## *Distalgesic erases pain*

Two tablets of Distalgesic taken three or four times daily bring prompt and lasting relief in pain of varying degrees. Distalgesic maintains its effect at this dosage level even in long-term use, such as in the aches and pains of rheumatism. It can be effective against more severe pain, often delaying the need for parenteral narcotics. Distalgesic itself is non-narcotic, does not cause constipation or addiction and does not irritate the gastric mucosa.

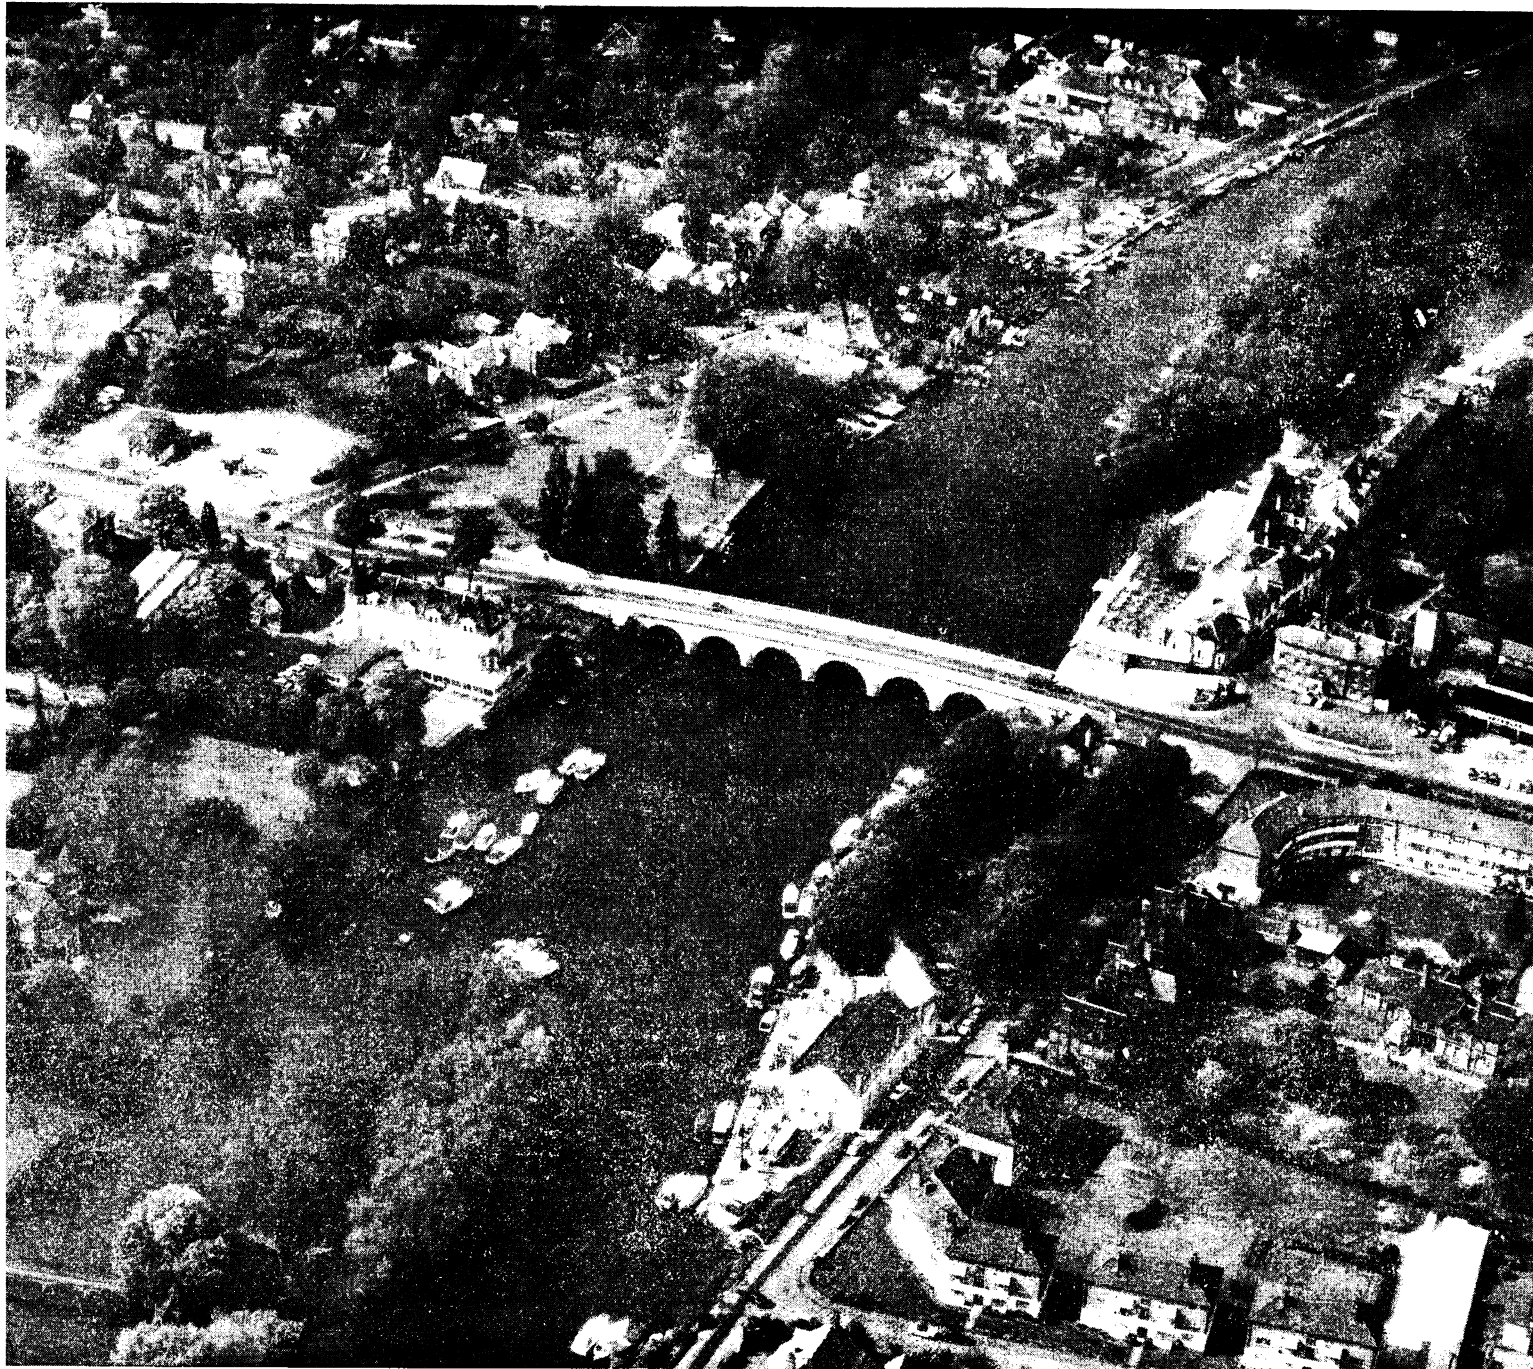

Distalgesic tablets each contain 32.5 mg. *dextropropoxyphene hydrochloride*, described as the most promising alternative to codeine, and 325 mg. *paracetamol*, generally regarded as the safest of the antipyretic analgesics.

## SYNTEX

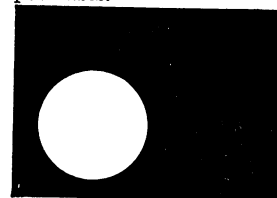

Over half of all the oral contraceptives consumed throughout the world contain Syntex-originated substances.

Syntex—an international pharmaceutical company just 22 years old—leads the world in research and development of steroids. Syntex have initiated many of the involved chemical syntheses on which up-to-date steroid manufacture depends. The Company has inspired products which currently account for nearly 50% of the oral contraceptives taken in Britain.

Syntex is a commercial corporation managed by men of outstanding scientific achievement. Its philosophy lays strong emphasis on research—Syntex spends a greater proportion of its sales revenue on research than any other pharmaceutical company.

Syntex is now established in the U.K. as Syntex Pharmaceuticals Limited. The Company's knowledge and expertise in the field of steroids is now to be made available at first hand to the British medical profession.

Fluocinolone acetonide (Synalar) a steroid originated and developed in the Syntex laboratories' is widely recognised for its effectiveness against hitherto resistant skin conditions, including psoriasis.

