# WOMEN AT RISK

'It is now widely recognized not only that urinary infection in childhood is a common and recurrent condition, but also that symptomatic improvement of the acute episode, whether spontaneous or after a short course of chemotherapy, may be followed by persistent asymptomatic infection.'

*Brit. med. J.* (1965), i, 1023

To reduce the risk of chronic renal disease in later life it is essential not merely to relieve the symptoms of urinary tract infection in children but to eradicate the infecting organisms. 'Furadantin' achieves this in the great majority of cases. It is available in a pleasant-tasting Suspension, specially for children.

## Why so many?

A range of this breadth comprising meat, fish and cheese dishes, vegetables, fruits and puddings, enables mothers to plan a balanced, healthy diet.

An infant once accustomed to the variety Heinz offers, and the gradation in texture from Strained Foods to chopped or minced Junior Foods, has the best possible chance of making an easy transition to adult diet when the time comes.

The maintenance of such a wide range is just one example of the care that Heinz devote to their baby foods. With the responsibility of feeding the great majority of Britain's babies, Heinz are painstaking and unremitting in ensuring their contribution to infant nutrition is of the highest standard.

For details of the nutritive value of Heinz Baby Foods, and a specimen copy of the booklet 'From Milk to Mixed Diet', please write to: Food Science Advisory Service, H. J. Heinz Co. Ltd., Hayes Park, Hayes, Middlesex.

## Galaton and Delexin

These two new Wander products give effective relief in the cough and bronchospasm common to many acute and chronic respiratory disorders.

**GALATON** combines a time-proved cough suppressant (codeine phosphate) with an effective bronchodilator (phenylpropanolamine). It relieves dry, unproductive cough and wheezing in many respiratory disorders—including acute bronchitis, chronic bronchitis and emphysema, bronchial asthma and pertussis. Galaton is particularly helpful in relieving the distressing night-time cough that disturbs sleep.

**DELEXIN** combines a powerful expectorant (guaiphenesin)—which liquefies tenacious, viscous sputum—with the bronchodilator and vasoconstrictor effects of phenylpropanolamine. Indications include acute tracheitis, acute bronchitis, chronic bronchitis and emphysema, and the respiratory complications of infectious diseases.

when all facts are considered the choice must be

# but what matters clinically is the reason why

Wide international usage is in itself striking testimony to the merits of Gynovlar 21. But more important are the clinical advantages which have earned such wide usage.

**First**, Gynovlar 21 provides four-fold security by ovulation control, protective changes in the endometrium and the cervical mucus and by the 21-tablet dosage scheme which virtually eliminates patient error.

**Secondly**, Gynovlar 21 is extremely well tolerated. Tolerance depends not only on the choice of progestogen, but especially on the type of dosage of oestrogen. Gynovlar 21 tablets contain 3 mg. norethisterone acetate—a progestogen used throughout the world in gynaecological medication and renowned

for its excellent tolerance—and 0.05 mg. ethinyl- $\alpha$ -estradiol B.P., which is the lowest dose to be employed for oral contraception. No other presentation contains less oestrogen, many contain more.

**Thirdly**, the substances used in Gynovlar 21 produce normal menstrual cycles, which have been described as being of 'almost clockwork precision'. Thus Gynovlar 21 is ideally suited to the 21-tablet dosage scheme, which this product pioneered and the advantages of which have, meanwhile, been generally recognized.

