3 widely-used ingredients Heinz leave out

Artificial colouring. Artificial flavouring. Artificial preservatives.

Heinz will have none of them in their Baby Foods!

Every Heinz Baby Food begins with a well-balanced recipe and the finest ingredients. Next, meticulous checking and inspection—right down to each individual grain of rice or split pea.

Finally, cooking. Years of experience in preparing baby foods enable Heinz to preserve the natural colour, the natural flavour and the

natural food values.

So you can be sure that Heinz Baby Foods are at least as nutritious as the very best a mother can prepare in her own kitchen. But the effort is far less and the choice far greater. New breakfast varieties introduced last year bring the total number of Heinz Strained and Junior varieties up to 77.

Heinz will gladly provide more detailed information to help you to advise mothers. So if you have any questions, please write to the

Anglo-French Clinical Research Scholarships

offered by the

Medical Research Council
and

L'Institut National de la Sante
et de la Recherche Medicale
for the

Academic Year

1969-70

MEDICAL GRADUATES of registrar status and with a working knowledge of French are invited to apply for 2 ANGLO-FRENCH CLINICAL RESEARCH SCHOLARSHIPS offered for the academic year 1969-70 under the terms of a reciprocal arrangement between the MEDICAL RESEARCH COUNCIL in LONDON and L'INSTITUT NATIONAL de la SANTE et de la RECHERCHE MEDICALE in PARIS.

TENURE

The Scholarships will normally be tenable for one year but may be renewable for a second year subject to satisfactory progress. In special circumstances an award may be made for a shorter period than one year but for not less than three months.

STIPEND

The Scholarships will normally be of a minimum value of 1,400 francs (tax free) a month (approximately £1,200 a year), the precise rate depending on the candidates' ages, qualifications and experience. Married men will receive a supplementary allowance of £250 a year (payable in sterling by the Council). Second class travelling expenses to and from the place of work in France will be provided.

LOCATION

The Scholarships are only tenable at centres in France.

ELIGIBILITY

Candidates must be:

- ☐ British subjects who are normally resident in the United Kingdom and who intend to make their future careers in medical research in the United Kingdom.
- ☐ Medical graduates of registrar status.

APPLICATION

If you are interested in the above Scholarships please write to the Training Awards Section for further particulars and an application form quoting AFC/U. Telephone inquiries may be made to 01-636 5422 Ext. 326/327. Completed forms should be returned not later than 1st March 1969.

New Record Level of Benefits Paid

At the 21st Annual General Meeting of BUPA, held in London on November 12, it was revealed that the amount paid out to BUPA subscribers during the year ended 30 June, 1968, was an all time record sum of £9,622,000.

This figure represented 86% of subscription income for the year. Administration costs amounted to 9.5%, leaving a surplus of 4.5%. The year also saw a record increase of £1,603,100 in subscription income, making a total of £11,188,900, which is another record sum. BUPA's investment income increased by £87,200 to £507,300; this was sufficient to meet covenanted payments to Nuffield Nursing Homes Trust, development expenses, and taxation, and to leave a small balance to be added to the subscription surplus. New registrations during the year were 56,396, making a total at 30 June, 1968, of 642,604 registrations, by which approximately 1½ million adults and their child dependants were protected. More than 75% of new registrations were through new or existing Groups set up by individual companies or trade or professional organisations; 807 such Groups were formed during the year bringing the total to 8,276.

A significant development which offers a new security to the 1½ million people enrolled under BUPA's private health insurance scheme has been announced. Although this new idea, called Lifelong Protection, will not be available till May 1969, it has already aroused considerable interest. The scheme enables the BUPA subscriber to pay an additional annual premium to ensure the waiver of subscription payments for himself after retirement, and a similar benefit for his family should he die. No other provident association in the world offers such a lifetime guarantee to a family wishing to provide for its own medical needs.

Announcing this innovation at BUPA's 21st Annual General Meeting, the Chairman of the Board of Governors, Mr. E. F. Webb, commented:—

"This new development extends the principle of continuity of cover which BUPA introduced at the beginning of this year, and which gives the subscriber the right to renew his cover each year regardless of his health record after joining. We see it as our duty to create and maintain a viable choice in this area of the social services for the individual who prefers self help to State Aid: with this new option we have built into our service the essential element of security for the subscriber and his family." Mr. Webb recalled that, during the past ten years, BUPA's primary role as a means of financing private treatment in illness had broadened to include provision of facilities for private health treatment.

