

Service in the

in angina pectoris

SYNADRIN® 60 WORKS

In controlled trials,
prenylamine—SYNADRIN 60—significantly reduced
the number of angina attacks^{1,2,3}.

Double-blind clinical trials of SYNADRIN 60, reported from many countries and confirmed by recent British studies, demonstrate that SYNADRIN 60 is effective in angina pectoris. SYNADRIN 60 reduced the number of anginal attacks and nitroglycerin consumption to a significantly greater extent than the placebo. Reduction in excessive sympathetic stimulation lowers the oxygen demand of the heart, a mild sedative action allays anxiety and increased blood flow improves oxygen supply.

Dosage: An adequate dose is essential to ensure a rapid onset of action and therapy can be initiated with one tablet (60 mg) SYNADRIN 60 three times daily. Reduction of the frequency of anginal attacks should be observed within two weeks.

Side Effects: SYNADRIN 60 is well tolerated, even after prolonged treatment. Gastric intolerance has been reported in few cases. Skin rashes have occurred on rare occasions. Transient drowsiness has been noticed at the commencement of treatment. SYNADRIN 60 has a slight hypotensive action and the dose of concurrently administered hypotensive agents may require adjustment.

Contraindications: SYNADRIN 60 is contraindicated in severe disorders of cardiac conduction, heart failure and hepatic conditions.

SYNADRIN 60 is available as tablets containing 60 mg prenylamine.

Pain knuckles under to NapsalgesicTM

Napsalgesic extends the effective analgesic range of aspirin therapy.

Aspirin in a readily-dispersable form to minimise gastric irritation is combined with dextropropoxyphene, whose pain-killing properties have been so effectively demonstrated in 'Distalgesic'.

