

NEW for urticaria, pruritus and allergic rhinitis

'BANISTYL'

the

- **★** Highly effective
- ★ Little if any soporific effect
- ★ Well tolerated by patients of all ages
- ★ One tablet three times daily effective in the majority of adult patients

'Banistyl' is well tolerated at a wide range of dosage levels. In general, side-effects are mild and occur in a small percentage of patients only. Somnolence is infrequent; when it occurs, it is usually not marked and disappears after the first few days of treatment or can be controlled by adjustment of dosage. Other side-effects which have been reported include nausea, epigastric pain, vertigo, diarrhoea and mild headache.

Although there is no evidence to suggest that 'Banistyl' is embryopathic, it is a sound medical principle to avoid, wherever possible, prescribing any drug during the first three months of pregnancy.

Certain activities, including control of vehicles or machinery, should not be undertaken by a patient starting a course of 'Banistyl' until it is evident that the drug has no soporific or other central nervous system side-effects, or until any such effects have subsided.

Brand Name Constituents

SYL CREAM (SYL is a Trade Mark)

Indications

Dimethic. B.P.C. 10%, Benzalk. Chlor. Soln. B.P. 0.02%, Nitrocellulose 1.5% in a specially emulsified cream base.

For the prevention and treatment of

Inflammation from body fluids (napkin rash, colostomy, ileostomy, pruritus due to urine leakage, diarrhoea, etc.);

Bedsores, plaster sores;

Soreness from perspiration between the legs or under the breasts.

Eczematous skin eruptions, and to protect the skin around varicose ulcers.

Occupational dermatoses, and to protect the hands against detergents, soaps, etc.

Allergic dermatoses (contact dermatitis, sensitivity to antibiotics, local anaesthetics, etc.).

Side-effects and Contraindications Directions for use

Keep away from the eyes, or slight and transient irritation may be experienced.

The skin area to be protected should be washed and carefully dried before applying the cream. It should be spread evenly and smoothed in gently until it disappears. To build up a good protective layer it is best to apply the cream 3-4 times a day for several days. After this initial period 1-2 applications each day are sufficient.

To prevent napkin rash, the cream should be applied after each napkin change paying particular attention to the folds of the skin. Napkins should be rinsed free from soap or detergents.

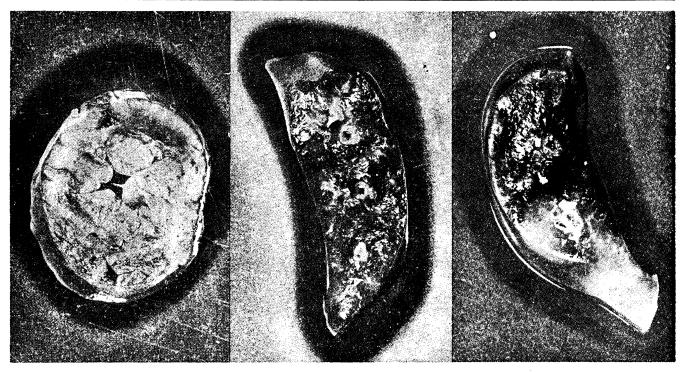

Presentation

Tube of 60 grammes at a basic NHS cost of 5/3. Jar of 500 grammes at a basic NHS cost of 20/-.

a striking demonstration of Lincocin penetration

Heart Tissue
Assay organism: Streptococcus hæmolyticus

Lung tissue
Assay organism: Staphylococcus aureus

Lung tissueAssay organism: Diplococcus pneumoniae

Since antibiotic effectiveness is dependent upon concentration at the site of infection, it is obvious that antibiotic diffusion and tissue penetration are of supreme importance. The accompanying photographs of an experiment in animals demonstrate Lincocin's capacity in this respect.

A healthy dog weighing 9.5 kg. was injected intramuscularly with 25 mg./kg. of lincomycin hydrochloride (base equivalent). After 90 minutes tissue samples were excised and placed on Petri dishes in which the agar had previously been seeded with pathogenic strains of Staphylococci, Streptococci and Pneumococci, respectively. Following incubation these photographs were taken of the plates containing either heart or lung tissue. The clear zones show that within 90 minutes Lincocin had penetrated these tissues in concentrations sufficient to inhibit growth of the pathogenic inocula.