Nuffield Nursing Homes Trust, set up by BUPA as a charity in 1957, had already built or modernised 14 'mini-hospitals'—modern surgical nursing homes—throughout the country; this year had seen the launch of BUPA Nursing Services Limited, to provide a ready supply of trained nursing staff for hospitals in Britain and abroad.

In August, BUPA had announced plans to build Britain's first health screening and diagnostic centre in London next year.

Sustanon makes a man a man again

in body and in mind

When gonadal activity is inadequate the young or middle-aged male may demonstrate diminished genital structure, and response, to the point of impotence. Understandably the repercussions reach far beyond the purely physical – often playing havoc with the patient's psyche, marriage and career.

Every physician knows how complex is diagnosis of the condition, with the patient frequently hiding the facts not only from his doctor but *from himself*. Even when the diagnosis is established, therapy is not straightforward and many factors must be considered. Nevertheless with Sustanon a clear, early and sustained response may occur at all levels, physical, mental, and emotional.

Sustanon is preferable to testosterone propionate as of course no single testosterone ester provides both lengthy activity and rapid onset of action. This Sustanon does. Its prolonged activity is such that only an occasional injection is needed to maintain the required therapeutic level.

Sustanon '100'

2 weeks' activity – contains 100mg testosterone per ml:

Testosterone Propionate B.P. 20mg
Testosterone Phenylpropionate B.P. 40mg
Testosterone Isocaproate 40mg

Sustanon '250'

4 weeks' activity – contains 250mg testosterone per ml:

Testosterone Propionate B.P. 30mg
Testosterone Phenylpropionate B.P. 60mg
Testosterone Isocaproate 60mg
Testosterone Decanoate 100mg

Packs: Boxes of 3 ampoules of 1 ml in either strength.
Single 1 ml Orgaject disposable syringes in either strength.

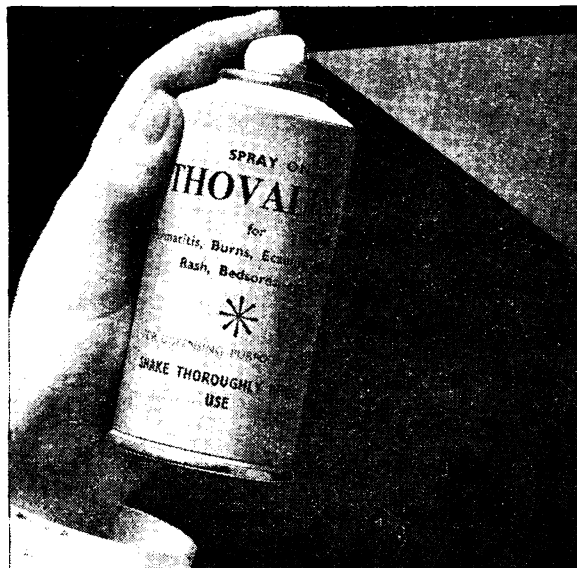

Contraindication: in males, carcinoma of the prostate.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

When you prescribe elastic stockings

Scholl make sure the patient wears them

Scholl know as well as you do just how much women hate the idea of elastic hosiery. And that though they'll often take the prescription, they don't always wear the stockings.

So Scholl make their elastic hosiery attractive by making the stockings as un-detectable as possible. They conform to all the specifications of the Drug Tariff and they give the patient all the support and comfort you want her to have. But they look nicer than ordinary elastic stockings. Feel lighter. So that your patient doesn't feel embarrassed by them. And instead of leaving them in the drawer, she wears them.

Scholl 'Soft Grip'

for conditions requiring 'Elastic Yarn Standard Weight'.

Worn *under* normal sheer nylons, Soft Grip are almost invisible. They are made in double-expansion mesh with two-way elasticity to provide firm, even support *around* the leg with plenty of comfortable 'give' lengthwise.

Scholl 'Nylastik'

for cases needing 'Lightweight Elastic Yarn Stockings'.

Nylastik are worn instead of nylons, and, on the leg, appear almost indistinguishable from an ordinary 30 denier stretch stocking.

Ventolin INHALER

(Salbutamol)

Trade Mark

A different class of bronchodilator

MORE SELECTIVE · LONGER ACTING · MORE EFFECTIVE

A NEW STANDARD IN BRONCHODILATOR THERAPY

Previously available β -adrenergic stimulants such as isoprenaline and orciprenaline act on the β_1 receptors of heart muscle as well as on the β_2 receptors of bronchial muscle. Consequently, undesirable increases in heart rate and pulse pressure sometimes occur when these drugs are used to produce bronchodilatation.

