use

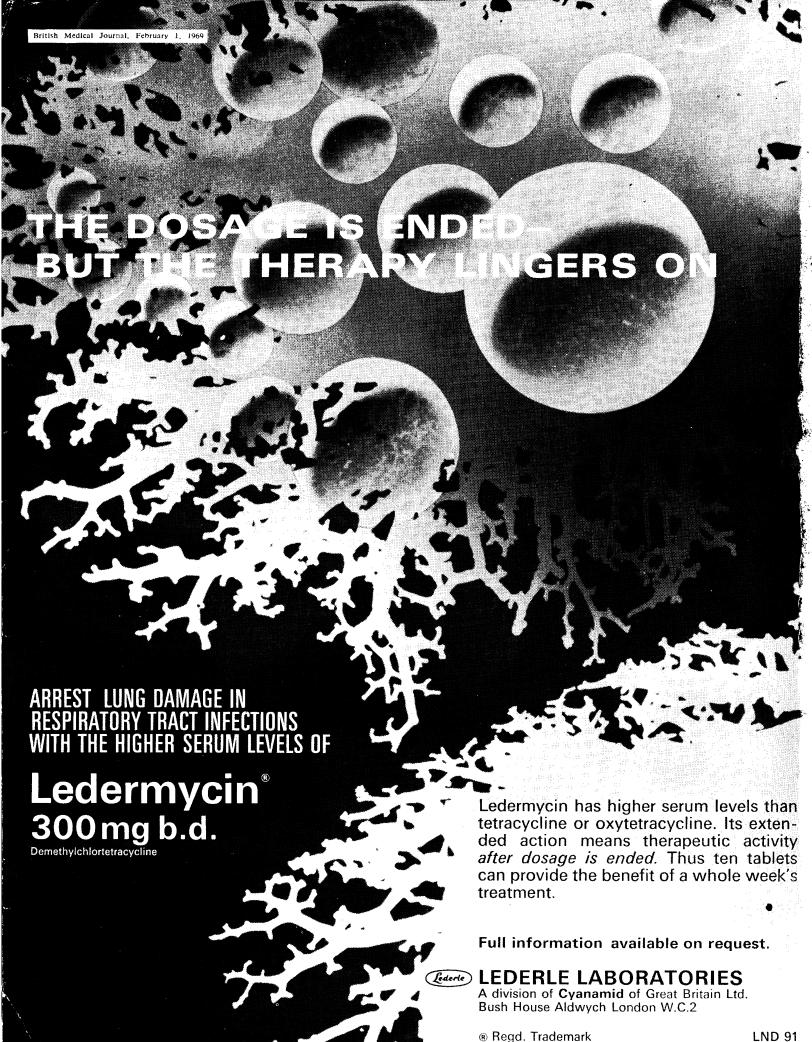

first in chronic bronchitis

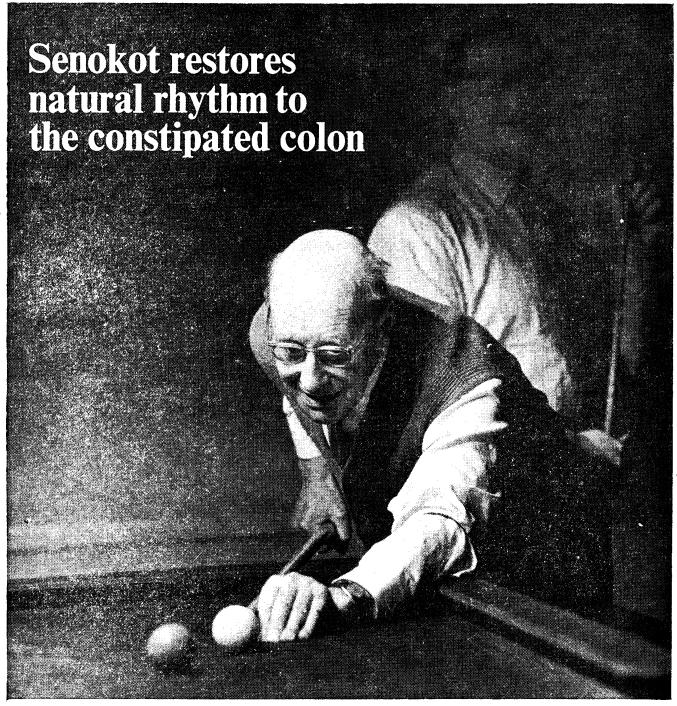

Bactrim[†] Roche: is highly effective in acute exacerbations of chronic bronchitis. It has an ultra-wide spectrum of activity; its dual action gives it great bactericidal potency, especially against Haemophilus influenzae-the most important pathogen in chronic bronch-

In a trial¹ Bactrim Roche* rapidly cleared purulent sputum and produced marked clinical improvement in every one of a group of 50 chronic bronchitics, where treatment with one or more antibiotics had already failed. Bactrim Roche produces its highly potent bactericidal activity from the potentiating action of its two components-trimethoprim and sulphamethoxazole. A leading article in the British Medical Journal on 18 May 1968 drew attention to the important therapeutic potential of this bactericidal synergy.

I. Proc. V int. Congr. Chemother., 1967, I, 293. *The formulation used in this trial was different from that which was subsequently found to produce the best results and which has now been adopted.

Senokot, standardized senna, has earned a reputation for effectiveness and safety. Over 150 references in medical journals and text books testify to its value. Senokot is suitable for all ages and is useful in pregnancy and in geriatric cases. It is predictable in its action and, taken in the correct dosage, is free from griping. Acting specifically in the colon, it induces controlled peristaltic action and restores the normal defaecation reflex leading to re-education of the bowel.

BASIC NHS COST: From the dispensing packs, the cost of a teaspoonful of granules or two tablets is about a halfpenny.
Granules: 56, 170 and 900 grammes.
Tablets: 50, 100, 200, 1000.

SENOKOT STANDARDIZED SENNA

re-educates the bowel

Westminster Laboratories Limited, Dansom Lane, Hull, Yorkshire.

I just can't seem to relax these days, doctor....

The over-anxious patient needs your sympathy... and the calming effect of BENVIL

