Certain things are *basic* . . . The books, for instance. You may not take them down every day, but you *know* them. Sound, fundamental.

You know Aspellin, too. A really effective, economical treatment for rheumatic conditions and muscular trauma—a spirit-based liniment containing Acid Acetylsalicylic to relieve symptomatic pain *rapidly*, and Methyl Salicylate, with Menthol and Camphor, to reduce inflammation and muscle tension.

Rheumatism sufferers can only obtain Aspellin if you prescribe it. Aspellin is *only* obtainable on prescription. Cost: 10½d per oz.

ASPELLIN—indicated in the treatment of acute rheumatic conditions, sciatica, lumbago, fibrositis, muscular trauma.

This book is intended to be a guide for young surgeons and practitioners and not a catalogue of all published work. The experimental work on pancreatitis relating to the human situation has been emphasized. An entirely clinical approach to the classification of the disease has led to new success in the treatment of various forms of pancreatitis. The book will prove of considerable value to surgeons, practitioners, gastroenterologists and physicians.

today's most advanced conception regulator,
satisfies these demanding criteria:

Reliability

More than four thousand women have completed more than 40,000 valid treatment cycles without a single pregnancy.¹ A valid treatment cycle is one in which intercourse takes place, NORINYL-1 is used as directed and no other contraceptive is employed.

Safety

The very low steroid content of NORINYL-1 is accompanied by the disappearance of some dose-dependent effects.² Bromsulphthalein excretion rates in women taking NORINYL-1 could not be distinguished from those in an untreated control group.³

Simplicity

The tiny tablet is easy to swallow, the pack convenient to use and the 21 day routine virtually eliminates patient error.⁴

Tolerance

In 40,000 cycles the incidence of *headache, depression* and *breast symptoms* did not differ in any cycle, **even the first**, from that in the untreated control group. **After the second cycle**, the reported incidence of *nausea* approached pre-treatment control levels. Among *dysmenorrhoea* cases 89.5% had no further symptoms after starting NORINYL-1. *Pre-menstrual tension* was totally relieved in 79.3% of cases.¹

Each tablet contains 1mg. of norethisterone (an original Syntex discovery) and 0.05mg. of mestranol. Packed in wallets of 21 tablets.

A NEW ORAL MEDICATION

A SAFE AND EFFECTIVE TOPICAL PREPARATION
WITH IMMEDIATE ANALGESIC PROPERTIES

Bonjela provides an effective remedy for lesions of the mouth. Relief from pain and rapid healing are achieved in nine out of ten cases of oral ulceration whatever the origin.

