

The case for using Penbritin

Regd.

in Acute Pharyngitis and Tonsillitis

Upper respiratory infections respond more quickly to Penbritin than to tetracycline¹... a significant advantage when nearly 50% of patients attending surgery want treatment for these conditions, as a recent General Practice survey has shown.²

Clinical cure with Penbritin is surer, as well as faster. Penbritin actually kills the vast majority of bacteria that cause these infections. About one third of β -haemolytic streptococci causing disease in man, however, are now insensitive to tetracycline³, and this organism is the most frequent cause of acute pharyngitis and tonsillitis.

Penbritin is also the safer broad spectrum antibiotic for children and during pregnancy, as it has no permanent or dangerous side effects*. There are two pleasant syrups, appreciated by all age groups—125 mg./5 ml. for

the child, and 250 mg./5 ml. for the adult or more severely ill child.

Penbritin is equally effective in other respiratory tract infections including:

Sinusitis · Laryngitis · Bronchitis · Pneumonia.

***Contra-indication:** Penicillin allergy.

Side-effects: As with other Penicillins.

N.B. Penbritin is not effective against penicillin-resistant staphylococci.

Twelve compelling reasons for using Alavac-P now

Hay fever can now be controlled with Alavac*P

Alavac-P is a hay fever vaccine incorporating allergenic materials of twelve varieties of common grass pollens (Bencard group B2)

Alavac-P is easy to give, effective and well tolerated.

Simple ... a course of treatment consists of only 8 or 9 injections based on the clinical severity of the symptoms.

Effective ... patients have been shown to respond well to this type of vaccine.

Well tolerated ... Alavac-P is carefully formulated so that, once injected, the allergens are released slowly, ensuring gradual and safe dispersal in the body.

Now is the time to prevent hay fever by desensitising the patient with Alavac-P from Bencard.

The simplest,
safest and most
effective treatment
for intestinal
amoebiasis...

FURAMIDE

Furamide relieves the symptoms of amoebic dysentery and other forms of intestinal amoebiasis within a few days, effecting a complete cure in ten days.

Furamide is particularly useful in the treatment of cyst-passers and is without doubt the drug of choice for mass treatment because of the absence of side-effects.

Furamide offers several distinct advantages over other forms of treatment:

- A cure rate of 80% or more in the acute condition and 90% to 100% in the chronic condition may be expected.
- The specific amoebicidal effect does not upset normal bacterial flora of the gut.
- Bed-rest is unnecessary unless the clinical condition of the patient warrants it.
- Hospitalisation is not normally necessary.
- No special dietary restrictions or enemas are necessary.
- The only side-effects which may occur are occasionally flatulence, which may normally be disregarded, and less frequently an urticarial rash may be observed.

Lincocin penetrates Lincocin works - quickly

Lincocin penetrates ... experimentally demonstrated in human tissue

Forty minutes prior to undergoing tonsillectomy, a child weighing 64 lb. received a single i.m. injection of 5 mg./lb. lincomycin hydrochloride (base equivalent). A sample of the patient's tonsil tissue was placed on a petri dish in which the agar had previously been seeded with a pathogenic strain of *Streptococcus hæmolyticus*. After incubation, the adjacent photograph was taken. The clear zone demonstrates that Lincocin penetrated the human tonsil tissue in a concentration sufficient to inhibit the growth of the pathogenic inoculum. were identified in subsequent studies as colonies of non-pathogenic *Neisseria catarrhalis*.)

Ferromyn-S gives 30% better iron absorption

SO?

So your patients make a faster recovery without increased dosage or increased side-effects.

Most oral iron treatments will get your patients better eventually. But only Ferromyn-S has an iron salt combined with free succinic acid, which research has shown, pushes up the absorption rate by 30%* - without increases in dosage or side-effects*.

Because the body absorbs more iron, patients respond to treatment sooner with quicker regeneration of the haemoglobin, faster repletion of tissue and storage iron. When you prescribe Ferromyn-S for your anaemic patients you are giving them all the benefits of the latest research on iron metabolism.

Ferromyn-S combines the maximum therapeutic effect

with the minimum side-effects at a cost of less than 2d. per day. What more could a Doctor - or patient - ask?

