

# Announcing a new advanced bactericidal antibiotic

**Versapen**\*  
(hetacillin, Bristol)  
the first penicinate

a broad band of continuous activity

## The first penicinate

After world-wide evaluation, Bristol Laboratories introduces a new chemical entity—the first penicinate—advanced bactericidal broad-spectrum antibiotic.

For the first time, the basic 6-aminopenicillanic acid has been substituted in such a way as to produce a new chemical entity—the first penicinate. In such a drug, the amino nitrogen of 6-APA has been incorporated into a ring structure. Hetacillin is called a penicinate whether in the form of a salt such as the potassium salt or in the form of its free acid. More precisely, a penicinate is a 6-(5-oxo-1-imidazolidinyl) penicillanate.

Initially, Versapen was proved in the laboratory to possess bactericidal activity against a wide range of Gram-positive and Gram-negative organisms while the potential for toxicity remained very low. Now, in the hands of practising physicians, Versapen has been shown to be effective in patients with a wide variety of common infections. The low incidence of side-effects favours Versapen over many other broad-spectrum antibiotics.

## Versapen is clinically outstanding: 93.4% cured or improved

Among more than 1500 patients with infections caused by beta-haemolytic streptococci, the frequently resistant enterococci, *Escherichia coli*, *Diplococcus pneumoniae*, *Proteus mirabilis*, *Haemophilus influenzae* plus many other Gram-

positive and Gram-negative organisms, clinical results of oral Versapen therapy were excellent. Because of the wide range of bacteria involved, these results indicate that Versapen will be useful in almost all types of general and hospital practice.

## Broad-spectrum and bactericidal

The range of antibacterial activity of Versapen is comparable to broad-spectrum antibiotics, including chloramphenicol and the tetracyclines. But, unlike these essentially bacteriostatic agents, Versapen is bactericidal. Common bacterial invaders are eradicated not just inhibited.

## Well tolerated and rarely causes side-effects

Haematopoietic and hepatic investigations reveal that Versapen is safe: no significant reactions have been reported. Note: Hetacillin shares with the penicillins a potential for producing allergic reactions.

## Extended blood levels

Antibacterial serum levels of Versapen are unusually prolonged. After a 250 mg. dose, bactericidal blood concentrations are preserved up to 6 hours and levels are detectable up to 8 hours. The patient benefits from *constant bactericidal action*. Usual adult dosage is 1 or 2 capsules four times per day.

Versapen is best given before or between meals. Availability: 250 mg. capsules, bottles of 20, 100 and 500.

With the introduction of HAVAPEN\* (penamecillin) Wyeth research in Britain has now made t.d.s. penicillin therapy a reality. HAVAPEN is resistant to inactivation by gastric acid and just one tablet every eight hours ensures reliably effective blood levels of penicillin G—still the most effective antibiotic against the majority of infections you see in General Practice. Thus HAVAPEN ensures real overnight protection for your patients and minimises the risks of missed or forgotten doses. Each HAVAPEN tablet contains 350 mg. penamecillin equivalent to 510,000 units penicillin G. In bottles of 100.

## the antibiotic that works for them . . .

ERYTHROPED (erythromycin ethyl succinate 200 mg/5ml, Abbott) is a logical first choice for the treatment of common bacterial infections of children. Its potency against the cocci is considerably greater than that of the tetracyclines or chloramphenicol. But, this power is gentle power—potency tempered with a remarkable degree of safety.

ERYTHROPED is, in fact, the least toxic and the least allergenic antibiotic currently in common use. ERYTHROPED is effective over a wide clinical spectrum that covers most common bacterial infections of children met with in general practice. Not least important, ERYTHROPED is presented in a form that *will* be taken. Its pleasant cherry flavour makes it readily acceptable to children—even the very young.

## . . . in the pack that works for you

**One 60 ml bottle provides a full five-day course of treatment—twenty-four 100 mg doses. In addition, attention is drawn on the bottle label to the need to complete the full course of treatment, so that the potential of ERYTHROPED may be fully realised.**

## a case for 'Stelazine'

Hypochondriasis as a response to loneliness

**The following case narrative is one of a series prepared by a consultant psychiatrist, based on actual patient records.**

This is the case of a 38 year-old woman, the youngest of four children, and the one who found herself left behind to look after her parents. Her brother and two sisters left home as soon as they were old enough to break away from a childhood of domestic drudgery imposed by the mother.

There is little doubt that the youngest daughter would have liked to follow suit, but by the time she left school the others had all gone, and father needed a lot of care and attention with his arthritis. The girl might have appreciated a little care, too, but no one thought of that—least of all her mother.

As the years passed, her personal life continued to be frustrated by the demands of duty. There had been a boy she liked but her mother, quickly alert to the threat, soon convinced her daughter that the affair was not quite right. So it ended.

Then there had been the job in the sweet-shop. She gave that up after a fortnight of domestic crises, tears, and reproachful looks. It had not been much of a job, but it had meant a great deal to her.

At 36, the pattern of spinsterhood and household drudgery now apparently irreversible, she first visited her doctor complaining of severe low back pain. Treatment didn't seem to help, and eventually he referred her to hospital for examination. Which started her on the road to chronic hypochondriasis.

Within a year, she was going to the ENT clinic with tinnitus, to the physician with paroxysmal tachycardia and faintness, to the neurologist with atypical migraine, and to the gynaecologist with amenorrhoea. And, of course, to the orthopaedic department for manipulation of the back. The difficulty was that, although they all thought she was largely functional, there was always *something* really wrong. She did have an old perforated drum, a fast pulse, sharp waves in the right parietal

region, a hypoplastic uterus, and OA of mild degree around lumbar 4-5. But never quite enough to justify the symptoms she described.