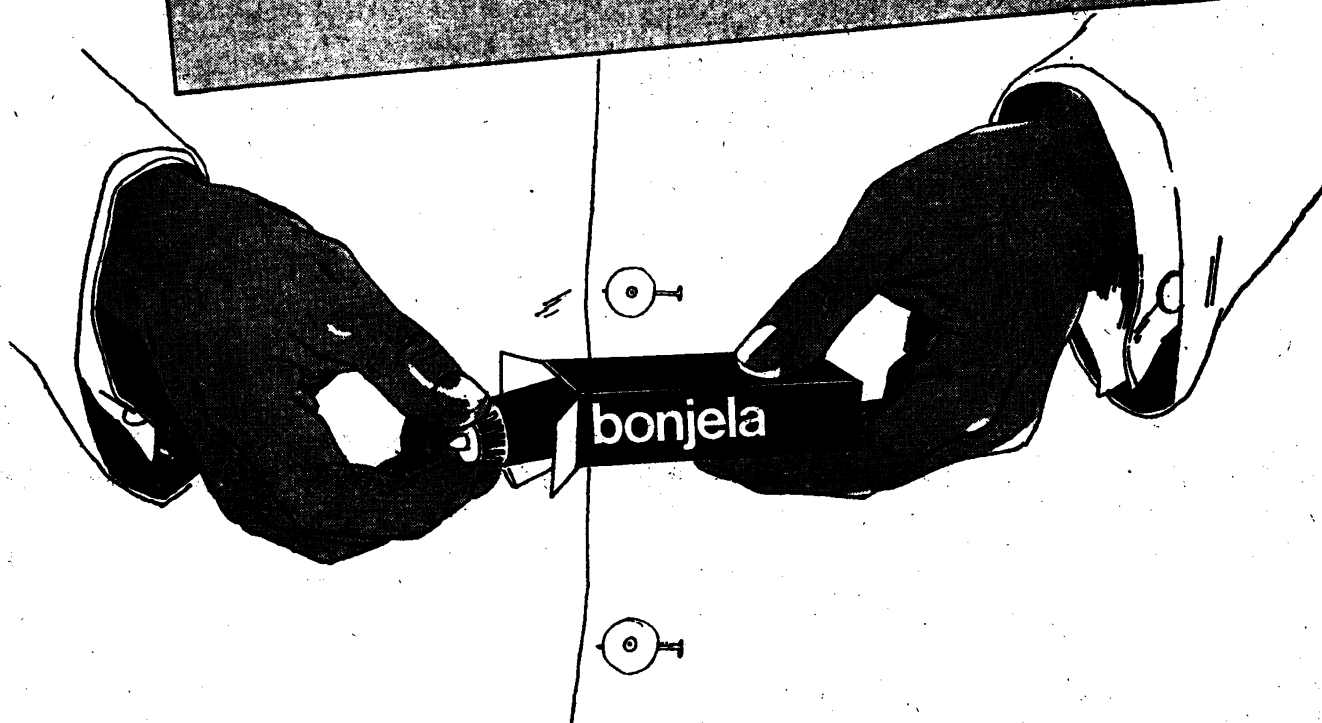

This high rate of response to Bonjela was revealed in American trials. Formal trials apart, an immediate clinical assessment may be made by applying Bonjela to any case of oral ulceration encountered. Pain or tenderness is usually relieved within a few minutes owing to the analgesic properties of choline salicylate and the anaesthetizing action of the alcoholic gel.

FORMULA: Choline Salicylate 8.7%, Cetylaluminum Chloride 0.01%, Alc. (96%) 88.0%, Menthol 0.067%, Glycer 4.0%.

INDICATIONS are Herpes Labialis, Gingivitis, Gleetitis, Oral Ulcerations, Cheilosis, Denture Sores, Infant Teething Disorders, Lesions of the Nasal Mucosa.

PRESENTATION: Bonjela is available in 10 g. tubes at basic N.H.S. cost of 2.83d. per tube.

TALKING OF HOLIDAYS

Holidays are a favourite subject of conversation at this time of the year—the reason possibly being that the pleasure of anticipation is so often better than the realization. Everybody at some time or another has experienced weather that was too wet, too hot, or too cold, or has suffered the disappointments of poor hotels, car breakdowns, and health troubles.

Still there is always plenty to look forward to on the bright side. The bulb fields of Holland, for instance—nothing could be brighter than a tour round these spectacular multi-coloured acres of tulips. There are many mini-tours organized in this country that take only four to six days and make a very welcome break. Another colourful tour is visiting orchards in Kent, Worcestershire, or further westwards.

Undoubtedly holidays are greatly enhanced by, and remembered by, colour—and there is such a variety: the purple heather in Scotland and on Dartmoor and Exmoor; the gay sunshades on the beaches at Costa Brava, St Tropez, or Rimini; the awnings on the verandas of continental hotels and houses, the brightly painted shutters in France, the flower markets in Belgium; sunsets in the Swiss mountains; the stained glass windows of Ely Cathedral, St. Peters (Rome) and the many churches, old and new, in Jerusalem or Bethlehem; the boulevards in Paris with the pavement cafes; white sails on blue lakes or seas; the list of colour associations is limitless.