Ventolin is different: first because it is highly selective in its action, affecting primarily β_2 receptors: second, because it is more effective than existing bronchodilators: and third, because it is longer acting.

MORE EFFECTIVE

Clinical trials have shown that Ventolin Inhaler is a more effective bronchodilator than isoprenaline or orciprenaline when given by inhalation; a comparison of the effects of inhaled Ventolin, isoprenaline, and orciprenaline on Forced Expiratory Volume in one second (FEV_1) in severely asthmatic patients is shown in Fig. 1.

LONGER ACTING

Ventolin is unusually long acting, its effect persisting for at least four hours. By contrast, isoprenaline, even in large doses, has a characteristically intense but transient effect. In another study using whole-body plethysmography, inhalation of 100 μ g of Ventolin produced an

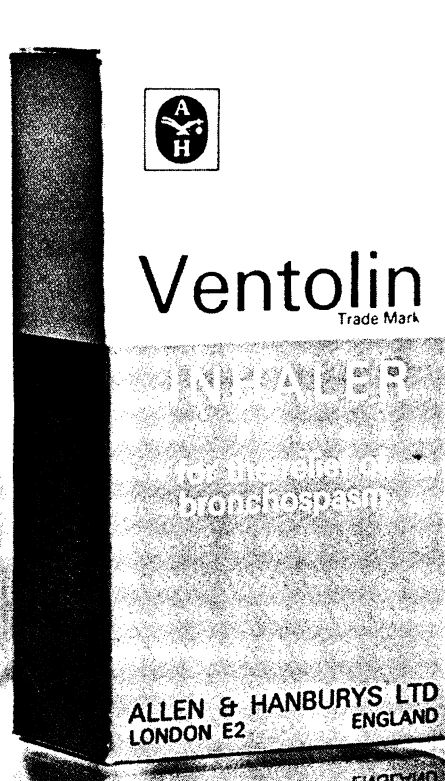

almost immediate maximal increase in airway conductance which was sustained for four to six hours.

MORE SELECTIVE

No side effects have been reported with therapeutic doses of Ventolin Inhaler. In studies comparing Ventolin with isoprenaline, a major difference found was that Ventolin did not stimulate the heart or affect the blood pressure, even after inhalation of a relatively large dose. (See Fig. 2.)

MORE ACCEPTABLE TO PATIENTS

Patients expressed a marked preference for Ventolin Inhaler in double-blind studies comparing Ventolin with aerosols containing isoprenaline or orciprenaline.

SAFETY IN USE

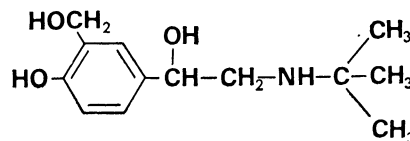

Past experience suggests that misuse of aerosol bronchodilators by asthmatic patients may lead to dangerous effects on the heart or give a false sense of security to patients with incipient status asthmaticus. Ventolin Inhaler has no effect on the heart in therapeutic dosage and has a long duration of action. Both these properties provide additional margins of safety; the lack of cardiac effects should reduce any likelihood of deaths due to ventricular fibrillation and the long duration of action makes it possible for patients to realise in time if the drug is becoming less effective. Because an effective treatment with Ventolin Inhaler should last for at least four hours, patients have been advised to consult their doctor immediately if the effect lasts for less than three hours, so enabling the doctor to take timely action.

CLINICAL STUDIES

The onset of action of Ventolin by inhalation is rapid; near maximal bronchodilation occurs within five minutes. The duration of action of Ventolin is much greater than that of isoprenaline. The results of a comparative study in severe asthmatics are summarised in Fig. 1. The effect of 1,000 µg of isoprenaline by inhalation on Forced Expiratory Volume in one second (FEV₁) reached its peak at six minutes and thereafter diminished rapidly; The peak effect on Forced Vital Capacity (FVC) was reached a little later, but the pattern was otherwise similar. A significant increase in heart rate was noted soon after administration of isoprenaline. After 200 µg of Ventolin, however, near maximal response persisted for two to three hours and substantial improvement was still present after five hours. No side effects were observed after Ventolin.

CHEMISTRY

Ventolin is 2-t-butylamino-1-(4-hydroxy-3-hydroxymethyl)-phenylethanol. Its approved name is salbutamol.

The inhaler contains Ventolin base, suspended in microcrystalline form.

PHARMACOLOGY

Ventolin was discovered in the research laboratories of Allen & Hanburys Limited during a search for a β-adrenergic stimulant free from undesirable cardiovascular actions. Replacement of the 3-OH group in isoprenaline by the primary alcohol group, -CH₂OH, gave rise to a new series of potent β-adrenergic stimulants. Ventolin was chosen for development because of its highly selective action on bronchial muscle, its lack of effect on heart muscle and its long duration of action.