Your reassurance, understanding and encouragement play an absolutely vital part in the treatment of any patient you feel is emotionally distraught. To help you *keep* your patients relaxed, calm and attuned to the realities of life you may wish to prescribe Benvil.

In cases of acute anxiety and tension, Benvil relaxes, calms, and restores a feeling of well-being. And it does this without over-sedation, which means that patients can successfully go about their daily work – an important aid to readjustment.

Moreover, reports on Benvil suggest that it is free from dependence.

Benvil is available as a new, smaller blue capsule containing 250 mg. tybamate in an original pack of 50.

Dosage: One capsule 3 or 4 times a day. For elderly patients it is recommended that therapy be started on the lower dosage. The dosage can be increased if necessary to a maximum of eight capsules in 24 hours to suit the individual concerned.

Precautions: Side effects are mild and infrequent at the normal dosage. In the aged, hypotensive effects are possible at higher doses. If drowsiness or mild dizziness occur, the patient should avoid activities requiring optimal alertness. If symptoms of hypersensitivity occur, treatment should be stopped and appropriate symptomatic therapy given.

Consumption of alcohol or concurrent administration of other psychotropic agents (e.g. phenothiazines, monoamine oxidase inhibitors) may have an additive effect. The customary precautions should be taken in administering Benvil to patients with a history of drug

allergies, blood dyscrasias, hepatic or renal disease. There has been no evidence to suggest development of tolerance or dependence with Benvil: in common with other psychotropic agents however, it is advisable to give Benvil cautiously to addiction-prone subjects and to withdraw therapy slowly after prolonged use. Although animal tests suggest freedom from teratogenic effects, Benvil cannot at present be recommended during the early weeks of pregnancy.