As she told the psychiatrist later, it was so nice having people really care about her for the first time in her life. And the addiction-effect of waiting room conviviality, the only opportunity she had of a friendly chat with ordinary people, proved irresistible. She's still coming in regularly to evening surgery. 'Stelazine' has helped her. But with sensible psychotherapy, it might have helped a great deal more a couple of years ago.

F. P. ANTIA

This book, the outcome of the author's wide experience of teaching clinical nutrition and dietetics in Britain, America and in India is divided into four parts. Part I discusses the principles of nutrition and the essential elements of an adequate diet; Part II gives an account of the common food-stuffs. In Part III these principles are applied to the dietetic problems associated with the management of a number of medical and surgical conditions, and many sample menus for both mixed and vegetarian foods are given. Part IV consists of tables of food values and nutritional requirements.

The variations in the methods of diagnosis are discussed in relation to the different ethnic groups and to the hospital versus 'private' groups.

Part 2 deals with cancer morbidity in infants and continues with a detailed report on the impact of cancer in specific sites; wherever possible these findings have been compared with similar investigations in the United States and in Scandinavia.

Writings concerned with the genetics of neurological disorders are to be found in a wide variety of languages published over many years. The need to collect and synthesize this scattered material has become more urgent by the recent expansion of knowledge in human genetics. In this volume an attempt has been made to serve the clinician by supplying a concise and critical assessment of the present evidence concerning the genetics of particular disorders, and the research worker by providing a bibliography of nearly 3,000 entries.

No single person has experience of more than a small number of cases of sinus thrombosis, so that any attempt at a comprehensive account of the clinical and pathological effects necessitates recourse to the literature which is large and spread over a century and a half. This book gives the most comprehensive review yet published of the development of knowledge of the manifestations of this dangerous complication. Clinical and pathological aspects are discussed and full reports given of the authors' own series of thirty-two cases. Final chapters deal with diagnosis, prognosis and treatment.

Whilst of particular interest to neurosurgeons and neurologists this book will also be of value to general physicians and surgeons, and to psychiatrists.

*Edited and illustrated by M. H. KING*

This book is largely the outcome of a conference assisted by the World Health Organization and the United Nations International Children's Emergency Fund on 'Health Centres and Hospitals in Africa'. Suitable for all developing countries, it is a practical handbook on 'the medicine of poverty'. The topics covered include the organization of health services, health education, administration and teaching, hospital architecture, treatment of the most common tropical diseases, paediatrics, family planning, maternity care, teaching and teaching aids, and supporting services. Appendixes contain valuable information on laboratory chemicals and reagents, drug dosage in children, and a list of suppliers of medical equipment.

The wider application of histology and its changing methods have called for a radical change in the method of presentation; the present authors have carried out a very extensive revision of the late Harry Carleton's text and have rewritten most of it. The basic aim, however, remains the same—to give, in compact form, the chief methods employed in microscopic examination of human and other mammalian tissues. The policy has been to give established and proven methods in detail together with references to other techniques, additional details of which are given in bibliographies at the end of each chapter. New chapters or sections have been included on fungi, virus inclusions, autoradiography, exfoliative cytology, and museum techniques.

### Malaria in Tanzania

D. F. CLYDE

Tanzania is fortunate in possessing scientifically valuable records dating from as early as 1890. The fund of information that has accumulated is recorded in this book and compared with the results of many recent surveys. Of special interest at the present time are descriptions of the spread under natural conditions of drug-resistant parasites among semi-immune inhabitants of Tanzania, and of the difficulties, both technical and administrative, that are delaying the development in East Africa of the type of malaria eradication campaign that is proving successful elsewhere.

## How you can see the world

## and gain valuable medical experience

(before you settle into general practice)

Would you like to see the Far East, the Mediterranean, or the West Indies? Study the new sciences of aviation, underwater or nuclear medicine? Have complete clinical freedom, modern medical equipment and the opportunity to practise a very wide and varied field of medicine? Lead an active, exciting outdoor life against a world-wide backcloth? These are some of the opportunities open to you as a Medical Officer in today's modern and expanding Royal Navy. During a 5-year Short Service Commission you can gain valuable, practical medical experience, treating both Royal Navy personnel and civilian families.

And you'll see something of the world – before you settle into the routine of general practice. You will be well paid, with a starting salary higher than that of a civilian hospital registrar. Marriage and other allowances can add considerably to your income. And, if you wish, you can apply for a Permanent Commission after 1 year's service. Later, you can study (with financial backing) for higher degrees, and you could aim for consultant status.

### 3 Ways of Entry

1. As a fully registered doctor; civilian experience counts towards your seniority.
2. During your pre-registration year.

3. As a student any time after passing 2nd M.B. For fully registered women doctors there is a special Short Service Commission.

If you would like more information, write to the address below, giving details of your age and qualifications. A personal interview can be arranged if desired.

The simple idea of an extra tablet put Gynovlar 21 ahead of the field in oral contraceptive administration. Now the 21-tablet dosage scheme is becoming standard practice as a method of virtually eliminating patient error in oral contraception.

## GYNOVLAR 21 PROVIDES:

**First**, four-fold security by ovulation control, by protective changes in the endometrium and cervical mucus and also by the 21-tablet dosage scheme which virtually eliminates patient error.