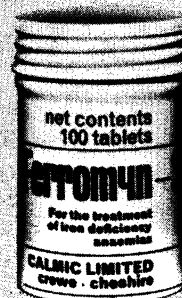

Ferromyn-S with Folic Acid is also available; each tablet contains 100 mcg Folic Acid, thus, at a dose of one tab.t.d.s. the recognised optimum daily dose of 300 mcg is prescribed.

If you think **PAYNOCIL** is just a strong, quick acting aspirin and nothing else

try it and see

Paynocil disperses instantly on the tongue in a release of sweetened lemon flavour, distributing aspirin into the stomach in minutely fine particles—and no water is needed.

Paynocil is aspirin in a most carefully planned form. At 10 grains per tablet in a glycine base it has twice the strength of aspirin tablets B.P. and it is also absorbed twice as fast. It is better tolerated than plain aspirin. Patients with rheumatic disorders who experienced nausea, heartburn or epigastric pain after plain aspirin have found Paynocil acceptable.

So Paynocil is especially valuable in rheumatic

disorders, for it provides the threefold activity of aspirin—analgesic, anti-pyretic, anti-rheumatic—in a form which is exceptionally pleasant and easy to take.

Long term in rheumatic disorders, short term in aspirin's many other indications (colds, influenza, headache, dysmenorrhoea etc.), Paynocil is an ideal therapy. It is convenient to take and it acts fast—patients who need aspirin will prefer Paynocil. It comes in convenient foil strips to slip easily into pocket or bag and is also available as Junior Paynocil—2½ grains per tablet—for children.

Full information is available on request.

You can make it a little easier by prescribing Alphosyl.

Over the years Alphosyl has proved the most effective known treatment for Psoriasis.

And Alphosyl continues to prove itself. Everyday there is new evidence of Alphosyl's effectiveness.

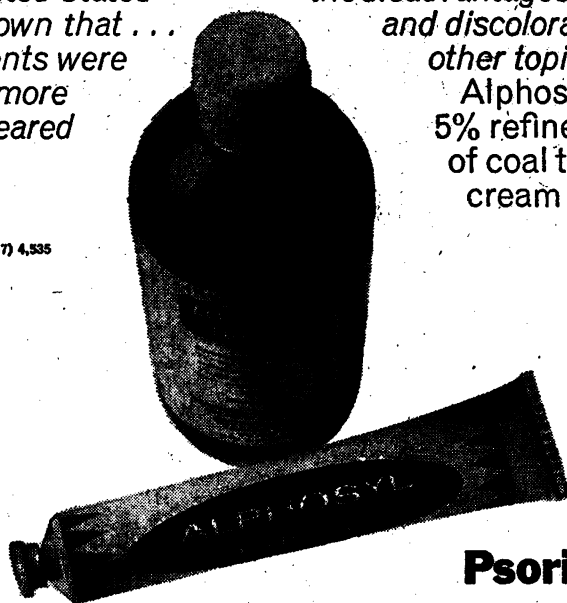

*"Trials in the United States of America have shown that . . . 70% to 80% of patients were helped and 50% or more had their lesions cleared completely by the treatment."**

* BRITISH MEDICAL JOURNAL (1967) 4,535

Long after 'revolutionary' advances have been tried and forgotten, Alphosyl remains the product most widely prescribed for the specific treatment of Psoriasis.

*"It certainly avoids the hazards of antimetabolites and local and systemic corticosteroids, and it does not have the disadvantages of staining, burning and discoloration that occur with other topical preparations."**

Alphosyl is available as a 5% refined alcoholic extract of coal tar and allantoin in a cream and lotion.

One THEO-NAR tablet gives double support

...8 hour relief of bronchospasm and irritant cough

Theo-nar is a special immediate-plus-delayed release tablet presentation which greatly enhances the therapeutic action of its two constituents – theophylline to relieve bronchospasm and noscapine to suppress exhausting, unproductive cough. In particular Theo-nar allows administration of a really effective dose of theophylline – giving profound bronchodilation without the high incidence of gastro-intestinal side effects sometimes associated with oral theophylline therapy.*

With Theo-nar there is no peak-and-valley effect in blood levels of the medicaments. Two or three tablets are thus sufficient to keep the patient symptom-free throughout the night and day – and the need for steroid therapy is reduced or eliminated.*

* Clinical Trials Journal, 1966, 4 : 51.