ANIMAL STUDIES

In all the species used, Ventolin was a more potent bronchodilator than isoprenaline when administered by aerosol or by mouth and about equally active by intravenous injection. It differs from isoprenaline in being able to prevent bronchospasm without having obvious effects on the cardiovascular system. Ventolin is unusually long acting because it is not affected by catechol o-methyl transferase, an enzyme which rapidly inactivates isoprenaline in the body.

HUMAN STUDIES

Studies on asthmatic volunteers using a whole-body plethysmograph revealed that doses of 100 µg of Ventolin by inhalation produced a substantial and almost immediate increase in airway conductance which was sustained for several hours. In normal volunteers, doses of 400 µg by inhalation had no effect on heart-rate, ECG or blood pressure. 200 µg of isoprenaline had marked cardiovascular effects in the same subjects.

INDICATIONS

Ventolin Inhaler is indicated for the relief of bronchospasm in:

- Bronchial asthma of all types ☐
- Chronic bronchitis ☐
- Emphysema ☐

DOSAGE

One or two inhalations, repeated four-hourly if required. The bronchodilator effect of each administration of Ventolin Inhaler lasts for at least four hours and more frequent use should be unnecessary. This long duration of action provides a margin of safety. The patient can readily recognise any reduction in the length of action and should be instructed to consult a doctor if the effect of a previously adequate dose lasts for less than three hours.

The patient's instruction leaflet enclosed with each Ventolin Inhaler therefore contains the following paragraph:

'Dosage; use Ventolin Inhaler only as directed by your doctor. He will tell you how many puffs to take for a treatment. An effective treatment with Ventolin Inhaler lasts for about four hours. Consult your doctor immediately if the effect lasts for less than three hours. No more than eight treatments should be taken in any 24-hour period without consulting your doctor.'

SIDE EFFECTS

No side effects have been reported from Ventolin given by inhalation in therapeutic doses.

Doses greatly in excess of those needed for full bronchodilation could cause short-lived secondary effects such as peripheral vasodilatation, minor increase in pulse rate, and skeletal muscle tremor.

CONTRA-INDICATIONS

There are at present no known contra-indications to the use of Ventolin. However, care should be taken with patients suffering from hypertension, myocardial insufficiency or thyrotoxicosis. Notice should be taken of recent suggestions that the administration of any drug during the first trimester of pregnancy is undesirable.

PRESENTATION

Ventolin Inhaler is a metered aerosol, delivering 100 µg of Ventolin per inhalation, with a specially designed actuator. Each canister provides 200 inhalations.

Selected Topics in Medical Genetics

A Review from the Nuffield Unit of Medical Genetics, Liverpool University

Edited by C. A. Clarke

This book is the work of a group of physicians, each of whom is interested in a particular aspect of genetics applied to medicine; thus no part of the book is completely divorced from medicine. There are chapters dealing with the pitfalls and problems in the interpretation of genetic material, the concept of linkage and association, pharmacogenetics, disorders of protein synthesis, and the polymorphic system. Later chapters are concerned with the more specifically clinical aspects of genetics involving immunogenetics, the haemoglobinopathies, transplantation, certain aspects of cytogenetics, and recent work on schizophrenia.

Clinical Research Fellowships

offered by the

Medical Research Council
for the

Academic Year

1969-70

MEDICAL AND DENTAL GRADUATES desiring to prepare themselves for a career in clinical research are invited to apply for a limited number of CLINICAL RESEARCH FELLOWSHIPS available for the academic year 1969-70. Preference will be given to candidates who have worked for a period in a department in which clinical research is in progress.

It is intended that each Fellow to whom an award is made should be given an opportunity, as part of his training for clinical research, to study methods of research in the basic subject most relevant to his particular clinical interest, and to broaden his experience by working in departments other than his parent department either at the same centre or elsewhere. In appropriate cases, arrangements can be made for Fellows to work in the Council's own research establishments, including the National Institute for Medical Research.

SPONSOR

Applications must be made in each case on behalf of the candidate by the head of the department sponsoring the candidate on the understanding that the head of the department will take all possible steps to ensure that a suitable academic post in a clinical department in the same University, Medical or Dental School will be available to the candidate on satisfactory completion of the period of study under the Fellowship.

TENURE

The Fellowships are made for one year in the first instance and will be renewable annually up to a maximum of three years in all, subject to satisfactory progress.