**Secondly**, Gynovlar 21 is extremely well tolerated. Tolerance depends not only on the choice of progestogen, but especially on the type of dosage of oestrogen. Gynovlar 21 tablets contain 3 mg. norethisterone acetate – a progestogen used throughout the world in gynaecological medication and renowned for its

excellent tolerance – and 0.05 mg. ethinylœstradiol B.P., which is the lowest dose to be employed for oral contraception. No other presentation contains less oestrogen, many contain more.

**Thirdly**, the substances used in Gynovlar 21 produce normal menstrual cycles, which have been described as being of 'almost clockwork precision'. Thus Gynovlar 21 is ideally suited to the 21-tablet dosage scheme, which this product pioneered and the advantages of which have, meanwhile, been generally recognized.

### A New Look at Medicine and Politics

*J. Enoch Powell, M.B.E., M.A., M.P.*

Since medicine has become inextricably involved with politics, and the organisation of medical services sometimes seems to have assumed more importance than the quality of those services, a new look at medicine and politics is badly needed. Few people can be better equipped to supply this new look than an ex-Minister of Health.

Since the N.H.S., the hospital doctor is a state employee and the general practitioner a contractor to the state. Such a change in the setting of medicine is fraught with profound consequences which are still only gradually being explored and understood. These consequences are widely misunderstood, by profession and public alike, as being accidental or transitory or easily remedied. The strains and stresses, the inadequacies and dissatisfactions, which the profession and the public experience, are implicit, the author argues, in the nature of a free, comprehensive national health service itself.

### Radiographic Atlas of the Genitourinary System

*C. Ney, M.D., and R. M. Friedenberg, M.D.*

This atlas, designed for clinicians by clinicians, is a complete reference guide to radiographic diagnosis. It is organised in a logical and practical manner, with over 2,300 carefully selected X-rays showing the normal and pathologic states of the kidneys, ureters, bladder, adrenal glands, the prostate and the urethra. A good deal of the text refers specifically to the female patient and such topics as stress incontinence and the influence of gynaecologic diseases on the urinary tract.

# **PRODEXIN<sup>regd.</sup>** **keeps acid level at placid level**

Prodexin puts acidity firmly in its place—right in the middle of the safe zone of pH 3-5. And keeps it there. Prodexin tablets give continuous and prolonged relief from pain caused by hyperacidity, dyspepsia and peptic ulcer.

Prodexin contains aluminium glycinate, a fast acting buffer antacid. Left to disperse slowly in the mouth, the tablet releases a steady trickle of antacid into the stomach: it simulates an intragastric drip in a simple and most convenient way.

Prodexin tablets are conveniently small. They can be carried about and taken wherever and whenever necessary. This is particularly useful to the ambulant patient.

**Dosage:** One or more tablets an hour when necessary. For continuous therapeutic effect, the tablet should be sucked slowly or left to disperse in the mouth. For rapid relief of pain, the tablet may be chewed and then swallowed.

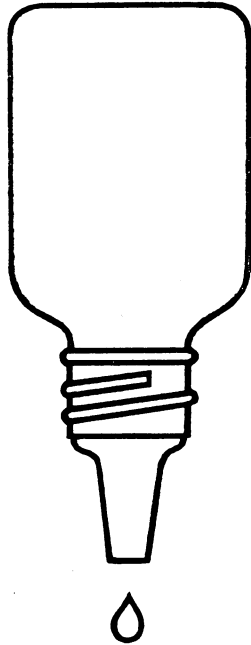

**Content:** aluminium glycinate 900mg., light magnesium carbonate 100mg.

## Psoriasis ... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.<sup>2</sup> A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.<sup>2</sup> These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

**New Alphosyl lubricating cream.** A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipoid constituents of normal healthy skin. The vehicle also contains hydrophylic-lipophilic bipolar substances which

Oct. 9th.

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalane, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

**Formula:** Allantoin 2%+90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

# Protection against Allergy

# Alavac

## for 1967 is available now

Alavac is the name for the Bencard range of adsorbed desensitising vaccines. Alavac provides a simple, effective and safe treatment for most common allergies. For many patients this treatment can be started now.

**Simple** A course of Alavac needs only 7-9 injections based on the clinical severity of symptoms. The three-vial Alavac treatment set includes sterile disposable syringes with attached needles, plus full instructions for administration.

**Effective** Over 80% of patients have been shown to respond well to the adsorbed type of desensitising vaccine. For these patients such therapy can bring long-lasting benefit and halt the deterioration that might otherwise occur with continued use of mere symptomatic treatment.

**Safe** Alavac is carefully formulated so that once injected, the allergens are released slowly ensuring a gradual and safe dispersal in the body. Consequently, effective doses are attainable in even the most sensitive patient.

### How to prescribe Alavac

There are three varieties of Alavac:

**Alavac-S** is individually formulated to the patient's particular allergic condition, and can be prepared from any one or more of a wide selection of allergen extracts.\* Specialists will appreciate that the allergens used correspond exactly with those available in Bencard testing solutions.

**Alavac-P** is a stock grass pollen vaccine for classical hay fever and pollen asthma. It is best administered pre-seasonally, starting in mid-March at the latest.