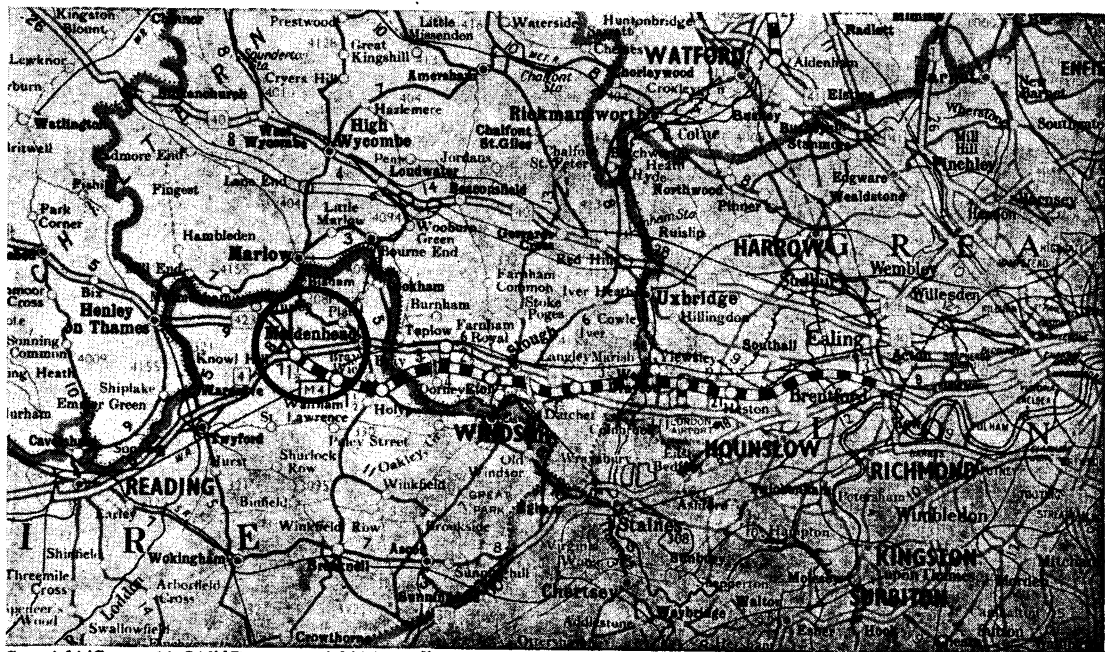

Three of the first five brands of oral contraceptives marketed in the United Kingdom were based on substances developed and produced by Syntex research.

“If the antiseptic is to be of any value at all it must not only kill organisms that are dry and probably embedded in films of some kind but it must act rapidly before it is removed by evaporation, gravity or washing”.  
 (“Efficiency of Antiseptics When Acting on Dried Organisms” BRIT. MED. J. 1963, i, 499)

**Dettol meets these two important provisions of  
rapidity of action and compatibility with soap**

1. Rapidity of Action. Dettol kills Staph. aureus including phage type 80, 81, and Ps. pyocyanea in less than 2½ minutes (vide BRIT. MED. J., 1963 i, 498)

2. Compatibility with Soap. 'Unlike the other antiseptics Dettol appeared to have its efficiency increased by the presence of soap, and against Staph. pyogenes the effect was one of true synergism.' — ("ANTISEPTICS IN MIDWIFERY" BRIT. MED. J., 1956, ii, 202)

Dettol is non-poisonous and is well-tolerated. Its efficiency is well maintained in the presence of organic materials and it is stable in solution.

# When the presence of slough delays healing...

## A CASE FOR ASERBINE

Clothing burns. Aserbine has been applied to the lower half of the right thigh. The upper half and the left thigh have been left as control areas. The slough on the treated area has softened and some de-sloughing has taken place. The softened slough is quite free from infection.

Eight days later. Both areas have been treated with Aserbine and the right thigh and the upper part of the left are completely de-sloughed. Rich, uninfected granulation tissue is present and, in this case, provides the ideal surface for grafting.

... in varicose ulcers, pressure sores, burns, trophic ulcers, etc.

... experience has shown that ASERBINE is a true de-sloughing agent which does not affect living tissue.

### Presentation

Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

## RESTORES EQUANIMITY

Benvil restores equanimity in acute and chronic anxiety states—so encouraging the patient to come to terms with life.