Presentation Each Theo-nar tablet contains 200 mg theophylline and 30 mg noscapine processed to provide immediate release of 100 mg theophylline and 15 mg noscapine, and delayed release after four hours of 100 mg theophylline and 15 mg noscapine.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

STANDARD The height of the crossbar

The Rugby Union was founded on January 28th, 1871, forty-eight years after William Webb Ellis 'first took the ball in his arms and ran with it.' Mr. A. Rutter of Blackheath was the first president, and two months later the first Rugby International took place, between England and Scotland. (Scotland won.) It is the Rugby Union, of course, who lay down the law today, including the size of the goal posts, each of which must exceed 11 ft. from the ground, placed 18 ft. 6 in. from inside to inside of the posts, with a crossbar 10 ft. from the ground.

STANDARD The Transvasin therapy for rheumatic symptoms

Patients suffering from rheumatic lesions obtain rapid relief with this well-proven and economical medication. The esters of nicotinic, salicylic and p-aminobenzoic acids penetrate the skin and are concentrated at the point of injury, producing superficial erythema and deep hyperaemia. PORPHYRIA— A ROYAL MALADY

Published January 1968

The last 400 years of British history will now have to be reassessed. Every schoolboy knows that George III was mad, that James I of England and VI of Scotland was the "wisest fool in Christendom," and that there were attempts to poison Mary Queen of Scots. "Facts" as widely known as these have now been shown to be based on the inadequate medical knowledge of the times. Each of these, and other royal personages, are now shown in this booklet to have been suffering from a rare disease—porphyria—and, in contrast to previous speculations on the nature of their illness, this diagnosis has now been substantiated not only by an investigation of contemporary records but by studies of two living collaterals of George III.

The booklet contains two articles by Dr. Ida Macalpine and her colleagues on porphyria in the Royal Houses of Stuart, Hanover and Prussia; a historical reassessment by Dr. John Brooke and an introduction to the disease by Professor Abe Goldberg.

As Dr. Macalpine and her colleagues conclude in their second article:

"Porphyria may justly be called a royal malady. It caused directly two major national disasters: The Regency Crisis in 1788 when George III had his severest attack, and the catastrophe of 1817 when Princess Charlotte died in childbirth with her infant. This tragedy threatened the Hanoverian succession with extinction and left the nation without an heir apparent until the birth in 1819 of Victoria."

UEL

To lessen the fear of mutilation . . . arrange for Prosthesis before mastectomy.

The psychological hazards of mastectomy are generally recognized. A woman's fear of mutilation—of its effect on her appearance—is often as great as her fear of surgery itself. That is why arranging for the correct prosthesis replacement *before* surgery helps to minimize the psychic trauma—enabling the patient to face the adjustment period with more calm and assurance.

The surgeon can prescribe Spencer Mastectomy Supports with complete confidence that they will meet both the medical and cosmetic indications. The reason: Each Spencer Breast Support and Breast Form is individually designed, cut and made for each patient.

Wherever support is indicated for breasts, back, abdomen,—for women, men, children—you will find Spencer Supports demonstrably superior.

BRADILAN

the NEW Peripheral Vasodilator *providing:*

Full information on request

MOORE MEDICINAL PRODUCTS LTD • ABERDEEN • SCOTLAND

OPTIMUM VASODILATATION

'BRADILAN' is tetranicotinoylfructose, a new research development which provides effective, sustained vasodilatation by a direct action on the smooth muscle of peripheral arterial vessels.

SUSTAINED ACTIVITY

In the alkaline region of the alimentary tract, 'BRADILAN' (coated tablets of 250 mg. tetranicotinoylfructose) is gradually and evenly hydrolysed to nicotinic acid which is absorbed to provide a continuous adequate level of activity over several hours.

IMPROVED TOLERANCE

Despite the high activity level provided, eight published clinical trials on 'BRADILAN' stress the freedom, from nicotinic acid side effects (facial flushing, itching, headache, nausea), even at high dosage.

"IS THERE AN ALTERNATIVE?"

