Manufacturer's Information

Broad-spectrum Antibiotic

Brand Name

SERVICIN (Regd.).

Constituents

Each triple-layer tablet, red, white and yellow, contains 250 mg. tetracycline HCl 250 million lyophilized *Lactobacilli casei* resistant to tetracycline.

Indications

All infectious conditions caused by tetracycline sensitive organisms, particularly when long-term or high dosage treatment is indicated.

Contra-indications

Caution should be observed if any of the tetracycline group of antibiotics is given during pregnancy, especially if the woman has pyelonephritis. Administration of long-term or high dosage treatment to children during the dentition period may cause discoloration of the teeth.

Dosage

One tablet four times a day. In severe infections, the dose should be doubled.

Side-effects

No side-effects have been reported with Servicin.

Special Notes

The most common side-effects with tetracyclines are nausea, vomiting, epigastric discomfort, diarrhoea, and enterocolitis. These symptoms have been attributed to suppression of the normal intestinal flora and its replacement by resistant pathogenic species. *Lactobacillus casei*, resistant to tetracycline, will proliferate where normal flora has been suppressed and materially assist in preventing the invasion by tetracycline resistant pathogenic species and consequent symptoms.

Availability

Vacuum-sealed bottles of 16 tablets.

Focus on Pneumonias

Pneumonias—one of the common groups of bacterial infections met with in everyday practice, are mostly caused by a single organism: *Pneumococcus*

More rarely pneumonias are caused by staphylococci, streptococci or *H. influenzae*, any or all of which may be present as secondary invaders in cases of primary pneumococcal pneumonia.

ERYTHROCIN deals decisively with them all

Mycoplasma pneumoniae (Eaton agent) is the most common causal organism found in atypical pneumonia. ERYTHROCIN deals effectively with mycoplasma too—with superior potency to either the penicillins or tetracyclines.

the chance is, they will be neither logical nor beneficial. For instance, Ferrograd-Folic will hardly be one of them, despite the fact that she may vitally need the iron and folic acid it contains.

Today, the place of effective oral iron in the management of pregnancy is unquestioned. Not so widely appreciated is the fact that folic acid is also vital. *One in three* women have been shown to have disturbance of folate metabolism during pregnancy.¹⁻³ At worst, this may lead to megaloblastic anaemia,^{1,4} which is associated with obstetric abnormalities, among the more important of which are premature labour, prematurity and consequent higher neonatal death rate.^{5,6}

Throughout the second and third trimesters of pregnancy *one* Ferrograd-Folic tablet a day, taken on an empty stomach for best effect, will provide all the iron and folic acid needed to prevent the development of iron- and folate-deficiency states and thus avoid the inherent risks to the health and well-being of mother and child.

'Aventyl' comes promptly to the rescue of the patient beset by depressive symptoms. Published reports indicate that 'Aventyl' rapidly relieves black mood, lassitude, loss of appetite and sleep disturbance.

'Aventyl' reassures the doctor, too, because it is exceptionally free from the drawbacks of earlier psychostimulants. The side-effects of 'Aventyl', as reported in three years' widespread use, have rarely been troublesome.

Since the drug is not a MAO inhibitor, dietary supervision is not necessary.

Lincocin penetrates... experimentally demonstrated in human tissue

Forty minutes prior to undergoing tonsillectomy, a child weighing 64 lb. received a single i.m. injection of 5 mg./lb. lincomycin hydrochloride (base equivalent). A sample of the patient's tonsil tissue was placed on a petri dish in which the agar had previously been seeded with a pathogenic strain of *Streptococcus haemolyticus*. After incubation, the adjacent photograph was taken. The clear zone demonstrates that Lincocin penetrated the human tonsil tissue in a concentration sufficient to inhibit the growth of the pathogenic inoculum. were identified in subsequent studies as colonies of non-pathogenic *Neisseria catarrhalis*.)

A statement

about hypertension and 'Esbatal' (Bethanidine)

An authoritative British clinical team found that control of blood pressure was achieved with 'Esbatal' in 73 to 87 per cent of the hypertensive patients they treated. Toxicity was not seen. Side-effects were rare. Tolerance was not a problem. Postural side-effects could usually be overcome by adjusting the dosage, timing of administration or by use of a diuretic.

The team with its wide experience in treating hypertension concluded that 'Esbatal' compares favourably with other established drugs. It comments that 'Esbatal' "has advantages which outweigh relative disadvantages in comparison with guanethidine or methyldopa". The incidence of side-effects, toxic effects and feelings of malaise were less with 'Esbatal' than with these two drugs.