"all patients are convinced they are much better"

Convinced

Anginal patients are *convinced* of the improvement brought about in their condition by Synadrin 60.

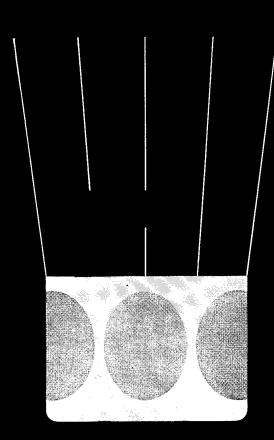

During 12 months treatment they suffered fewer attacks, less pain.

Earlier clinical studies 1,2,3,4,5. have been strikingly confirmed by British papers published in the last few months.6,7.

Try Synadrin 60 in your angina patients. They can convince *you*.

Scholl make sure the patient wears them

Scholl know as well as you do just how much women hate the idea of elastic hosiery. And that though they'll often take the prescription, they don't always wear the stockings.

So Scholl make their elastic hosiery attractive by making the stockings as un-detectable as possible. They conform to all the specifications of the Drug Tariff and they give the patient all the support and comfort you want her to have. But they look nicer than ordinary elastic stockings. Feel lighter. So that your patient doesn't feel embarrassed by them. And instead of leaving them in the drawer, she wears them.

Scholl 'Soft Grip' for conditions requiring 'Elastic Yarn Standard Weight—circular'.

Standard Weight—circular.

Worn under normal sheer nylons, Soft Grip are almost invisible. They are made in double-expansion mesh with two-way elasticity to provide firm, even support around the leg with plenty of comfortable 'give' lengthwise.

Scholl 'Nylastik' for cases needing 'Lightweight Elastic Yarn Stockings'.

Nylastik are worn instead of nylons, and, on the leg, appear almost indistinguishable from an ordinary 30 denier stretch stocking.

SEDNINE

An ideal treatment for all forms of cough, especially where there is associated bronchospasm. Each 10 ml dose contains: pholocodine BP 15 mg, pseudoephedrine hydrochloride 60 mg. Available in bottles of 150 ml and 2 litres.

COUGH! ETHNINE

For sedative cough therapy,

particularly suitable for infants, children and elderly patients. Each 10 ml dose contains: pholodine BP 10 mg. Available in bottles of 150 ml and 2 litres.

COUGH!

Trade Mari

For expectorant cough therapy when there is congestion as in the common cold and bronchitis. Each 10 ml dose contains: Piriton (chlorpheniramine maleate BP) 4 mg, ammonium chloride BP 200 mg, sodium citrate BP 88 mg. Available in bottles of 150 ml and 2 litres.

The treble choice in cough therapy

Holidays by Car Ferry

It is not often that you can enjoy the holiday pleasures of two worlds at relatively the same time but that is now becoming possible for an increasing number of people. A cruise on a liner-sized vessel can be followed by a tour on the Continent and then back to ship and home.

There is no doubt at all that the car ferry companies no longer regard their services as merely a means of getting passengers from A to B as quickly as possible with or without a car. The modern ferry boats and ferry liners are extremely well furnished and comfortable, stabilized, and air conditioned. Many of them have quite a number of four berth cabins and two berth with private shower and toilet.

Particularly comfortable are the ships serving the more distant countries like Sweden, (Tor Line, 25 hours from Immingham, Grimsby to Gothenburg) and Portugal (Normandy Ferries, two days from Southampton to Lisbon).

This sounds delightful and is delightful. Sweden is a lovely country with its lakes, mountains, and historical cities. Sports activities are many—sailing, fishing, horse riding, swimming, and golf—and the facilities to indulge in them are numerous. Spain and Portugal have, of course, long been favourites. This is not only because living is still fairly cheap and sunshine assured, but because of the magnificent beaches and the quite fantastic air of enjoyment of life at the nice leisurely pace that seems to pervade everywhere.