Lincocin Capsules: Each capsule contains lincomycin hydrochloride monohydrate equivalent to 500 mg. lincomycin base, in bottles of 12 and 100. Lincocin Sterile Solution: In 2 ml. ampoules. Each 2 ml. contains lincomycin hydrochloride monohydrate equivalent to 600 mg. lincomycin base.

Lincocin Syrup 250: Each 5 cc. contains 250 mg. lincomycin (as lincomycin hydrochloride monohydrate), in bottles of 60 cc.

for Sacro-iliac strain a narrow belt alone is not enough . . .

That is why Spencer Designers incorporate an easily adjustable pelvic binder (see inset below) inside each Spencer created for Sacro-iliac strain.

A narrow belt alone will not provide adequate continuous immobilization of the sacro-iliac joints, because such a belt will not stay in place. With ordinary body movements, any narrow belt alone will ride up and dig in at the back, thus causing faulty posture that increases the disability. That is why every Spencer Sacro-iliac Support is a "belt within a support"

designed to the necessary heights and lengths to bridge the lumbar curve and correlate abdominal and back support. Thus improvement in posture—essential to relief in sacro-iliac strain—is attained and maintained.

Every Spencer—for abdomen, back, breasts—is individually designed, cut and made for each patient.

Vasogen Silicone -for skin protection in cases of bedsores, napkin rash cracked skin, itching and other skin disorders

Vasogen Silicone has high water repellent properties and protects the skin from irritants induced or aggravated by contact with aqueous liquids, body fluids and exudations. It is effective also in the treatment of sore buttocks, excoriation, plaster sores, maceration, some conditions of eczema and can be used after colostomy. Vasogen Silicone is easy to apply and is almost invisible on the skin. It provides an acceptable protective barrier that is maintained effectively for lengthy periods.

AIM FOR THE BAD'UNS WITH 'ILOSONE'

With 'Ilosone' your aim is effective and selective. Killing off the pathogenic bacteria, allowing the normal gut flora to pursue their useful life.

The real 'bad 'uns', of course, are Gram positive cocci, causing most of the infections you see every day. Against these infections 'Ilosone' is much more active than, for example, the tetracyclines and it will not discolour teeth or deposit in bone. Nor is 'Ilosone' likely to cause diarrhoea or gastro-intestinal upset—disadvantages which the tetracyclines share with the broad spectrum penicillins.

Effective. Selective. Use 'Ilosone' when you go gunning for bad 'uns—in acute tonsillitis or acute bronchitis or any common bacterial infection of the upper respiratory tract. Haemophilus influenzae? Yes, 'Ilosone' deals with this 'bad 'un' too!

'Pulvules' of 250 mg* and 125 mg*; a pleasant tasting suspension containing 125 mg*/5 ml. *Base equivalent. Full information available on request.

Eli Lilly & Company Limited Basingstoke, England

throats

Broxil-rapid results

Broxil in clinical practice has proved to be highly successful in the treatment of throat infections, including pharyngitis and tonsillitis. The reasons for this success are threefold. Firstly, Broxil is bactericidal, *killing* the infecting organisms, not just inhibiting their growth.

Secondly, Broxil produces high blood levels—twice those of an equivalent oral dose of penicillin V, and equal to those of intramuscular penicillin G.

Finally, Broxil shows greater activity than penicillins V and G against low penicillinase-producing staphylococci.

Because of these properties Broxil is rapidly successful—as for example:

In 33 pairs of patients, Broxil produced both better and faster results than penicillin V, with an average recovery time of 2.5 days with Broxil, compared with 3.4 days with penicillin V. Practitioner, (1960), 185, 214

In practice, more patients do seem to get better quicker with Broxil.

AVAILABILITY: Broxil (phenethicillin as phenethicillin potassium B.P.)