"The British Medical Journal has produced a series of articles, now collected in book form under the title Is There An Alternative? with which many of you will be familiar. The object of these essays—ranging widely as they do from what one might almost call pure organisation theory to the possibility of a sweepstake to finance hospital services—seems to have been to provoke people to think about the range of possible alternative structures. If I may say so, this seems altogether helpful: there is not one, there are many possible ways of restructuring the Health Service."

The Minister of Health, the Rt. Hon. Kenneth Robinson, M.P., giving the Maurice Bloch lecture at Glasgow University on 6 December, 1967.

COMMERCIAL APPOINTMENTS

PART-TIME NON-CLINICAL COLLABORATOR urgently sought by private individual doctor. Ideally suit ex-medical adviser to pharmaceutical industry. Must be bright, mobile, free up to one day a week. London-based. English. Interesting and well paid. —Box CA.2169, B.M.J.

COMMERCIAL APPOINTMENTS

Medical Adviser

for International Pharmaceutical Company

A registered medical practitioner, who must be a graduate of a British Medical School, is required for interesting, responsible and highly rewarding work as a key member of our Medical Service Department. This is an excellent opportunity for a suitably qualified man aged around 27-30 having a particular interest in, and a good understanding of, Applied Therapeutics, to embark upon a career in which his activities will embrace the entire range of pharmaceutical products manufactured by this leading international company. Essentially, he will be expected to make a major contribution towards the guidance and execution of the Company's general medical policy; advise Management on the merit and standing of established products and, in this field, be involved in developing clinical trials. He will also be called upon to recommend procedures to be adopted to safeguard the health of employees; assist in the training of medical representatives; and handle all medical correspondence which may demand his specialist knowledge. In order that he may perform these duties with maximum efficiency and effectiveness, he will have direct access to top management.

This is an important appointment in which a young doctor can find added stimulus and lasting satisfaction. The salary is attractive, fringe benefits excellent and the prospects first-class.

MINISTRY OF OVERSEAS DEVELOPMENT

The Need

GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

The Opportunity Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

The Advantages Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained. **Salaries** Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum.

Training Scheme for Recently Qualified Doctors

In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

skin

Broxil – added advantages

Broxil is effective and has all the safety of an oral penicillin. In addition, it possesses the advantage of reliable absorption—serum levels are considerably above those that can be achieved with oral penicillins V and G, and in fact, are equivalent to those achieved by intramuscular penicillin G.

These levels are of particular importance in treating skin and soft tissue infections, especially those such as carbuncles, which are 'walled off' from the blood supply and which require a well absorbed antibiotic. Broxil's higher blood levels result in more antibiotic at the site of infection.

It is this advantage of Broxil which results in success—success which led one clinician to conclude:

'The clinical results in these cases (150) of skin and soft tissue infections were excellent, with rapid defervescence and regression of local inflammation.' *Antibiot. and Chemother.*, (1961), XI, 758

AVAILABILITY: Broxil (phenethicillin as phenethicillin potassium B.P.).

Tablets, 125 and 250mg.; Capsules, 125 and 250mg.

For children, adults with sore throats, or patients who find difficulty in swallowing tablets or capsules, there is Syrup, fruit-flavoured, in 60ml. bottles. When dispensed, each 5ml. teaspoonful contains 125mg.

DOSAGE: Children 62.5—125mg. and

Adults 125—250mg., four times a day.

Prophylactic: Children 62.5—125mg. and

Adults 125mg., twice a day.

CONTRA-INDICATION: Penicillin allergy.

SIDE EFFECTS: As with other oral penicillins.

**ST. ANDREW'S HOSPITAL
NORTHAMPTON**

President: Lieutenant-Colonel J. Chandos-Pole, O.B.E.

Medical Director: James Harper, M.B., F.R.C.P.(Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illness. The fees range from twenty guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide satisfactory recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A recreation and occupation centre, known as Gloucester House, has been opened recently, which includes an occupational therapy department, a swimming pool, a squash court and a library with an adjoining reading room.

WANTAGE HOUSE
This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

Charges for treatment at St. Andrew's are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

For terms and further particulars apply to the Medical Director (Telephone No. 34354 Northampton) who can be seen in London by appointment.