Many people find the drive down from a Channel port tiring, so it is a great advantage to be able to reach Lisbon by boat and then tour from there. Others, of course, use the ferry simply for the pleasure of the sea voyage and as part of a touring holiday.

The bulk of the traffic though will be going across the Channel from Southampton, Newhaven, and Dover to St. Malo, Cherbourg, Le Havre, Dieppe, Boulogne, Calais, Dunkirk and Ostend or from Tilbury, Harwich, Felixstowe, Immingham, and Hull to Hook of Holland, Rotterdam, Amsterdam, and Bremerhaven. With a choice of ports such as these it is no wonder that holidays on the Continent are so popular. Add to this the motor-rail service of British Rail, which is a great saving in time and energy apart from wear and tear of the car and frustrations of holiday-time traffic on the driver and passengers, and the result is the making of a first-rate holiday.

Townsend Ferries who already have three new ferry ships on the Dover—Calais and Dover—Zeebrugge routes are adding yet another

TFS The Car Ferry Where The Fare Includes Everything

Drive on . . . relax . . . Drive off

T.F.S. spring no surprise extras on the voyage. Travelling with (or without) your car you enjoy superb meals and a luxurious cabin—all included in the fare, plus personal service. Frequent sailings from Felixstowe to Rotterdam (Europoort) and Antwerp. Also daily sailings to Northern Ireland from Preston to Larne or Belfast. Ask your motoring organization or travel agent for details, or write to us.

The Transport Ferry Service

Dept BM, 25, Whitehall, London, S.W.1. Tel. 01-930 2363

to their fleet this year-Enterprise IV. British Rail have increased their scope with more ships and more sailings.

Car ferry services are not limited only to Continental routes. Ireland is well in the picture, being serviced by a number of routes. British Rail run services from Fishguard, Holyhead, Heysham, and Stranraer. The Transfer Ferry Service (T.F.S.) sails from Preston, and the Belfast Steamship Co. from Liverpool. In addition, Burns and aird Lines provide a daily return service from Androssan near Glasgow to Belfast with a new drive-through vessel m.v. 'Lion'.

Once hotel accommodation was quite limited in Ireland but the position is improving each year. It may not always be possible to find starred hotels, but the alternatives have much charm of their own and the friendliness of the Irish is incomparable.

Cruising Holidays

Although the length of journey undertaken by some of the ferry services entitles them to the name of cruises, there is still a great fascination and attraction in straightforward holidays at sea. currency allowance problem has possibly done quite a lot to encourage this, but nevertheless the demand has always been great, even if it is now greater. There are many to choose from according to one's own purse and inclination.

There are, of course, alternatives on this theme of holidays on the water. You can hire motor launches or travel in well-equipped barges and water buses on the waterways of England, France, Germany, Holland, and Switzerland. In this way you can with complete relaxation and no hotel worries visit Stratford or Strasbourg, Bath or Basle. The Dutch have always been well to the forefront with their water bus tours of the bulb fields of Holland, so it is no wonder that this expertise has been put to a further use with the Botel Cruises on the Rhine. It has been said that this is possibly the most beautiful river in the world. The valley in which it flows is through four picturesque countries full of historical interest and local charm.

Although on a more limited scale, the water buses-or 'mouches' of Paris which ply on the Seine provide an enjoyable hour or so's sightseeing of the famous buildings, churches, and bridges. To dinea true gourmet's dinner-on one of these famous boats at night, watch the floodlit skyline, and sense the exciting and romantic atmosphere is a thrilling unforgettable experience.

TO NORTHERN IRELAND

DQV-K offers high blood levels and the rapid action that doctors demand.

their patients just like the flavour.