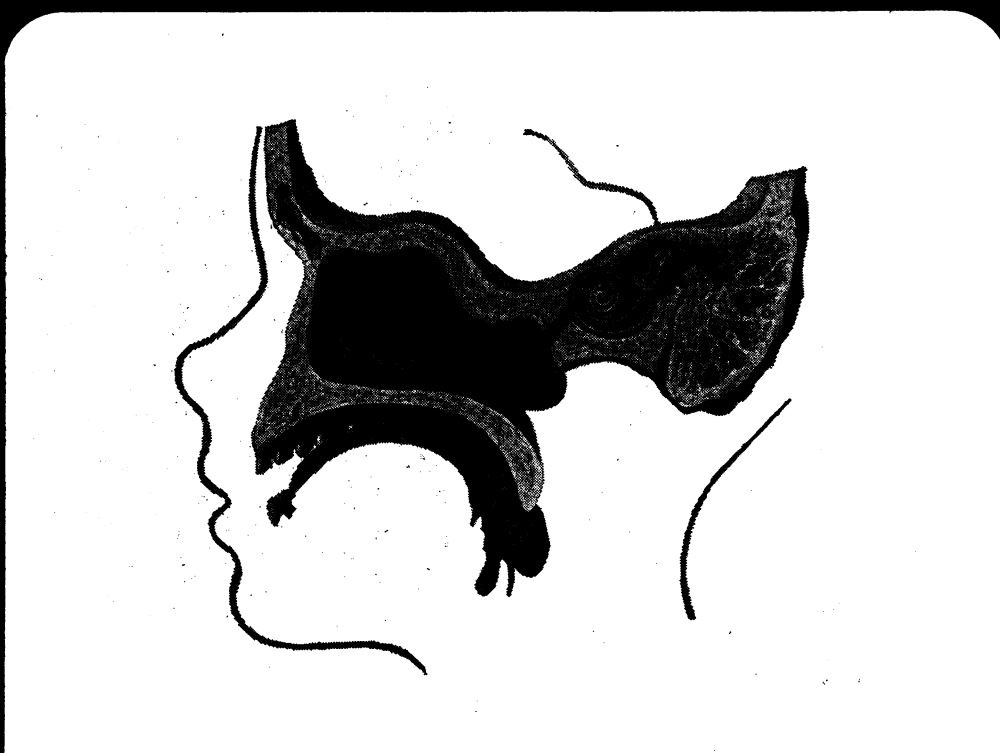

**Alavac-D** is a stock house dust vaccine for non-seasonal asthma and perennial rhinitis. It may be given at any time of the year.

### A NEW ORAL MEDICATION

A SAFE AND EFFECTIVE TOPICAL PREPARATION  
WITH IMMEDIATE ANALGESIC PROPERTIES

Bonjela provides an effective remedy for lesions of the mouth. Relief from pain and rapid healing are achieved in nine out of ten cases of oral ulceration whatever the origin.

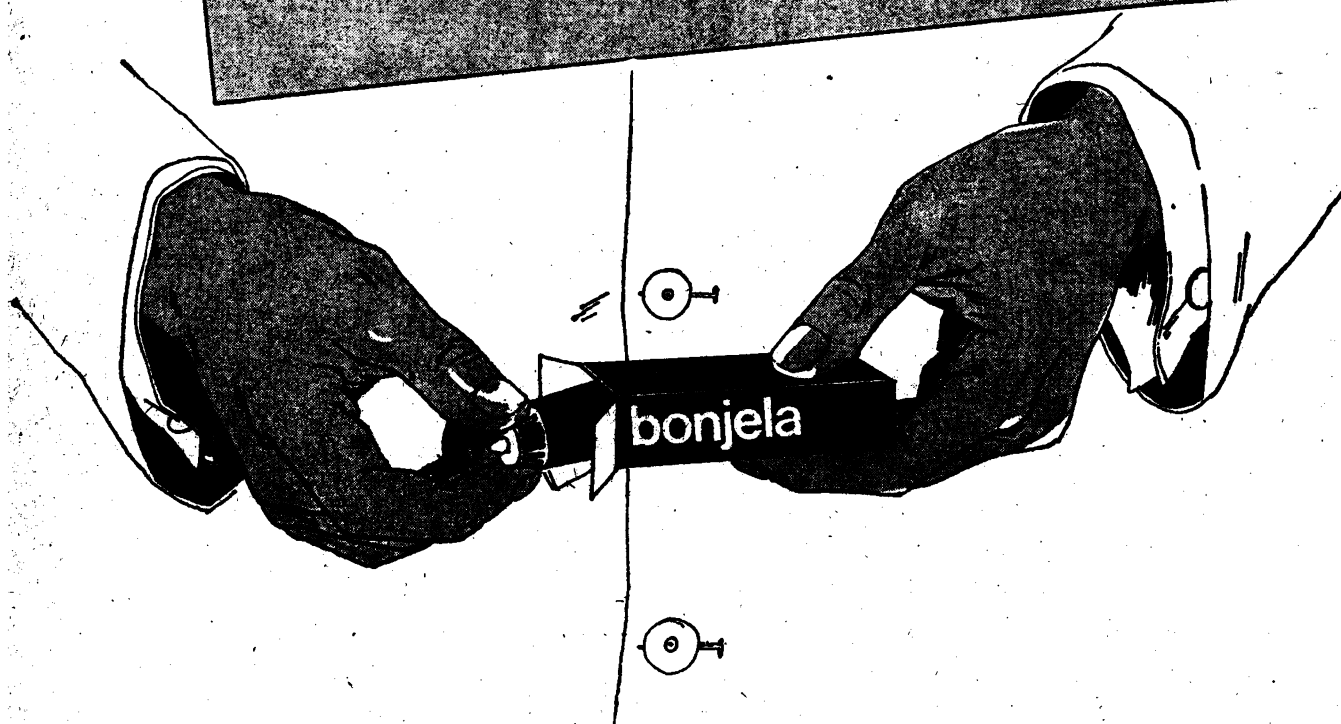

This high rate of response to Bonjela was revealed in American trials. Formal trials apart, an immediate clinical assessment may be made by applying Bonjela to any case of oral ulceration encountered. Pain or tenderness is usually relieved within a few minutes owing to the analgesic properties of choline salicylate and the anaesthetizing action of the alcoholic gel.

