

Why Penbritin^{Regd.} is so powerful against bronchitis

Because many organisms can cause the different types of bronchitis, it is imperative to use an antibiotic which is active against all of them . . . for in General Practice treatment often has to begin before the causative organism can be identified. Penbritin's activity covers all penicillin-sensitive organisms, and Gram-negative organisms as well. Penbritin is bactericidal. Unlike most other broad-spectrum antibiotics which merely inhibit bacterial growth, Penbritin kills bacteria. This is an advantage in the treatment of any patient—and virtually essential when treating children, the old and others whose natural defences are inadequate.

Penbritin has the safety of a penicillin. It is free from dangerous or permanent side-effects* . . . of special interest in the treatment of children.

Penbritin's broad spectrum, bactericidal action and comparative safety, endorsed by many world references, establish it as a powerful force against bronchitis.

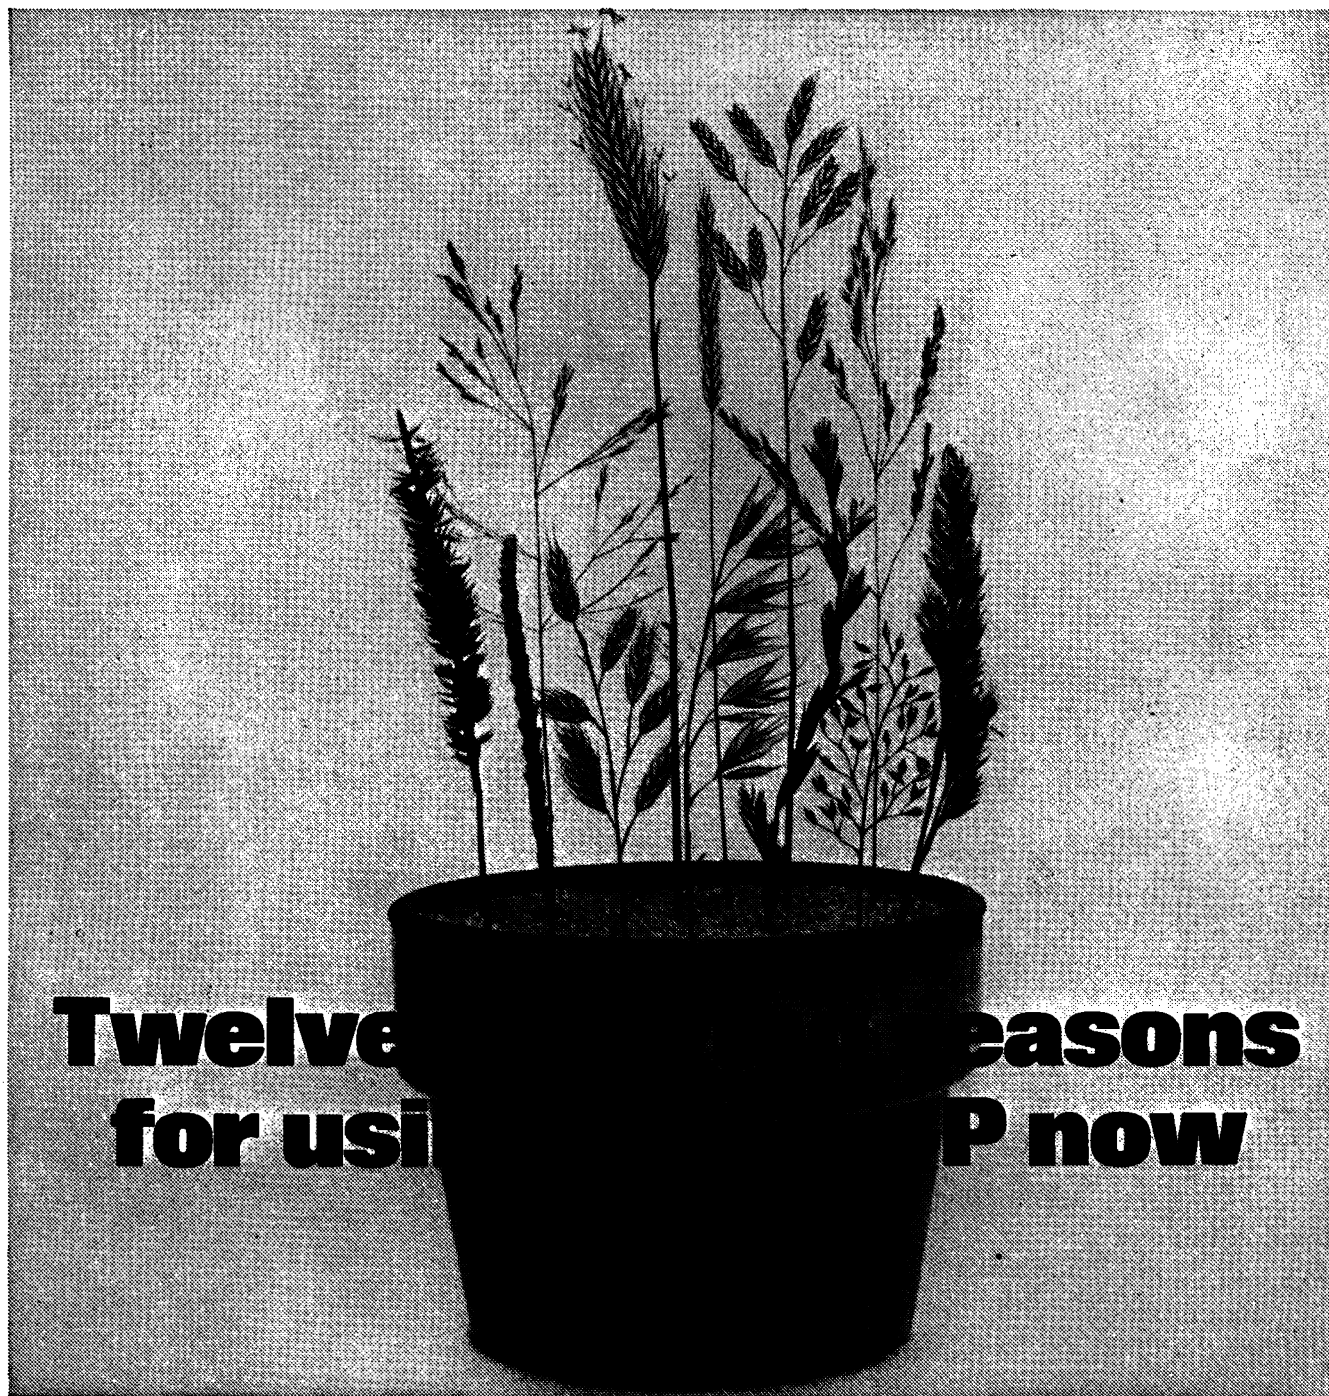

Penbritin is also highly effective in other respiratory tract infections including: Sinusitis · Pharyngitis · Laryngitis · Tonsillitis · Pneumonia.

***Contra-indication:** Penicillin allergy.
Side-effects: As with other penicillins.
Full information is available on request.

**Twelve seasons
for use of Alavac-P now**

Hay fever can now be controlled with Alavac* P

Alavac-P is a hay fever vaccine incorporating allergenic materials of twelve varieties of common grass pollens (Bencard group B2)

Alavac-P is easy to give, effective and well tolerated.

Simple . . . a course of treatment consists of only 8 or 9 injections based on the clinical severity of the symptoms.

Effective . . . patients have been shown to respond well to this type of vaccine.