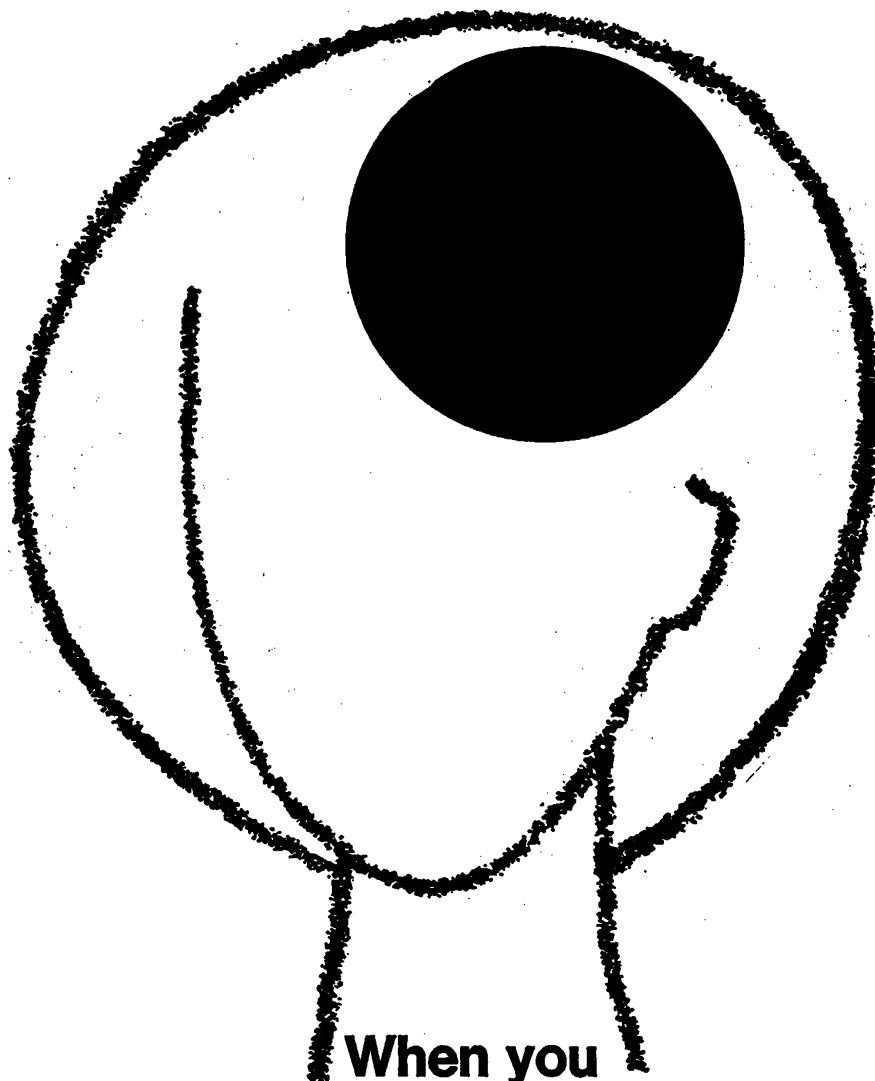

In long-term treatment your patient will obtain relief without suffering the adverse effects of high aspirin dosage or the constipation and respiratory depression evident with many alternative analgesic drugs.

Napsalgesic tablets each contain 50 mg dextropropoxyphene napsylate with 500 mg aspirin.

'Aventyl' comes promptly to the rescue of the patient beset by depressive symptoms. Published reports indicate that 'Aventyl' rapidly relieves black mood, lassitude, loss of appetite and sleep disturbance.

'Aventyl' reassures the doctor, too, because it is exceptionally free from the drawbacks of earlier psychostimulants. The side-effects of 'Aventyl', as reported in three years' widespread use, have rarely been troublesome.

Since the drug is not a MAO inhibitor, dietary supervision is not necessary.

AIM FOR THE BAD'UNS WITH 'ILOSONE'

With 'Ilosone', your aim is effective and selective. Killing off the pathogenic bacteria, allowing the normal gut flora to pursue their useful life.

The real 'bad 'uns', of course, are Gram positive cocci, causing most of the infections you see every day. Against these infections 'Ilosone' is much more active than, for example, the tetracyclines and it will not discolour teeth or deposit in bone. Nor is 'Ilosone' likely to cause diarrhoea or gastro-intestinal upset—disadvantages which the tetracyclines share with the broad spectrum penicillins.

Effective. Selective. Use 'Ilosone' when you go gunning for bad 'uns—in acute tonsillitis or acute bronchitis or any common bacterial infection of the upper respiratory tract. *Haemophilus influenzae*? Yes, 'Ilosone' deals with this 'bad 'un' too!

'Pulvules' of 250 mg* and 125 mg*; a pleasant tasting suspension containing 125 mg*/5 ml. *Base equivalent. Full information available on request.

A statement

about hypertension and 'Esbatal' (Bethanidine)

An authoritative British clinical team found that control of blood pressure was achieved with 'Esbatal' in 73 to 87 per cent of the hypertensive patients they treated. Toxicity was not seen. Side-effects were rare. Tolerance was not a problem. Postural side-effects could usually be overcome by adjusting the dosage, timing of administration or by use of a diuretic.

The team with its wide experience in treating hypertension concluded that 'Esbatal' compares favourably with other established drugs. It comments that 'Esbatal' "has advantages which outweigh relative disadvantages in comparison with guanethidine or methyldopa". The incidence of side-effects, toxic effects and feelings of malaise were less with 'Esbatal' than with these two drugs.

To quote again from the report: "There would now seem to be no case for beginning treatment with guanethidine or methyldopa in any new patient, but either may be useful in any patient in whom treatment with one of the newer preparations is unsatisfactory."

For a full account of the trial which covered 82 patients and extended over 2½ years see the *British Medical Journal* 2nd December, 1967, pp. 519-521. Full information about 'Esbatal' brand Bethanidine Sulphate is available on request.

in staphylococcal septicaemia

powerful · bactericidal · antistaphylococcal

The potential severity of staphylococcal septicaemia demands prompt antibacterial therapy—often well before sensitivity reports become available. FUCIDIN is rapidly and easily absorbed, and gives serum levels which are bactericidal against almost all pathogenic staphylococcal strains; FUCIDIN exhibits remarkable ability to reach the nidus of infection despite poverty of blood supply or presence of pus. For early control of these dangerous infections FUCIDIN has proved a reliable and

economical choice—in over five years of clinical use.

Ten reasons why Acthar Gel is the most widely prescribed ACTH

**ACTHAR
GEL** is the most reliable form of ACTH¹.

**ACTHAR
GEL** is highly purified and standardised to ensure reliable potency, and has been used safely and effectively for fifteen years.