# brontisol\*

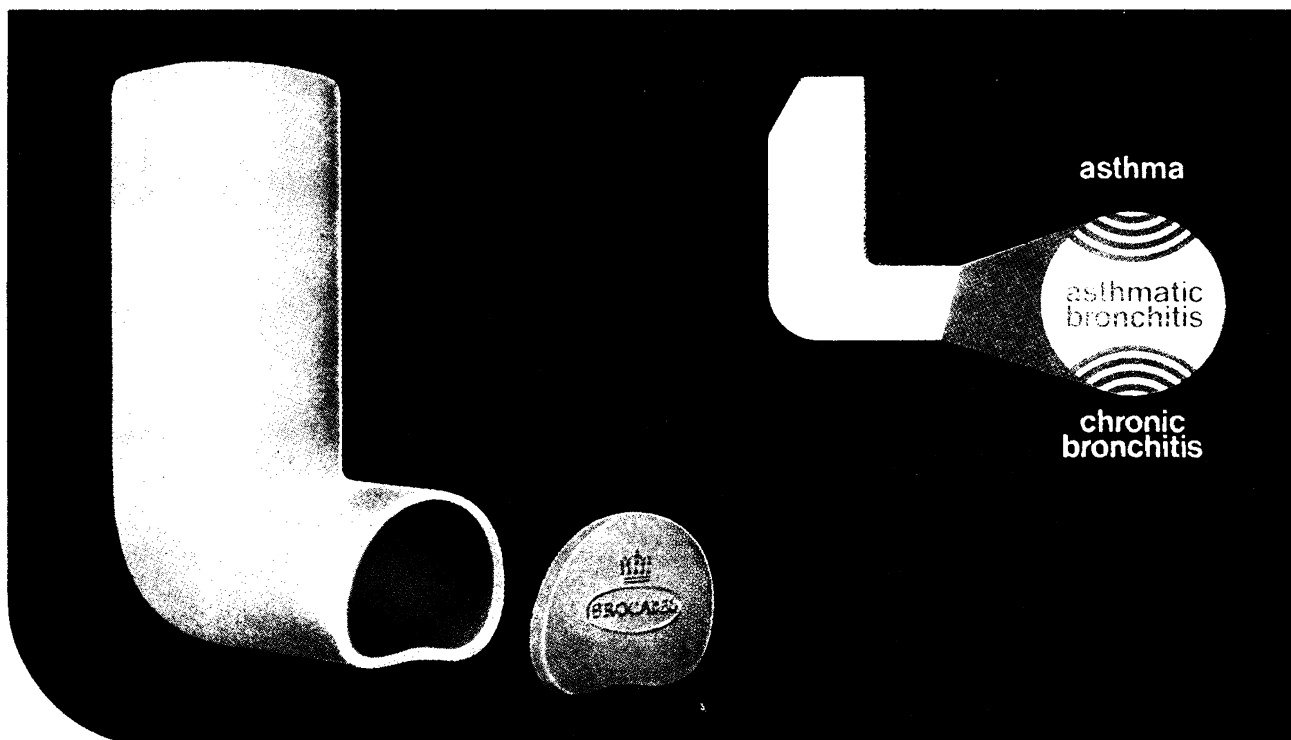

## night long relief

Brontisol is a metered dose aerosol in an inert propellant, combining  $\beta$  sympathomimetic, anticholinergic, antihistaminic and antiserotonin properties. The recommended adult dosage is 1-3 puffs every 4 to 5 hours as directed by the physician. Brontisol is a new concept in the treatment of generalised airways obstruction, since it not only produces marked bronchodilation, but also

controls hypersecretion and reduces swollen mucosa. Brontisol combines a rapid, pronounced action with a long duration of effect. Maximum effect is reached within 5-10 minutes and remains at this level for at least 4 hours. A significant therapeutic response can frequently be demonstrated for up to 6 hours. Brontisol can also block continuous spasmogenic effects for up to nine hours.

**A NEW ORAL MEDICATION****A SAFE AND EFFECTIVE TOPICAL PREPARATION  
WITH IMMEDIATE ANALGESIC PROPERTIES**

Bonjela provides an effective remedy for lesions of the mouth. Relief from pain and rapid healing are achieved in many out of ten cases of oral ulceration whatever the origin.