Tablets, 125 and 250mg.; Capsules, 125 and 250mg. For children, adults with sore throats, or patients who find difficulty in swallowing tablets or capsules, there is Syrup, fruit-flavoured, in 60ml. bottles. When dispensed, each 5ml. teaspoonful contains 125mg.

DOSAGE: Children 62·5—125mg. and Adults 125—250mg., four times a day. Prophylactic: Children 62·5—125mg. and

Adults 125mg., twice a day.

CONTRA-INDICATION: Penicillin allergy. SIDE EFFECTS: As with other oral penicillins. Additional information is available on request.

2weeks

In the treatment of psoriasis, triacetoxyanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin.

It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages—it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol—1,8,9-triacetoxyanthracene—has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

Pharmaceutical Journal (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency... It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable."

British Medical Journal (1966) 2, 993

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxyanthracene without any adverse reaction occurring" British Medical Journal (1967) 1, 682

"After three weeks treatment with triacetoxyanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

British Journal of Dermatology (1967) 79, 491

Psoriasis case history. Male patient aged 72 years with widespread chronic psoriasis admitted to hospital 18th October, 1966. Exolan Cream prescribed for application twice daily. Psoriasis practically clear; patient discharged 1st November, 1966.

Exolan is the only specific treatment for Psoriasis which has been given an A.2. classification by the Standing Joint Committee on the Classification of Proprietary Preparations. (A.2.: "A preparation of a single therapeutically active drug which has been shown to the Committee's satisfaction to have an acceptable degree of efficacy in relation to its toxicity and therapeutic indications and which in the light of alternative available preparations can be recommended for use. Exolan is entirely a product of British research.

IMPORTANT ANNOUNCEMENT

NEW DOSAGE RECOMMENDATIONS FOR MEDIHALER PRODUCTS

Recent reports in the medical press and by the Committee on Safety of Drugs, whilst pointing to the great value of bronchodilator aerosols for the relief of asthma, have drawn attention to the need for careful supervision of asthmatic patients under treatment with these aerosols.

In consultation with the Committee on Safety of Drugs modified instruction leaflets for patients have now been prepared. They include the following amended dosage recommendations:

Use *Medihaler* according to the instructions given to you by your doctor. He will advise you on the number of puffs to take for a treatment.

Caution: It is dangerous to exceed the recommended dose.

Each puff from *Medihaler* delivers a measured dose, and one or two (or at the most three) puffs are sufficient to treat most attacks. Do not use *Medihaler* again for at least thirty minutes unless you have been advised to do so by your doctor.

If at any time you find that your usual treatment is ineffective, or that you need more than eight treatments a day, do not take further inahalations but get in touch with your doctor without delay.

Children

Medihaler should be administered to children only under the supervision of a responsible adult, and strictly as recommended by the doctor.

Leaflets incorporating these new instructions are contained in all *Medihaler* cartons now leaving our factory. However, as it may be some time before these are in the hands of all patients, doctors may wish to have supplies of the amended leaflet for handing to their asthmatic patients at the next consultation. Supplies for this purpose can be obtained on request to Dept. P.S.D.

Ethyl Aminobenzoate	2%
Base	

A statement

about hypertension and 'Esbatal' (Bethanidine)

An authoritative British clinical team found that control of blood pressure was achieved with 'Esbatal' in 73 to 87 per cent of the hypertensive patients they treated. Toxicity was not seen. Side-effects were rare. Tolerance was not a problem. Postural side-effects could usually be overcome by adjusting the dosage, timing of administration or by use of a diuretic.

The team with its wide experience in treating hypertension concluded that 'Esbatal' compares favourably with other established drugs. It comments that 'Esbatal' "has advantages which outweigh relative disadvantages in comparison with guanethidine or methyldopa". The incidence of side-effects, toxic effects and feelings of malaise were less with 'Esbatal' than with these two drugs.

To quote again from the report: "There would now seem to be no case for beginning treatment with guanethidine or methyldopa in any new patient, but either may be useful in any patient in whom treatment with one of the newer preparations is unsatisfactory."