To quote again from the report: "There would now seem to be no case for beginning treatment with guanethidine or methyldopa in any new patient, but either may be useful in any patient in whom treatment with one of the newer preparations is unsatisfactory."

For a full account of the trial which covered 82 patients and extended over 2½ years see the *British Medical Journal* 2nd December, 1967, pp. 519-521. Full information about 'Esbatal' brand Bethanidine Sulphate is available on request.

The case for using Penbritin

Regd.

in Acute Pharyngitis and Tonsillitis

Upper respiratory infections respond more quickly to Penbritin than to tetracycline¹. . . a significant advantage when nearly 50% of patients attending surgery want treatment for these conditions, as a recent General Practice survey has shown.²

Clinical cure with Penbritin is surer, as well as faster. Penbritin actually kills the vast majority of bacteria that cause these infections. About one third of β -haemolytic streptococci causing disease in man, however, are now insensitive to tetracycline³, and this organism is the most frequent cause of acute pharyngitis and tonsillitis.

Penbritin is also the safer broad spectrum antibiotic for children and during pregnancy, as it has no permanent or dangerous side effects*. There are two pleasant syrups, appreciated by all age groups—125 mg./5 ml. for

the child, and 250 mg./5 ml. for the adult or more severely ill child.

Penbritin is equally effective in other respiratory tract infections including:

Sinusitis · Laryngitis · Bronchitis · Pneumonia.

***Contra-indication:** Penicillin allergy.

Side-effects: As with other Penicillins.

N.B. Penbritin is not effective against penicillin-resistant staphylococci.

In the treatment of psoriasis, triacetoxanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin. It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages — it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol — 1,8,9-triacetoxanthracene — has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

Pharmaceutical Journal (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency . . . It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable."

British Medical Journal (1966) 2, 993

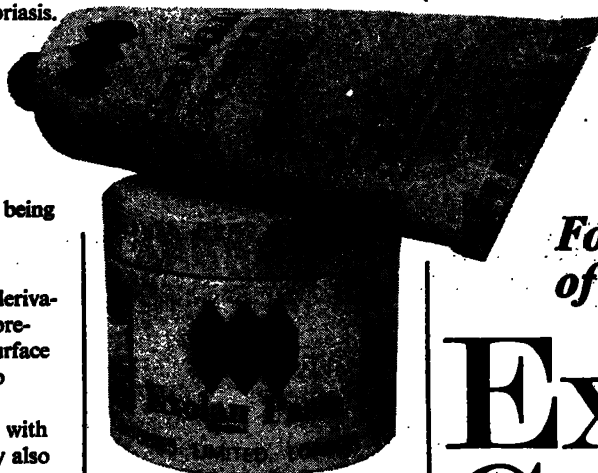

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxanthracene without any adverse reaction occurring"

British Medical Journal (1967) 1, 682

"After three weeks treatment with triacetoxanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

British Journal of Dermatology (1967) 79, 491

These free coloured charts are time savers

With these 8½" x 11" laminated charts, from the classic anatomical drawings by R. L. Dickinson, M.D., you can answer questions about menstruation easily and quickly. The schematic illustrations clearly label each organ in the female reproductive system, and the plastic finish is suitable for explanatory grease pencil markings you may wish to make.

In addition, we offer two free booklets—one for beginning menstruants and another for older girls. These booklets, designed to answer the questions most frequently asked, are scientific and informative, yet written in simple terms that are easily understood. Along with the charts, you will receive sample copies of the booklets which you may then order in quantity for distribution.

Tampax tampons offer a modern method that is suitable for every age of the menstrual span. They are particularly appropriate for schoolgirls who wish to swim and exercise while menstruating. Since Tampax tampons are worn internally, they eliminate menstrual odour and the danger of infection from the anal

region. What's more, they absorb the flow with no possibility of occlusion.

Tampax tampons are useful for girls in their early years who may feel "different" because of their new-found maturity... and for those who are more mature, yet need the security and confidence that bolsters social poise. They will appreciate the assurance of safety and simplicity, as well as the comfort and convenience that come with wearing Tampax tampons.

Available in Regular and Super absorbencies with explicit directions for easy insertion, removal and disposal enclosed in each package.

IRON *with all its advantages and few of its drawbacks*

In the treatment of iron-deficiency anaemia by the oral route in adults or children, PLESMET—chelated iron in tablet or syrup form has been suggested as a *most effective preparation* because of a low incidence of gastro-intestinal symptoms.

