

OCTOBER 4—THE PROBLEM. A large weeping ulcer infected with staph. pyogenes and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times.

TWO WEEKS LATER—DESLOUGHING. After treatment with Aserbine Cream to the ulcer and Aqueous Icthyol to the surrounding skin, complete desloughing has taken place.

NOVEMBER 14—HEALING. The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

When the presence of slough delays healing...

. in varicose ulcers, burns, pressure sores, trophic ulcers, etc.

experience has shown that ASERBINE is a true desloughing agent which does not affect living tissue

Presentation: Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

Method of Application: Aserbine Cream should be applied once or twice daily. o Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.

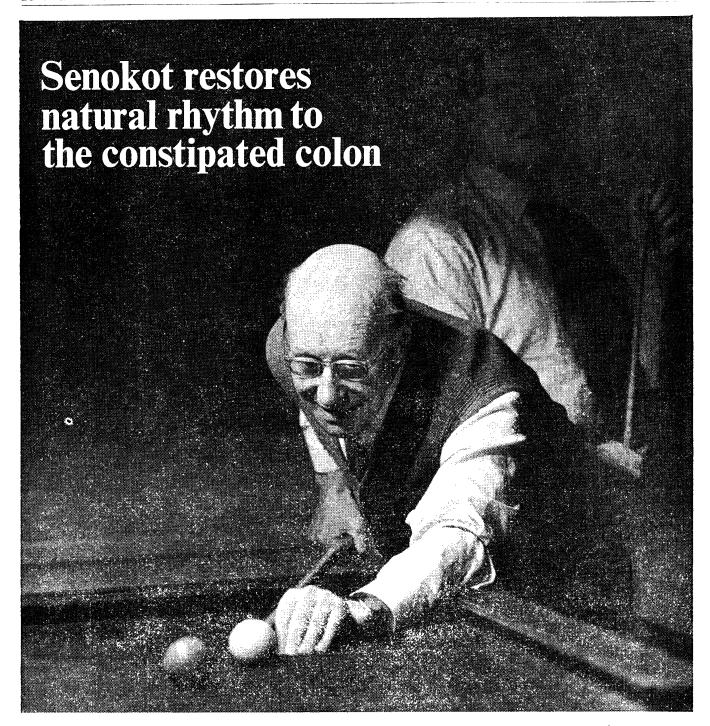

Active Ingredients	In 100 G.	In 500 ml
Malic Acid Ester of	cream	solution
propylene glycol	160 mg.	5.25 G.
Malic Acid	250 mg.	7.65 G.
Benzoic Acid	25 mg.	0.75 G.
Salicylic Acid	5 mg.	0.15 G.

ERBINE the true desloughing agent

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

From dispensing packs, the basic NHS cost of a teaspoonful of granules or two tablets is about a halfpenny; thus treatment with Senokot is very economical.

In addition to granules and tablets, there is now a syrup presentation — a highly acceptable form, specially suited to the needs of children and elderly patients.

Tablets: 50, 100 and 200. Granules (chocolate flavoured): 56 and 170 grammes. Syrup: 150 millilitre bottle.

RECORDING AN OPERATION?

Recording an operation or addressing students whilst concentrating on your immediate work can prove exceptionally difficult.

To solve this LUSTRAPHONE have developed a mask michrophone, it weighs 1 oz is 1" square and slips inside the mask. Breathing sounds are eliminated and when used with the "Radiomic" there are no trailing cords. In fact there is absolutely nothing to distract the surgeon. He merely comments on his actions and these comments are relayed to an assembly or recorded. This is the ideal method of instruction especially when combined with closed circuit television or cine film equipment.

Send for free illustrated literature giving full details of MASK Microphones and "RADIOMIC" Equipment.

Studies in Psychiatry

A Survey of Work carried out in the Department of Psychiatry of the Institute of Psychiatry, under the Chairmanship of Sir Aubrey Lewis, 1945–1966.

Edited by MICHAEL SHEPHERD

Professor of Epidemiological Psychiatry, Institute of Psychiatry, University of London and

D. L. DAVIES

Physician, The Bethlem Royal and Maudsley Hospitals

When he retired in 1966 after twenty-one years as Professor of Psychiatry at the Institute of Psychiatry, Sir Aubrey Lewis had succeeded in laying the foundations of academic psychiatry in Great Britain. Some notion of its scientific breadth and depth can be obtained from the scope and quality of the research which he initiated and guided. Most of the essays in this book have been written by senior members of his department and review many studies on various aspects of psychiatry which were carried out over a period of twenty years. Taken together, these essays constitute an important source of knowledge for everyone interested in British psychiatry and its most distinguished exponent.