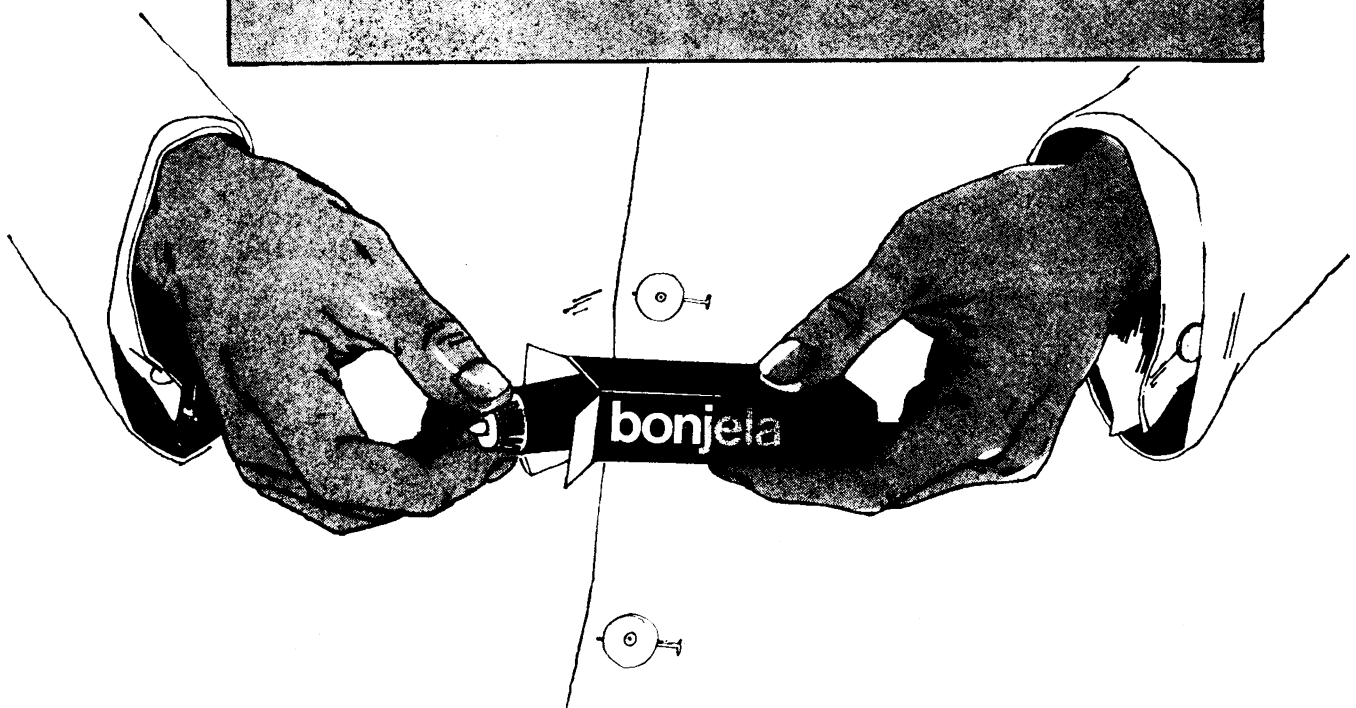

This high rate of response to Bonjela was revealed in American trials. Formal trials apart, an immediate clinical assessment may be made by applying Bonjela to any case of oral ulceration encountered. Pain or soreness is usually relieved within a few minutes owing to the analgesic properties of choline salicylate and the anaesthetising action of the alcoholic gum.

**FORMULA:** Choline salicylate 2.5% (w/w), Colloidal lanolin 0.5% (w/w), 95% Ethanol 9.5%, Glycerol 1.0%.

**INDICATIONS:** Are Herpes labialis, Stomatitis, Aphthae, Oral Ulcerations, Radiation Sore, Mouth Sores, Teaching, Discharge, Lesions of the Buccal Mucosa.

## How you can see the world

## and gain valuable medical experience

(before you settle into general practice)

Would you like to see the Far East, the Mediterranean, or the West Indies? Study the new sciences of aviation, underwater or nuclear medicine? Have complete clinical freedom, modern medical equipment and the opportunity to practise a very wide and varied field of medicine? Lead an active, exciting outdoor life against a world-wide backdrop?

These are some of the opportunities open to you as a Medical Officer in today's modern and expanding Royal Navy. During a 5-year Short Service Commission you can gain valuable, practical medical experience, treating both Royal Navy personnel and civilian families.

And you'll see something of the world – before you settle into the routine of general practice. You will be well paid, with a starting salary higher than that of a civilian hospital registrar. Marriage and other allowances can add considerably to your income. And, if you wish, you can apply for a Permanent Commission after 1 year's service. Later, you can study (with financial backing) for higher degrees, and you could aim for consultant status.

### 3 Ways of Entry

1. As a fully registered doctor; civilian experience counts towards your seniority.
2. During your pre-registration year.

3. As a student any time after passing 2nd M.B. For fully registered women doctors there is a special Short Service Commission.

If you would like more information, write to the address below, giving details of your age and qualifications. A personal interview can be arranged if desired.

Night coughing disturbs not only the cougher but also other members of the household. Each teaspoonful dose of *Pholtex* is effective for up to *ten hours*, long enough to ensure that sleep—for everyone—is undisturbed by troublesome cough.