'Distaquaine' V-K Syrup is a presentation of penicillin V potassium—the stable, rapidlyacting bactericidal antibiotic that gives higher blood levels than benzylpenicillin (approximately double for an equivalent oral dose)1,2. It is consistent in its action and is manufactured by a company whose reputation is founded on penicillin expertise. These are all important factors, but the touches of finesse are important too: the pleasant fruity taste that coaxes patients to take the full course of medicine; the 125 mg or 250 mg per 5 ml strength for selective prescribing; and the 5 days treatment afforded by the 100 ml pack.

References

1. Lancet, (1956), 2, 328.

BRUFEN (ibuprofen)

an achievement of British research in the treatment of rheumatic disease

This announcement comes after fifteen years of intensive research directed towards the development of a compound which would be effective in the treatment of rheumatic disease and without many of the disadvantage's commonly associated with other antirheumatic drugs. Brufen is a potent, non-steroidal antirheumatic agent which possesses powerful analgesic, anti-inflammatory and antipyretic properties. Extended clinical studies have indicated that Brufen exerts a high level of clinical activity without serious side-effects. Information about Brufen is now being mailed to general practitioners and to physicians in relevant fields.

for gentle control in the elderly hypertensive SALUPRES

Salupres' is an antihypertensive agent containing hydrochlorothiazide, reserpine and a potassium supplement. 'Salupres' is for the treatment of mild to moderate hypertension in cases where some insurance against thiazide-induced potassium loss is necessary. Such cases include older patients on diets low in petassium, and patients receiving digitalis. The action of 'Salupres' is gradual and smooth in onset, and does not produce undue fluctuations in blood pressure—advantages to remember when treating the elderly patient.

'Salupres' is supplied as white sugar-coated tablets containing 12.5 mg hydrochlorothiazide, 0.0825 mg reservine and 572 mg potassium chloride, in Bottles of 25, 100, and 500. Detailed information is available to physicians on request.

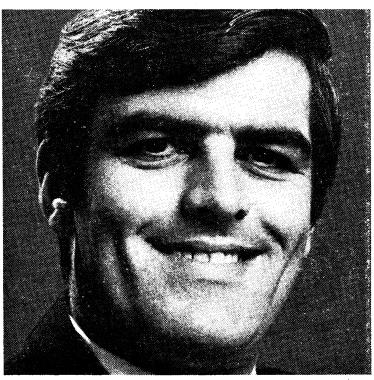

Note. 'Salupres' contains potassium chloride. Symptoms and signs which might indicate ulceration or obstruction of the small bowel in patients taking tablets or ospeules containing potassium salts are indications for stopping treatment with such preparations immediately.

Merck Sharp & Dohme Limited, Hoddesdo Hertfordshire *Telephone, Hoddesdon 671*.

Hay fever will strike soon. His income could suffer.

He's a salesman.
Suffers badly from hay fever.
His car is his office.
Anti-histamines make him drowsy.
He works hard for a tough company.
Last summer his sales went down.
So did his commission.
This year it could happen again.

The answer is Alavac-P....NOW!

The peak pollen time is June/July. That's hay fever time. Palliative anti-histamines provide some relief but often induce drowsiness. The patient's mental and physical life is restricted —especially if he drives or has to operate machinery.

Now is the time for Alavac-P.

Alavac-P is a fundamental treatment that effectively desensitizes hay fever sufferers and gives them summer-long protection from the miseries of grass pollen allergies.

The course is short—no more than 9 injections given at intervals of 7 to 14 days—and should be timed so that the course is completed before the start of the grass-pollen season.

The Alavac-P mix of 12 grass pollen extracts provides the widest available protection against hay fever and hay asthma right throughout the grass pollen season and throughout the British Isles. It can be prescribed from case history alone and can be administered with confidence to even the most sensitive patients.

Each Alavac-P vaccine course is supplied with sterile disposable syringes and full instructions on administration and dosage.

The time to prescribe is now.

Full prescribing information is available on request.