The Early Diagnosis of the Acute Abdomen

SIR ZACHARY COPE

Consulting Surgeon, St Mary's Hospital, London

The text for the new edition of this surgical classic, the first edition of which appeared forty-seven years ago, has been revised throughout and new material added to several sections. The influence of the therapeutic use of adrenal steroids on the symptoms of acute abdominal disease is discussed and a new section on the value of paracentesis of the abdomen in some cases of abdominal injury and disease has been included. Additions have been made to the sections on gall-stone obstruction, diverticulitis of the colon, and auscultation of the abdomen. Thirteenth Edition 212 pages 59 illustrations 28s net

The Classification of Depressive Illnesses

R. E. KENDELL

Lecturer, Institute of Psychiatry, University of London

The author describes a series of studies designed to clarify the prolonged controversy over the classification of depressions. Data from a series of over a thousand patients with depressive illnesses were analysed in several different ways. Discriminant function analyses were performed to test the validity of existing diagnostic criteria and a principal component analysis to identify clusters of correlated symptoms independently of these existing criteria. The differences in symptomatology, treatment, and outcome of different diagnostic categories were studied and the successive illnesses of patients with recurrent depressions were compared. Finally, a further series of one hundred patients was studied clinically and rated on scales derived from the earlier statistical studies. 112 pages 17 illustrations 40s net (Maudsley Monographs, No. 18)

Parasitic Disease and Urbanization in a Developing Community

E. NNOCHIRI

Associate Professor in Medical Parasitology and Microbiology University of Lagos Medical School, Nigeria

Developing countries are usually associated with the concept of an agricultural economy; the problems of urbanization have therefore always taken second place and the idea has grown that parasitic diseases are only of importance in rural areas. The author shows how erroneous this idea can be by drawing his material from the two largest cities in Nigeria—Ibadan and Lagos. He carefully examines the socio-economic, religious, and other factors which influence parasitic infections in cities and emphasizes the importance of migration from rural areas. The book provides some of the vital information needed for the rational approach to planning health measures in Nigerian cities.

An Atlas of Clinical Neurology

JOHN D. SPILLANE

Consultant Neurologist, The United Cardiff Hospitals and the Welsh Hospital Board

The outstanding feature of this book is the teaching value of its illustrations. From his collection of several thousand photographs the author has selected over 800 and appended legends which in many cases take the form of summarized case histories and are in themselves a further aid to learning. The arrangement has been for each neurological condition to begin with a short introduction and to be followed by a section of illustrations showing all aspects of that condition. Dr. Spillane's aim has not been to produce a formal textbook but to show the practitioner how far the use of his senses will take him when struggling with the burdens of diagnosis at the bedside.

private treatment today

In this space BUPA reports from time to time, on matters which may be of interest to those concerned with private treatment in this country. BUPA's own interest is clear and declared; we believe a strong private sector in medicine to be an essential corollary to a successful public sector. Alone among the provident associations, we are sponsoring (through Nuffield Nursing Homes Trust) the creation of new and expanded facilities for private treatment

BUPA'S Twenty-First Anniversary

It is now twenty-one years since, in April, 1947, a number of small provident associations amalgamated to form a company limited by guarantee called the British United Provident Association.

During its first year BUPA's membership totalled only 38,000 and even the most optimistic of the Association's founder members could hardly have foreseen the dramatic growth in membership that was to take place over the next two decades.

In 1956 membership exceeded 250,000—ten times that of five years before. Today there are 630,000 subscribers to BUPA and, including dependants, the total number of people protected by the Association has reached almost 1½ million—a rate that shows quite clearly the value that so many people place on private treatment.

To mark the twenty-first anniversary, a history of BUPA has been commissioned, tracing the growth of the Association from its small beginnings in 1947 to the present day. In addition, the twenty-first anniversary was celebrated with a reception at the Savoy Hotel on March 11.

The Unit Scheme

BUPA's Unit Scheme, introduced last November, has met with a very encouraging response, both from new subscribers and from existing subscribers—it is designed to give the widest possible choice of benefits and to guarantee the subscriber continuity of benefit. Since the inception of the new Scheme on January 1, some 40,000 new and existing subscribers have joined it.

International Conference on Voluntary Health Insurance

E. D. Roberts. General Manager of BUPA, leaves London in April for Sydney, where he will attend the 2nd International Conference on Voluntary Health Insurance which takes place from April 29 to May 4. The first International Conference, which was held in Dublin in 1966, attracted more than one hundred delegates from thirteen countries, and was a valuable forum at which many items of common interest to non-profit medical schemes were discussed.

Mr. Roberts was a member of the five-man committee which met in London last year to prepare a draft constitution for an International Federation of Voluntary Health Insurance Organizations. This constitution will be submitted to the Sydney conference. At present about two hundred million people throughout the world are covered by Voluntary Health Insurance.

THE A.A. SUPPLY CO. LTD. (Dept. B.M.), 31/33 Priory Park Road, London N.W.6. Anxiety. Twisting paper clips out of shape does not necessarily indicate the tense patient. However, many such doodlers do reach their doctor's surgery requiring treatment for underlying anxiety states. By advice and understanding, and where necessary, the help of a safe benevolent drug like Equipose, anxiety and tension can be effectively eased. Equipose calms rapidly and is unusually free from side-effects.

Let them eat cake?

A *little* of what you fancy does you good—even in babyhood.

But you would probably agree that, today, many babies are getting too much starchy food. Yet any mother can give her baby a balanced diet of meats, vegetables, fruits, eggs, fish and cheese, by using Heinz Strained and Junior Foods—now available in 75 varieties.

In the last year, special breakfast varieties have been introduced. And the fruit varieties are ideal for tea-time use . . . preferably without cake to follow.