STIPEND

The taxable stipend will be within the range of £1,650 to £2,175 per annum, the point of entry being determined according to age, qualifications and experience.

SUPERANNUATION

Superannuation will be provided

to treat peripheral ischaemia
take 4 glasses
of punch

Unlike alcohol and many other peripheral vasodilators, Opilon is specific in its action and does not cause distressing or dangerous side effects. Opilon is a selective peripheral vasodilator whose action is confined almost entirely to the periphery. Opilon is indicated where peripheral ischaemia is evident, such as Raynaud's phenomenon, chilblains, Ménière's syndrome, acrocyanosis and excessively cold hands and feet. Opilon may also be used to maintain nutrition of the skin, important in many occlusive disorders. Tablets of 40mg. thymoxamine in bottles of 50 and 250. Full information is available on request.

by a comfortable margin. In a recent report of a comparative trial* involving three antihypertensive agents satisfactory control of blood pressure was obtained with each drug.

With 'Esbatal' for instance, a standing diastolic pressure of 100 mm. Hg or less was achieved in 75% of cases. The authors pointed out that

'Esbatal', guanethidine and methyldopa are probably similar in their ability to control blood pressure. *It was found, however, that 'Esbatal' produced fewer uncomfortable side-effects and was preferred by more patients than were the other agents. In contrast to the other drugs, all the patients on 'Esbatal' were able to complete the course of treatment.*

A morning's surgery brings a lot of Crystapen G patients

How many patients needing antibiotics do you see in a morning? Whatever the number, there is a strong case for using penicillin. It is still the drug of choice in so many infections. An established penicillin in a modern form is Crystapen G (penicillin G)—one you can rely on in the treatment of strep. throats for example.¹ And Crystapen G is as effective clinically as penicillin V.²

When your patients need oral penicillin, you can rely on Crystapen G.

For the 'bug' that's going around...

Ivax

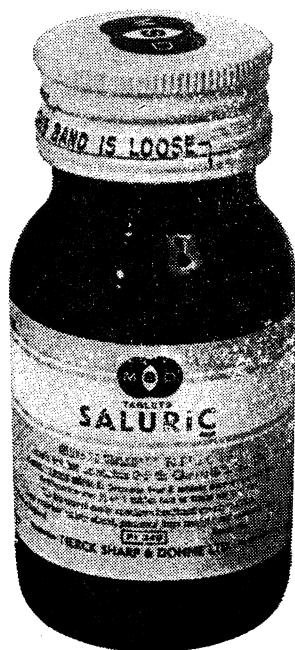

quickly controls diarrhoea

In diarrhoea of bacterial origin, Ivax means prompt relief. Ivax is a combination of sulphaguanidine, neomycin and kaolin, presented as a palatable liquid suitable for both adults and children. Ivax eradicates infecting organisms, adsorbs toxins, consolidates the stools and soothes irritated mucosa.

Women... can't help it

'Saluric' can in premenstrual tension with oedema

Women suffering from premenstrual tension with oedema cannot avoid the tiresome and inevitable signs and symptoms of this common condition, which may last for 7 to 10 days every month, prior to the menses. Because many of the distressing symptoms may be directly related to fluid retention, effective diuresis usually brings prompt relief.

