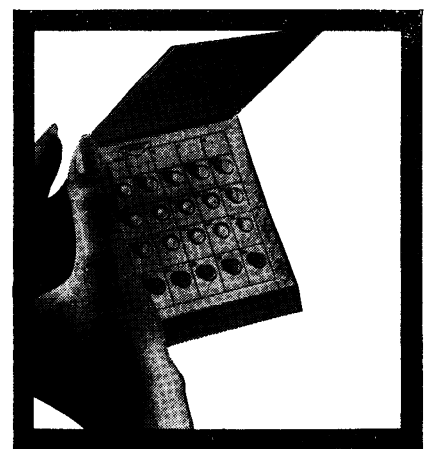

- * weight gain is not a problem
- * low incidence of breakthrough bleeding
- * nausea only rarely encountered
- * patient-tested package and directions provide easy understanding

the turning point for many arthritic patients

INDOCID
Indomethacin REGD

"...the results obtained indicate that indomethacin has provided a most useful additional therapy in the management of osteoarthritis, gout, and some patients suffering from rheumatoid arthritis."

***Brit.med.J.*, 1966, 1, 80 (8 Jan)**

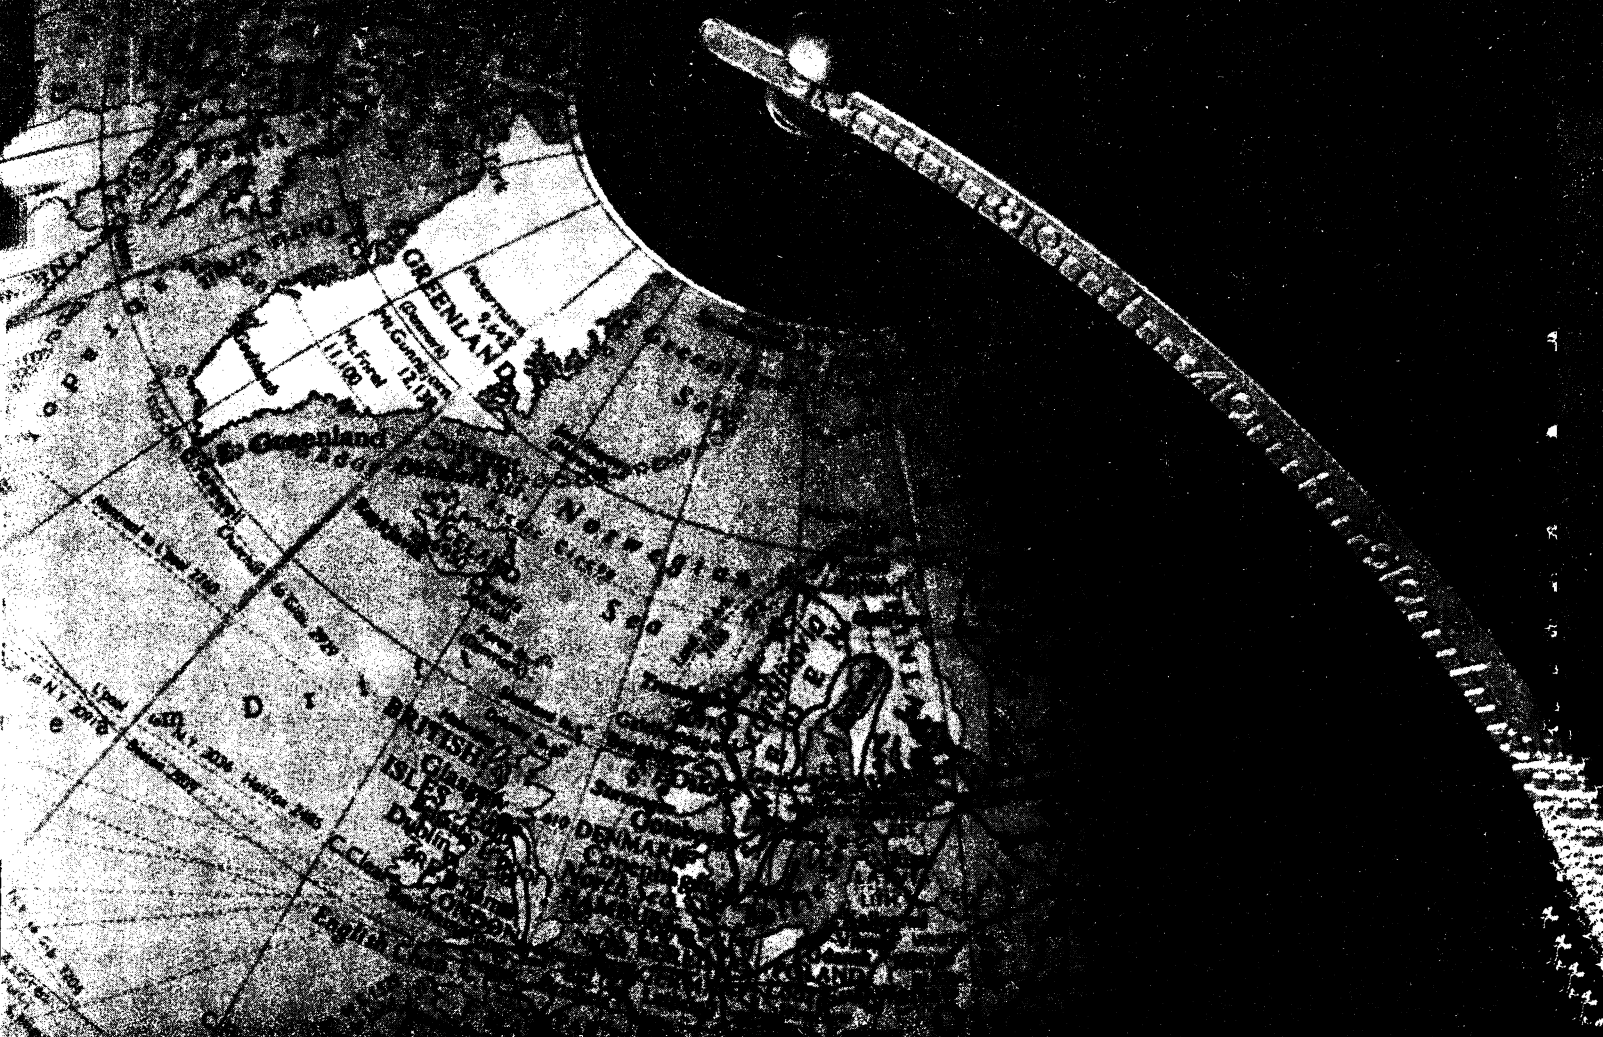

For many patients, 'Indocid' has proved to be the turning point in their course of treatment. 'Indocid' may be dramatically effective in reducing pain and swelling associated with many arthritic conditions. Therapy with 'Indocid' often results in a progressive improvement in mobility, even in severely-disabled patients, and has proved well-suited to long-term uninterrupted use. 'Indocid' is now also available as suppositories which are of value where relief of night pain and morning stiffness is particularly important.

'Indocid' is supplied as 25 mg capsules and 100 mg suppositories. Detailed information is available to physicians on request.

**The fact that Gynovlar 21
is widely used throughout
five continents may be very
impressive geographically**

when all facts are considered the choice must be

but what matters clinically is the reason why

Wide international usage is in itself striking testimony to the merits of Gynovlar 21. But more important are the clinical advantages which have earned such wide usage.

First, Gynovlar 21 provides four-fold security by ovulation control, protective changes in the endometrium and the cervical mucus and by the 21-tablet dosage scheme which virtually eliminates patient error.