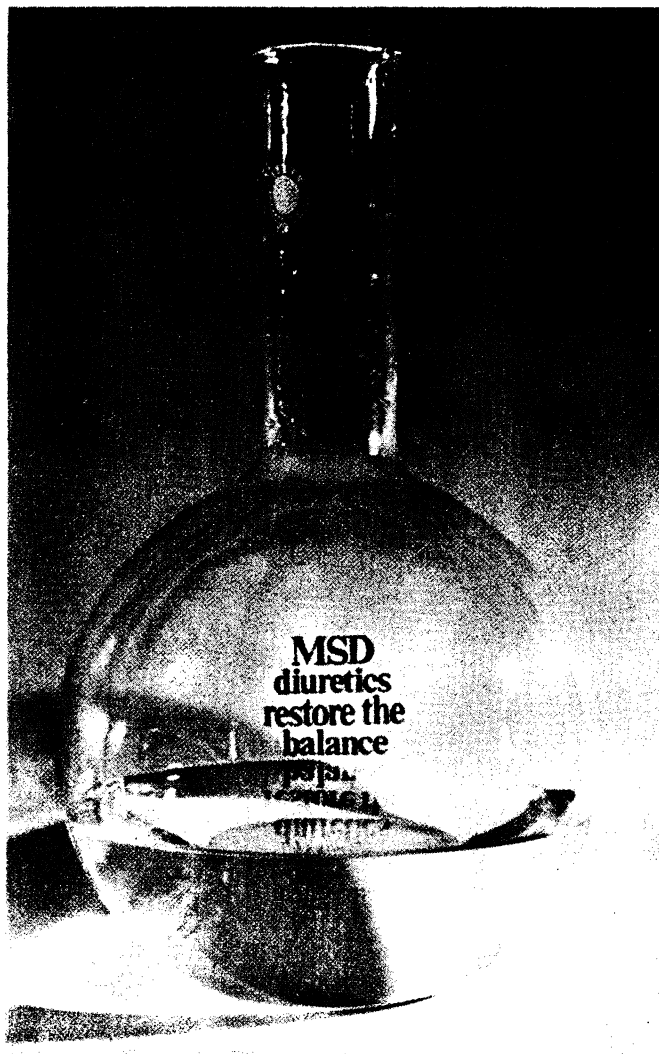

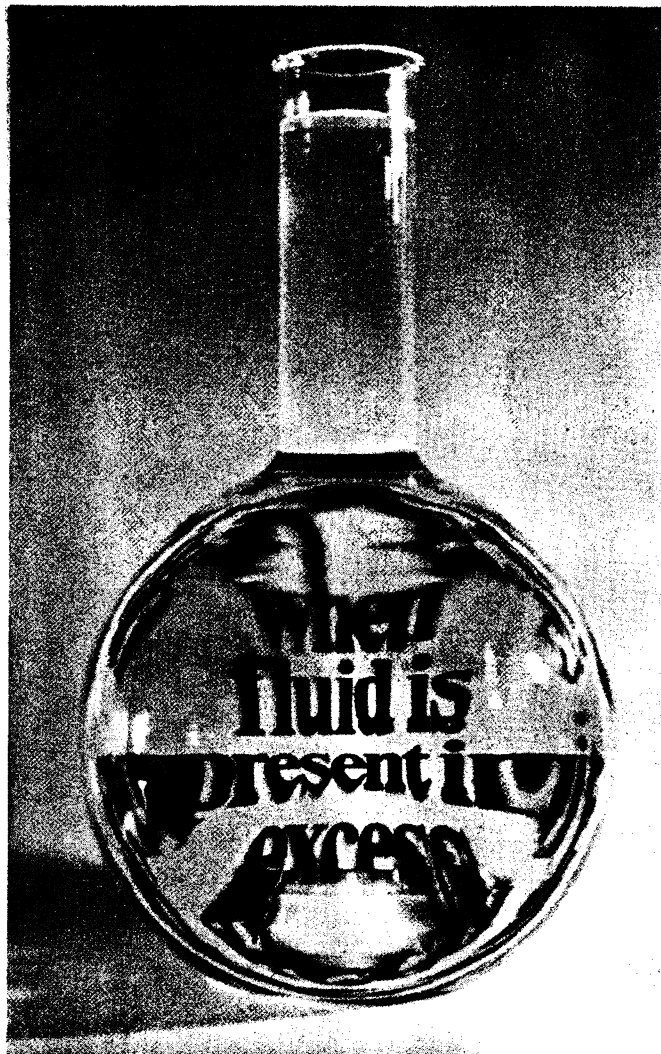

Well tolerated . . . Alavac-P is carefully formulated so that, once injected, the allergens are released slowly, ensuring gradual and safe dispersal in the body.