For a full account of the trial which covered 82 patients and extended over $2\frac{1}{2}$ years see the *British Medical Journal* 2nd December, 1967, pp. 519-521. Full information about 'Esbatal' brand Bethanidine Sulphate is available on request.

PRACTICES (Executive Councils)

For vacancies (except those in Scotland) apply on Form E.C.16A, obtainable from the Executive Council, "Vacancy."

CITY OF LINCOLN MEDICAL PRACTICE VACANCY

MEDICAL PRACTICE VACANCY

The Executive Council for the City of Lincoln invites applications for appointment to a single-handed medical practice of 3,500 patients. The vacancy will occur on May 14, 1968. The list is comprised of approximately 3,000 patients who reside within the city and 500 who reside in the adjacent county area. The area of the City of Lincoln has been continuously designated since April 30, 1965, and it is therefore anticipated that practitioners will qualify for the appropriate additional payment this year. Surgery and residential accommodation will be available for purchase at a valuation. Applications, on E.C.16A, obtainable from this Council, must reach the Executive Council for the City of Lincoln, 27 Tentercroft Street, Lincoln, by not later than Monday, March 18, 1968.

(H.6799)

CLAYTON WEST NR, HUDDERSFIELD (DENBY DALE U.D.)

Applications are invited for vacancy due to resignation on April 30, 1968, at Clayton West. "Open" area. List 2,148. Surgery accommodation available on rental at local health authority clinic. Successful applicant required to take over on May 1, 1968. Applications on Form E.C.16A (obtainable from the undersigned), should be submitted to B. England, Clerk, West Riding Executive Council, 5 St, John's North, Wakefield, by not later than the March 15, 1968. (H.6830)

EXECUTIVE COUNCIL FOR SOUTH-EAST LONDON AND KENT

EXECUTIVE COUNCIL FOR SOUTH-EAST LONDON AND KENT
THAMESMEAD
(LONDON BOROUGH OF BEXLEY)
Applications are invited from experienced general practitioners for the first of a number of appointments of general medical practitioners to practise in the new riverside community of Thamesmead which is being developed by the Greater London Council within the areas of the Boroughs of Bexley and Greenwich. It is expected that the first houses will be completed in Bexley in June. 1968, and it is intended that the appointed medical practitioner should be available to give services to the new residents. The practitioners appointed will work closely with the local health authorities and local hospitals and will also be associated with the Medical School of Guy's Hospital in undergraduate teaching. A Joint Health Services Advisory Committee has been formed to advise the bodies concerned on the operation of these arrangements. It is intended that the practice will be based on a temporary health centre pending the building of the first permanent health centre which will form part of the projected medical plan for the whole area. Thamesmead has been approved as a designated area for which the new increased (Type D) initial practice allow ances will be payable.

Further information regarding the appointment may be obtained from the Clerk of the Executive Council for South-East London and Kent. 11 Station Road. Maidstone. Kent adplications on forms E.C.16A must be received by him not later than March 20, 1968.

Service in the cause of medicine

ARE YOU A

Hospital Registrar?

Make your mark in the Pharmaceutical Industry

Hoechst Pharmaceuticals can make life interesting for you-professionally

We need another Medical Adviser in our Clinical Investigation Department to prepare submissions on novel compounds for consideration by the to prepare submissions on novel compounds for consideration by the Committee on Safety of Drugs and to arrange for their clinical trial. The man who can join this small, active team will find the work immensely rewarding. His job will take him all over the U.K., occasionally to Europe. He will be 35 years old or under, a British graduate, and ideally at present a Registrar in medicine or pathology. Higher medical qualification, whilst desirable, is not essential; applicants must, however, have had all-round hospital experience. Ability to communicate is important and the successful applicants. experience. Ability to communicate is important and the successful applicant will be a good mixer.

Initial salary will be better than that of a Senior Registrar and a car will be

provided. Conditions of work are excellent. The Company operates a non-contributory pension scheme and free life insurance and offers B.U.P.A. membership.

Please apply in writing, with curriculum vitae, to The Managing Director,

Hoechst Pharmaceuticals Limited,

Hoechst House, Kew Bridge, Brentford, Middlesex.