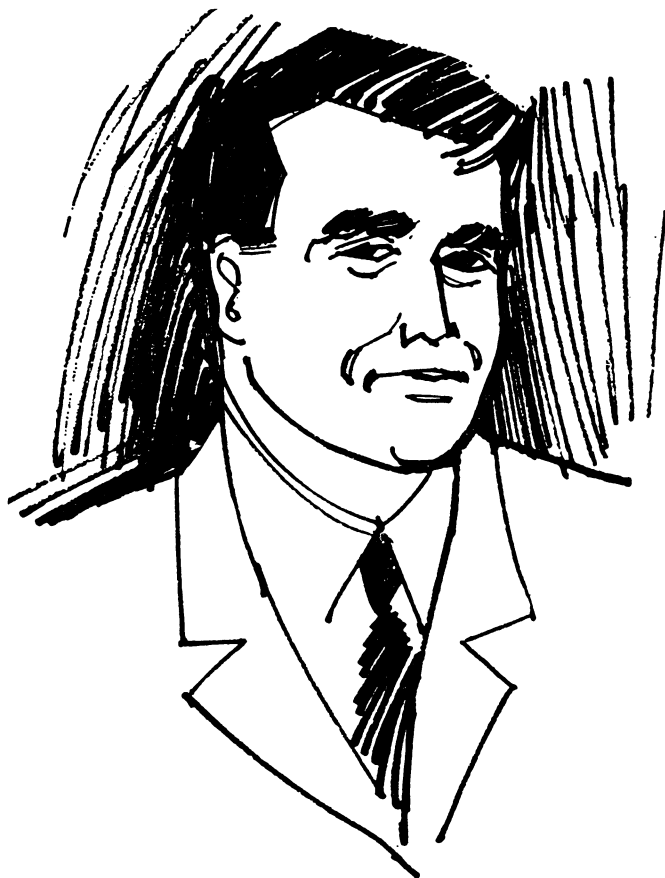

'Saluric' can relieve swelling of the ankles, breast engorgement, and fullness of the abdomen. It may well help to alleviate the concomitant irritability and nervousness. 'Saluric' has been proved by 10 years of clinical experience to be a dependable diuretic which can be used month after month to control premenstrual tension with oedema.

Each tablet of 'Saluric' contains 500 mg chlorothiazide BP. Detailed information is available to physicians on request.

DQV-K offers high blood levels and the rapid action that doctors demand...

...their patients just like the flavour

'Distaquaine' V-K Syrup is a presentation of penicillin V potassium—the stable, rapidly-acting bactericidal antibiotic that gives higher blood levels than benzylpenicillin (approximately double for an equivalent oral dose)^{1,2}. It is consistent in its action and is manufactured by a company whose reputation is founded on penicillin expertise. These are all important factors, but the touches of finesse are important too: the pleasant fruity taste that coaxes patients to take the full course of medicine; the 125 mg or 250 mg per 5 ml strength for selective prescribing; and the 5 days treatment afforded by the 100 ml pack.

We timed our launch rather late...

but we timed Nitrong better

For longer relief from angina pectoris.

Independent studies confirm Nitrong consistently relieves angina for 10–12 hours.

1. Proven blood levels.

"Nitrate blood levels in patients given Nitrong tablets were the same after 8 hours as the levels found after 6 minutes in patients given a sublingual tablet of nitroglycerin. After 12 hours the blood level was still sustained above the value (6 to 9 $\mu\text{g/ml}$) which correlates with good control of the anginal syndrome". *West. Med.* 7:11, 330, 1966.

2. Proven performance.

"A new type of tablet, Nitrong, containing controlled-release nitroglycerin, which is stabilized to maintain a constant potency, and which is released in the alimentary tract over a period of approximately 10 hours... gave marked or good

improvement in 17 of 20 cases with confirmed coronary insufficiency". *Sartr. Op. Med.* 10, 1965.

3. Proven prophylaxis.

"...the controlled-release tablets (Nitrong) benefited all patients in that their need for sublingual tablets was diminished. The mean diminution in the need for sublingual medication was **78 per cent**. Ten of 19 patients required no sublingual tablets during 14 or more days of the test period". *Curr. Ther. Res.* 7:12, 1965.

When the anti-convulsant regimen fails -add Benuride for better control

For firm control of grand mal or temporal lobe epilepsy few anti-convulsant drugs are as effective as Benuride (pheneturide). Yet treatment with Benuride is remarkably trouble-free. Twelve years of clinical experience, as reported in over 30 published papers, has confirmed its wide margin of safety and comparative freedom from toxic effects. A change to Benuride means better control—and a brighter, more alert life for your epileptic patient.

Benuride: tablets containing 200 mg. pheneturide. A new comprehensive product booklet, giving up-to-date details of clinical experience, is now available. We shall be pleased to send you a copy, or any other information, on request.

For sustained benefit in hypertension

Ismelin[®]

guanethidine sulphate BP

C I B A

Holds blood pressure levels constant

often just two tablets daily

Prescribing notes

Initial dosage — two 10mg tablets daily. Frequent adjustment is unnecessary during stabilisation; intervals between consultations may be up to one month. Should 20mg daily prove insufficient, increase daily dosage by 10mg. As the action of Ismelin is gradual and prolonged, allow at least one week before any increase, to observe full effect. The majority of patients will be adequately controlled and free from hypertensive symptoms on a daily dosage of 40mg or less.

Ismelin is contra-indicated in the presence of phaeochromocytoma. Side effects attributable to postural hypotension normally reflect overdosage. Patients should be advised to avoid sudden changes of posture or violent exertion, and if morning faintness on rising persists, to reduce the daily dosage by one 10mg tablet until the next consultation. If diarrhoea is troublesome, reduce or divide dose, or add $\frac{1}{2}$ gr. codeine phosphate t.d.s.