We timed our launch rather late...

but we timed Nitrong better.

For longer relief from angina pectoris.

Independent studies confirm Nitrong consistently relieves angina for 10 – 12 hours.

I. Proven blood levels.

"Nitrate blood levels in patients given Nitrong tablets were the same after 8 hours as the levels found after 6 minutes in patients given a sublingual tablet of nitroglycerin. After 12 hours the blood level was still sustained above the value (6 to 9 µg/ml) which correlates with good control of the anginal syndrome". West. Med. 7:11, 330, 1966.

2. Proven performance.

"A new type of tablet, Nitrong, containing controlledrelease nitroglycerin, which is stabilized to maintain a constant potency, and which is released in the alimentary tract over a period of approximately 10 hours...gave marked or good improvement in 17 of 20 cases with confirmed coronary insufficiency". Sartr. Op. Med. 10, 1965.

3. Proven prophylaxis.

"...the controlled-release tablets (Nitrong) benefited all patients in that their need for sublingual tablets was diminished. The mean diminution in the need for sublingual medication was 78 per cent. Ten of 19 patients required no sublingual tablets during 14 or more days of the test period". Curr. Ther. Res. 7:12, 1965.

Basic NHS prices: 14/9 for 50s, 67/6 for 250s.

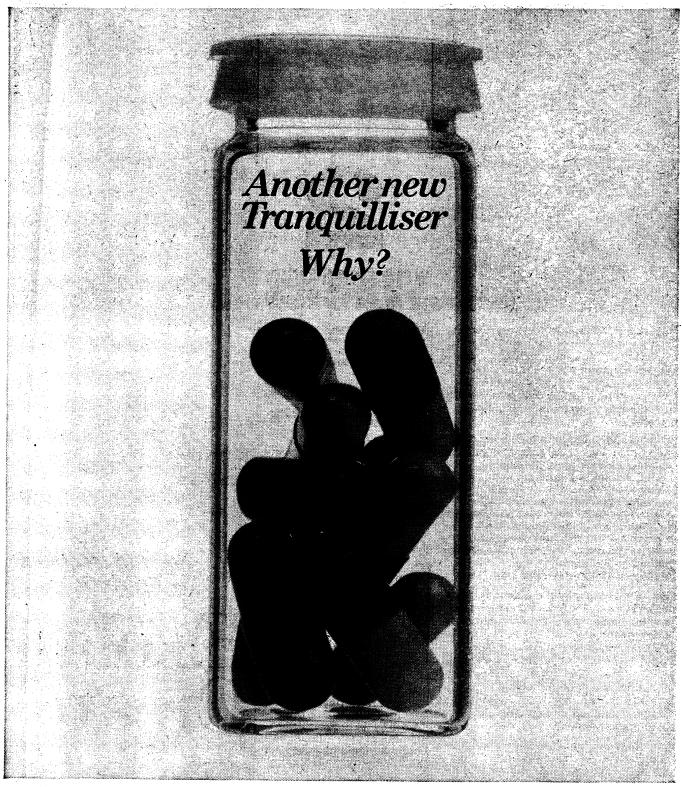

Composition: Glyceryl trinitrate (2.6 mgm) in sustained-release form — mottled, scored tablets.

2weeks

In the treatment of psoriasis, triacetoxyanthracene has been shown to exhibit the healing properties of dithranol while displaying none of the side effects of burning or staining the skin. It therefore may be used by the patient in his own home without the fear that any harm will result if it accidentally comes in contact with normal skin.