However, reminiscing is not constructive and as the holiday season is approaching so quickly more definite action is required. Many tours and cruises already have their full complement and hotels in the more popular resorts or areas have reported heavy bookings. It is therefore not advisable to wait too much longer before coming to a decision.

Case history

23 JAN. 1967

Mrs. C. P., aged 20 years, presented with established impetigo of face and early lesions on neck and shoulders. Fucidin Ointment was prescribed, for application 3 times daily.

**25 JAN. 1967**

Infection was well controlled after two days' treatment. Irritation had ceased and there was no fresh eruption.

**30 JAN. 1967**

Five days later infection had been eliminated and healing was almost complete without disfigurement. *No further infection was reported in the succeeding seven days.*

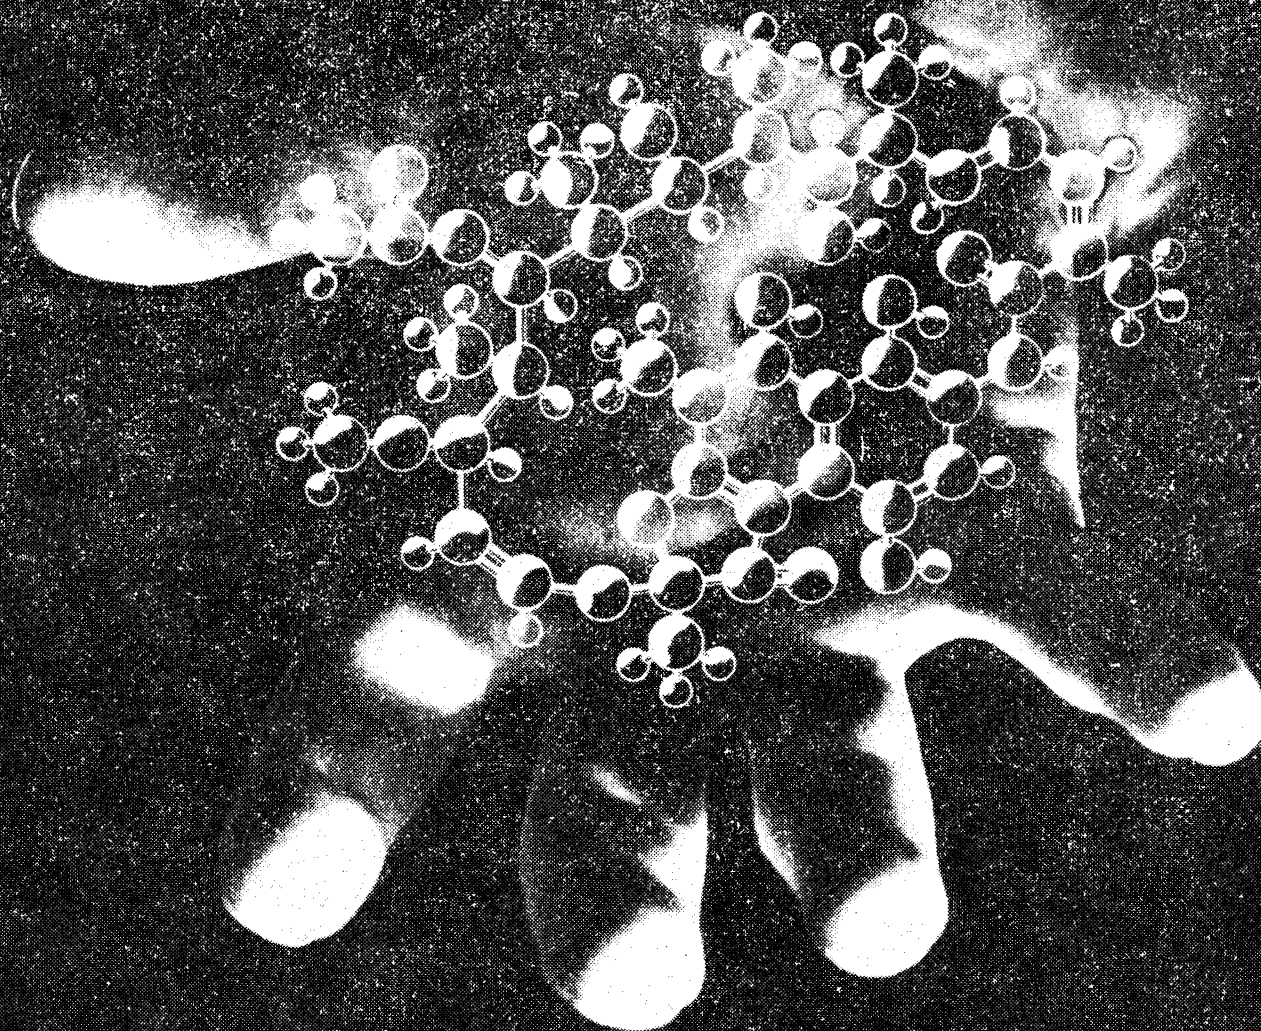

This patient, typical of the many who present with cutaneous infections, was seen and treated by a family doctor under whose direction the photographs were taken. *Staphylococcus aureus* is by far the most common pathogen in conditions such as boils, paronychia, impetigo, folliculitis, hidradenitis axillaris, and in secondary infection of traumatic, post-operative or other skin lesions. The marked anti-staphylococcal activity of Fucidin—confirmed in over five years of systemic as well as topical use—makes Fucidin Ointment both rapidly effective and specific in the treatment of skin infections. Fucidin Ointment, containing sodium fusidate B.P. 2% in a neutral base, is available in tubes of 10 G. and 25 G.

BROXIL

**would be my choice
in routine penicillin therapy**

BECAUSE of its Excellent Clinical Results

There are over 400 published references to Broxil in world literature. These confirm its success in infections such as tonsillitis, pharyngitis, otitis media, boils and carbuncles, which in an overwhelming proportion of cases are caused by Gram-positive organisms (staphylococci, streptococci and pneumococci).