Secondly, Gynovlar 21 is extremely well tolerated. Tolerance depends not only on the choice of progestogen, but especially on the type of dosage of oestrogen. Gynovlar 21 tablets contain 3 mg. norethisterone acetate—a progestogen used throughout the world in gynaecological medication and renowned

for its excellent tolerance—and 0.05 mg. ethinyl-oestradiol B.P., which is the lowest dose to be employed for oral contraception. No other presentation contains less oestrogen, many contain more.

Thirdly, the substances used in Gynovlar 21 produce normal menstrual cycles, which have been described as being of 'almost clockwork precision'. Thus Gynovlar 21 is ideally suited to the 21-tablet dosage scheme, which this product pioneered and the advantages of which have, meanwhile, been generally recognized.

Psoriasis... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.² A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.² These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

New Alphosyl lubricating cream. A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipoid constituents of normal healthy skin. The vehicle also contains hydrophylic-lipophilic bipolar substances which

Oct. 9th.

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalane, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

Formula: Allantoin 2%+90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

In Gout and other hyperuricaemic conditions 'Zyloric' Allopurinol has a radically new mode of action

'Zyloric' lowers serum and urinary uric acid levels by inhibition of xanthine oxidase, an enzyme important in uric acid formation.

'Zyloric' prevents the deposition of urates in the tissues, relieves chronic joint pain, increases joint mobility and has the great advantage that it also inhibits urinary urate stone formation.