Now is the time to prevent hay fever by desensitising the patient with Alavac-P from Bencard.

in staphylococcal osteomyelitis

fucidin

gets through

powerful · bactericidal · antistaphylococcal

FUCIDIN exhibits remarkable ability to reach the nidus of staphylococcal infection despite poverty of blood supply or presence of pus and sequestra. The early success of FUCIDIN in osteomyelitis after failure of other apparently suitable antibiotics has been amply demonstrated in over five years of clinical use. FUCIDIN is rapidly and easily absorbed giving serum and tissue levels which are bactericidal against almost all pathogenic staphylococcal strains. Resistance has not proved a clinical problem, and there is no cross-resistance with other available antibiotics. For prompt and sustained control in acute osteomyelitis FUCIDIN has proved a reliable and economical choice.

50 years of emancipation

Now with this new oral contraceptive woman's freedom is complete

Not only is she free to plan her family as she chooses, she has greater freedom from unpleasant side-effects. 'C-QUEENS 21'—the latest development in oral contraception—is the first sequential product to be endorsed by British trials. These trials have shown that 'C-QUEENS 21' is highly effective—and exceptionally free from side-effects. It is a new low-dosage combination of hormones in their natural sequence with all the advantages of a simple 21 tablet regimen—and the pack almost remembers for the patient.

'C-QUEENS 21'—The first sequential approved by the F.P.A.

Fourteen yellow tablets containing 100 mcg mestranol and seven pink tablets containing 100 mcg mestranol with 1.5 mg chlormadinone acetate.

pain

Distalgesic erases pain

Distalgesic is effective where prolonged medication is necessary; in pain which recurs intermittently and in the acute pain of injury. In severe pain, Distalgesic can often delay the need for parenteral narcotics. It is non-narcotic, does not cause constipation, addiction or gastric bleeding.

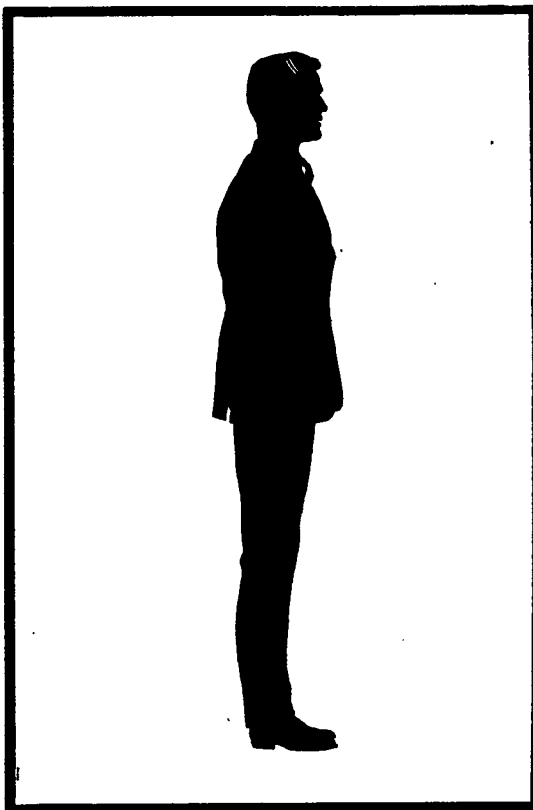

Distalgesic tablets – specially shaped for ease of swallowing and identification – each contain 32.5 mg dextro-propoxyphene hydrochloride, authoritatively described as the most promising alternative to codeine, and 325 mg paracetamol, generally regarded as the safest of the antipyretic analgesics.

Nacton also

- ☐ gives the ulcer a better chance to heal
- ☐ lets the patient eat as he chooses
- ☐ enables him to dispense with antacids.