For further information about Heinz Strained and Junior Foods, please write to the Food Science Advisory Service, H. J. Heinz Company Ltd., Hayes Park, Hayes, Middlesex.

Heinz Baby Foods for a balanced diet

anything you can do

l can do better

Plenty of antacid preparations work, but there will always be the patient who fails to respond satisfactorily to standard therapy. Possibly he experiences side-effects, diarrhoea maybe, or perhaps his white chalky mixture is so unattractive that he "forgets" to take it.

Glymaxil is an antacid that is just that much better.

- ☐ It has no laxative effect.
- It relieves pain promptly and has been shown to be "significantly more effective" than aluminium hydroxide.
- It tastes refreshingly of peppermint—is clean and easy to take.
- Uniform doses and activity are assured because Glymaxil is a soluble antacid.

a striking demonstration of Lincocin penetration

Assay organism: Streptococcus hæmolyticus

Lung tissue
Assay organism: Staphylococcus aureus

Lung tissue
Assay organism: Diplococcus pneumoniae

Since antibiotic effectiveness is dependent upon concentration at the site of infection, it is obvious that antibiotic diffusion and tissue penetration are of supreme importance. The accompanying photographs of an experiment in animals demonstrate Lincocin's capacity in this respect.

A healthy dog weighing 9.5 kg. was injected intramuscularly with 25 mg./kg. of lincomycin hydrochloride (base equivalent). After 90 minutes tissue samples were excised and placed on Petri dishes in which the agar had previously been seeded with pathogenic strains of Staphylococci, Streptococci and Pneumococci, respectively. Following incubation these photographs were taken of the plates containing either heart or lung tissue. The clear zones show that within 90 minutes Lincocin had penetrated these tissues in concentrations sufficient to inhibit growth of the pathogenic inocula.

Lincocin Capsules: Each capsule contains lincomycin hydrochloride monohydrate equivalent to 500 mg. lincomycin base, in bottles of 12 and 100. Lincocin Sterile Solution: In 2 ml. ampoules. Each 2 ml. contains lincomycin hydrochloride monohydrate equivalent to 600 mg. lincomycin base.

Lincocin Syrup 250: Each 5 cc. contains 250 mg. lincomycin (as lincomycin hydrochloride monohydrate), in bottles of 60 cc.

BAD LEGS? Tired heavy aching legs

Before 'bad legs' become an ugly problem-**PAROVEN®**

All the early symptoms of venous insufficiency -tired, heavy, aching legs, skin disorders, and night cramps—respond to PAROVEN therapy.

PAROVEN, containing trihydroxyethylrutoside, reduces the increased capillary permeability which "is at the bottom of the majority of the complications of varicose disorders".

Indications

Conditions associated with lower limb venous insufficiency.

Tired, heavy, aching legs. Night cramps. Skin disorders.

Superficial thrombophlebitis.

Varicose states.

Dosage

1 tablet 3 or 4 times a day. Maintenance dosage [as little as one tablet a day] may be adjusted to patients' needs.

Tablets of 250 mg. hydroxyethylrutosides [not less than 45% troxerutin]. Tins of 20-100 tablets.

PAROVEN—a new approach to treatment promises 'younger' legs

ZYMA [UK] Limited Godalming, Surrey.

® Denotes registered trademark

Psoriasis can be for life. It's hard for your patients to face.

You can make it a little easier by prescribing Alphosyl.

Over the years Alphosyl has proved the most effective known treatment for Psoriasis.

And Alphosyl continues to prove itself. Everyday there is new evidence of Alphosyl's effectiveness.

"Trials in the United States of America have shown that . . . 70% to 80% of patients were helped and 50% or more had their lesions cleared completely by the treatment."*

Long after 'revolutionary' advances have been tried and forgotten, Alphosyl remains the product most widely prescribed for the specific treatment of Psoriasis.

"It certainly avoids the hazards of antimetabolites and local and systemic corticosteroids, and it does not have the disadvantages of staining, burning and discoloration that occur with other topical preparations."*

Alphosyl is available as a

Alphosyl is available as a 5% refined alcoholic extract of coal tar and allantoin in a cream and lotion.

Stafford Miller Ltd., Hatfield, Hertfordshire, England.

She will appreciate the convenience of Candeptin Vaginal Tablets, a new extension of the specific treatment for monilial vaginitis

Rapid symptomatic relief and decisive resolution of infection2 are the proven results of Candeptin vaginal ointment in the treatment of monilial vaginitis caused by Candida albicans. Now Candeptin vaginal tablets provide the same effective fungicidal treatment (candicidin), in a more convenient form. They are "... easier to use, and appear more suited to obstetrical patients, in whom an applicator might be contra-indicated".3

IN THE LABORATORY

candicidin has been shown4 to inhibit Candida albicans at 0.05 mcg/ml even after two days' incubation. Under the same circumstances nystatin had to be used at 5 mcg/ml to achieve inhibition.