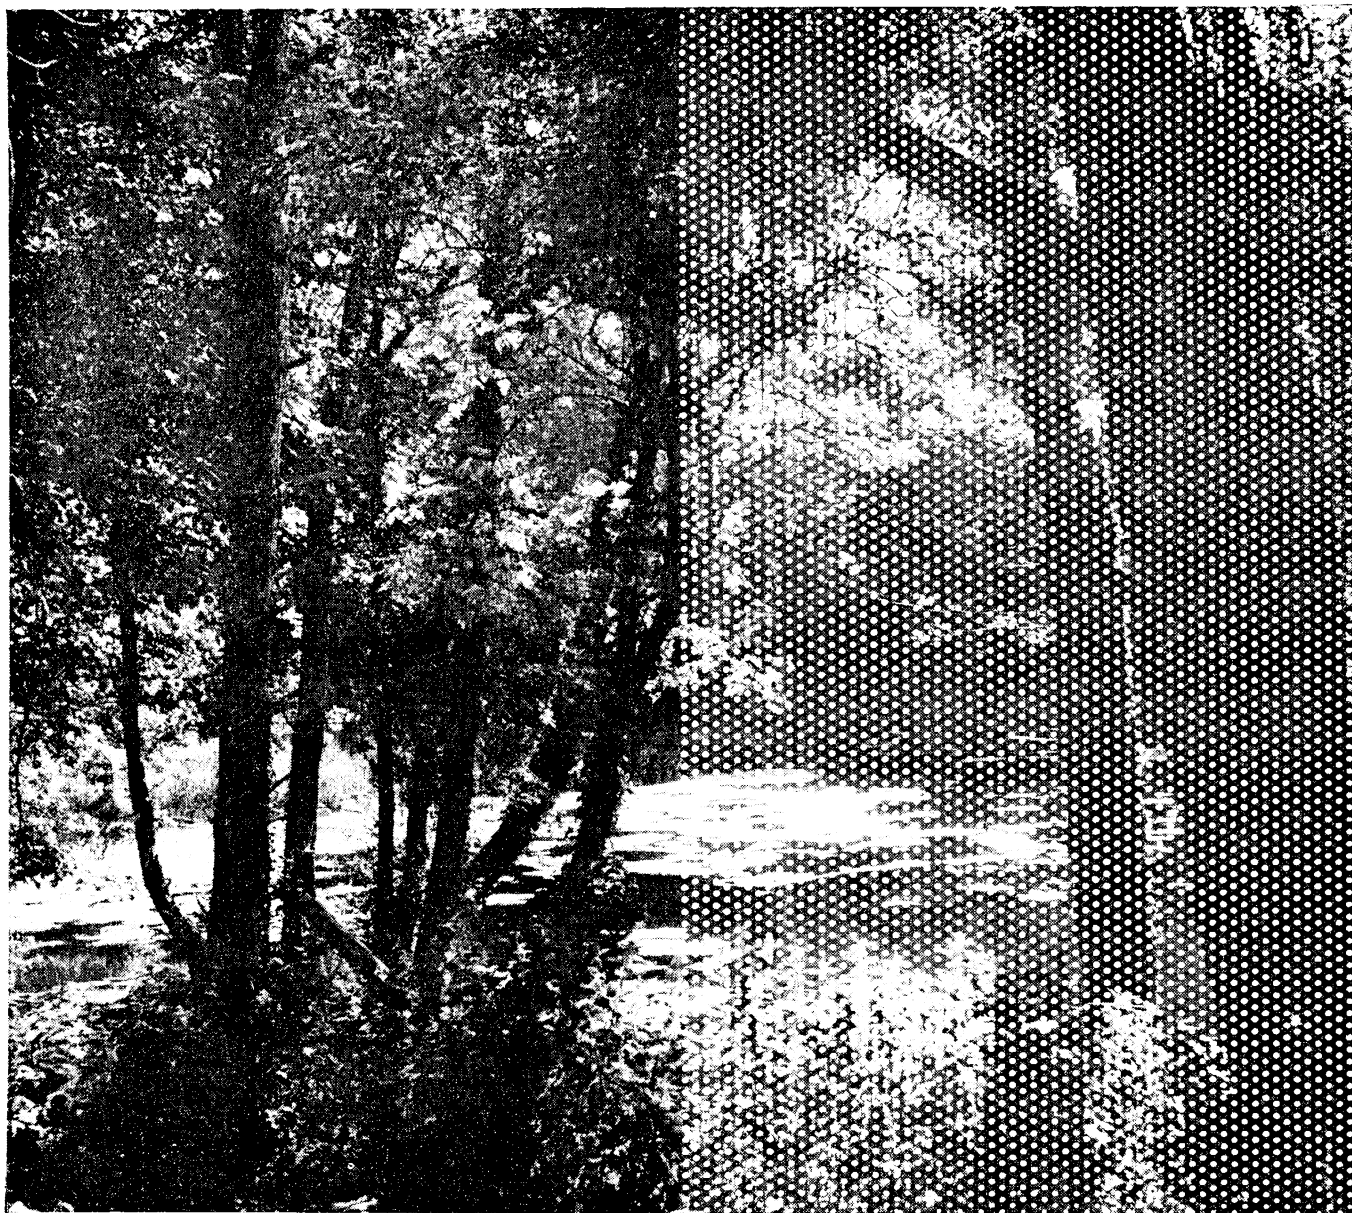

'Zyloric' is therefore indicated especially in gouty nephropathy, in patients who form urate stones, and in those with unusually severe disease.

eating is a serious business . . .

so everything about Heinz Baby Foods is very very special

Heinz Baby Foods provide an unequalled variety for baby's daily diet. Broths and soups, meat, fish, chicken, cheese and egg dishes, vegetables and fruits—68 varieties in all.

And Heinz—because of intensive care and supervision from seed to harvest—are able to use far better, fresher ingredients than the average mother.

For instance, before contracting with fruit or vegetable growers, Heinz experts study the land and the farming methods used; they specify what seeds are to be sown; crops are gathered at the peak of maturity.

Meat, too, is chosen with the greatest care. Only prime, tender cuts

are used. This same stringent inspection applies to every single ingredient in each of the 68 varieties of Baby Foods.

Heinz cooking retains the maximum nutritional value. Instrumentally controlled steam cooking ensures uniformity with each batch of foods and prevents over-cooking. Hot foods are exposed as little as possible to the air; juices are retained to avoid loss of soluble nutrients.

Heinz Baby Foods not only make life simpler for busy mothers. They provide babies with a varied and nutritious diet, superior in every way to the meals most mothers have the time and resources to prepare themselves.