**ACTHAR
GEL** provides optimum length of adrenal stimulation – twelve to sixteen hours,^{4,6,7} this allows pituitary recovery time. Risk of pituitary suppression is minimal – no growth stunting⁴.

**ACTHAR
GEL** has been shown to have a clinical effect lasting up to three days or more³ from one injection.

**ACTHAR
GEL** is safe and side effects, when seen, are usually symptoms of overdose^{1,2}.

**ACTHAR
GEL** is not a steroid⁸ and treatment can be stopped when unnecessary – no withdrawal symptoms,^{2,3,9} no problem of bruising or when presenting for surgery.

**ACTHAR
GEL** is now liquid at normal room temperatures and is easy to inject.

**ACTHAR
GEL** is a solution not a suspension and accurate dosage is ensured.

**ACTHAR
GEL** Gelatin is the optimum delay medium⁷ and unlikely to cause side effects.

**ACTHAR
GEL** has featured in the vast majority of published clinical papers on ACTH. Some of the latest are given.

If you think PAYNOCIL is just a strong, quick acting aspirin and nothing else

try it and see

Paynocil disperses instantly on the tongue in a release of sweetened lemon flavour, distributing aspirin into the stomach in minutely fine particles—and no water is needed.

Paynocil is aspirin in a most carefully planned form. At 10 grains per tablet in a glycine base it has twice the strength of aspirin tablets B.P. and it is also absorbed twice as fast. It is better tolerated than plain aspirin. Patients with rheumatic disorders who experienced nausea, heartburn or epigastric pain after plain aspirin have found Paynocil acceptable.

So Paynocil is especially valuable in rheumatic

disorders, for it provides the threefold activity of aspirin—analgesic, anti-pyretic, anti-rheumatic—in a form which is exceptionally pleasant and easy to take.