FORMULA: Choline Salicylate 8.7%, Cetalkonium Chloride 0.01%, Alc. (95%) 39.0%, Menthol 0.057%, Glycer 4.6%.

INDICATIONS are Herpes Labialis, Gingivitis, Glossitis, Oral Ulcerations, Cheilosis, Denture Sores, Infant Teething Disorders, Lesions of the Nasal Mucosa.

PRESENTATION: Bonjela is available in 10 g. tubes at a basic N.M.S. cost of 2/8½d. per tube.

# A doctor's life with a difference can be found in the ROYAL ARMY MEDICAL CORPS

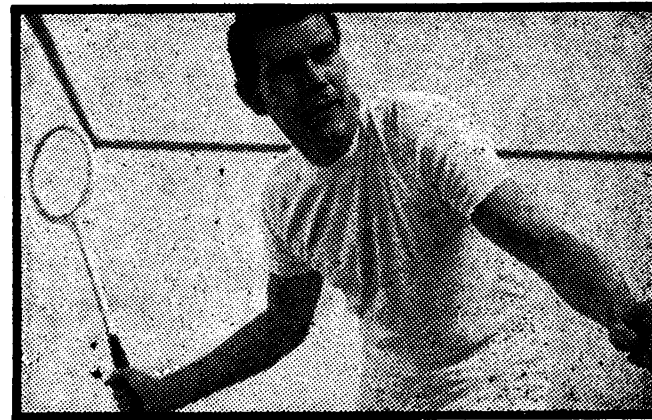

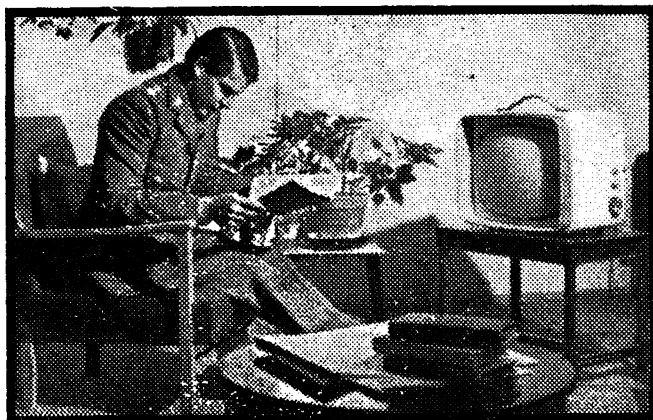

Excellent opportunities are provided for general practice under good conditions of service. The professional opportunities are very wide and varied and include caring for the wives and children of soldiers.

All aspects of medical care—preventive medicine, general and hospital practice are closely integrated. Surgeries are organised by groups and groups are supported by hospitals so that Medical Officers are able to follow up those of their patients admitted to

hospital. These modern surgeries have every facility. Good equipment, trained staff, and a locum provided for six weeks' annual leave. Post-graduate training is given.

For the married man it matters greatly how his wife feels about the Service. The community spirit of Army life, especially overseas, embraces an Officer's family as much as himself. Such extra emoluments as Marriage Allowance, Education Allowance, Disturbance

Allowance, and Local Overseas Allowance, show the importance attached by the Army to helping the Officer with a family. Most married Medical Officers get a furnished house at low rental.

Pay for a married Captain (the rank on entry) is over £2000. There are increases every two years and on promotion. Promotion to Major can normally be expected after 5 years and to Lieut-Colonel after 13 years (or shorter, where an antedate is given for experience in

hospitals and general practice). Commissions granted may be permanent or Short Service. A Short Service commission earns a tax-free gratuity of £3000 for 5 years' service, £1500 for 3 years. Regular commissions are pensionable on the normal basis.

For further information please write or pay a visit to: Colonel A. D. Young, D.S.O., M.B., Ministry of Defence (AMD2), Dept. 475, Lansdowne House, Berkeley Square, London, W.1.

**UNIVERSITY AND  
RESEARCH  
APPOINTMENTS**

(see also under "Overseas")

**INSTITUTE OF CHILD HEALTH**  
The Hospital for Sick Children,  
Great Ormond Street, London W.C.1

Applications are invited for the post of **LECTURER IN HAEMATOLOGY**. The post involves a share in the routine clinical laboratory work of the department, and also provides opportunity for research. Salary within the University scale £1,580 to £2,535. (A revised scale of £1,754 to £2,820 will be implemented retrospectively later.) Further particulars may be obtained from the head of the department, Dr. R. M. Hardy. Applications, giving particulars of qualifications and experience, and naming two referees, should be sent not later than March 20, 1967, to the Secretary, Institute of Child Health, 30 Guilford Street, London W.C.1 (13778)

**INSTITUTE OF EXPERIMENTAL  
PSYCHOLOGY**  
Oxford

**RESEARCH OFFICER** Applications are invited for a Research Officer (non-medical) to join a new unit concerned with the study of learning processes in epileptic children. The unit, which will comprise seven workers of various grades, is to be financed jointly by the Wellcome Foundation, The Department of Education and Science, and the Ministry of Labour. It is to be based at the Park Hospital for Children. The study will cover investigations of the physiological bases of learning failures in epileptic children, the application of programmed instruction as an aid to learning, and the long-term educational and vocational adjustment of children who suffer fits in early life. Although the three parts of the project are complementary, it is hoped that the successful applicant will be concerned mostly with that part of the project dealing with programmed learning. Experience in any of these areas would be an advantage: information theory; learning theory (including programmed learning); lesion studies on animals or humans; cerebral dominance. Appointments will be made according to qualifications and experience on the University Lecturer's scale, £1,470 to £2,900. Applications should reach the Acting Director, Dr. D. M. Vowles, not later than March 31, 1967. (24533)