IN CLINICAL PRACTICE 1,2,3,5,6

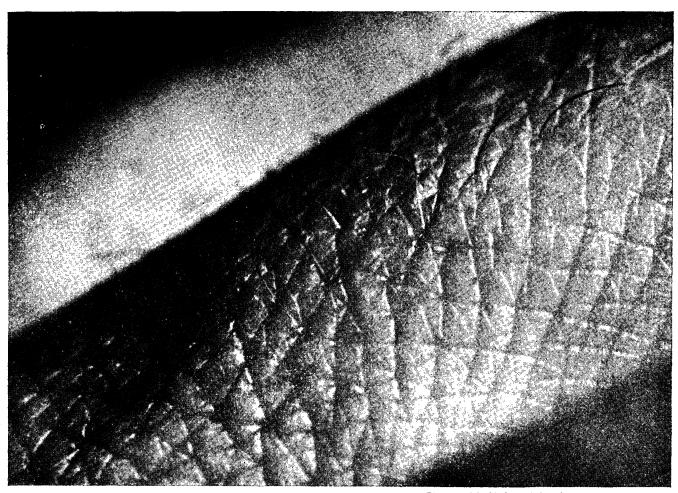

Candeptin gives equally remarkable results. Out of 312 women treated, both pregnant and non-pregnant, 255 were cured after one course of treatment. A further 33 responded to a second course giving an overall success rate of 93%.

Success of the incorporation of silicones with nitrocellulose provides double skin protection in the treatment of bedsores, napkin rash and inflammation from body fluids

Dimethicone 350 BPC and nitrocellulose in new SYL Cream

Most silicone creams hitherto available depend for their skin protective functions solely on the properties of silicones. In Syl Cream these are greatly enhanced by the incorporation of a film-producing plasticising agent, nitrocellulose. Series of tests to determine water-repellent properties have demonstrated the superiority of Syl Cream over other formulations.

This unique silicone and nitrocellulose content provides a protection against aqueous irritants which is not destroyed by washing.

Syl Cream also contains the modern

quaternary ammonium antiseptic benzalkonium chloride, the action of which is to suppress ammonia-producing agents, so the Syl Cream assists healing while it protects.

Indications: Syl Cream is indicated in the following conditions:—

Bedsores; inflammation from body fluids (colostomy, ileostomy, napkin rash, pruritus due to urine leakage, diarrhoea, etc.); soreness from perspiration between the legs or under the breasts; eczematous skin eruptions, and to protect the skin around varicose ulcers; occupational dermatoses, and to protect the hands against detergents, soaps, etc.; allergic dermatoses (contact dermatitis, sensitivity to antibiotics, local anaesthetics, etc.).

Syl Cream Active Constituents: Dimethic. 350 BPC 10.0%, Benzalk.Chlor. Soln. BP 0.02%, Nitrocellulose 1.5%.

Presentation: 60 g. tubes at 3/1 and 500 g. jars at 20/- at basic N.H.S. prices plus P.T.

Professional samples and literature available on request from

LLOYD-HAMOL LIMITED, 103 Mount Street, London, W.1. SYL is a Trade Mark.

for pain that goes on-and on-a

Depronal SA does the same...

Now, for the first time, patients with protracted or recurrent pain can obtain relief for up to 12 hours at a time with a single dose. Depronal SA is a new analgesic preparation which releases its active constituent over an 8-12 hour period, unaffected by variations in gastro-intestinal motility, pH or temperature. Depronal SA frees the patient in pain from the routine of a four-hourly dosage regime. One capsule provides a whole day free from pain, and another ensures an undisturbed night's sleep. Capsules of 150 mg. dextropropoxyphene hydrochloride in containers of 50 and 250.

For pain that lingers, relief that lasts

A statement

about hypertension and 'Esbatal' (Bethanidine)

An authoritative British clinical team found that control of blood pressure was achieved with 'Esbatal' in 73 to 87 per cent of the hypertensive patients they treated. Toxicity was not seen. Side-effects were rare. Tolerance was not a problem. Postural side-effects could usually be overcome by adjusting the dosage, timing of administration or by use of a diuretic.

The team with its wide experience in treating hypertension concluded that 'Esbatal' compares favourably with other established drugs. It comments that 'Esbatal' "has advantages which outweigh relative disadvantages in comparison with guanethidine or methyldopa". The incidence of side-effects, toxic effects and feelings of malaise were less with 'Esbatal' than with these two drugs.

To quote again from the report: "There would now seem to be no case for beginning treatment with guanethidine or methyldopa in any new patient, but either may be useful in any patient in whom treatment with one of the newer preparations is unsatisfactory."

For a full account of the trial which covered 82 patients and extended over $2\frac{1}{2}$ years see the *British Medical Journal* 2nd December, 1967, pp. 519-521. Full information about 'Esbatal' brand Bethanidine Sulphate is available on request.

Burroughs Wellcome and Co. (The Wellcome Foundation Ltd.) **London**

For years he's been dosing himself with antacids For years he's been suffering with indigestion

When indigestion and malabsorption suggest replacement of deficient enzymes – replace them as completely as possible.

After operative procedures on the gastro-intestinal tract and in malabsorption due to various enteropathies, lipase, trypsin, amylase, cellulase and oxbile extract may be valuable aids to management. A daily dose of six Cotazym B tablets provides sufficient of these substances to digest 50 g. of fat, 100 g. of protein, 250 g. of starch and 480 mg. of cellulose.

Dosage: 1 or 2 tablets during meals.
There is no contraindication.