Failure of ejaculation has been reported and, rarely, exertional dyspnoea, nasal congestion, shivering, muscle weakness, paraesthesiae (due to latent cerebral arterial insufficiency), aggravation of intermittent claudication, and exacerbation of peptic ulcer. In heart failure, any tendency to fluid retention may be increased. As with any anti-hypertensive, prescribe cautiously for patients with renal failure and urea retention. Allowance should be made for the antagonistic pressor action of some antidepressants (MAOI), appetite suppressants and stimulants of the amphetamine class if administered concurrently.

COMMERCIAL APPOINTMENTS—see also p. xxxii**Clinical Trial Investigator**

The Medical Department of an international ethical pharmaceutical Company requires a doctor to join its clinical investigation team. The applicant must be medically qualified, registered and between 28-40 years of age. Previous knowledge of drug evaluation is not necessary but the ability to initiate and organise clinical investigations is essential. The appointed doctor will in addition to normal clinical trial responsibilities specialise in early evaluation of drugs in clinic for which he will be encouraged to develop the necessary expertise. Consequently, an interest in general medicine would be a distinct advantage. The successful applicant would be expected to maintain a clinical attachment.

Career prospects in the pharmaceutical industry are above average. Initial salary will depend mainly on qualifications and experience and the Company operates a non-contributory Pension Fund. A Company car is provided. Conditions of employment are good and would include assistance with removal expenses.

Cheques should be made payable to the "University of Birmingham" and crossed. (14825)

UNIVERSITY OF EXETER
Postgraduate Medical Institute

A full-time postgraduate course lasting ten weeks will begin on April 23, 1969. These courses are held three times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for one or two weeks of a course, and attendance for this period is recognized under section 63 of the Health Services and Public Health Act 1968. These courses are also recognized under the special scheme for the retraining for general practice of doctors who have been out of the Health Service for at least five years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom). Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire. (14814)

COMMERCIAL APPOINTMENTS—see also p. xxxi

MEDICAL ADVISER

Applications are invited from British registered medical practitioners of either sex for the post of medical adviser to an independent private British company.

The company is primarily concerned with the manufacture of fine chemicals and secondarily with that of ethical pharmaceuticals, but the activities and scope of the Medical Department are increasing, and the Research Department's energies are largely devoted to searching for compounds that may prove valuable in the treatment of a wide range of human disease.

Preference will be given to candidates who

- (i) are young men (aged 25-30) or older women (aged 35-45);
- (ii) have a liberal education and a good command of English, are articulate, and have the ability to express themselves in writing clearly, accurately and concisely;
- (iii) have an enthusiastic interest in therapeutics and clinical pharmacology;
- (iv) are imaginative, painstaking and persevering in handling problems.

The work will involve all aspects of the company's activities in which the specialized knowledge of a qualified doctor has application. This embraces—planning, arranging, recording and assessing clinical trials of existing and new drugs and dressings; medical teaching of representatives; following up medical matters raised in representatives' reports; answering inquiries from doctors; medical advice to those concerned with the chemical and pharmacological search for new drugs; keeping abreast of the literature over a wide field of medicine; and generally assisting the senior medical adviser.

Starting salary will be by negotiation. A company car will be provided. The company operates a contributory superannuation scheme.

Requests for application forms should be made to

The Senior Medical Adviser,
Ward, Blenkinsop & Co. Ltd.,
Fulton House, Empire Way,
Wembley, Middlesex.

(H.6574)

MEDICAL
ADVISER

to the Sterling Winthrop Research and Development Division which, organised on a Pan European basis, undertakes research and development for The Bayer Products Company and its associate exporting company The Winthrop Products Company.

As a member of an international team of doctors the Medical Adviser will be responsible for initiating, organising and interpreting clinical trials for new products in the U.K.

The Company has an excellent record of new product development and plans to double research activities in the next four years. The job is responsible and offers plenty of opportunity to an experienced medical practitioner with initiative and administrative ability to contribute to and benefit from this expansion and to progress within the Company.

The starting salary is excellent and a company car is provided. We are particularly interested in a man or woman with hospital experience to Registrar status who has, ideally, obtained a higher qualification.

If you are interested please write giving brief details about yourself to:- Mrs. J. Waugh, Personnel Manager, Sterling Winthrop Research and Development Division, Winthrop House, Surbiton-on-Thames, Surrey, or if you prefer, telephone KINGston 7733. Initial interviews can be arranged in Surbiton or in Central London.