"Dithranol (trihydroxyanthracene) is one of the most effective drugs in the treatment of psoriasis. Unfortunately it has two disadvantages—it may irritate the skin and even cause blistering and it stains both the skin and the patient's under-clothes and bed linen. Within the last few months a modification of dithranol—1,8,9-triacetoxyanthracene—has been developed which neither burns the skin nor stains clothes. It is now being marketed as Exolan paste"

Pharmaceutical Journal (1966) 2, 175

"Exolan is a recently developed synthetic derivation of dithranol. The active ingredient is preferentially liberated by hydrolysis on the surface of the psoriatic plaques. The molecule is so adapted that the staining and much of the irritant properties of dithranol are avoided with loss of only some of its potency . . . It may also be tolerated in cases where the psoriasis is too inflamed or acute for dithranol, or where staining makes it cosmetically unacceptable."

British Medical Journal (1966) 2, 993

"Patients known to be sensitive to dithranol were not treated with the new drug, but in one case such a patient was given triacetoxyanthracene without any adverse reaction occurring" British Medical Journal (1967) 1, 682

"After three weeks treatment with triacetoxyanthracene paste there was an amazing clearance and he was able to roll up his sleeves for the first time for 25 years. After a further 3 weeks he was practically clear and better than he had been for 30 years."

British Journal of Dermatology (1967) 79, 491

Psoriasis case history. Male patient aged 72 years with widespread chronic psoriasis admitted to hospital 18th October, 1966. Exolan Cream prescribed for application twice daily. Psoriasis practically clear; patient discharged 1st November, 1966.

Exolan is the only specific treatment for Psoriasis which has been given an A.2. classification by the Standing Joint Committee on the Classification of Proprietary Preparations. (A.2.: "A preparation of a single therapeutically active drug which has been shown to the Committee's satisfaction to have an acceptable degree of efficacy in relation to its toxicity and therapeutic indications and which in the light of alternative available preparations can be recommended for use. Exolan is entirely a product of British research.

by a comfortable margin. In a recent report

of a comparative trial* involving three antihypertensive agents satisfactory control of blood pressure was obtained with each drug.

With 'Esbatal' for instance, a standing diastolic pressure of 100 mm. Hg or less was achieved in 75% of cases. The authors pointed out that

'Esbatal', guanethidine and methyldopa are probably similar in their ability to control blood pressure. It was found, however, that 'Esbatal' produced fewer uncomfortable side-effects and was preferred by more patients than were the other agents.

In contrast to the other drugs, all the patients on 'Esbatal' were able to complete the course of treatment.