BECAUSE of its Specific Activity

Broxil is highly bactericidal to the majority of these organisms, destroying them without disrupting the normal intestinal flora.

BECAUSE of its High Blood Levels

Broxil gives blood levels double those achieved by penicillin V and at least as high as intramuscular injections of penicillin G.

BECAUSE in its syrup form, it is particularly suitable for children

Broxil is readily accepted and tolerated by children, and side effects are minimal.

Availability: 125 and 250 mg. tablets and capsules. 60 ml. syrup (125 mg./5 ml.)

Dosage: Children : 62.5–125 mg. every 4–6 hours. Adults : 125–250 mg. every 4–6 hours.
Prophylactic Dose: Adults : 125 mg. twice daily. Children : 62.5–125 mg. twice daily.

GLYMAXIL **instant buffer antacid**

Regd.

Hyperacidity and peptic ulcer:

AN OUTSTANDINGLY DIFFERENT AND MORE EFFECTIVE TREATMENT

Just two things interest the chronic sufferer. He wants the pain to go, and stay gone. And if both results can be achieved with an antacid that tastes pleasant and is needed in lesser quantity than he's used to, he's going to be very grateful indeed.

Glymaxil, the only soluble buffer antacid, can promise exactly this. In clinical practice Glymaxil has been shown 'significantly more effective' in relieving pain and 'significantly more palatable' than aluminium hydroxide. Glymaxil, the first antacid chelate, acts faster and buffers more acid for longer periods in the ideal pH range 3-5 than other commonly used antacids.

A very agreeable treatment

By suppressing pain promptly Glymaxil gives the patient a sense of reassurance, itself highly beneficial. Taken in small doses (1-2 teaspoonfuls) and tasting pleasantly of peppermint, it is also a most agreeable and convenient liquid antacid—one that will make his symptoms a great deal easier to live with.

Dosage One or two teaspoonfuls as required. Not more than 120ml. (one bottle) of Glymaxil should be consumed in any 24 hour period.