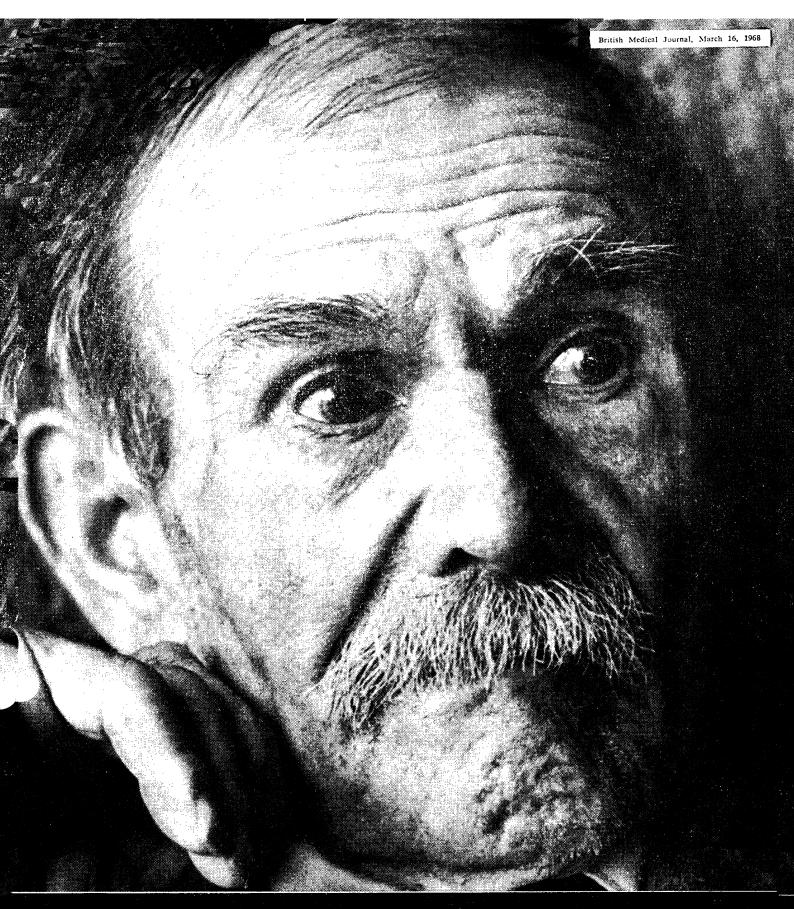

Packs: Foil-stripped in cartons of 30 and 120.

Less income tax and surtax now-more pension later!

Allowing for inflation, a doctor in a General Practice for 35 years may get about half his final income as a pension from the Superannuation Scheme. But is that sufficient to promise a carefree and comfortable retirement?

You could increase your pension by 50%-often more-with one of our Personal Pension Policies. In addition you receive full relief of income tax and surtax on the premiums you invest.

Bonuses declared every three years increase the pension. You are not committed to pay a fixed annual premium. You pay as you like in accordance with your earnings.

Should you die before pension age all payments are returned to your estate plus compound interest at 4%. You may take the pension at any age between 60 and 70.

For full details of these unique policies, specially designed for General Practitioners, write for details quoting ref. No. 001.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of Lactobacillus acidophilus which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacterial 2 and thus contribute to its rapid preponderance over other species.

oral treatment with antibiotic-resistant L. acidophilus in the form of ENPAC has been shown to eliminate Candida from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight³ 4 and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

COMMERCIAL APPOINTMENTS

PHILIPS PHILIPS

MEDICAL ADVISER

(Part time)

required by London Carriers Limited as part-time Medical Adviser at their Sywell site, close to Northampton. The Medical Adviser appointed would require to spend a total of not more than two hours per week. Present holder of the post is retiring from the job for practice reasons. Preferred age 35-45 years. B.M.A. conditions of service and remuneration.

Applications for this appointment should be made to:

Dr. A. M. Scott, Chief Medical Officer, Philips Croydon, Commerce Way, Purley Way, Croydon, CR9 4JA.

(17163)

MEDICAL DOCTOR LINICAL BIOCHEMIST

These appointments are with an International Company (located in the Home Counties), with diversity of interests and activities within the medical field. Both will work within a commercial operating division of the company, which is concerned with the development of advanced electronic and clinical chemistry diagnostic systems.

The specifications and offers for our ideal candidates will be as

MEDICAL DOCTOR

Aged at least 35 years.

He will be involved at a senior level in the development of policies and will advise on the total operation in relation to all medical/clinical matters throughout the European area.

The ability to lead subordinate staff towards the achievement of Company objectives is essential and will call for a man with a well-balanced, outward-going personality.

Starting salary will depend upon experience but will be not less than £3,000 per annum. A company car will be provided.

CLINICAL BIOCHEMIST

Aged at least 25 years. Could be a medical practitioner or a science graduate, and the possession of the recently instituted Mastership in Clinical Biochemistry would be a decided advantage.

He will give biochemical/technical support to the operation and will be involved in some travel in the U.K. and in Europe. In addition he will be required to conduct training of other personnel in biochemical techniques and will assist in the development of policies and procedures.

Starting salary will be not less than £2,250 per annum.