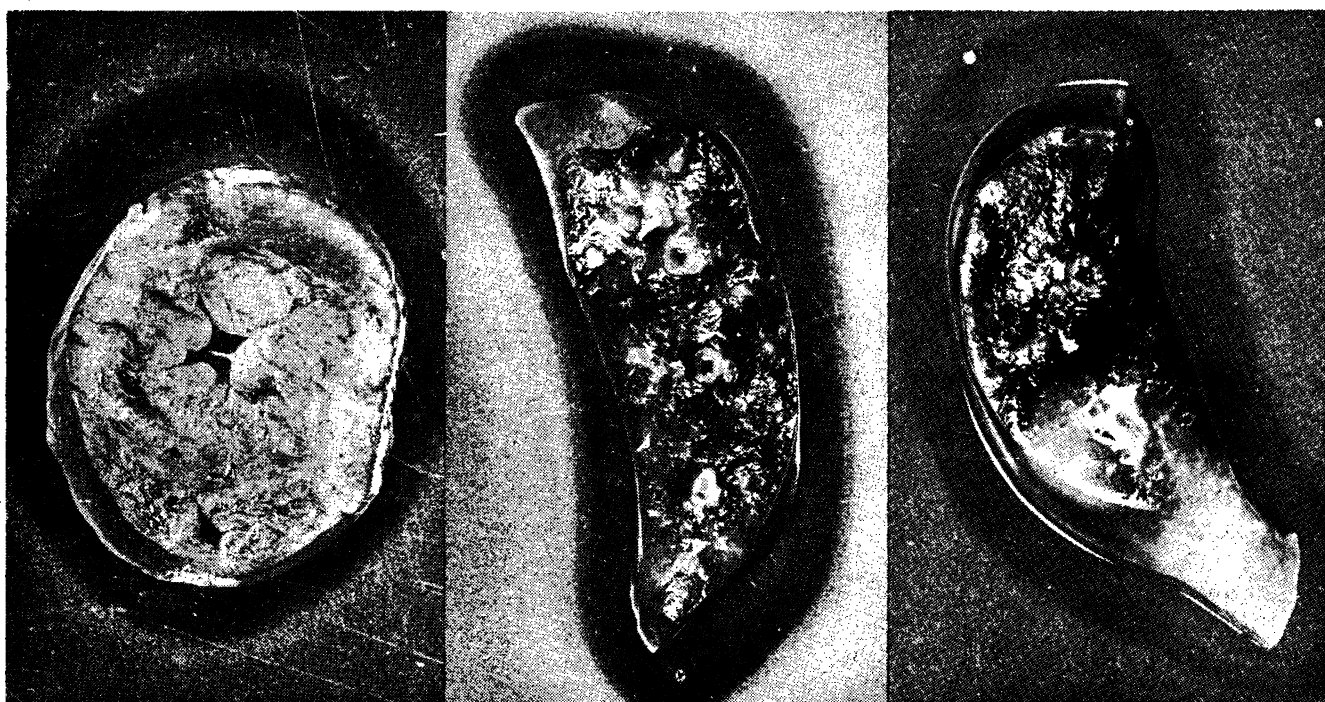

Long term in rheumatic disorders, short term in aspirin's many other indications (colds, influenza, headache, dysmenorrhoea etc.), Paynocil is an ideal therapy. It is convenient to take and it acts fast—patients who need aspirin will prefer Paynocil. It comes in convenient foil strips to slip easily into pocket or bag and is also available as Junior Paynocil—2½ grains per tablet—for children.

a striking demonstration of Lincocin penetration

**Heart Tissue**Assay organism: *Streptococcus haemolyticus***Lung tissue**Assay organism: *Staphylococcus aureus***Lung tissue**Assay organism: *Diplococcus pneumoniae*

Since antibiotic effectiveness is dependent upon concentration at the site of infection, it is obvious that antibiotic diffusion and tissue penetration are of supreme importance. The accompanying photographs of an experiment in animals demonstrate Lincocin's capacity in this respect.

A healthy dog weighing 9.5 kg. was injected intramuscularly with 25 mg./kg. of lincomycin hydrochloride (base equivalent). After 90 minutes tissue samples were excised and placed on Petri dishes in which the agar had previously been seeded with pathogenic strains of *Staphylococci*, *Streptococci* and *Pneumococci*, respectively. Following incubation these photographs were taken of the plates containing either heart or lung tissue. The clear zones show that within 90 minutes Lincocin had penetrated these tissues in concentrations sufficient to inhibit growth of the pathogenic inocula.

Lincocin Capsules: Each capsule contains lincomycin hydrochloride monohydrate equivalent to 500 mg. lincomycin base, in bottles of 12 and 100.

Lincocin Sterile Solution: In 2 ml. ampoules. Each 2 ml. contains lincomycin hydrochloride monohydrate equivalent to 600 mg. lincomycin base.

No need, obviously, to acquaint you with the facts of Multiple Sclerosis, also known as Disseminated Sclerosis, or that over 40,000 people in Gt. Britain suffer from the disease. You'll doubtless know, too, about the work done by The Multiple Sclerosis Society of Gt. In this respect, the co-operation of the medical profession is urgently needed. SANDOZ**DEPARTMENT OF
EXPERIMENTAL THERAPEUTICS
LONDON & BASLE**

The Department of Experimental Therapeutics is concerned with specific scientific questions relating to human and clinical pharmacology. The more complex problems of therapeutic evaluation which cannot be satisfied by formal controlled clinical trial are dealt with by this Department, employing an experimental approach.

Members of the Department carry substantial responsibility and enjoy a measure of independence; hospital affiliations on a part-time basis are encouraged. The duties call for a wide knowledge of both the experimental and the clinical fields of medicine.

Applicants should possess sound clinical experience, preferably a higher medical qualification and, in addition, experience in a basic science—for example, physiology, pharmacology, biochemistry, immunology, etc. Some training in clinical pharmacology would be an advantage but is not essential.

In the first instance, applications, marked 'In Confidence', for positions in the Department of Experimental Therapeutics in London and in the Sandoz parent organisation in Basle, Switzerland, should be made in writing to **The Research Manager, Sandoz Products Limited, Sandoz House, 23 Great Castle Street, London, W.1.**

**Assistant
Medical Director**

This senior appointment involves responsibility for the initiation, organization and development of clinical trials on new products and new applications on existing products. It is with a well-known pharmaceutical company with diversified interests and international associations and calls for a medical graduate with a wide knowledge of clinical medicine and a considerable degree of experience within the pharmaceutical industry. He will be required to liaise with the company's marketing organization and travel extensively throughout the world, consulting with clinicians and lecturing on the medical aspects of the company's products.