The Practitioner, 1960, 184, 792.

The above is one of numerous clinical references to Plesmet, which is rapidly absorbed and utilized to provide an adequate increase in haemoglobin levels and is, moreover, economical in both dosage and cost.

Senokot restores natural rhythm to the constipated colon

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, is free from griping. It acts specifically in the colon; it induces controlled peristaltic action, restores the normal defaecation reflex leading to re-education of the bowel.

BASIC NHS COST: From the dispensing packs, the cost of a teaspoonful of granules or two tablets is about a halfpenny.
Granules: 56, 170 and 900 grammes.
Tablets: 50, 100, 200, 1000.

SAMURAI WARRIOR

The military elite of feudal Japan, the Samurai were renowned and respected for ferocity and prowess in combat, yet governed by a strict code of chivalry. Today, simplified and formalised, their fighting techniques and rules of conduct have developed into the more peaceable physical and philosophical recreation known as Kendo.

Ismelin®

guanethidine sulphate BP

Seven years ago Ismelin established a standard for the reliable and consistent reduction of severely raised blood pressure which has not since been surpassed. Effective in up to 90% of cases, Ismelin is distinguished by an absence of toxic activity which makes it especially suitable for long-term therapy. Today, it is accepted that these very qualities make Ismelin equally appropriate for the firm yet smooth control of milder states of hypertension.

● Clinical Surgery— Volume 15: Gynaecology and Obstetrics

General Editors: Charles Rob and Rodney Smith

Consultant Editor: D. W. T. Roberts

In nine comprehensive articles recognized authorities present a full account of modern gynaecological practice, taking into consideration that the problems of gynaecology are often subjects of concern for more than one doctor or discipline in the management of a particular patient.

218 pages illustrated £4 10s. in complete set

As a separate volume 72s.

● Labor: Clinical Evaluation and Management

By Emanuel A. Friedman

This is the most detailed and comprehensive study yet to be published of the graphic representation of the course of childbirth. These graphs plot concisely the relationship between cervical dilatation patterns and the time lapse between contractions. A major part of the work is devoted to an interpretation of the resulting graphical curves and their significance in assessing various aspects of normal and abnormal labour.

in staphylococcal infection of the lung

fucidin

gets through

powerful · bactericidal · antistaphylococcal

Whether in acute 'post-virus' pneumonia or more localized infection such as empyema, the potential severity of staphylococcal infection demands prompt and specific antibacterial therapy. FUCIDIN is rapidly and easily absorbed, gives serum and tissue levels which are bactericidal against almost all pathogenic staphylococcal strains; FUCIDIN exhibits remarkable ability to reach the nidus of infection despite poverty of blood supply or presence of pus. For early control of these difficult infections FUCIDIN has proved a reliable and economical choice—in over five years of clinical use.

For full literature and prescribing information please write to the Medical Information Department.

PORPHYRIA— A ROYAL MALADY

Published January 1968

The last 400 years of British history will now have to be reassessed. Every schoolboy knows that George III was mad, that James I of England and VI of Scotland was the "wisest fool in Christendom," and that there were attempts to poison Mary Queen of Scots. "Facts" as widely known as these have now been shown to be based on the inadequate medical knowledge of the times. Each of these, and other royal personages, are now shown in this booklet to have been suffering from a rare disease—porphyria—and, in contrast to previous speculations on the nature of their illness, this diagnosis has now been substantiated not only by an investigation of contemporary records but by studies of two living collaterals of George III.

The booklet contains two articles by Dr. Ida Macalpine and her colleagues on porphyria in the Royal Houses of Stuart, Hanover and Prussia; a historical reassessment by Dr. John Brooke and an introduction to the disease by Professor Abe Goldberg.

As Dr. Macalpine and her colleagues conclude in their second article:

"Porphyria may justly be called a royal malady. It caused directly two major national disasters: The Regency Crisis in 1788 when George III had his severest attack, and the catastrophe of 1817 when Princess Charlotte died in childbirth with her infant. This tragedy threatened the Hanoverian succession with extinction and left the nation without an heir apparent until the birth in 1819 of Victoria."

**HEINZ FELLOWSHIPS OF THE
BRITISH PAEDIATRIC ASSOCIATION**

H. J. Heinz Company Limited have generously endowed Fellowships in Paediatrics which the Nuffield Foundation has agreed to administer in conjunction with the British Paediatric Association.