Benvil relaxes tension, calms agitation, and restores well-being in the moody, dejected patient. In clinical trials with this new compound, relief of symptoms was either complete, or more marked than with other psychotropic agents. Notable improvement occurred in cases where the results of previous medication were considered to be equivocal.

Published studies also report less sedation than with chlordiazepoxide, meprobamate, phenothiazines or barbiturates; in addition, reports suggest freedom from habituation or addiction. When prescribing Benvil, it is nevertheless advisable to follow the precautions normally applying to these compounds.

**Dosage:** One capsule three times a day and one at bed-time. (This may later be adjusted to 3-6 capsules per 24 hours.)

Available as blue/white capsules each containing 350mg. tybamate, in canisters of 50 and 250.

# In Gout and other hyperuricaemic conditions 'Zyloric' Allopurinol has a radically new mode of action

---

'Zyloric' lowers serum and urinary uric acid levels by inhibition of xanthine oxidase, an enzyme important in uric acid formation.

'Zyloric' prevents the deposition of urates in the tissues, relieves chronic joint pain, increases joint mobility and has the great advantage that it also inhibits urinary urate stone formation.

'Zyloric' is therefore indicated especially in gouty nephropathy, in patients who form urate stones, and in those with unusually severe disease.

## To minimise the danger of potassium depletion during long-term diuretic therapy...

... Glaxo have added a generous potassium supplement to the reliable bendrofluazide diuretic Neo-NaClex. The newer preparation, known as Neo-NaClex-K, is presented in a unique two-tier tablet. The tablet is designed to overcome the problems of gastric disturbance and possible small bowel ulceration which are sometimes associated with a potassium supplement. Shortly after the tablet is swallowed, bendrofluazide is released from one tier; the diuretic dose is therefore promptly available. Thereafter, the potassium supplement is released very slowly from the second tier; this will usually ensure that most of the potassium passes the stomach before dissolving and that no great local concentration of potassium is reached on its passage through the intestine.

### Neo-NaClex-K

When a potassium supplement is unnecessary, plain Neo-NaClex will provide smooth, sustained diuresis on one dose a day.

# PENBRITIN K.S.

Brings bacterial enteritis  
firmly under control

PENBRITIN K.S., a new product from Beecham Research Laboratories, combines all the advantages of broad spectrum antibiotic therapy with a soluble, well absorbed sulphonamide (sulphadimidine) that is effective against certain bacterial strains insensitive to ampicillin. This formulation, with Kaolin, provides a highly effective treatment that brings bacterial enteritis firmly under control by eliminating both the cause and symptoms of diarrhoea.

- The systemic action of Penbritin and sulphadimidine removes infection in the wall of the intestine – the most important site of infection.
- The unabsorbed Penbritin and sulphadimidine deal effectively with bacteria in the lumen of the gut.
- Kaolin adsorbs toxins, consolidates stools and exerts a demulcent action on inflamed mucosa.

PENBRITIN K.S. gives the broadest coverage against entero-pathogenic bacteria.

## The problem of the dirty mouth

Even in 1966 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

## For rheumatic disorders the solution is Solprin

When prolonged administration of aspirin is indicated, Solprin ensures a high degree of efficacy and safety.

Solprin, which provides aspirin in neutral soluble form, has all the analgesic and anti-inflammatory properties of aspirin but is more rapidly absorbed and better tolerated.

Solprin is especially valuable in the treatment of

rheumatic disorders where high dosage over long periods is necessary.

SOLPRIN tablets are stable for long periods and are presented in protective moisture-proof foil.

Basic N.H.S. price: 500 tablets 12/6.

## Psoriasis... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.<sup>2</sup> A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.<sup>2</sup> These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

**New Alphosyl lubricating cream.** A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipoid constituents of normal healthy skin. The vehicle also contains hydrophobic-lipophilic bipolar substances which

Oct. 9th.

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalene, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

**Formula:** Allantoin 2%+90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

**Bone Marrow Reactions****J. M. YOFFEY, D.Sc., M.D., F.R.C.S., Professor of Anatomy, University of Bristol**

This monograph discusses the quantitative data which the author and his collaborators have been collecting on bone marrow functions. The reaction of the bone marrow in the intact animal to a variety of experimental conditions has been studied, and many of the obvious gaps in earlier studies have been filled in.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1,2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3,4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

## ISO-BROVON TABLETS

Isoprenaline sulphate—15 mg.  
 e-N-methylephedrine hydrochloride ('Metheph')—36 mg.  
 Theophylline—130 mg.