All replies will be treated in strict confidence and those required to attend an interview will be asked to complete an appropriate questionnaire. Therefore in the first place brief but relevant details regarding qualifications and experience should be sent to: Position No. ARD 1428.

Austin Knight Limited P.O. BOX 1DS, LONDON, W.I.

All applications are recorded, acknowledged and forwarded to our clients. Companies in which you are not interested should be listed in a covering letter to the Position Number Supervisor.

Commercial Appointments-contd.

The Wellcome Foundation Limited

Virologist

An opportunity exists for an experienced Virologist to work for the Wellcome Foundation in conjunction with the Virus Laboratories at the Royal Veterinary College, London N.W.1.

The successful candidate, who will be a member of the staff of the Wellcome Foundation, will be seconded for a period of up to three years to work under the direction of Professor A. O. Betts at the Royal Veterinary College and will be responsible for the preparation of mono-specific reference sera against human and animal viruses. He will also be expected to undertake research on viral infections in gnotobiotic animals. He may also be required to undertake a limited amount of undergraduate teaching and to supervise research students. The possession of a veterinary or medical qualification would be an advantage, but is not essential. Contributory superannuation scheme. Salary will be consistent with the senior nature of this post and will depend upon experience and qualifications.

Details of the post and application form can be obtained (quoting reference AM.383) from the Senior Personnel Officer, The Wellcome Research Laboratories, Langley Court, Beckenham, Kent, BR3 3BS.

SANDOZ

DEPARTMENT OF EXPERIMENTAL THERAPEUTICS LONDON & BASLE

The Department of Experimental Therapeutics is concerned with specific scientific questions relating to human and clinical pharmacology. The more complex problems of therapeutic evaluation which cannot be satisfied by formal controlled clinical trial are dealt with by this Department, employing an experimental approach.

Members of the Department carry substantial responsibility and enjoy a measure of independence; hospital affiliations on a part-time basis are encouraged. The duties call for a wide knowledge of both the experimental and the clinical fields of medicine.

Applicants should possess sound clinical experience, preferably a higher medical qualification and, in addition, experience in a basic science-for example, physiology, pharmacology, biochemistry, immunology, etc. Some training in clinical pharmacology would be an advantage but is not essential,

In the first instance, applications, marked 'In Confidence', for positions in the Department of Experimental Therapeutics in London and in the Sandoz parent organisation in Basle, Switzerland, should be made in writing to The Research Manager, Sandoz Products national Limited, Sandoz House, 23 Great Castle Street, London, W.1.

Ovulen , the most widely prescribed oral contraceptive in Britain today.

Doctor experience The physician finds Ovulen I mg. not only an effective contraceptive, but also one which is very well tolerated. More prescriptions are written for Ovulen I mg. than for any other oral contraceptive in Britain.

Clinical experience Ovulen 1 mg. was subjected to extensive clinical trials in 2,500 women before it was made commercially available. Today, more than 16,000 women have been involved in clinical trials for over 190,000 cycles of experience.

Patient experience The acceptability of Ovulen 1 mg. is, of course, an important reason for its wide usage. Today millions of women in Britain and overseas use this low dose oral contraceptive.

Ovulen is a Trade Mark

Company experience Searle's experience in oral contraception is well known. In the 14 years since Searle developed the first

oral contraceptive, its products have been used by many millions of women. Ovulen I mg is widely used in national family planning programmes throughout the world and in routine clinical practice.

Full information is available on request.
G. D. Searle & Co. Ltd.,

High Wycombe, Bucks.

Ovulen contains 1 mg. ethynodiol diacetate and 0.1 mg. mestranol.

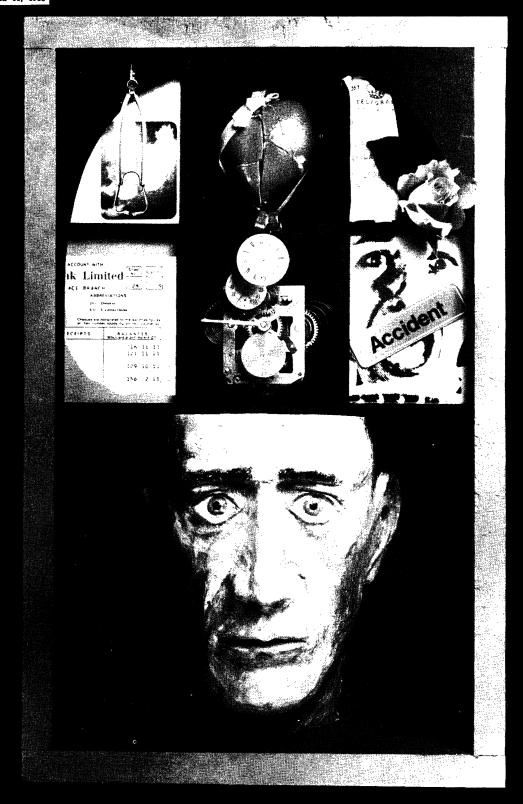

What has apparently received little publicity and certainly very much less than it deserves is the potential of the method (oral contraception) for the production of highly desirable and pleasant side-effects, such as the heartening degree of personal happiness that seems to come to the patient, presumably from the confidence in the future that the method affords. I have also been favourably impressed by how readily and effectively this sense of happiness and confidence extends to other members of the family, husband and existing children . . .