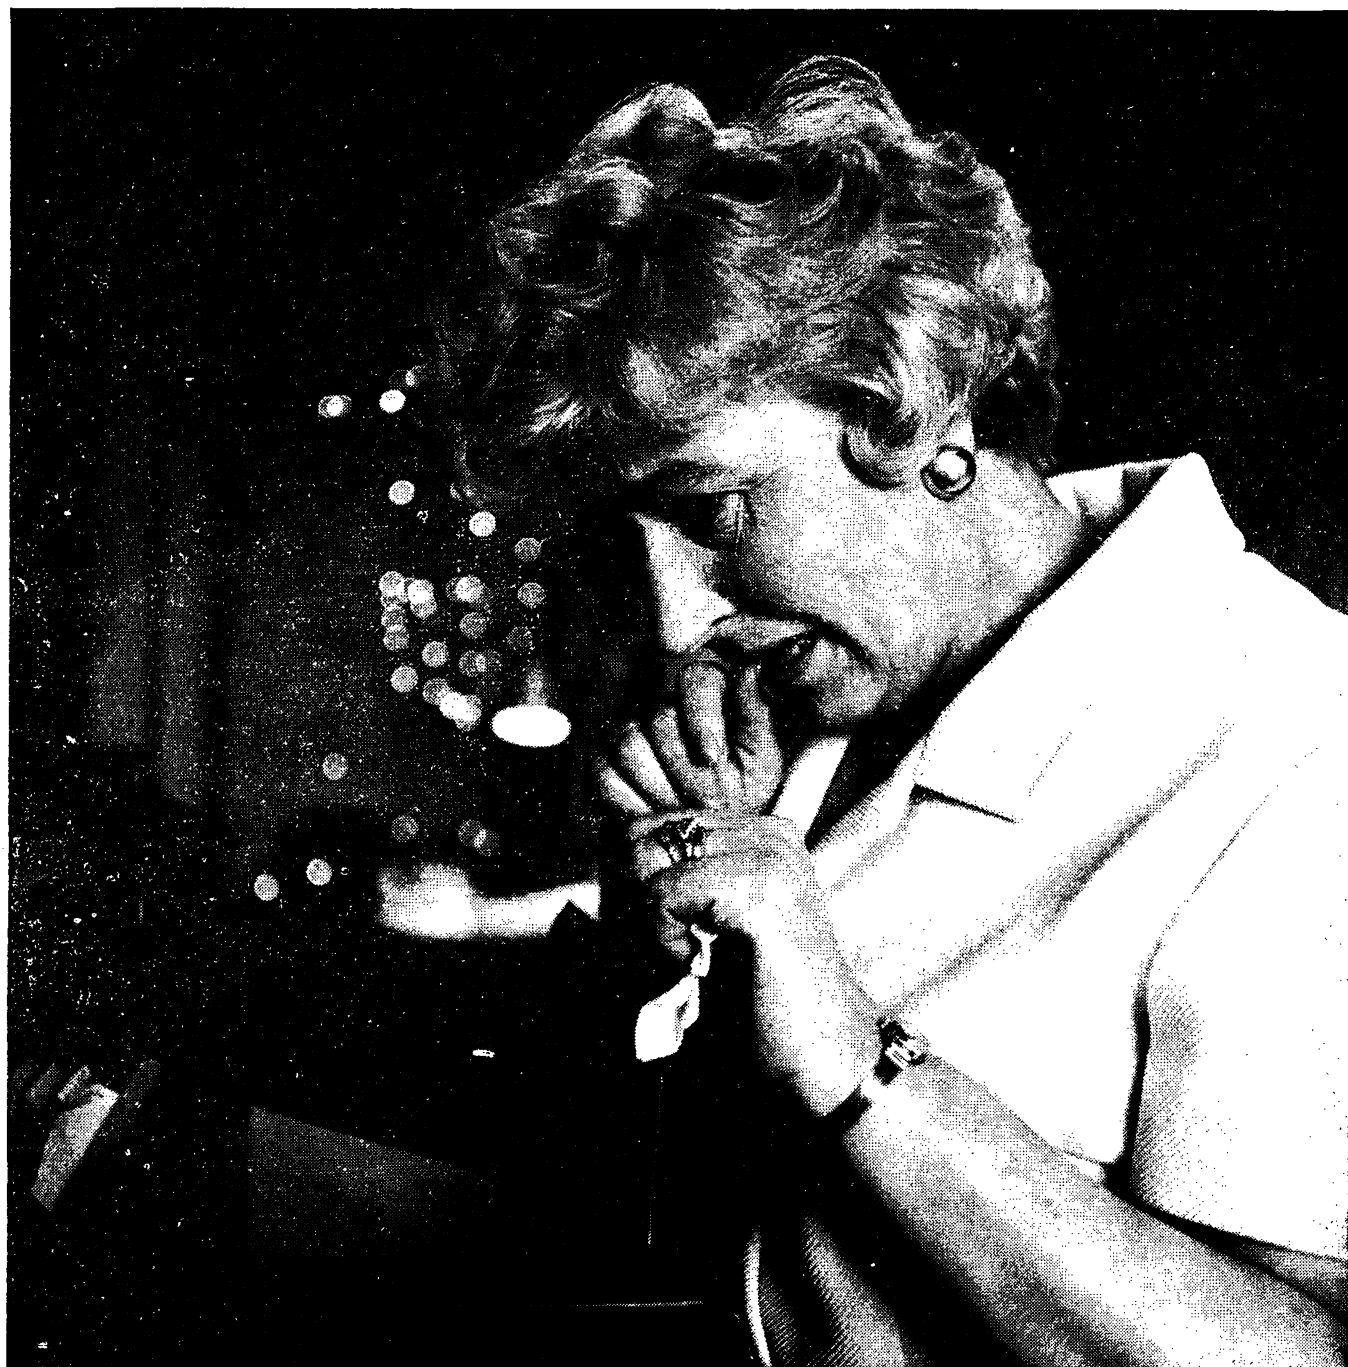

Because Nacton has no anaesthetic effect, it will not mask the warning pain of an impending perforation. And at the correct dosage, Nacton has no side-effects.