**KING'S COLLEGE HOSPITAL MEDICAL  
SCHOOL**  
(University of London)  
Denmark Hill, London S.E.5

**DEMONSTRATOR IN PATHOLOGY** From April 1, 1967. The appointment is for one year in the first instance, renewable. The successful candidate will spend six months in each of the four departments of pathology. Salary will be determined in accordance with age, qualifications and experience. Applications, one copy only, including the names of two referees, should be sent not later than March 17, 1967, to the Secretary of the Medical School. (13827)

**INSTITUTE OF EXPERIMENTAL  
PSYCHOLOGY**  
Oxford**RESEARCH OFFICER**

Applications are invited for a Research Officer (medical) to join a new unit concerned with the study of learning processes in epileptic children. The unit, which will comprise seven workers of various grades, is to be financed jointly by the Wellcome Foundation, The Department of Education and Science, and the Ministry of Labour. It is to be based at the Park Hospital for Children. The study will cover investigations of the physiological bases of learning failures in epileptic children, the application of programmed instruction as an aid to learning and the long-term medical, educational and social adjustment of children who suffer fits in early life. Although the three parts of the project are not mutually exclusive, the successful applicant will be concerned primarily with the medical aspects of the programme and in particular with the follow-up study of children with epilepsy. Experience in paediatrics and neurology would be an advantage. A sound general training in medicine is essential. Appointments will be made according to qualifications and experience on the University Pre-Clinical Lecturer's scale, £1,470 to £2,900. Applicants should reach the Acting-Director, Dr. D. M. Vowles, not later than March 31, 1967. (24534)

**RESEARCH ASSISTANTSHIP**

Applications are invited for the post of Research Assistant in the department of anaesthesia, University of Leeds. Facilities for research are good with ample provision of laboratory space immediately adjacent to theatres and intensive care unit. Analytical apparatus is available on a generous scale with special emphasis on study of circulatory and respiratory function. Supporting staff consist of seven technicians (two workshop, one electronics, four chemical) and three secretaries. Computer service is provided by the university and library facilities are excellent.

It is hoped that the successful applicant will pursue studies towards the degree of Ph.D. or M.D. on a whole-time student basis. This does not preclude participation in some clinical work and teaching. The Board of Governors of the United Leeds Hospitals will consider the granting of an honorary contract of appropriate grade. Salary on a scale up to £1,940 per annum (under review).

Applications to Professor J. F. Nunn, University Department of Anaesthesia, 24 Hyde Terrace, Leeds 2, by April 1, 1967, from whom further particulars may be obtained. (H.4670)

**ROYAL COLLEGE OF SURGEONS OF ENGLAND  
ELECTION OF PROFESSORS AND LECTURERS**

The Council invites applications for election to the office of Hunterian Professor, Arris and Gale Lecturer, Arnott Demonstrator and Erasmus Wilson Demonstrator for the ensuing year.

Of the Hunterian Lectures, at least twelve illustrated by Hunterian specimens are delivered by Fellows or Members of the College. Additional Hunterian Lectures, not exceeding three in number, on medical or dental subjects may be given by Fellows, Members, Fellows in Dental Surgery or Fellows in the Faculty of Anaesthetists of the College.

The three Arris and Gale Lectures are on subjects relating to Human Anatomy and Physiology, the six Arnott Demonstrations on the contents of the Museum, and the six Erasmus Wilson Demonstrations on the Pathological contents of the Museum. Applications in writing must be made to the Secretary on or before Monday, April 24. Candidates for the Hunterian Professorships and Arris and Gale Lectureships are requested to submit with their application thirty-five copies of a synopsis of approximately 500 words describing the subject matter of their proposed lecture. Each copy of the synopsis must have the name of applicant in the top right-hand corner, and must state his present appointments, where the work was carried out, and the extent to which the work submitted is original. Work carried out under a superior must be shown to have the latter's approval before being submitted.

In the case of Hunterian Lectures the Council is prepared to consider applications for either a series of lectures or a single lecture. Appointments to Professorships and Lectureships are made on the condition that those elected will give the College first refusal of publishing their lecture in the Annals.

## COMMERCIAL APPOINTMENTS

Pfizer

**Medical**  
**Adviser**

Applications are invited from registered practitioners for the position of Medical Adviser in the Pharmaceutical Division of PFIZER LIMITED. The person appointed will be responsible to the Director of Medical Services and will be mainly concerned with the initiating and progressing of clinical trials for products which are already on the market.

The Medical Adviser will also be concerned with the maintenance of an advisory service to practitioners on various aspects of the Company's products and, in addition, he will assist in the training of medical representatives.

The person appointed will preferably be between the ages of 27 and 35 and will have had experience in general practice and hospitals. Salary will be commensurate with the qualifications and experience of the successful applicant and also with the responsibility of this important position.

Attractive fringe benefits will include non-contributory Pension and Life Assurance Schemes, a profit-sharing bonus scheme and the payment of removal expenses.

The Company is located at Sandwich on the East Kent coast in an area offering attractive residential and leisure facilities.