Improved two-stage action provides  
**CONTINUOUS RELIEF** from bronchospasm  
for several hours

**Rapid Initial Bronchodilatation:** Isoprenaline in the special outer layer is released and absorbed promptly (within 1 minute).

**Immediate Sustained Bronchodilatation:** A NEW, soluble, lozenge-type core allows an IMMEDIATE start to release of the core ingredients (methylephedrine/theophylline) on swallowing. A steady, **even** release continues over 50-60 minutes, providing effective bronchodilatation for several hours.

**Minimum Side Effects:** The use of methylephedrine instead of ephedrine reduces risk of central nervous system stimulation and blood pressure increase. The tablet contains no sedative ingredients.

**UNIVERSITY OF EXETER  
Postgraduate Medical Institute**

A full-time postgraduate course lasting 10 weeks will begin on October 3, 1966. These courses are held three times a year starting in October, January and April. Each course includes instructions in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students receive teaching in each of the main clinical departments. Unpaid attachments can be arranged at the end of the course for students requiring a longer period of training.

It is sometimes possible to accept general practitioners for one or two weeks of a course, and attendance for this period is recognized under section 48 of the N.H.S. Act (1946).

Further particulars and application forms for these courses are obtainable from the Director, the Postgraduate Medical Institute, the University, Exeter, Devon.

## CLINICAL RESEARCH

We have a vacancy for a Medical Officer, to be based on our Clinical Research Department at Welwyn Garden City, Hertfordshire. Some travelling in this country will be necessary in connection with the duties of the post, which concern the initiation and supervision of clinical trials on the products of Roche research. We are looking for a man who has a good understanding of the pharmacological and biochemical basis of drug action and who would now like to apply his knowledge to the broader aspects of clinical research. A working knowledge of German and some understanding of statistical methods would be additional advantages.

A good starting salary will be negotiated, and is thereafter subject to annual review; there is an exceptional contributory pension scheme, and other conditions of service are also attractive.

Interested medical practitioners should write, in confidence, to the Staff Officer at:

15 MANCHESTER SQUARE LONDON W1

(H.7478)

CLINICAL  
RESEARCH

Due to expansion the Medical Department of Beecham Research Laboratories have two new vacancies for registered medical practitioners aged up to 40. Both men will be organizing human pharmacological studies and clinical trials. They should have wide clinical experience and a basic interest in physiology and pharmacology. A knowledge of statistical methods would be an advantage, but it is essential that the men appointed are of sufficient stature professionally and personally to converse knowledgeably with general practitioners, consultants and the staff of medical schools. One doctor will be mainly concerned with new products at home whilst the other's primary interest will be in products established at home which are to be launched overseas. For the latter post knowledge of at least one European language is essential.

Attractive salaries will be paid to the men appointed to both posts, and they carry exceptional fringe benefits including profit participation and non-contributory pension and life assurance schemes. Those interested should send full personal details to the

## DOCTORS

### ETHICAL PHARMACEUTICALS

One of the world's leading pharmaceutical organizations, well known and respected in professional circles for its contributions to pure and applied research, wishes to make two appointments.

**SWITZERLAND**

A British-trained male registered medical practitioner is required to join the company's Medical Research Department in Basle. The Department is responsible for the organization of clinical trials and screenings of the company's new drugs throughout the world, this appointment being principally concerned with the administration and correlation of trials with subsidiaries in English-speaking areas. This work will involve some travel outside Switzerland. Candidates, in their thirties or late twenties, should have had several years' sound experience in clinical medicine and an interest in therapeutics. A knowledge of German would be advantageous but facilities to learn this language exist within the company. The salary is progressive and pensionable; it will not be less than £3,500. Selected candidates will be invited to Basle before a final decision is required. (Ref. M14/2031/BM.)

**LONDON**

The new doctor will join an active department engaged in introducing interesting new compounds into this country. His work will entail maintaining close liaison with the parent company's research organization, the submission of data to recognized government bodies, the organization of clinical trials, and other professional activities associated with the company's business. Candidates should be British male registered medical practitioners, preferably aged 27 to 32, with clinical and pharmacological interests. Postgraduate experience in psychiatry would be an advantage, but is by no means essential. The salary is progressive and will not be less than £2,750. (Ref. M14/2032/BM.)