Friedberg—

DISEASES OF THE HEART

By Charles C. Friedberg, M.D.

The Mt. Sinai Hospital, New York, and College of Physicians and Surgeons, Columbia University

During the past 15 years the name "Friedberg" has become synonymous with authority, up-to-dateness, practicality, completeness and understandability among reference books in cardiology.

This *New (3rd) Edition* is beyond question the finest "Friedberg" yet. Here is a remarkably cohesive, logical and balanced presentation of all the factors that together make up the clinical picture of the individual with disease or dysfunction of the heart. Virtually every problem regarding recognition, differential diagnosis, pathological physiology, treatment and prognosis is fully examined and effectively resolved.

Nearly 800 pages have been added—despite drastic and judicious pruning of older material. Dr. Friedberg has added a wealth of new material to the sections on angiocardiology, congenital heart disease, catheterization, vectorcardiography, phonocardiography, and the new electronic aids to management. The many fronts of cardiac surgery in regard to indications, contraindications and the operative procedures themselves are superbly illuminated.

Whether you purchase this great book in the single volume or in the easier to handle two-volume set, you will receive a vast storehouse about all the worth-while information on heart disease available today.

Suddenly the treatment of psoriasis with coal tar could well be out-of-date!

Even steroids may rarely need to be used in future—Now every well-informed doctor in the world can prescribe this note-worthy new British discovery . . . revealed here for the first time . . .

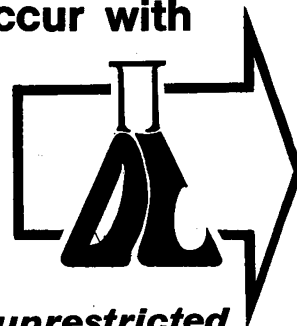

Now you can
expect
unrestricted
efficacy for
psoriasis

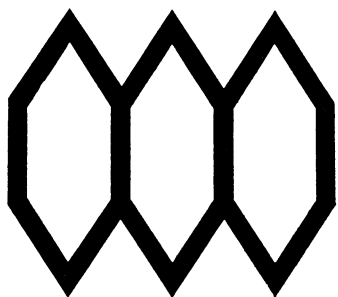

Exolan is a new preparation which attacks psoriatic lesions with the striking effectiveness of dithranol, but without its unpleasant side-effects of burning and staining. Presented as a paste, it can be prescribed for application by the patient, at home, with complete safety. There is no rapid relapse on cessation of treatment as may occur with steroids.

Exolan Paste is available in
70 gram Polystyrene jars
Basic N.H.S. Price 22/6d.

Over a million psoriatics in the U.K. alone can now expect *unrestricted* efficacy with New Exolan Paste.

This table demonstrates how new Exolan Paste compares with other treatments for psoriasis

Treatment	Rate of healing	Necessity for supervised treatment	Any risks or hazards	Discomfort or unpleasantness experienced	Chances of rapid relapse
Crude coal tar	Slow	No	No	Yes	Moderate
Liq. Picis Carb.	Slow	No	No	Yes	Moderate
Cosmetic coal tars	Very slow	No	No	No	Moderate
Topical Steroids alone	Slow	No	No	No	High
Steroids under polythene	Very rapid	Yes	Yes	Yes	High
Chrysarobin	Rapid	Yes	Yes	Yes	Low
Dithranol	Rapid	Yes	Yes	Yes	Low
Exolan	Rapid	No	No	No	Low

While dithranol is still the best overall treatment for psoriasis* it can only be used under constant supervision. Dermal Laboratories' new discovery, triacetoxanthracene (Exolan), will heal psoriasis quickly and effectively in the same way as dithranol itself does but without causing burning or staining of the skin. Clinical trials by eminent British dermatologists on several hundred psoriatic patients showed virtually equal rates of healing between dithranol and Exolan, but Exolan caused none of the usual dithranol signs of burning, staining and erythema. Exolan frequently proved acceptable, where dithranol was irritant and had to be discontinued. Exolan Paste needs no precautions which means that it may be used by the patient in his own home without fear of side effects through indiscriminate application.