The characteristic smooth and extended action of *Pholtex* results from ion-exchange release of the constituents—the cough depressant pholcodine and the antihistamine phenyltoloxamine. Because cough relief is prolonged, two or three doses daily are usually adequate and 2 fl. oz. can provide a week's treatment.

*Pholtex* is ideal for pædiatric use. It tastes pleasant and is easy to administer—even to infants.

Dosage: one teaspoonful (4 ml.) two or three times daily. (Children half to full adult dosage, according to age.) Each teaspoonful contains pholcodine 15 mg. and phenyltoloxamine 10 mg. as ion-exchange resin complexes.

## *Distalgesic erases pain*

Two tablets of Distalgesic taken three or four times daily bring prompt and lasting relief in pain of varying degrees. Distalgesic is effective for the aches and pains of arthritis and rheumatism where prolonged medication is necessary; in pain which recurs intermittently and in the acute pain of injury. In severe pain, Distalgesic can often delay the need for parenteral narcotics. It is non-narcotic, does not cause constipation, addiction or gastric bleeding.

Distalgesic tablets—specially shaped for ease of swallowing and identification—each contain 32.5 mg dextro-propoxyphene hydrochloride, authoritatively described as the most promising alternative to codeine, and 325 mg paracetamol, generally regarded as the safest of the antipyretic analgesics.

## BRONCHITIS-ASTHMA-EMPHYSEMA

Clinical evidence confirms that this new theophylline-niacinamide complex achieves rapid therapeutic blood levels for faster dilation of the bronchioles and substantial improvement in vital capacity in most cases of chronic bronchitis, asthma and emphysema.

### Significant Treatment Advantages:

The unique Anaphylline complex is a loose bonding of theophylline and niacinamide which affords a soluble theophylline through all pH ranges. No more ionization of theophylline salts with precipitation of the theophylline in the acid of the stomach. Now direct immediate absorption of the theophylline complex for faster, higher and longer blood levels.

#### \* MORE RAPID ABSORPTION FOR QUICKER PATIENT RESPONSE

Evidence from clinical trials indicates that Anaphylline achieves therapeutic blood levels faster than theophylline salts and within 15 minutes of oral administration.

#### \* MORE PROLONGED BLOOD LEVELS FOR SUSTAINED RELIEF

Rapid, initial blood levels achieved are followed by a steady, sustained rise reaching peak achievement at 60 minutes, with gradual, but uniform decline thereafter.

#### \* SUPERIOR PATIENT TOLERANCE

Achievement of these blood levels is not accompanied by any increase in the side-effects normally associated with theophylline treatment.

#### INDICATIONS

For use as a bronchodilator to control the symptoms of chronic bronchitis, chronic asthma, emphysema and other pulmonary disorders.

#### DOSAGE:

Adults 1 to 2 tablets to be taken 3 or 4 times daily, preferably after meals. (Children 6-12 yrs., half to 1 tablet.)

**the antibiotic  
that works for them...**

ERYTHROPED (erythromycin ethyl succinate 200 mg/5ml, Abbott) is a logical first choice for the treatment of common bacterial infections of children. Its potency against the cocci is considerably greater than that of the tetracyclines or chloramphenicol. But, this power is gentle power—potency tempered with a remarkable degree of safety.

ERYTHROPED is, in fact, the least toxic and the least allergenic antibiotic currently in common use. ERYTHROPED is effective over a wide clinical spectrum that covers most common bacterial infections of children met with in general practice. Not least important, ERYTHROPED is presented in a form that *will* be taken. Its pleasant cherry flavour makes it readily acceptable to children—even the very young.

**CHILD CARE*****Published 1 January, 1967***

This book is the second to be published from a series of articles that have appeared in the "Current Practice" section of the *British Medical Journal*. It gives practical up-to-date advice on problems faced by general practitioners. The articles that make up the book cover the period from infancy to adolescence, and in their scope cover child-care in the broadest sense, with sections on normal development, adoption, puberty, and behaviour disorders as well as the diagnosis and management of childhood diseases. The authors are consultant paediatricians or leading authorities in their fields, but the emphasis throughout has been on a practical approach. It is hoped that the book will be a useful guide for all family doctors.

# Triominic

Oral Nasal Decongestant **WANDER**

'Triominic' timed-release tablets and orange-flavoured syrup contain antihistamines and a decongestant in balanced proportions to ensure relief from nasal congestion for between 6 and 8 hours. The active constituents of 'Triominic'—the original *oral* decongestant—reach the nasal mucosa systemically. This obviates the rebound congestion which may follow the topical use of decongestants.