(16823)

Johnson Johnson (GL. BRITAIN) LIMITED

MEDICAL ADMINISTRATOR

Registered Medical Practitioners are invited to apply for the post of Medical Administrator with Johnson & Johnson (Gt. Britain)

The post is a senior one of top management level. It offers excellent career opportunities for a suitably qualified man up to about 35 years of age, with a particular interest in applied medicine and surgery and who has had experience in general practice and hospitals.

As a key member of the Research and Development Division, the activities of the Medical Administrator will encompass the wide range of surgical and medical products manufactured and under development by the Company.

It is anticipated that he will play an active role in the formulation and implementation of the Company's medical policy. Additionally to advising on existing products, he will be involved in the development and clinical evaluation of new products. He will be expected to maintain relationships with professional bodies and to represent the Company's medical interests. This will provide interesting opportunities for travel.

Salary will be commensurate with the qualifications and experience of the applicant and will be accompanied by excellent fringe benefits.

Please write for an application form to the

Technical Services Director, JOHNSON & JOHNSON, (Gt. Britain) Ltd., Cosham, Hants.

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

approved. I nest came into tote of occords, 1990 in Section 1990,

SENIOR HOUSE OFFICERS: £1.450 per annum in the first year; £1.550 per annum in the second year; £1.650 per annum in the third or subsequent years. Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

REGISTRARS: £1,650 per annum, rising by four annual increments of £100

REGISTRARS: £1.650 per annum, rising by four annual increments of £100 to £2.050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those on the third and subsequent points will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRARS: £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £2,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No de uctions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSETATION

MEDICAL ASSISTANTS: £1,850 per annum rising by fourteen annual increments of £100 to £3,250.
Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

CONSULTANTS: £3,200 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885.

Deductions of £350 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence).

Doctors with satisfactory training will not be excluded from consideration for appointment to consultant posts on the grounds that they have spent little or no time as senior registrars.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff. Memoranda on the following subjects of particular interest have been issued by the Ministry of Health: Standard of Residential Accommodation, Telephone Charges, Removal Allowances, Study Leave.

Further details may be obtained from the Hospital Secretary, or summaries of the Memoranda may be obtained from the Secretary, British Medical Association. (August, 1967)

These studies show why Pro-Banthine* reduces the pain of peptic ulcer

E.B., male, age 48. Normal antral contraction. Pyloric opening is not seen. It is difficult to differentiate a deep prepyloric contraction from a "pyloric fleurette" of true pylorus.

These intra-gastric photographs were taken by the techniques of continuous cine-fibregastroscopy during the intravenous administration of Pro-Banthine, and demonstrate clearly its ability to inhibit gastric motor activity at a low dosage level. The ability of Pro-Banthine, whether given orally or parenterally, to reduce spasm, coupled with its

Same subject after 6 mg. of propantheline bromide intravenously; antral contractions ceased. The pyloric orifice remains open and is easily identified. Better visualisation of the antrum is also obtained.

superior activity in reducing gastric acid secretion, leading to rapid pain relief, is the reason for the widespread use of the compound in the treatment of peptic ulcer.

Cine-gastroscopic studies presented to the Annual Meeting of the American College of Gastroenterology. Bal Harbor, Fla. October 1965.

five patients. 10 ml. of blood was taken for secondition determination from the fasting patient who thepatost three tablets of 'Ferromyn S' (ferrous-succluste/succluse acid mixture). Serum-iron levels were repeated 3 hours later. An increase of 100 μg. per 100 ml. or more in the serumiron indicates normal iron absorption. The iron cablets used in the test can be the proparation selected for meatment of the patient; but lately we have given all patients ferromyn S, since in our Good Green the tree for the most efficetive oral iron tablet. We feel that from malabsorption is certainly present if it occurs when ferromyn S is used. It is also better for comparison with other patients and for comparison with later tests in the same patients if a standard test is evolved. The test can be repeated with 800 mg, ascorbic acid taken orally at the same time and in. addition to the iron. This test was --

Why Ferromyn-S is more effective than other oral iron treatments.