The identity of candidates will not be revealed to our client without prior permission. Applicants should forward brief details, quoting reference number to:

CITY OF KITWE  
Zambia

MEDICAL OFFICER OF HEALTH

Applications are invited from registered medical practitioners preferably holding a D.P.H., for the above post, which becomes vacant on June 30, 1966.

Duties include the full range of local authority public health services in a tropical area, together with responsibility for the Council's Community Development services.

The appointment in the case of an expatriate (non-Zambian) will be on a contract basis for a term of three years, renewable by mutual agreement and in accordance with Local Government Service Commission conditions. Terms applicable to applicants of Zambian origin may be obtained from the Medical Officer of Health, P.O. Box 70, Kitwe.

The salary scale (including special additional salary payable in the case of expatriates) is £3,700 rising by £75 to £4,400 per annum. In addition an inducement bonus is payable subject to the completion of two years service with the Council. This consists of 20% of total salary for the first year of service, 25% for the second year and 30% for the third year.

An officer on contract will be entitled to free passages from his place of recruitment for himself, his wife and wholly dependent children under the age of 19 years subject to a maximum of the equivalent of four economy class adult fares by air, tourist class by sea or first-class by rail. Return passages or passages to a new place of employment (whichever is the less) will be paid on the same basis on the termination of contract or termination of employment by the Council for any cause other than misconduct or upon termination of service with the Council in the event of the contract being renewed or extended. Housing with basic furniture will be available at a rental of £360 per annum. Leave entitlement is at the rate of 39 working days per annum and in each two-year period not less than one third of the leave earned in the period must be taken. Subject to this leave may be accumulated up to a maximum of 120 days. Accumulated leave to the maximum will be paid to the officer at the termination of his service with the Council.

Applications, giving full details of age, marital status, qualifications and experience, together with the names of two referees, and/or recent testimonials, must be airmailed to reach the Town Clerk on or before July 31, 1966. Applicants should state if they are related to any member or senior officer of the Council. Convulsions will disqualify.—C. J. Millward, Town Clerk, P.O. Box 70, Kitwe, Zambia. (H.7409)

ST. ANDREW'S HOSPITAL  
NORTHAMPTON

FOR NERVOUS AND MENTAL  
DISORDERS

President: The Earl Spencer

Medical Superintendent: James Harper, M.B., F.R.C.P.(Edin.), D.P.M.

This private hospital receives patients, both  
male and female, suffering from nervous and  
mental disorders, including alcoholism and  
senile illnesses. The fees range from eighteen  
guineas per week. Private rooms with special  
nurses can be provided, either in the hospital  
or in one of the villas in the grounds. The  
hospital is situated in 130 acres of pleasant  
grounds which provide all recreational facili-  
ties. These include a nine-hole golf course,  
sports ground, tennis courts, etc. A Recre-  
ation and Occupation Centre, known as  
Gloucester House, was opened in 1962,  
which comprises an occupational therapy de-  
partment, a swimming pool, a squash court,  
and a library with an adjoining reading  
room.

## WANTAGE HOUSE

This is a separate reception unit to which  
patients may be admitted. It is equipped  
for the complete investigation of nervous and  
mental disorders by the most modern  
methods. All forms of treatment are avail-  
able.

## MOULTON PARK

Some two miles from the main hospital is  
the farm of approximately 600 acres. Occu-  
pational therapy is a feature of this branch.

For terms and further particulars apply to  
the Medical Superintendent (Telephone No.:  
34354 Northampton), who can be seen in  
London by appointment.

## how much does **loneliness** weigh?

Loneliness is just one of the emotional stresses that may lead to compulsive overeating. In treating the obese patient, merely curbing the appetite is unlikely to provide a complete answer: the stresses must be countered and adequate compensation provided for the solace formerly derived from overeating. *Durophet-M* does just that. It contains not only laevo- and dextro-amphetamine (ratio 1:3) — probably the most effective appetite depressant available — but also methaqualone, a calmiative to counter the underlying emotional factors that motivate the compulsive overeater. In obesity, with its attendant hazards to health, these agents together provide more effective weight loss than do simple appetite depressants. Dosage is simple — just one capsule daily.

**Basic NHS prices:** Bottles of 30 capsules 12.5 mg. 7/4 — 20 mg. 8/- . Bottles of 300 capsules 12.5 mg. 49/8 — 20 mg. 54/-.