## Formula per timed-release tablet.

Phenylpropanolamine hydrochloride.....	50 mg.
Mepyramine maleate B.P.....	25 mg.
Pheniramine maleate.....	25 mg.

S.7

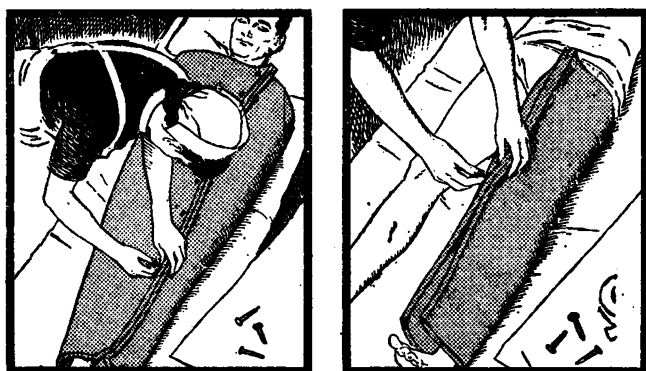

'Triominic' is also available  
as an orange-flavoured syrup.  
Basic N.H.S. prices: 50 tablets 5/9½;  
4 fl. oz. 2/2 (ex dispensing packs).

# New First-aid and transit dressing for Burns

--even unskilled helpers  
can apply it in seconds

The Roehampton burns dressing, made from Pritex polyurethane foam, reduces risk to the patient during the critical pre-hospital period. It also provides a logical preliminary to the modern exposure treatment. It is so simple and effective to apply that even unskilled helpers can attend to a casualty—quickly and safely. It can be applied in seconds without causing unnecessary pain and with a minimal risk of adherence. It provides good protection against trauma and reduces the risk of infection.

This Roehampton dressing can be removed **in seconds**. It will often save the patient having to be given large doses of drugs, or even a general anaesthetic.

**In the event of multiple casualties**, such as might be caused by large scale explosions or fires, the Roehampton burns dressing has many advantages. ☐ It makes a light, compact package that is easy to transport. ☐ No special care is needed to keep it in perfect condition. ☐ It remains sterile until the package is broken open. ☐ **In all circumstances, it gives the patient the best possible means of protection from further damage while on the way to hospital.**

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria<sup>1,2</sup> and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms; succeeded by rapid gain in weight<sup>3,4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

**Clinical Research Fellowships**

offered by the  
**Medical Research Council**

for the  
**Academic Year  
1967-68**

MEDICAL AND DENTAL GRADUATES desiring to prepare themselves for a career in clinical research are invited to apply for a limited number of CLINICAL RESEARCH FELLOWSHIPS available for the academic year 1967-68. Preference will be given to candidates who have worked for a period in a department in which clinical research is in progress.

It is intended that each Fellow to whom an award is made should be given an opportunity, as part of his training for clinical research, to study methods of research in the basic subject most relevant to his particular clinical interest, and to broaden his experience by working in departments other than his parent department either at the same centre or elsewhere. In appropriate cases, arrangements can be made for Fellows to work in the Council's own research establishments, including the National Institute for Medical Research.

**SPONSOR**

Applications must be made in each case on behalf of the candidate by the head of the department sponsoring the candidate on the understanding that the head of the department will take all possible steps to ensure that a suitable academic post in a clinical department in the same University Medical or Dental School will be available to the candidate on satisfactory completion of the period of study under the Fellowship.

**TENURE**

The Fellowships are made for one year in the first instance and will be renewable annually up to a maximum of three years in all, subject to satisfactory progress.

**STIPEND**

The taxable stipend will be within the range of £1370 to £1940 per annum, the point of entry being determined according to age, qualifications and experience.

**SUPERANNUATION**

Superannuation will be provided.

**LOCATION**

The Fellowships are only tenable at centres in the United Kingdom.

**ELIGIBILITY**

Candidates must be

- ☐ British subjects who are normally resident in the United Kingdom.
- ☐ Medical or dental graduates who are clinically experienced.

**APPLICATION**

If you are interested in the above Fellowships please write to Miss Y. L. Vollmer for further particulars and an application form quoting reference CRF/A. Telephone enquiries may be made to MUSEum 5422, Ext. 107. Completed forms should be returned no later than 1st March, 1967.