Applications, giving details of age, education, professional experience and salary should be addressed to:

Mr. M. F. Shorten,  
Pharmaceutical Division,  
Pfizer Limited,  
Sandwich, Kent. (24455)

# <sup>British</sup> objective evidence proves that cyclospasmol<sup>®</sup> is also cyclandelate of value in the treatment of cerebrovascular disease

## Mental Function Testing + Radiocirculography

A double blind trial was completed by 24 elderly patients with cerebrovascular impairment and loss of mental function. Prior to treatment mental function tests were performed by all patients and their cerebral blood circulation time was obtained from radiocirculograms. The patients were divided into two similar groups, one group receiving Cyclospasmol 200 mg. q.d.s. for 4 months, the other group receiving identical placebo tablets. The mental function tests and radiocirculograms were repeated after two and four months treatment.

There was a highly significant increase in mental function score in the Cyclospasmol group only. Some improvement in cerebral blood flow occurred in the Cyclospasmol group

but it was not significantly greater than in the placebo group.

The significant improvement in mental function in the Cyclospasmol group over the placebo group suggests that the improvement was brought about by the drug. That a significant correlation between changes in mental function tests scores and changes in mean circulation time was not found supports the idea (Eichhorn 1965) that the improvement in mental function brought about by Cyclospasmol follows a more efficient distribution of available blood rather than an increase in total blood flow.

Further details of this trial available on request,

Dosage: 200 mg. q.d.s. which may be reduced to 200 mg. b.d. when maximum therapeutic benefit has been reached.

# **BROXIL**<sup>Regd.</sup>

**would be my choice  
in routine penicillin therapy**

## **BECAUSE of its Excellent Clinical Results**

There are over 400 published references to Broxil in world literature. These confirm its success in infections such as tonsillitis, pharyngitis, otitis media, boils and carbuncles, which in an overwhelming proportion of cases are caused by Gram-positive organisms (staphylococci, streptococci and pneumococci).

## **BECAUSE of its Specific Activity**

Broxil is highly bactericidal to the majority of these organisms, destroying them without disrupting the normal intestinal flora.

## **BECAUSE of its High Blood Levels**

Broxil gives blood levels double those achieved by penicillin V and at least as high as intramuscular injections of penicillin G.

## **BECAUSE in its syrup form, it is particularly suitable for children**

Broxil is readily accepted and tolerated by children, and side effects are minimal.