Clinical Trials Journal (in press)

Ovulen

Searle

as surely as problems promote insomnia 'Tuinal' promotes sleep

Whatever the insomnia problem 'Tuinal' will give your patient a good night's sleep. 'Tuinal' promotes sleep so surely because it is a balanced combination of two hypnotics—one to give prompt onset, one to ensure that sleep lasts the whole night through.

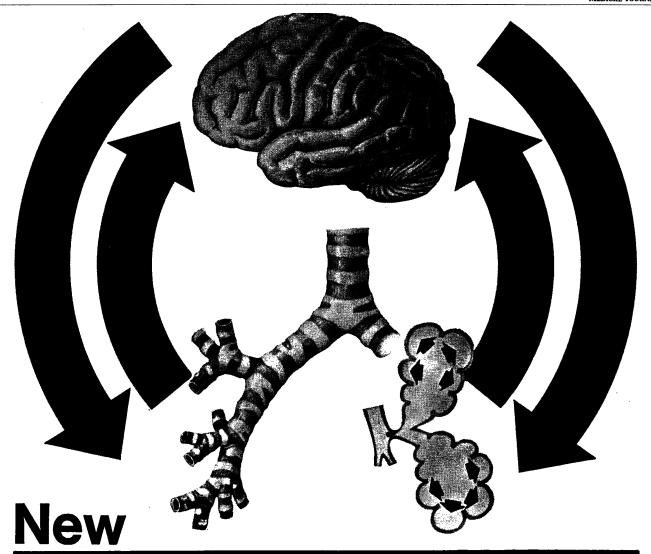

Whether your patients have trouble getting off to sleep or whether they waken too early, 'Tuinal' is the ideal all-rounder. Moreover, you may prescribe 'Tuinal' with confidence because extensive clinical

experience has confirmed its safety at the recommended dosage level. Within 30 minutes of taking 'Tuinal' your patients can safely pigeon-hole tonight's problems until the morning.

"Tuinal 200 mg: each 'Pulvule' contains quinalbarbitone sodium 100 mg, amylobarbitone sodium 100 mg.

Alupent - Sed®

(orciprenaline sulphate 1-(3,5-dihydroxyphenyl)-2-isopropylaminoethanolsulphate and amylobarbitone)

When the soma reflects the psyche in the asthmatic patient...

When the psyche reflects the soma in the chronic bronchitic patient...

Alupent - Sed®

is a rational treatment.

Each tablet of Alupent-Sed contains: 20 mg. of orciprenaline sulphate 20 mg. of amylobarbitone.

This combination ensures that the patient receives the optimum dose of Alupent to relieve the wheezing and sufficient sedation to relieve anxiety.

Dosage:

Adult — 1 tablet of Alupent-Sed four times daily.

Children 6-12 years— $\frac{1}{2}$ tablet Alupent-Sed 3-4 times daily.

Contra-indications:

Alupent-Sed should not be given to patients with thyrotoxicosis. Alupent-Sed should not be given to patients who have a known idiosyncrasy to barbiturates, or a condition in which barbiturates are contra-indicated.

Caution:

In view of the known interaction between sympathomimetic amines and monoamine oxidase inhibitors, care should be exercised if it is proposed to administer an MAO inhibitor concurrently with Alupent-Sed.

Further information and samples are available on request.

NORTHAMPTONSHIRE COUNTY COUNCIL

Health Department

SENIOR MEDICAL OFFICER
This is a new post with responsibility
for adult health. It should be particularly
attractive to those interested in administration and research, as the person appointed
will be responsible for the supervision of
the new department of preventive and social
medicine at Kettering General Hospital; the
medical supervision of the rehabilitation of
handicapped adults, and the development of
screening programmes. There will be an
opportunity to participate in the planning
of health centres, which are being developed
throughout the county. Many links have
been developed with general practitioners and
with the hospital service in the area in
which the population is undergoing rapid
expansion, and part of the responsibility
will be the maintenance of these links, and
the establishment of others.

Salary within the scale £2,535 to £3,075. SENIOR MEDICAL OFFICER
is is a new post with responsibility

Salary within the scale £2,535 to £3,075. There is a grant of 50% of the cost of removal expenses, not exceeding £50.

Applicants, with the appropriate qualifica-tions and experience, should apply, giving the names of three referees, not later than April 1, 1968, to the County Medical Officer of Health, County Hall, Guildhall Road, Northampton.—J. Alan Turner, Clerk of the County Council. (27694)

LONDON BOROUGH of HOUNSLOW Department of Health

Medical Officer of Health: R. L. LINDON, M.R.C.S., L.R.C.P., D.P.H., D.C.H.

PRINCIPAL MEDICAL OFFICER (£2,880-£3,240 inc. **London weighting)**

Applications are invited for the post of Principal Medical Officer for specialised duties mainly with physically handicapped, deaf and partially hearing children. There are excellent facilities for research into problems related to handicapped children. Applicants should have experience in paediatrics and be able to take part in medical planning of services and to assist in the training of medical students and postgraduate D.C.H. students. The person appointed will work in close liaison with Regional Hospital Board consultants who attend the authority's special units.