Presentation Bottles of 120ml. containing 40% w/v sodium glucaldrate.

spasm

Pain . . . spasm . . . both striking at once . . . with unfortunate effects on your patients.

Now, with Robaxisal-Forte in your armoury you have a two-pronged therapeutic weapon which combats and conquers pain and spasm simultaneously. Robaxisal-Forte combines the dependable skeletal muscle relaxant, Methocarbamol with the pain-relieving benefits of acetylsalicylic acid in one convenient dosage form. When administered together these compounds have a potentiating effect upon one another. Higher plasma salicylate levels are attained than with the same dosage of acetylsalicylic acid alone.

The Military Fork shown here was extensively used by sappers and miners during the 17th, 18th and 19th centuries. Over 8ft. long it evolved, like many infantry weapons from agricultural instruments—in this case the pitch fork.

Indications: Effective in treating sprains and strains, painful back disorders, lumbago, arthritis, etc.

Yesterday was when Dr. Carr took time off to accompany his eleven-year-old son David to his first boarding school. It was also the day when Dr. Carr had a celebration drink with his bank manager. Because, from now on, David's going to be far less of a financial burden. There'll be plenty of money for his school fees, his books, even his clothing. And enough left over to start him on a career or send him to university.

Dr. Carr asked to see one of our representatives a few days after the boy was born. And, acting upon our advice, he took out an Educational Policy to cover the most expensive years in his son's future. He invested a modest sum annually but, with accumulated profits, it will ensure David a first-class schooling for the next eight years.

This is just one example of the many policies we have designed specially for doctors and dentists. And since the Society is wholly owned by the policy holders all the profits belong to them and are distributed by bonus declaration every three years.

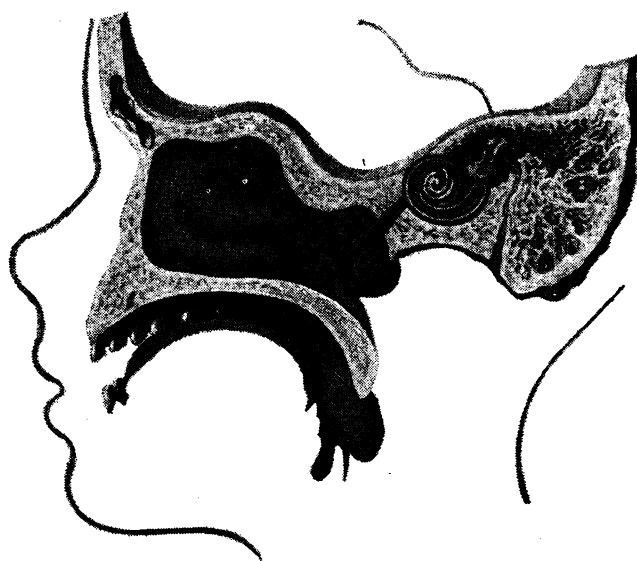

If you are eligible to join the Society you should be sharing these profits. So why not write to us now without any obligation, of course, for further details? There are separate brochures for Sickness and Accident; Educational; Life; Personal Pension; Family Income; Provision for Estate Duty; Car Hire Purchase. A card giving your name, address, date of birth and quoting Reference No. 001 and listing the policies that interest you, will receive prompt attention.

...Medihaler-iso Forte gives relief in seconds

Fast profound relief of bronchospasm is within reach of the patient with *Medihaler-iso Forte*—in bronchitis as in asthma. Two recent reports have confirmed its exceptional speed and degree of relief. In one trial¹, *Medihaler-iso Forte* gave faster and greater relief than the two other pocket aerosols with which it was compared: at 3 to 5 minutes after inhalation *Medihaler-iso Forte* produced an average improvement in peak expiratory flow rate of 47 per cent, 18 per cent higher than the next best preparation. In the second trial² it was the fastest-acting of six pocket aerosols. In

yet another trial³ a single inhalation from *Medihaler-iso Forte* had greater effect than 5 mg. of isoprenaline inhaled over three minutes from an oxygen-powered nebuliser.