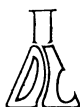

On 19th May 1966 a paper was presented at the Royal Society of Medicine on the results of trials with EXOLAN PASTE. A leaflet is available giving the history, chemistry, rationale and up-to-date clinical results of this new British discovery which is now certain to be the prescription of choice for psoriasis.

HEALTH CENTRES & GROUP PRACTICES

Lord Cohen of Birkenhead writes the introduction to a booklet on Health Centres and Group Practices based on recent articles in the *B.M.J.*

"... a series of excellent articles. . . Any practitioner who is considering how he can improve his service to his patients and his own working conditions will find this a very useful book."

Lancet (1966), 1, 380.

"... a 'must' for any group contemplating new practice premises . . . should be equally valuable to the M.O.H. planning a new health centre."

Brit. med. J. (1966), 1, 221.

"These reports . . . provide an admirable summary of the position today. . . ."

The PORTOGEN could make life more tolerable for some of your patients

Many patients suffering from chronic respiratory insufficiency are debarred from normal activities by their dependence on a supply of supplementary oxygen.

THE PORTOGEN has been designed to provide such a supply in extremely portable and handy form. It contains sufficient oxygen to last for 25 minutes at a continuous flow of 4 litres per minute, and yet the complete outfit, including 100 litre cylinder, regulator, control valve, gauge, and neat, ever-ready carrying case weighs little more than 3lbs.

THE PORTOGEN also constitutes a readily available source of oxygen for use in all kinds of respiratory emergencies, and is therefore eminently suitable for your surgery and your car.

THE PORTOGEN is simple and safe. Very little instruction is needed in its use, and cylinders may either be exchanged through a chemist, or recharged by the patient from a standard 48 cu. ft. cylinder in his home.

For further information, get in touch with your nearest Branch of British Oxygen. Our representative will be glad to call on you by arrangement.

THE PROPOSED UNIVERSITY OF SURREY
(Battersea College of Technology)
Department of Mechanical Engineering
POSTGRADUATE COURSE IN BIOMECHANICS
Applications are invited for a one-year course in Biomechanics in October, 1966. The course, which leads to the degree of M.Sc. by examination, is intended for graduates in engineering or physical sciences on the one hand and graduates in medicine or biological sciences on the other. The branch of the course for graduates in engineering or physical sciences aims to train them for work in the medical field—e.g., the design of prostheses or of hospital equipment, and to introduce them to the physiological problems which they can help to solve. The branch of the course for graduates in medicine or biological sciences aims to introduce them to the mathematical and engineering methods and techniques which are applicable to medical and physiological practice and research. Clinical application of the studies is provided through close collaboration with hospitals and medical specialists and the department specializes in research problems related to internal and external prostheses and blood flow measurement. Requests for further particulars and application forms should be sent to Professor J. M. Zarek, Head of the Mechanical Engineering Department, at the College, London S.W.11. (16337)

SWINDON AND DISTRICT HOSPITAL MANAGEMENT COMMITTEE

Applications are invited for the post of

HOUSE SURGEON

one

Before you commit yourself to a practice, work 3 or 5 years in the R.A.F.

You'll do some interesting, out-of-the-rut medicine, see a bit of the world, live well, and 'retire' with up to £3,000, tax free.

Your first job in the R.A.F. would probably be junior M.O. at a Station: rather like being an 'Assistant with a view'. In a typical case you could be one of two doctors with, between you, 1500 to 2500 people to take care of, and your own 'cottage hospital' with wards, theatre and laboratory, and secretarial as well as nursing staff.

You'd have a shorter list than a civilian G.P., and to this extent you would live a less strenuous life. To compensate, you would give much more comprehensive care. It is this—and the variety of your work—that makes practice in the R.A.F. so interesting.