One THEO-NAR tablet gives double support

...8 hour relief of bronchospasm and irritant cough

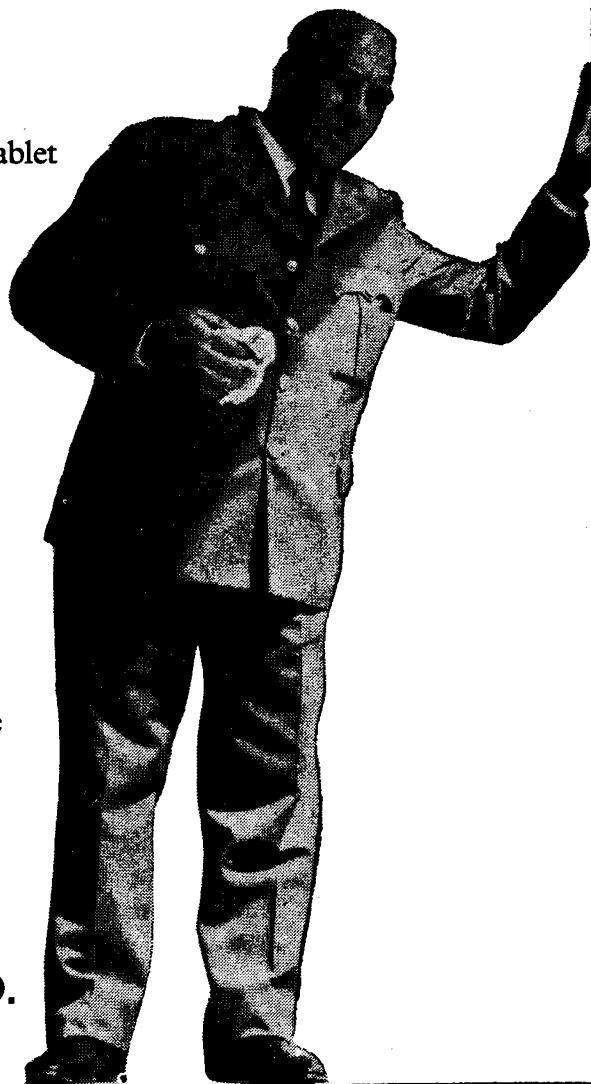

Theo-nar is a special immediate-plus-delayed release tablet presentation which greatly enhances the therapeutic action of its two constituents – theophylline to relieve bronchospasm and noscapine to suppress exhausting, unproductive cough. In particular Theo-nar allows administration of a really effective dose of theophylline – giving profound bronchodilation without the high incidence of gastro-intestinal side effects sometimes associated with oral theophylline therapy.*

With Theo-nar there is no peak-and-valley effect in blood levels of the medicaments. Two or three tablets are thus sufficient to keep the patient symptom-free throughout the night and day – and the need for steroid therapy is reduced or eliminated.*

* Clinical Trials Journal, 1966, 4 : 51.

Presentation Each Theo-nar tablet contains 200 mg theophylline and 30 mg noscapine processed to provide immediate release of 100 mg theophylline and 15 mg noscapine, and delayed release after four hours of 100 mg theophylline and 15 mg noscapine.

A lively summing-up of the successes and the failures of modern medicine. It is an assessment of the whole current state of medicine, including the efficacy and the cost of modern drugs, modern treatment of the mentally ill, and such controversial issues as addiction, tranquillizers, LSD, transplants, and "the pill". Informed and informative, critical yet balanced, it is a provocative and deeply disturbing book.

Will your Saab feel lonesome?

Lonesome? No. Unusual, perhaps. Because the Saab is still rare enough to raise eyebrows and cause comment wherever you go. The Saab is a beautifully designed and technically advanced car. Roomy and luxuriously comfortable. Fast when needed and flexible in traffic. Its road holding is legendary, the faster you go the tighter it hugs the road. Sure it's a little out of the ordinary, but Saab owners like being out of the ordinary.

"IS THERE AN ALTERNATIVE?"

"The British Medical Journal has produced a series of articles, now collected in book form under the title Is There An Alternative? with which many of you will be familiar. The object of these essays—ranging widely as they do from what one might almost call pure organisation theory to the possibility of a sweepstake to finance hospital services—seems to have been to provoke people to think about the range of possible alternative structures. If I may say so, this seems altogether helpful: there is not one, there are many possible ways of restructuring the Health Service."

The Minister of Health, the Rt. Hon. Kenneth Robinson, M.P., giving the Maurice Bloch lecture at Glasgow University on 6 December, 1967.

CLINICAL RESEARCH

A physician who enjoys overseas travel and has an interest in, and knowledge of, medical statistics, is required for a key appointment in our Department of Clinical Investigation. The successful candidate, who will be based at Hounslow, will be responsible for the initiation, follow-up, statistical evaluation and medical interpretation of clinical trials of experimental drugs both within the U.K. and elsewhere. As a result the man appointed will travel to various other countries including Eire, Scandinavia, Portugal and Greece. Because of the Department's close associations with the Company's research laboratories at Ann Arbor, Michigan, it is envisaged that he will also spend some time in America. In this connection, he will work closely with the research biometrician responsible for data handling and statistical analysis of clinical trials. This work includes computer processing of clinical data. The post calls for a Registered Medical Practitioner, aged 30-35, preferably British by nationality and graduates of a British or Commonwealth medical school. Preference will be given to a married man with children. A background of broad clinical experience is essential, and only those having wide medical interests will be considered. Previous experience of medical research is desirable but not essential. Salary will be negotiable with due regard to age, qualifications and experience but it will certainly be in excess of £3,000 in the first year. A car will be provided, and there is an excellent contributory pension scheme. This is a quite unusual, absorbing and rewarding appointment for a man of special ability.

Broxil – added advantages

Broxil is effective and has all the safety of an oral penicillin. In addition, it possesses the advantage of reliable absorption—serum levels are considerably above those that can be achieved with oral penicillins V and G, and in fact, are equivalent to those achieved by intramuscular penicillin G.