These reports confirm that fast profound relief of bronchospasm is within reach of the patient with *Medihaler-iso Forte*. In the acute attack it is a most effective and convenient treatment. For the less severe case, relief can often be obtained from the smaller dose delivered by *Medihaler-iso*.

THE ENEMY

Upper respiratory tract infection, henceforth known
as U.R.T.I.

COUNTER-AGENT

Penicillin is still the best means of counter-action.
The best agent is Distaquaine V-K potassium penicillin V.

THE CODE NAME IS DQV-K

Active against most U.R.T.I. and other infections
encountered in General Practice.

Memorise this and when attacked by U.R.T.I. quickly
write DQV-K on E.C.10. You'll be counter-attacking
with the highest quality oral penicillin.

The fruit-flavoured syrup contains 125mg potassium
penicillin V per 5ml at a basic NHS cost of 4s. 4d.
for a 60ml bottle whilst the tablets of 250mg have
a basic NHS cost of 6s. 8d. for 25 (ex 500 pack).

Also available are tablets of 125mg and a ready-prepared
suspension containing 125mg per 5ml.

Codis

when pain is severe

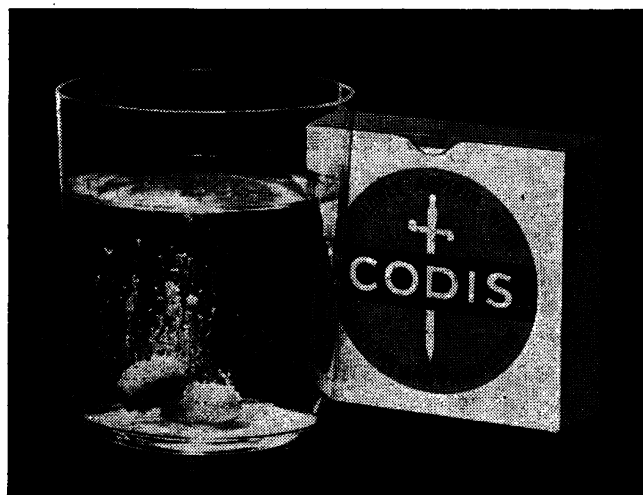

Codis tablets provide soluble aspirin together with codeine and phenacetin. Absorption is rapid and there is less likelihood of gastric irritation during prolonged periods of administration.

In addition to the rapid analgesic and anti-inflammatory action of soluble aspirin and phenacetin, the codeine component exerts a gentle sedative effect often helpful in those cases of mild insomnia associated with pain.

Codis tablets are pleasant to take and, being administered in water, are particularly suitable for invalids and the elderly.

Codis tablets are stable over long periods of time and are presented in protective moisture-proof foil.

Basic N.H.S. price: 500 tablets 25/-.

RECKITT & SONS LIMITED, PHARMACEUTICAL DEPARTMENT, HULL, YORKSHIRE

PAYNOCIL is strongly analgesic, anti-pyretic and anti-rheumatic in both short and long term treatment.

Paynocil is double-strength aspirin—10 grains per tablet—in a lemon-flavoured glycine base.

The glycine disperses the tablet instantly on the tongue, and distributes the aspirin rapidly into the stomach in minutely fine particles—minimising the risk of gastric irritation.

Paynocil tablets are sealed in protective metal foil.

JUNIOR PAYNOCIL for children, a quarter-strength tablet of the same formula, is available in similar foil strips.

PAYNOCIL^{REGD.} THE MOST EXPEDIENT ASPIRIN THERAPY FOR PAIN, FEBRILE AND RHEUMATIC CONDITIONS

The frenzied fight for breath through obstructed airways, the telephone call in the night requesting immediate treatment—such emergency situations are reduced when you prescribe Tedral SA (sustained action) tablets. One tablet twice a day helps to prevent bronchospasm, and increases vital capacity. Your patients are freed from worry about exacerbations and the simple dosage reduces the risk of missed medication.