Three or four Fellowships will be offered each year, the number and type awarded in any one year depending on circumstances and the calibre of applicants available. The types of Fellowship, which are open to men or women, are:

- To enable a paediatrician from any part of the Commonwealth overseas to spend six to eight weeks in the United Kingdom, meeting British paediatricians and seeing something of their work. Preference will be given to those recently established in an academic career who can arrange their visit to allow attendance at the Annual Meeting of the British Paediatric Association.
- To enable a young paediatrician in training from any part of the Commonwealth overseas to spend one year of postgraduate paediatrics and child health at approved centres in the United Kingdom. The award is not intended to enable the Fellow to obtain a higher degree in medicine.
- To support a Paediatric Registrar, Senior Paediatric Registrar or Consultant Paediatrician from the United Kingdom in the carrying out of some short-term study or a special research project (clinical, laboratory or public health, etc.), the practical facilities for the study or research being favourable in a particular overseas centre and not available where the candidate is normally employed.

Applications for these awards must be received by the Nuffield Foundation not later than July 15, 1968.

The conditions for the Fellowships and application forms may be obtained from the Director of the Nuffield Foundation, Nuffield Lodge, Regent's Park, London N.W. (H.6421)

**THE MIDDLESEX HOSPITAL MEDICAL
SCHOOL****THE BERKELEY FELLOWSHIP**

(Founded in memory of the late Sir G. H. A. Comyns Berkeley and his wife, Ethel Rose Berkeley.)

The Berkeley Fellowship was founded under the will of the late Sir G. H. A. Comyns Berkeley to provide an opportunity for research in medicine, or for visits to medical institutions or hospitals to a person elected jointly by the master and fellows of Gonville and Caius College, Cambridge, and the Council of the Middlesex Hospital Medical School. Under the terms of the bequest medical centres in any part of the world may be visited with the exception of Oxford or Cambridge.

Applications from graduates in medicine are invited for the Fellowship. The period of tenure of the Fellowship and the emoluments will depend upon the circumstances of each case. A Fellowship will not normally be awarded for a period shorter than three months or longer than one year, but applications for renewal will be considered. The emolument may be paid as a stipend or as a grant to cover travel and other expenses necessarily incurred by the Fellow in the performance of his programme of work, or partly as stipend and partly as grant. The total emolument allowed will not normally exceed £2,000 during one year's tenure.

Applications (six copies) should reach the Dean of the Middlesex Hospital Medical School by April 30 and should include the following information:

- Name, address and age;
- Qualifications and experience;
- Present appointment;
- Programme of work proposed with estimate of necessary expenses;
- Other sources of financial assistance, including any stipend from present appointment if continued during the tenure of the Fellowship. (16176)

EXAMINATION REGULATIONS

The following additional regulations will become effective as indicated:
Clinical Year
As from the primary examination in February/March, 1969, candidates will be required to have held suitable clinical appointments in medicine and/or surgery for a total period of not less than one year, which time shall be additional to the prescribed training period in pathology (bylaw 16). This new regulation does not apply to candidates who have been accepted for the primary examination on previous occasions.
Recognition of Laboratories
As from January, 1971, candidates entering for the primary examination shall be required to have held appointments for a minimum period of two years in laboratories recognized by the College as suitable for training for the primary examination.
As from January, 1973, candidates for the final examination shall be required to have held appointments for a minimum period of three years in laboratories recognized by the College as suitable for training for the final examination in the subject for which they are entering.
In the first instance the scheme of recognition applies only to laboratories in the United Kingdom and Republic of Ireland: candidates who have held appointments elsewhere will be considered on an individual basis.—T. Crawford, Registrar. (16183)

**UNIVERSITY OF EXETER
Postgraduate Medical Institute**

A full-time postgraduate course lasting ten
weeks will begin on April 17, 1968. These
courses are held three times a year, starting
in October, January and April. Each course
includes instruction in general medicine,
paediatrics, preventive medicine, pathology,
psychiatry, orthopaedics and general surgery.
The programme is planned so that students
wishing to specialize in a particular clinical
subject are given facilities to do so, while
other students are taught in each of the
main clinical departments. Unpaid clinical
attachments can be arranged at the end of
the course for students requiring a longer
period of training.

It is sometimes possible to accept general
practitioners for one or two weeks of a
course, and attendance for this period is
recognized under Section 48 of the N.H.S.
Act (1946). These courses are also recog-
nized under the special scheme for the re-
training for general practice of doctors who
have been out of the Health Service for at
least five years.