The position is based in the south coast area and conditions of employment will be first class, including a starting salary around £4,000 and valuable fringe benefits. The prospects for a man of proven ability will be excellent.

(Ref: 3332/BMJ)

Replies will be forwarded direct and in confidence to the client unless addressed to our Security Manager listing companies to which they may not go. They should include comprehensive career details, not refer to previous correspondence with P.A., quote the reference on the envelope and be sent to:

P.A. Advertising Limited,
192 Sloane Street, London S.W.1.
Telephone: 01-235 6060.

Commercial Appointments—contd.

I am the Medical Director for the U.K. of a Continental-based international pharmaceutical company. I am interested in contacting an experienced doctor to initiate and follow the progress of clinical trials within the British Isles. The person appointed will work in co-operation with colleagues in South America, the Far East, Middle East and Europe under the direction of the Medical Research Department of the parent company. He will be responsible to the Director of Medical Research, who will finalize the appointment.

The appointee will be an experienced clinician aged 35-45, with medical research experience, who wishes to enter the pharmaceutical industry. Whilst he will be retained on a full-time basis, there will be the opportunity for him to conduct his own clinical programme. Initially he will spend up to six months at various centres in Europe.

Please write to me under Box CA.2914, B.M.J.

The Wellcome Research Laboratories

MICROBIOLOGIST

This appointment in the Department of Virology calls for a graduate with previous training in microbiology to work on the mycoplasmas. The duties include research into the properties of the organisms and their role in diseases of man and animals, the production of a number of diagnostic reagents, and the provision of specialist advice and assistance within the department. Preference will be given to applicants with prior experience with the mycoplasmas. There is considerable scope for individual research and personal initiative in a department that has pioneered this particular field. Laboratory facilities are excellent and publication of results is encouraged.

Salary according to qualifications and experience.

Application form and further details may be obtained from the Senior Personnel Officer, The Wellcome Research Laboratories, Langley Court, Beckenham, Kent, BR3 3BS. (17406)

medical advisers

We invite applications from medical practitioners, preferably under the age of 35, to fill a vacancy for a further Medical Adviser to the Company. The expansion of our Medical Department has become essential due to the growth of the Company and its increasing participation in the international field of therapeutics.

We require a sound practical clinician who is willing to make himself fully conversant with several specialized fields of therapy. As he will be expected to liaise with senior clinicians in the U.K. and overseas he should be capable of a versatile approach to his work, keen to exercise initiative and be able to express himself clearly. Fluency in another European language would be an advantage.

The doctor appointed will be expected to participate fully in all aspects of the responsibilities of the Medical Department. This includes the initiation and co-ordination of clinical trials, advising the Company on medical matters and maintaining an efficient information service on our products to the medical profession. He would also assist in the medical training of representatives and be prepared to participate in national and international medical meetings.

The Company is based in Loughborough, Leicestershire, a non-industrial area with good educational facilities and pleasant residential areas. It is a member of the Fison Group and Group Contributory Pension and other Welfare Schemes operate.

A Company car will be provided and the salary will be negotiated according to experience.

Full personal details should be sent in confidence to the
Personnel Manager (141),
**FISONS PHARMACEUTICALS
LIMITED,**
12 Derby Road, Loughborough.

READING AND DISTRICT HOSPITAL MANAGEMENT COMMITTEE
Reading Area Accident and Orthopaedic Service

A vacancy immediately available in the above service at Battle Hospital, Reading, for a **SENIOR HOUSE OFFICER**

This unit is the only accident service for a population of 400,000, and the bulk of the work consists of major trauma although there is also a small amount of "cold" orthopaedics. The successful candidate will be part of a team whose duties will be divided between the wards, operating theatre and the accident reception department. The latter is newly built and very well equipped, including resuscitation rooms and two operating theatres.

The post offers extreme good experience in the management of acute trauma, and there are good facilities for postgraduate study. The post is recognized for the F.R.C.S.

A modern flat is probably available. Applications, with application form, two referees, to the Hospital Secretary, Battle Hospital, Oxford Road, Reading. (17118)

APPOINTMENTS

Applicants should state name, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given. Canvassing disqualifies (Statutory Instrument, 1966, No. 569).

SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Seventh Report of the Review Body, new salary scales have been approved. These came into force on October 1, 1966. The scales are set out below:

HOUSE OFFICERS: Each post in this grade shall be tenable for six months. £1,100 per annum for the posts held during the first year; £1,200 per annum for posts held during the second year; £1,300 per annum for posts held during the third and subsequent years, subject to full registration. Deductions of £150 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

SENIOR HOUSE OFFICERS: £1,450 per annum in the first year; £1,550 per annum in the second year; £1,650 per annum in the third or subsequent years. Deductions of £175 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

REGISTRARS: £1,650 per annum, rising by four annual increments of £100 to £2,050.

Deductions of £175 per annum for those with remuneration at the first two points on the scale, and £200 per annum for those at the subsequent points, will be made in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £140 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

SENIOR REGISTRARS: £1,950 per annum rising by one increment of £100 and four further annual increments of £125 to £3,550.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

MEDICAL ASSISTANTS: £1,850 per annum rising by fourteen annual increments of £100 to £3,250.

Deductions of £225 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

CONSULTANTS: £3,700 per annum rising by five annual increments of £185, and then by four further increments of £190 to £4,885.

Deductions of £350 per annum in respect of lodging only for voluntary residence. (No deductions for lodging will be made for compulsory residence.)

Doctors with satisfactory training will not be excluded from consideration for appointment to consultant posts on the grounds that they have spent little or no time as senior registrars.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff. Memoranda on the following subjects of particular interest have been issued by the Ministry of Health: Standard of Residential Accommodation, Telephone Charges, Removal Allowances, Study Leave.

Further details may be obtained from the Hospital Secretary, or summaries of the Memoranda may be obtained from the Secretary, British Medical Association. (August, 1967)

ROYAL GWENT HOSPITAL
Newport (Recognized F.R.C.S.)

Applications are invited for a

SENIOR HOUSE OFFICER

in the accident and emergency department, vacant on April 1. The department is in the charge of a full-time Consultant Surgeon, has five S.H.O.s and all emergency cases are admitted through the department, which is responsible for initial resuscitation. The department is equipped with apparatus for cardiac monitoring, positive-pressure ventilation, blood gas analysis, and blood volume computation, with radio-active isotopes, as well as X-ray image intensifiers and a Berman F.B. locator.

The hospital has 4-8 beds, is the base hospital for the Group and therefore has a large volume of acute cases in all specialties. It is being extensively redeveloped by a major capital building programme. A new intensive care unit will be in operation soon. There is a close connection with the teaching hospital at Cardiff, 10 miles to the west, and there is an extensive postgraduate education programme with a very good library. A new postgraduate centre is about to be built which will enhance further the facilities at present available. The appointment gives ample opportunity to the holder to avail himself of these facilities.

The successful candidate will be expected to be resident on the nights in which he will be on first call, which will on average be one night in five. If non-resident, every assistance will be given to find suitable accommodation. There is a certain amount of married accommodation available at the control of the Hospital Management Committee. Applications, giving full particulars, and names and addresses of two referees, to Group Secretary, 64 Cardiff Road, Newport, Mon. (27770)

MINISTRY OF OVERSEAS DEVELOPMENT

The Need

GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years.

The Opportunity Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

The Advantages Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained.

Salaries Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1650 to £2900 per annum.

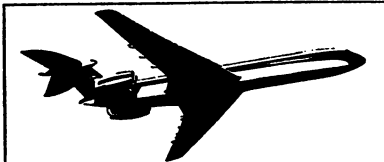

Training Scheme for Recently Qualified Doctors In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

Broxil Syrup is ideal

Geriatric patients often experience difficulty in swallowing tablets and capsules—and this makes them reluctant to take their medicine, or worse, puts them off it completely. For these patients Broxil Syrup is ideal . . . it is easy to swallow, and pleasantly fruit-flavoured. Moreover, Broxil Syrup gives quicker and higher blood levels than are obtained with capsules or tablets, and is thus more reliable in the treatment of older patients, who are often poor absorbers.

Broxil is bactericidal. As it kills the offending pathogens, resolution of infection relies far less on the natural body defences than would be the case with bacteriostatic antibiotics like tetracycline. This is of real significance in geriatric patients where these defences can be extremely weak.