The Borough possesses the first local authority purpose-built hearing clinic (Audiology Unit) and a new medical unit has been opened extending existing facilities for assessment and treatment of cerebral palsied and other physically handicapped children. Medical surveillance is provided by the Department for handicapped children in four special schools for: (i) deaf, with associated classes for partially hearing pupils in normal schools; (ii) physically handicapped; (iii) delicate/maladjusted and (iv) educationally subnormal pupils. The Department also runs two junior training schools, two special care units and two adult training centres. For some years the Department has accepted, as a matter of routine, medical students from London Teaching Hospitals for visits to the various units and services comprising the Department of Health.

Preference will be given to candidates possessing the D.C.H.

A lump sum car allowance is payable. Subject to medical assessment the appointment is permanent and pensionable. Whitley Council conditions of service apply.

Application forms obtainable from the

MEDICAL OFFICER OF HEALTH, 92, BATH ROAD, HOUNSLOW.

to be returned by 1st April, 1968

UNIVERSITY OF OTAGO Dunedin, New Zealand

LECTURER IN BIOCHEMISTRY (SCIENCE)

Applications are invited from Science graduates for the appointment of Lecturer in Bischemistry.

The present intention is to appoint a biochemist whose research interests lie in the fields of enzymology or intermediary metabolism, but applications will be welcomed from candidates whose interests lie in other fields of biochemistry.

Salary range: \$NZ3,000 \times \$200 - \$4,400 \\$4,400 \times \$200 - \$5,400 per annum. The status of Senior Lecturer may be awarded as a mark of personal distinction either on initial appointment or by subsequent promotion. The salary of Senior Lecturers will be not less than \$4,600 per annum. (Note: \$NZ100 equals £46 13s. 4d. sterling, \$US112, \$A100).

In certain circumstances a short-term appointment, with pro-vision for return fares, may be negotiated. In general such an arrangement would be on the basis of a three-year term.

Further particulars are available from the Secretary-General, Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London S.W.1, or from the Registrar of the University.

Applications close in New Zealand on April 15, 1968.

(17179)

World-wide Pharmaceutical Company is looking for dynamic outgoing

Physicians, Veterinarians, Biologists

interested in the problems of developing, testing and applying new drugs. Primary concerns will be:

Contact with physicians in hospital and general practice for in-

formation, advice and discussion of therapeutic problems. Written and personal communication with national health authorities in European and other countries. Training of medical representatives in these countries. Medical promotion. Organizing symposia and congresses. Scientific supervision and preparation of audiovisual aids for medical education (films).

What we are looking for

-You are under 40, a graduate or training in medicine, veterinary science or biology
-You speak and write English, German or French fluently and

have some knowledge of the other two languages Even more important, you are interested in problems of medicine and psychology, enjoy writing about them and you value contact with leading figures in science and industry.

Capdidates are requested to send their application to F. HOFFMANN-LA ROCHE & CO. Limited Company, Personnel Department, 4002 Basle (Switzerland). (17301)

UNSOLICITED TESTIMONIALS!

Whilst it is a matter of regret that it is unethical for us to quote from the many letters from Porsche owners who are members of the medical profession, we can stress the absolute reliability of the Porsche as senething a doctor's car must posses. In addition, as "Car and Driver" of America said recently, "driving the car is not only hugely enjoyable, it's also bugely comfortable."

It isn't easy to krow to what extent possible owners are irfluenced by success in composition, but it is a fact that the Porsche factory has always believed in the merits of participation in competition as the best possible way of testing and developing their production models. In 1967 Porsche wan both Group I (Touring Cars) and Group 3 (Grand Teuring Cars) of the International Rally Champiorship, while Porsche cars were outright winn'rs of the first two eve ts so far held for the 1968 Rally Championship—the Swedish Rally (described by "Autocar" as "certainly the severe t test of winter rallying-racing in the world") and the Monte Carlo Rally—also 2nd overall.

STOP PRESS—PORSCHE WINS SAN REMO RALLY MARCH 6-10 May we send you our new illus-trated catalogue describing all models.

PHARMACEUTICAL PRODUCTS

Readers are reminded that prescribers literature and clinical information are always available from advertisers on request.

Terramycin's wasn't born yesterday....

Not only is it supported by over 3,000 published papers; it has a record of safety and clinical success that puts it beyond the area of controversy. You know where you are with Terramycin*

'Overuse of the shoulder may lead to inflammation of this [subacromial] bursa...'
'...it is also liable to develop when the daily

work involves the maintenance of a strain against interrupted resistance, as in the case of certain tools employed in electric steel grooving, pneumatic drills used in the process of breaking up roads, and the like.'*

*French's Index of Differential Diagnosis, 9th Edition, John Wright & Son Ltd., Bristol, 1967, p.749

It is estimated that nearly one million cases of synovitis and bursitis occur each year in the United Kingdom. These patients are frequently resistant to treatment and at times progress to prolonged and severe disability before eventual resolution. 'Indocid' relieves the pain and inflammation associated with painful soft tissue disorders and enables the patient to resume his normal activities more quickly.

Detailed information is available to physicians on request. Supplied as 25 mg capsules, a suspension (25 mg/5 ml), and 100 mg suppositories.

rapidly relieves pain in acute and chronic soft tissue disorders