The fee for this course will be £40 (£60
for students from outside the United King-

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

HOUSE OFFICERS: Each post in this grade shall be tenable for six months. £100 per annum for the first year; £120 per annum for posts held during the second year; £130 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £150 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

SENIOR HOUSE OFFICERS: £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years. Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

REGISTRARS: £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRARS: £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANTS: £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

CONSULTANTS: £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885.

Deductions of £350 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

Doctors with satisfactory training will not be excluded from consideration for appointment to consultant posts on the grounds that they have spent little or no time as senior registrars.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff. Memoranda on the following subjects of particular interest have been issued by the Ministry of Health: Standard of Residential Accommodation, Telephone Charges, Removal Allowances, Study Leave.

Further details may be obtained from the Hospital Secretary, or summaries of the Memoranda may be obtained from the Secretary, British Medical Association. (August, 1967)

anything you can do

I can do better

Plenty of antacid preparations work, but there will always be the patient who fails to respond satisfactorily to standard therapy. Possibly he experiences side-effects, diarrhoea maybe, or perhaps his white chalky mixture is so unattractive that he "forgets" to take it.

Glymaxil is an antacid that is just that much better.

- ☐ It has no laxative effect.
- ☐ It relieves pain promptly and has been shown to be "significantly more effective" than aluminium hydroxide.
- ☐ It tastes refreshingly of peppermint—is clean and easy to take.
- ☐ Uniform doses and activity are assured because Glymaxil is a soluble antacid.

When the soma reflects the psyche in the asthmatic patient...
When the psyche reflects the soma in the chronic bronchitic patient...

Alupent - Sed[®]

is a rational treatment.

Each tablet of Alupent-Sed contains:
20 mg. of orciprenaline sulphate
20 mg. of amylobarbitone.

This combination ensures that the patient receives the optimum dose of Alupent to relieve the wheezing and sufficient sedation to relieve anxiety.

Dosage:

Adult—1 tablet of Alupent-Sed four times daily.

Children 6–12 years— $\frac{1}{2}$ tablet Alupent-Sed 3–4 times daily.

Contra-indications:

Alupent-Sed should not be given to patients with thyrotoxicosis. Alupent-Sed should not be given to patients who have a known idiosyncrasy to barbiturates, or a condition in which barbiturates are contra-indicated.

Caution:

In view of the known interaction between sympathomimetic amines and monoamine oxidase inhibitors, care should be exercised if it is proposed to administer an MAO inhibitor concurrently with Alupent-Sed.

TRAINING POSTS IN MEDICAL ADMINISTRATION

Three training posts in whole-time medical administration in the Scottish Hospital Service are offered in 1968 for registered medical practitioners.

Medical administration is concerned with the use and development of medical skills and resources, and the work ranges from medical management of these resources at hospital level, to the planning and management of regional services and association with the provision for medical teaching. A career in this field offers the opportunity of using epidemiological methods in studying medical needs, of carrying out operational research into the workings of health services, and of applying the findings in improving the effectiveness of health services.

A three-year training programme has been planned. One year will be spent attending a full-time university course leading to a postgraduate diploma and two years in supervised practical training. Commencing salary ranging from £2,105 (at age 29) to £2,335 (at age 33 or over); annual increments thereafter. University fees will also be met and other allowances in respect of travelling and subsistence are payable.

A memorandum of information and an application form may be obtained from the Secretary, Administrative Medical Staff Training Committee, Woodburn House, Canaan Lane, Edinburgh 10. The closing date for receipt of applications, on the prescribed form, is March 29, 1968. (H.6443)

Hoechst Pharmaceuticals Limited
Hoechst House Kew Bridge Brentford

There is one short-acting diuretic
with an effect that can be
precisely regulated in routine use
Its name is

Lasix[®]

SAFE SIMPLE EFFECTIVE NULACIN

EFFECTIVE, because Nulacin achieves *continuous* neutralisation of hyperacidity. As peptic ulcers arise and recur only in the presence of free acid, Nulacin not only relieves symptoms but is the ideal long-term medical treatment.

SIMPLE, because Nulacin is specially designed to dissolve slowly in the mouth and produce a continuous intragastric milk-alkali drip in the ambulant patient. One tablet provides up to 30 minutes' relief from excess acid.

SAFE, because clinical experience has shown that Nulacin produces no electrolyte disturbances and can be used in *all* patients with peptic ulcers.

NULACIN is a unique combination of whole milk protein and fats with dextrans, maltose and suitable antacids and provides *economical*, long-term medical treatment for peptic ulcer.