**Availability:** 125 and 250 mg. tablets and capsules. 60 ml. syrup (125 mg./5 ml.)

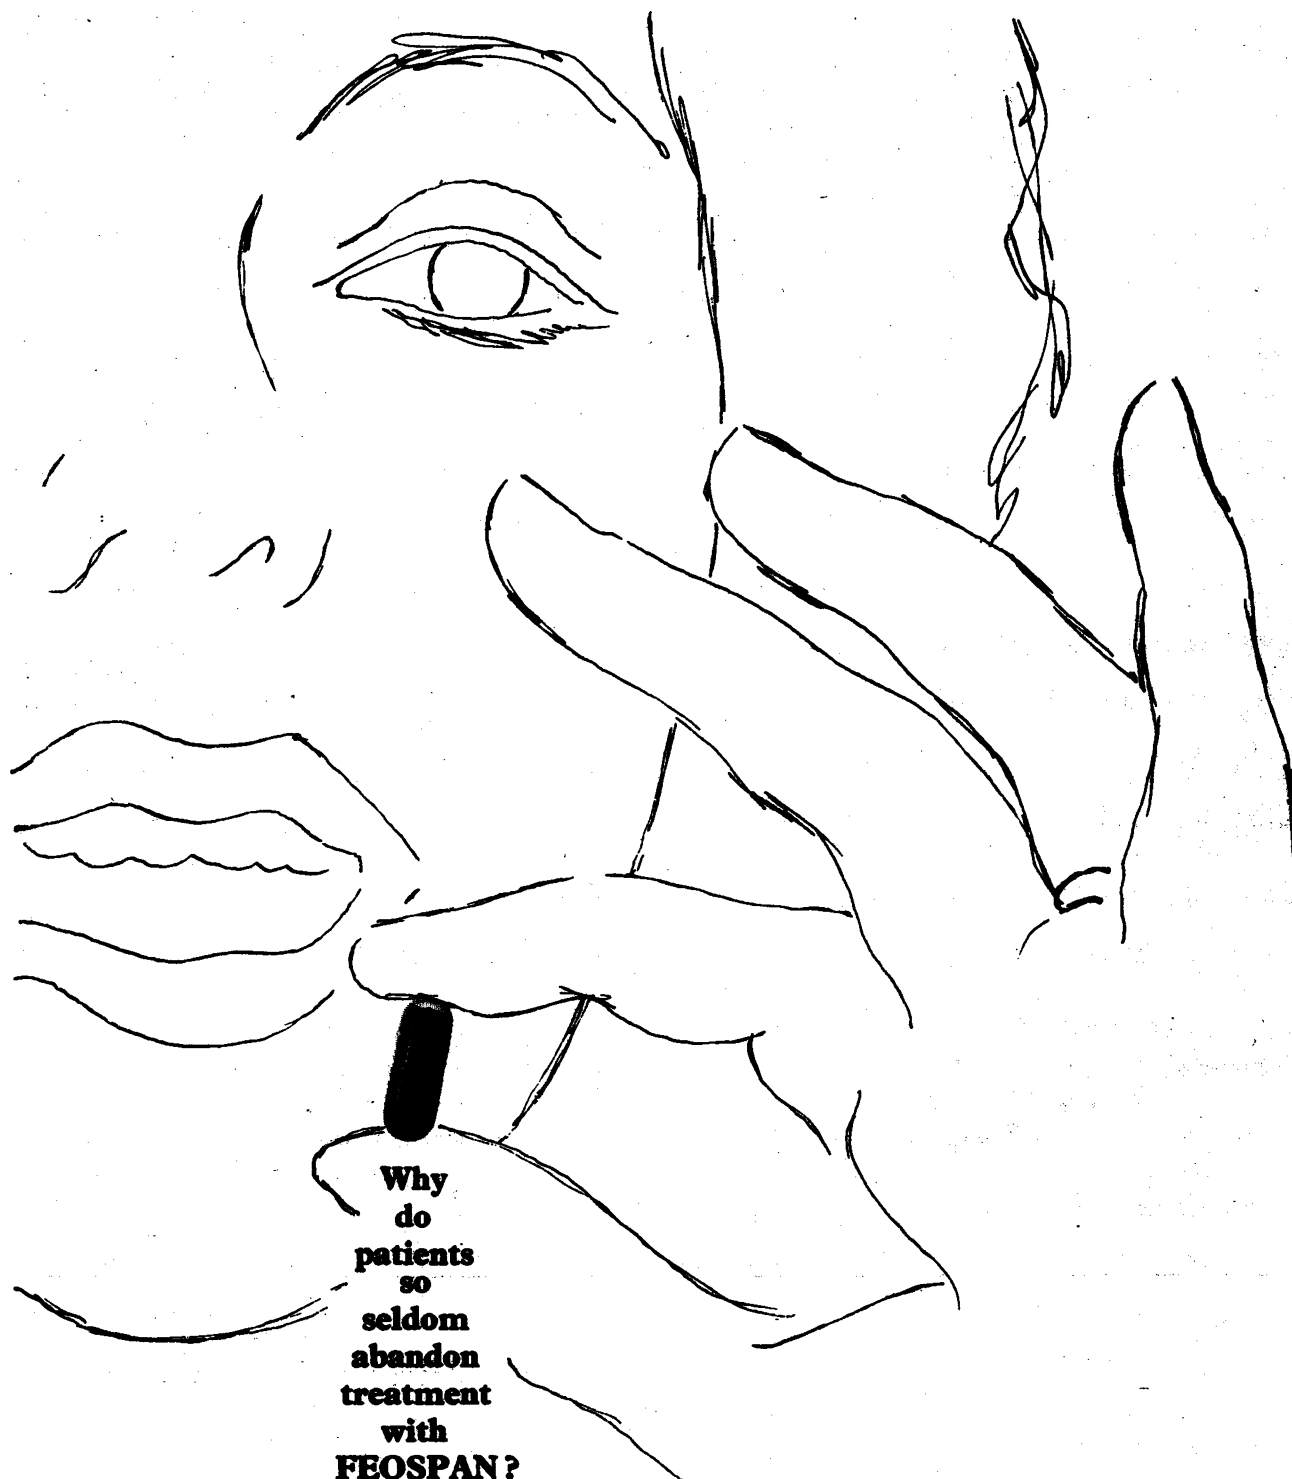

**Dosage:** Children : 62.5–125 mg. every 4–6 hours. Adults : 125–250 mg. every 4–6 hours.

**Prophylactic Dose:** Adults : 125 mg. twice daily. Children : 62.5–125 mg. twice daily.

**Why  
do  
patients  
so  
seldom  
abandon  
treatment  
with  
FEOSPAN?**

With a once-daily dosage of only 150 mg. ferrous sulphate, 'Feospan' can produce a rise in haemoglobin level of up to one per cent. or more a day. Low dosage once a day and minimal release of iron in the stomach make side effects unlikely to occur. So it's easy to understand why patients—and their doctors—so seldom abandon 'Feospan' therapy.

## Department of Radiotherapy

1. DIRECTOR OF RADIO THERAPY  
2. STAFF SPECIALIST RADIO THERAPIST  
This department has a full range of equipment including a rotating head cobalt unit (Theratron 60) and Flawer Hospital, 3350 Collingwood Blvd., Toledo, Ohio 43610.

The present bed accommodation of St. Vincent's Hospital, a university teaching hospital, is 475 beds and it is expected that this will be increased to 600 beds in the foreseeable future. Extensions to St. Vincent's Private Hospital are envisaged and these will make increased demands on the facilities of the radiotherapy department.

The number of new patients attending the department this current year will exceed 1,500. Joint tumour clinics with the departments of medicine, surgery and special departments are held within the radiotherapy department. The Director will be required to possess senior qualifications in therapeutic radiotherapy and/or senior medical or surgical qualifications and to have had considerable postgraduate experience. The Staff Specialist will be required to have completed training in radiotherapy.

Salary range is \$48,000 to \$411,000 per annum according to years of experience. In addition an administrative allowance of \$700 per annum will be paid to the Director.

Applications, setting out details of training and experience, and indicating three referees, should be forwarded before March 31, 1967, to Dr. M. P. Cleary, General Medical Superintendent, St. Vincent's Hospital, Sydney, N.S.W., Australia. (H.4563)

## how much does **loneliness** weigh?

Loneliness is just one of the emotional stresses that may lead to compulsive overeating. In treating the obese patient, merely curbing the appetite is unlikely to provide a complete answer; the stresses must be countered and adequate compensation provided for the solace formerly derived from overeating. *Durophet-M* does just that. It contains not only laevo- and dextro-amphetamine (ratio 1:3) — probably the most effective appetite depressant available — but also methaqualone, a calmative to counter the underlying emotional factors that motivate the compulsive overeater. In obesity, with its attendant hazards to health, these agents together provide more effective weight loss than do simple appetite depressants. Dosage is simple — just one capsule daily.

**Basic NHS prices:** Bottles of 30 capsules 12.5 mg. 7/4 — 20 mg. 8/-. Bottles of 300 capsules 12.5 mg. 49/8 — 20 mg. 54/-.