# GENERAL MEDICAL OFFICER/ ANAESTHETIST

£3,760 p.a.

Mufulira Copper Mines, situated on the Zambian Copperbelt, maintain two modern, well-equipped hospitals, total 460 beds, with excellent laboratory, x-ray, operating and other facilities. There is a team of 10 medical officers and a further medical officer is now required to carry out duties of a general nature, including attending expatriate employees and their dependants on a basis of hospital out-patient consultations and domiciliary visits. He will also be expected to share calls for emergency anaesthetics in addition to acting for the anaesthetist during periods of absence.

Applications are invited from suitable qualified candidates who have had experience in hospital or in general practice and a good grounding and experience in the use of modern anaesthetics.

Employment will be on a contract basis, initially for a period of one, two or three years. Starting salary will be dependent on qualifications and experience, but, including bonus and gratuity, will not be less than £3,760 per annum.

Paid leave will accrue at the rate of 55 days per annum.

The Company operates a generous life assurance scheme and education and travelling allowances are paid for children receiving secondary education outside Zambia. A car is provided for professional use.

Fares to Mufulira will be provided for the successful applicant, his wife and children. Similar return passages will be provided on completion of the contract.

Single or married accommodation is immediately available at sub-economical rental. Basic furniture, including electric cooker and refrigerator may be rented from the Company for a nominal sum.

At 400 ft. above sea-level, the Copperbelt enjoys a pleasant climate with sunshine all the year round. Excellent facilities exist for practically all sports and leisure activities including television.

Application forms may be obtained from:

Pain . . . spasm . . . both striking at once . . . with unfortunate effects on your patients.

Now, with Robaxial-Forte in your armoury you have a two-pronged therapeutic weapon which combats and conquers pain and spasm simultaneously. Robaxial-Forte combines the dependable skeletal muscle relaxant, Methocarbamol with the pain-relieving benefits of acetylsalicylic acid in one convenient dosage form. When administered together these compounds have a potentiating effect upon one another. Higher plasma salicylate levels are attained than with the same dosage of acetylsalicylic acid alone.

## A·H·ROBINS

A. H. Robins Co. Ltd., Horsham, Sussex.

In chronic bronchitis **PENBRITIN** helps him put up a better fight

By swiftly reducing both the quantity and purulence of the sputum, routine dosage Penbritin brings a rapid clinical response in the majority of patients: moreover clinical trials have shown these benefits to be more marked than those observed in patients on tetracycline therapy. The success of this regimen (250mg. four times daily for one week or more) can be attributed to Penbritin's higher activity against the causative organisms, *H. influenzae* and pneumococci.

In addition, severely disabled patients, including those with extensive bronchiectasis and cases whose sputum is winter-long purulent despite other antibiotic therapy, may gain unprecedented relief from a short course of high dosage Penbritin. In published trials on this regimen (1 gram four times daily for one week or more) infection was cleared in the majority of patients, and subsequent freedom from exacerbation for up to 16 weeks was reported.

**THE WHYALLA HOSPITAL INC.  
Whyalla, South Australia****MEDICAL SUPERINTENDENT**

The board of management invite applications from medical practitioners, registrable locally, who have experience in medical administration for this post.

The hospital of 230 beds, recently rebuilt, is of the latest design. The staff includes a Physician and a Surgeon of Consultant status. It serves a young industrial population of 22,000, rapidly expanding.

The township has a full range of social amenities, including education up to university entrance.

The Medical Superintendent will be directly responsible to the board for the professional departments within the hospital in co-operation with the Secretary and Matron. In addition, he may be required to serve on the duty roster for the casualty department, which would enable him to take part in the clinical work of the hospital.

The salary would be \$7,000 to \$8,000 per annum, according to experience, with no right to private practice. Conditions of service are based on those applying in similar Government hospitals for leave (four weeks annually), long service leave, superannuation, etc.

Plans are in hand for the erection of a suitable residence in the hospital grounds, for which a reasonable rental would be charged.

Applicants for this post should supply details of age, marital status, qualifications and professional experience, and names of two referees, addressed to the Acting Medical Superintendent, Whyalla Hospital Inc., P.O. Box 267, Whyalla, South Australia, who would be pleased to answer any queries. (H.3950)