In the R.A.F. you combine several functions. You are in medical care not only of people, but of the environment they live in, and of the work they do. In proportion you do less curative work and more preventive work than is even possible for most civilian doctors.

A lot of people hold the view that this is the way all medicine should be practised—with the closest possible integration of the doctor and the community.

This is the choice you face

Think of two doctors, both aged 40. One went to his practice straight from his teaching hospital, and has been there ever since. The other went into the R.A.F. on a 5-year commission. He lived

—and lived well—in the tropics with his family for 2½ years and, on leave or on duty, visited 7 countries: two European, three Asiatic, and two Australasian. By now he's been in civilian practice for 10 years; he's as well established as the other doctor. But which of the two has got more out of life, and has the richer memories to look back upon?

In many ways, the transition from hospital into the R.A.F. seems more 'natural' than the movement to civilian practice. You go from one community to another—and they have much in common: both are young, cheerful, energetic, rather self-contained—and at the same time very professional, with a marked sense of purpose. If you can feel, now, that you are going to miss Medical School—think about the R.A.F. Service life would probably be 'right' for you.

The time for bold decisions is when you are young and free

Today, because you are at the beginning of your career, you can take a short time out from the main stream of civilian practice just by deciding to do it.

Now, you are free to go. In a few years time, you probably won't be.

You'll have a practice 'with your name on it'; children who want a permanent home to strike root in; and soon. It will be time for you to settle down.

Meanwhile, at the parting of the ways, you have this chance. Now is the time to find out about it.

The address to write to is: Wing Commander D. G. M. Hills, O.B.E., M.B., B.S., D.P.H., R.A.F., Ministry of Defence (MA1/724EE3), 1-6 Tavistock Square, London, W.C.1. Please give your age and qualifications.

Medical cadetships. Commissions as a cadet are available to students who have passed second M.B. (or equivalent). Initially your basic pay would be £630 p.a. Appropriate R.A.F. allowances, examination and tuition fees are paid in addition. You would continue to live and work as a medical student and when fully registered you would start work in the R.A.F. as a doctor in the rank of Flight Lieutenant on a five year short service commission. Further information may be obtained from the above address.

**AUSTRALIAN NATIONAL UNIVERSITY
INSTITUTE OF ADVANCED STUDIES
CHAIR OF PHYSIOLOGY**

The University is seeking to make an appointment to fill the Chair of Physiology following the resignation of Professor Sir John Eccles, F.R.S., F.F.A., which will take effect in August, 1966. The appointee will be head of the department of physiology within the John Curtin School of Medical Research. Professor Eccles was the Foundation Professor of Physiology and established the research interests of the department in the fields of neurophysiology and neuropharmacology.

In making an appointment to the Chair the University does not propose to give preference necessarily to a Physiologist whose interests are primarily in the field of neurophysiology. Should an appointment be made of an individual whose interests lie outside this field the University expects to be able to re-equip laboratories so that the appointee can follow his particular research interests.

Those who may be interested in appointment are invited to write to the Dean of the John Curtin School of Medical Research, Professor Sir Hugh Ennor, from whom further information about the Chair and the John Curtin School can be obtained.

Summary conditions of appointment, and a brochure about the University, can be obtained from the Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London S.W.1. (15833)

Exacerbation of eczema on side of foot, a site liable to infection when skin is broken.

Clearance after a week's treatment thrice daily with new Betnovate-C Ointment.

wide scope

Betnovate

the topical steroid
most likely to succeed

The excellence of Betnovate (betamethasone 17-valerate) in treating psoriasis and eczema of all types has now been firmly established. The evidence from extensive clinical trials—"that a better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested"*—has been fully substantiated by the outstanding results obtained with Betnovate in hospital and general practice. Used increasingly for many conditions other than psoriasis and eczema, Betnovate has also been shown to produce a better response throughout the whole range of steroid-responsive dermatoses. The majority of such skin disorders can in fact be treated satisfactorily by simply applying a Betnovate preparation once or twice daily.