Tedral SA

Pregfol
just one-capsule-
per-day dosage

By prescribing one PREGFOL* capsule a day for all your ante-natal patients you guard them against the risk of development of anaemia. Because only one capsule has to be taken daily the possibility of doses being missed or forgotten is minimised. PREGFOL contains iron and folic acid in the recommended, physiologically correct, amounts¹. Available in bottles of 100.

WOMEN AT RISK

'Urinary infections are common in elderly patients, but often these infections present with different symptoms, follow a different course, and have a different prognosis than in the younger age group. The aim of therapy is to eradicate bacteriuria and prevent bacteremia as well as late sequelae of urinary infections.'

Geriatrics (1955), 20, 613

Urinary tract infections inadequately treated with simple symptomatic remedies may smoulder subclinically, with progressive renal scarring and risk of uraemia and death. Eradication of infecting organisms is therefore essential in the treatment of every urinary tract infection, however apparently mild.

CHILD CARE

Published 1 January, 1967

This book is the second to be published from a series of articles that have appeared in the "Current Practice" section of the *British Medical Journal*. It gives practical up-to-date advice on problems faced by general practitioners. The articles that make up the book cover the period from infancy to adolescence, and in their scope cover child-care in the broadest sense, with sections on normal development, adoption, puberty, and behaviour disorders as well as the diagnosis and management of childhood diseases. The authors are consultant paediatricians or leading authorities in their fields, but the emphasis throughout has been on a practical approach. It is hoped that the book will be a useful guide for all family doctors.

M.S.?

No need, obviously, to acquaint you with the facts of Multiple Sclerosis, also known as Disseminated Sclerosis, or that over 40,000 people in Gt. Britain suffer from the disease. You'll doubtless know, too, about the work done by The Multiple Sclerosis Society of Gt. Britain and Northern Ireland, not the least part of which is to encourage a greater awareness on the part of the general public to the nature of the disease. In this respect, the co-operation of the medical profession is urgently needed. If you have a patient who is suffering from M.S., and you decide that it is in his best interests to acquaint him of this fact, the Society would be grateful if you would let him know of the work it is doing, and how, through its welfare services, it can help him, too.

In chronic bronchitis **PENBRITIN** helps him put up a better fight

By swiftly reducing both the quantity and purulence of the sputum, routine dosage Penbritin brings a rapid clinical response in the majority of patients: moreover clinical trials have shown these benefits to be more marked than those observed in patients on tetracycline therapy. The success of this regimen (250mg. four times daily for one week or more) can be attributed to Penbritin's higher activity against the causative organisms, *H. influenzae* and pneumococci.

In addition, severely disabled patients, including those with extensive bronchiectasis and cases whose sputum is winter-long purulent despite other antibiotic therapy, may gain unprecedented relief from a short course of high dosage Penbritin. In published trials on this regimen (1 gram four times daily for one week or more) infection was cleared in the majority of patients, and subsequent freedom from exacerbation for up to 16 weeks was reported.

**If she rejects
support stockings
because
they're
too thick-
recommmend
Supp-hose®
(they're *sheer*)**

Only her face will show that she's wearing Supp-hose. Many women reject support stockings because they think that such a stocking is thick and unattractive. Consequently they are prepared to sacrifice their health for the sake of their appearance. But this is where Elbeo Supp-hose stockings have a tremendous advantage; they look scarcely any different from everyone else's nylon stockings. They are made in fashionable colours—seamed or seamfree. They are sheer, unbelievably sheer for the strong support they give. Yet they give as much relief as the thicker type of support stocking and are entirely acceptable from a medical point of view.