These levels are of particular importance in treating skin and soft tissue infections, especially those such as carbuncles, which are 'walled off' from the blood supply and which require a well absorbed antibiotic. Broxil's higher blood levels result in more antibiotic at the site of infection.

It is this advantage of Broxil which results in success—success which led one clinician to conclude:

'The clinical results in these cases (150) of skin and soft tissue infections were excellent, with rapid defervescence and regression of local inflammation.' *Antibiot. and Chemother.*, (1961), XI, 758

AVAILABILITY: Broxil (phenethicillin as phenethicillin potassium B.P.).

Tablets, 125 and 250mg.; Capsules, 125 and 250mg.

For children, adults with sore throats, or patients who find difficulty in swallowing tablets or capsules, there is Syrup, fruit-flavoured, in 60ml. bottles. When dispensed, each 5ml. teaspoonful contains 125mg.

DOSAGE: Children 62.5—125mg. and

Adults 125—250mg., four times a day.

Prophylactic: Children 62.5—125mg. and

Adults 125mg., twice a day.

CONTRA-INDICATION: Penicillin allergy.

SIDE EFFECTS: As with other oral penicillins.

MINISTRY OF OVERSEAS DEVELOPMENT

The Need

GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

The Opportunity Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

The Advantages Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained. **Salaries** Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum.

Training Scheme for Recently Qualified Doctors In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

FACULTY OF MEDICINE

DEPARTMENT OF PHYSIOLOGY

TEACHING AND RESEARCH APPOINTMENTS

Applications are invited for posts in the department of physiology of the Faculty of Medicine, in the University of Manitoba. A major expansion of the research and teaching programmes of the department has created openings at the Lecturer, Assistant Professor and Associate Professor levels for individuals with appropriate experience. Current departmental interests range from fundamental mammalian physiology and biophysics to clinical physiology. Candidates with diverse backgrounds and interests will be considered and need not be medically qualified.

Salary scale: \$10,000 to \$16,000 per annum according to qualifications and experience.

Further details concerning the opportunities available in the department, retirement and disability benefits, travel allowances, etc., may be obtained from:

The Chairman, Department of Physiology, Faculty of Medicine, University of Manitoba, Winnipeg 3, Manitoba, Canada. (H.6316)

VACANCY FOR A MEDICAL OFFICER

in Commonwealth West Africa

This vacancy offers an opportunity to a doctor who wishes to work for a short or for a long period overseas. Service can be for a single period of 18 months or if the doctor so wishes he can continue his service for any number of tours of 18 months with paid home leave between tours.

The minimum professional requirement is 2 to 5 years' post-qualification experience and registration with the G.M.C.

This vacancy is on the medical staff of the United Africa Company Limited, a member of the Unilever group. The Company employs a number of doctors in Nigeria and Ghana. The main work content of the job will be general medicine, but ability to tackle emergency surgery and obstetrics will be necessary.

It is not possible to quote the level of salary which will be offered because this will be dependent upon the experience of the individual candidate appointed. In any case, overseas rates of pay need to be fully explained before an applicant can evaluate them. This will be done at interviews.

Passages are paid by the Company to and from West Africa at the beginning and end of each tour and passages are also provided for a wife and children. The Company provides fully furnished accommodation. If children are at school in the U.K. education allowances are paid and free return holiday passages are arranged. There is a contributory pension fund and cash benefits. Apply to:

Dr. D. S. F. Robertson, Principal Medical Adviser, Unilever Limited, Blackfriars, London, E.C.4.

ST. ANDREW'S HOSPITAL
NORTHAMPTON

Lieutenant-Colonel J. Chandos-Pole, O.B.E., Medical Director
James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illness. The fees range from twenty guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A recreation and occupation centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court and a library with an adjoining reading room.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

Charges for treatment at St. Andrew's are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

For terms and further particulars apply to the Medical Director (Telephone No. 34354 Northampton), who can be seen in London by appointment.