The double radio isotope technique for measuring absorption of substances in the body* eliminates the wide range of variables present in the normal clinical trial. Applications of this technique in experiments to determine the efficacy of common iron salts led to the discovery that Free Succinic Acid actively promotes the absorption of iron. When added in its optimum ratio an increase of 30% or more can be expected.

What is the value of 30% greater absorption?

It is now widely accepted that the incidence of side effects associated with oral iron therapy is in direct ratio to the dosage of elemental iron. Ferromyn-S (Ferrous Succinate & Free Succinic Acid) contains less elemental iron than the conventional iron tablet but, because of the higher absorption, gives a better Haemoglobin response. At the same time, this combination of low iron

dosage and greater absorption significantly reduces the incidence of side effects encountered with the common iron salts. Ferromyn-S, therefore provides a high efficiency therapy at a cost of less than 2d. per day.

Full information is available on request.

GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

The Opportunity Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

understanding of the world and its people.

The Advantages Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained. Salaries Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum. Training Scheme for Recently Qualified Doctors. In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

Where required ANTIGUA, BARBADOS, FALKLAND ISLANDS, KENYA, LESOTHO, MONTSERRAT, ST. LUCIA, ST. HELENA, ST. KITTS, ST. VINCENT, TANZANIA, UGANDA, ZAMBIA.

SPECIALISTS TANZANIA

FINCHLEY 5283

NORTHUMBERLAND HOUSE, N.3 A psychiatric nursing home. Elderly patients accepted, Moderate terms. Apply Resident Physician, 237 Ballards Lane.

ST. ANDREW'S HOSPITAL NORTHAMPTON President: Lieutenant-Colonel J. Chandos-Pole, O.B.E. Medical Director: James Harper, M.B., F.R.C.P.(Edin.), D.P.M.

James Harper, M.B., F.R.C.P.(Edin.), D.P.M.
This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illness. The fees range from twenty guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the vilias in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a ningle courts, etc. A recreation and occupation centre, known as Gloucester House, has been opened recently, which includes an occupational therapy department, a swimming pool, a squash court and a library with an adjoining reading room.

Ing reading room.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

Charges for treatment at St. Andrew's are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

For terms and further particulars apply to the Medical Director (Telephone No. 34354 Northampton), who can be seen in London by appointment.

•tolbutamide is the safest oral hypoglycaemic drug available for general use and it should be tried first•

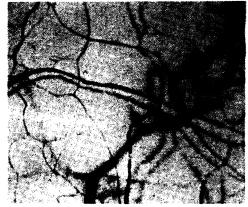

Today's Drugs, B.M.J., 1963, 1,521.

Nestinon tablets contain 0 · 5G tolbutamide B.P. Full information available on request.

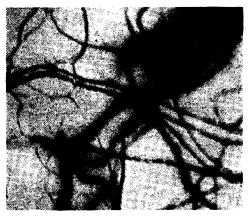

RONICOL*TIMESPAN*

gives day-long relief from symptoms due to 'poor peripheral circulation'

Microphotograph of the bulbar conjunctiva in a man aged 65 with peripheral vascular disease.

The same area two hours after a single Ronicol Timespan tablet, showing marked vasodilation.

Ronicol Timespan presents a powerful vasodilator (β -pyridyl carbinol) in a long-acting tablet form which rapidly produces sustained vasodilation. Because the action is prolonged, peripheral vascular diseases can be treated with a convenient, twice-daily dosage schedule.

Ronicol Timespan is indicated for:

peripheral vascular diseases giving rise to 'poor peripheral circulation'

intermittent claudication

cramps, including night cramps

vasospasms such as Raynaud's phenomenon, acrocyanosis and other ischaemic conditions of the limbs.

*Ronicol is the registered trade mark applied to pharmaceutical preparations containing β-pyridyl carbinol, the alcohol corresponding to nicotinic acid. Timespan is the registered trade mark applied to long-acting dosage forms.

Full information is available on request from Roche Products Ltd 15 Manchester Square London W1 J215