When severe debility follows infections,
prolonged illness or an operation

OROVITE HELPS HER FIGHT BACK

And fight back she must.
Surgery and antibiotic therapy are good
strong corrective measures—but what she
needs now is a prompt build-up of reserves.
In fact she needs Orovite.

Orovite is not merely a vitamin supplement—
it is a therapeutic dose of all the essential
vitamins needed to correct body metabolism.
It has been found extremely useful in treating
confusional states that so often follow oper-
ations and illness in older patients. And
specially for these patients, it is available as
easy-to-take, pleasant-tasting Orovite Elixir.

Contents: High potency
vitamin B complex and vitamin C.

Dosage: Adults: 1-3 tablets daily, or 1-3 teaspoonfuls Elixir,
3 times a day.

Children: 1-2 teaspoonfuls Elixir, twice a day.

The dose can be varied to suit the needs of the patient.
Acute cases should be treated parenterally, with Parentrovite.*

Contra-indications and Side-effects: None at the
recommended dosage.

Further information is available on request.

Orovite* is one of the range of Bencard vitamins.

PARKE-DAVIS

OCTOBER 4—THE PROBLEM. A large weeping ulcer infected with staph. pyogenes and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times

TWO WEEKS LATER—DESLOUGHING. After treatment with Aserbine Cream to the ulcer and Aqueous Ichthyol to the surrounding skin, complete desloughing has taken place.

NOVEMBER 14—HEALING. The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

When the presence of slough delays healing...

... in varicose ulcers, burns, pressure sores, trophic ulcers, etc.

... experience has shown that **ASERBINE** is a true desloughing agent which does not affect living tissue

Presentation: Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

Method of Application: Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep the dressing moist.

Active Ingredients	In 100 G. cream	In 500 ml. solution
Propylene Glycol	1.7%	40%
Malic Acid	0.36%	2.25%
Benzoic Acid	0.024%	0.15%
Salicylic Acid	0.006%	0.035%

CITY OF BIRMINGHAM
Public Health Department
Medical Officer of Health
E. L. M. Millar, M.D., M.Sc., D.P.H.SENIOR ADMINISTRATIVE
MEDICAL OFFICER

for the Personal and Child Health Services.

Salary: £3,540 × £105 (6)—£4,170 per annum.

Applications are invited for this post which becomes vacant on May 5, 1969. The school health and child welfare services, hitherto operated separately, are being combined into one service under the day-to-day administration of two senior administrative medical officers of equal status. Duties of the post soon to become vacant lie mainly in administering the School Health Service, and the successful applicant will work closely with the Senior Administrative Medical Officer of the Maternity and Child Welfare element of the Service in developing a fully integrated Personal and Child Health Service. Appropriate experience in the School Health Service and its administration is therefore essential and experience in a combined service highly desirable.

Closing date for applications: January 27, 1969.

Applications should be addressed to: STAFF APPOINTMENTS, P.O. BOX 29, Council House, Birmingham 1. Please state Reference Number 19/44/127 on letter and envelope. (14678)

ST. ANDREW'S HOSPITAL
NORTHAMPTON

Medical Director: James Harper, M.D., F.R.C.P. (Edin.), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 1.0 acres of parkland in the county town of Northampton. In general, patients are admitted to Wantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation, mainly in private rooms, both in the main hospital and in various villas, for longer stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an occupational therapy department, swimming-pool, a squash court and library, while in the grounds there are tennis courts, a nine hole golf course, etc.

Fees range from 25 guineas per week, and charges for treatment at St. Andrew's Hospital are allowable for benefit to British United Provident Association and Private Patients Plan subscribers.

Further particulars can be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel.: Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London W.1.

0.05% betamethasone 17-valerate + 0.1% phenylephrine hydrochloride + 2.5% lignocaine hydrochloride)

20 gram tube

* Now prescribable on the NHS except in Northern Ireland

Indications

All steroid-responsive dermatoses including psoriasis.

Betnovate-N preparations should be used if bacterial infection is present or suspected. As an alternative or when there is fungal infection, Betnovate-C preparations may be used.

Application

Ointment, cream, lotion and scalp application

Apply a small quantity once or twice daily

Rectal ointment

Apply a small quantity two or three times daily

Tulle

Apply direct to the lesion and cover with an absorbent dressing if necessary.

Adverse reactions

Betnovate preparations are usually tolerated well but if signs of hypersensitivity appear, application should be stopped immediately. When used with occlusive dressings on extensive areas, or for prolonged periods, as with all topical steroids, there is a possibility of systemic absorption. When using Betnovate-C preparations, cover lesions with a dressing to protect clothing.

Betnovate is a Glaxo trade mark