Medically beneficial. Made in nylon yarn, specially coiled, twisted and fixed before the stockings are knitted, Supp-hose

stockings provide adequate compressive elastic support which is maintained over months of wear and washing. This makes them suitable for venous states of the lower extremities causing oedema and requiring elastic support. Supp-hose stockings will relieve, significantly, the symptoms associated with varicose veins, the post-phlebitic phenomenon or chronic venous insufficiency. Supp-hose can also be recommended to patients suffering from the condition termed 'tired legs', particularly during pregnancy.

Thousands of women are wearing Supp-hose stockings. Each year we receive dozens of enthusiastic testimonials. A report on clinical trials—and information about sizing—will gladly be sent on request. Write to Dept BM6, Elbeo House, Woodborough Road, Nottingham.

ADMINISTRATIVE**TRAINING POSTS IN MEDICAL****ADMINISTRATION**

Three training posts in whole-time medical administration in the Scottish Hospital Service are offered in 1967 for registered medical practitioners. Medical administration is concerned with the use and development of medical skills and resources, and the work ranges from medical management of these resources at hospital level, to the planning and management of regional services and association with the provision for medical teaching. A career in this field offers the opportunity of using epidemiological methods in studying medical needs, of carrying out operational research into the workings of health services, and of applying the findings in improving the effectiveness of health services.

A three-year training programme has been planned. One year will be spent attending a full-time university course leading to a postgraduate diploma and two years in supervised practical training. Commencing salary ranging from £2,105 (at age 29) to £2,335 (at age 33 or over); annual increments thereafter. University fees will also be met and other allowances in respect of travelling and subsistence are payable.

A memorandum of information and an application form may be obtained from the Secretary, Administrative Medical Staff Training Committee, Woodburn House, Canaan Lane, Edinburgh 10. The closing date for receipt of applications, on the prescribed form, is March 28, 1967. (H.4430)

GOVERNMENTAL**SCOTLAND****PRINCIPAL MEDICAL OFFICER**

(£4825)

Research & Development in Medicine

As a senior member of the Scottish Home and Health Department in Edinburgh, he will advise (a) on all developments in medical science, including those in related clinical and scientific research, and (b) on developments in medical education generally, but particularly with relation to present and future education activities within the N.H.S. He will also act as Secretary to the Secretary of State's Advisory Committee on Medical Research.

This post demands a registered medical practitioner with broad experience in one or more of these fields—organization of medical research, academic work at a senior level, and organization of medical education.

Salary: £4,825; non-contributory pension.

Fuller details of this appointment may be obtained, without obligation, by writing (quoting 6603/AM) to the Scottish Home and Health Department, St. Andrew's House, Edinburgh 1. Closing date for completed applications, March 14, 1967. (13443)

ST. VINCENT'S HOSPITAL
Sydney

Department of Radiotherapy

1. **PROFESSOR OF RADIOGRAPHY**
2. **STAFF SPECIALIST RADIOTHERAPIST**

This department has a full range of equipment including a rotating head cobalt unit (Theratron 60) and plans are in hand for extensions to include more powerful equipment.

The present bed accommodation of St. Vincent's Hospital, a university teaching hospital, is 475 beds and it is expected that this will be increased to 600 beds in the foreseeable future. Extensions to St. Vincent's Private Hospital are envisaged and these will make increased demands on the facilities of the radiotherapy department.

The number of new patients attending the department this current year will exceed 1,500.

Joint tumour clinics with the departments of medicine, surgery, and special departments are held within the radiotherapy department. The Director will be required to possess senior qualifications in therapeutic radiology and/or senior medical or surgical qualifications and to have had considerable postgraduate experience. The Staff Specialist will be required to have completed training in radiotherapy.

Salary range is \$8,000 to \$11,000 per annum according to years of experience. In addition an administrative allowance of \$700 per annum will be paid to the Director. Applications, setting out details of training and experience, and nominating three referees, should be forwarded before March 31, 1967 to Dr. M. P. Cleary, General Medical Superintendent, St. Vincent's Hospital, Sydney, N.S.W., Australia. (H.4563)