Because it is a narrow spectrum antibiotic, Broxil does not disturb the natural intestinal flora. There are no gastro-intestinal upsets which can so weaken older patients.

Broxil Syrup is pleasant, easy to take and effective. And it has all the safety of an oral penicillin.

AVAILABILITY: Broxil (phenethicillin as phenethicillin potassium B.P.).

Tablets, 125 and 250mg.; Capsules, 125 and 250mg.

For children, adults with sore throats, or patients who find difficulty in swallowing tablets or capsules, there is Syrup, fruit-flavoured, in 60ml. bottles. When dispensed, each 5ml. teaspoonful contains 125mg.

DOSAGE: Children 62.5—125mg., and

Adults 125—250mg., four times a day.

Prophylactic: Children 62.5—125mg., and

Adults 125mg., twice a day.

CONTRA-INDICATIONS: Penicillin allergy.

SIDE EFFECTS: As with other oral penicillins.

Additional information is available on request.

**ST. ANDREW'S HOSPITAL
NORTHAMPTON**

President: Lieutenant-Colonel J. Chandon-Pole, O.B.E. Medical Director: James Harper, M.B., F.R.C.P.(Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illness. The fees range from twenty guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 170 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A recreation and occupation centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court and a library with an adjoining reading room.

WANTAGE HOUSE
This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

Charges for treatment at St. Andrew's are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

For terms and further particulars apply to the Medical Director (Telephone No. 34354 Northampton), who can be seen in London by appointment.

Why Penbritin^{Regd.} is so powerful against bronchitis

Because many organisms can cause the different types of bronchitis, it is imperative to use an antibiotic which is active against all of them . . . for in General Practice treatment often has to begin before the causative organism can be identified. Penbritin's activity covers all penicillin-sensitive organisms, and Gram-negative organisms as well. Penbritin is bactericidal. Unlike most other broad-spectrum antibiotics which merely inhibit bacterial growth, Penbritin kills bacteria. This is an advantage in the treatment of any patient—and virtually essential when treating children, the old and others whose natural defences are inadequate.

Penbritin has the safety of a penicillin. It is free from dangerous or permanent side-effects* . . . of special interest in the treatment of children.

Penbritin's broad spectrum, bactericidal action and comparative safety, endorsed by many world references, establish it as a powerful force against bronchitis.

Penbritin is also highly effective in other respiratory tract infections including: Sinusitis · Pharyngitis · Laryngitis · Tonsillitis · Pneumonia.

***Contra-indication:** Penicillin allergy.
Side-effects: As with other penicillins.
Full information is available on request.

50 years of emancipation

Now with this new oral contraceptive woman's freedom is complete

Not only is she free to plan her family as she chooses, she has greater freedom from unpleasant side-effects. 'C-QUEENS 21'—the latest development in oral contraception—is the first sequential product to be endorsed by British trials. These trials have shown that 'C-QUEENS 21' is highly effective—and exceptionally free from side-effects. It is a new low-dosage combination of hormones in their natural sequence with all the advantages of a simple 21 tablet regimen—and the pack almost remembers for the patient.

'C-QUEENS 21'—The first sequential approved by the F.P.A.

Fourteen yellow tablets containing 100 mcg mestranol and seven pink tablets containing 100 mcg mestranol with 1.5 mg chlormadinone acetate.

Samples and full prescribing information are available on request.

SAFE SIMPLE EFFECTIVE NULACIN

EFFECTIVE, because Nulacin achieves *continuous* neutralisation of hyperacidity. As peptic ulcers arise and recur only in the presence of free acid, Nulacin not only relieves symptoms but is the ideal long-term medical treatment.

SIMPLE, because Nulacin is specially designed to dissolve slowly in the mouth and produce a continuous intragastric milk-alkali drip in the ambulant patient. One tablet provides up to 30 minutes' relief from excess acid.

SAFE, because clinical experience has shown that Nulacin produces no electrolyte disturbances and can be used in *all* patients with peptic ulcers.

NULACIN is a unique combination of whole milk protein and fats with dextrins, maltose and suitable antacids and provides *economical*, long-term medical treatment for peptic ulcer.