NURSING HOMES

TYRINGHAM CLINIC FOR IN-PATIENTS is a registered medical nursing home where comprehensive naturopathic and osteopathic methods of healing are used to re-generate health. Inclusive fees from 14 guineas to 25 guineas per week. Illustrated prospectus request from the Secretary (Dept. B.M.J. Tyingham Clinic, Nr. Newport Pagnel, Bucks. Telephone 451).

"When 100 mg. [suppository] was given last thing at night, not only was early-morning stiffness relieved but pain was lessened until midday, up to 16 hours."
Brit.med.J., 1965, 1, 1354 (22 May)

For the majority of patients, oral administration of 'Indocid' as capsules is preferred, but 'Indocid' Suppositories are particularly valuable in the relief of night pain and morning stiffness, experienced by so many arthritic patients. The prolonged relief of pain afforded by 'Indocid' Suppositories will amply justify this method of administration in such patients.

Supplied as 100 mg suppositories and 25 mg capsules. Detailed information is available to physicians on request.

Now with this new oral contraceptive woman's freedom is complete

Not only is she free to plan her family as she chooses, she has greater freedom from unpleasant side-effects. 'C-QUEENS 21'—the latest development in oral contraception—is the first sequential product to be endorsed by British trials. These trials have shown that 'C-QUEENS 21' is highly effective—and exceptionally free from side-effects. It is a new low-dosage combination of hormones in their natural sequence with all the advantages of a simple 21 tablet regimen—and the pack almost remembers for the patient.

'C-QUEENS 21'—The first sequential approved by the F.P.A.

Fourteen yellow tablets containing 100 mcg mestranol and seven pink tablets containing 100 mcg mestranol with 1.5 mg chlormadinone acetate.

Samples and full prescribing information are available on request.

Advantages

In the skin-blanching test¹ Betnovate (betamethasone 17-valerate) was shown to be the most potent of a long series of corticosteroids put to test.² The validity of this screening test has been confirmed by clinical experience indicating that Betnovate is therapeutically more effective than the other topical corticosteroids in the majority of cases.³

Indications

Betnovate produces a remarkably rapid and profound response in inflammatory dermatoses which normally respond to topical corticosteroid therapy. It also makes possible effective topical therapy of more difficult conditions such as resistant psoriasis, hypertrophic lichen planus, lichen simplex chronicus and eczema of the hands. Clinical indications for use of Betnovate dermatological preparations include:

psoriasis; eczema—including atopic eczema, infantile eczema, Besnier's (flexural) prurigo, nummular (discoid) eczema, stasis eczema, otitis externa; *neurodermatoses*—including lichen simplex; *anal and vulval pruritus*; *seborrhoeic dermatitis*; *intertrigo*; *contact sensitivity reactions and allergies*—

including insect bites; *sunburn*; 'prickly heat'; *lichen planus*; *discoid lupus erythematosus*; *generalised erythrodermia*.

The preparations with neomycin should be used when bacterial infection is present or suspected. Similarly, the preparations containing chionoform can be used when bacterial or fungal infection is present or suspected.

Side effects

Corticosteroids should never be used in the presence of infection except in conjunction with effective chemotherapy. Usually the preparations are well tolerated. However, sensitisation phenomena have on very rare occasions been reported with the use of corticosteroid-containing preparations for local application. From existing reports it is difficult to determine whether or not the corticosteroid or other components were responsible. Neomycin, largely confined in its use to local application, has been reported to give rise to skin sensitisation. These occurrences, however, are rather uncommon and this antibiotic is probably one of the best tolerated when used for local application. It can be said to have a very low sensitising potential. If by remote chance any indication of sensitisation occurs, application should be stopped immediately. When occlusive dressings are used on extensive areas, or for prolonged periods, it is desirable that, as with all topical corticosteroids, the possibility of systemic absorption should be considered.

Application

Ointment, Cream, Lotion and Scalp Application

A small quantity should be applied gently to the affected area once or twice daily until improvement occurs. It may then be possible to maintain progressive improvement using one application a day or less.

Tulle

Apply direct to the lesion and cover with an absorbent dressing if necessary.

Legal restriction

To be supplied on prescription only. (Therapeutic Substances Act: Part II).