ESBATAL bethanidine sulphate Trade mark

the happiest choice for your hypertensive patient

Just one teaspoonful of PHOLTEX relieves cough for 8to 10 hourz

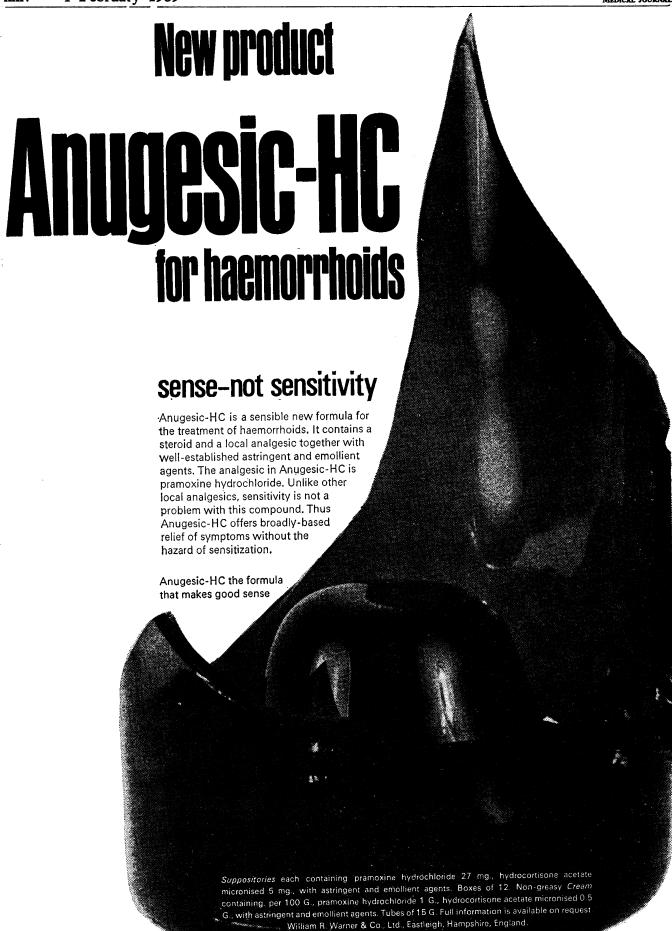

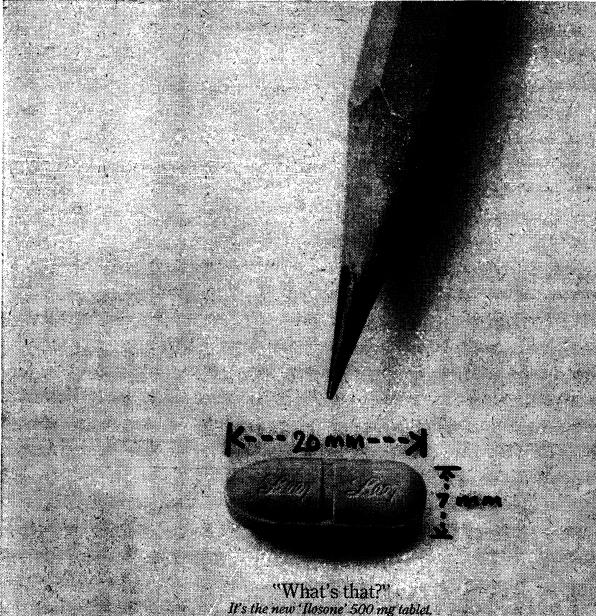

Just a single teaspoonful dose of Pholtex can relieve a cough through the whole of a restful night-or all of a working day. Each teaspoonful of Pholtex contains Pholcodine B.P. 15 mg. and phenyltoloxamine 10 mg. as ion-exchange resin complexes in a pleasantly-flavoured thixotropic vehicle. Dosage: one 5 ml. teaspoonful two to three times a day (for children, half to full adult dosage according to age). Basic NHS cost 100 ml., 8/-: 1000 ml., 79/4. Full information is available on request.

Riker Laboratories Loughborough Leicestershire \Riker

It's the new 'Ilosone' 500 mg tablet,

"Why 500 mg?"

Because it enables 'Ilosone', the everyday antibiotic, to be given in a simple twice a day dosage – an easy dosage for the patient to follow, and less risk of missed doses than with q.i.d. regimens.

So your patient has a continuously effective blood level of 'Ilosone' – already well known for its bactericidal effect in infections of the respiratory tract-but with simple b.i.d. dosage.

Ilosone 500 mg tablet for twice a day dosage

Further information available on request.

Bli Lilly and Company Limited, Basingstoke, England.

Precaution: On rare occasions there have been reports of cholestatic jaundice, generally when treatment has been prolonged for ten days or more. All such cases
have regressed, usually promptly, when 'llosone' was discontinued. However,
'llosone' should not be used in persons who have previously developed jaundice or other
sensitivity reactions in association with its use, or in patients
with pre-existing liver disease or dysfunction.

'llosone' is the Lifty trade mark for crythronycin estolate.

Hutchison's Food and the Principles of Nutrition

Twelfth Edition

HUGH M. SINCLAIR and DOROTHY HOLLINGSWORTH

652 pages. 19 figures. 21 tables

Completely reset and re-designed this new edition has been long awaited. Considerable changes have been made to include advances that have taken place during recent years and the title slightly altered to make it an accurate description of the contents. Historical aspects are followed_by a discussion of nutrition in health and disease, the nature of foods, and diet in the treatment of disease.

Originally published in 1900 this book has been in the forefront of works on this subject throughout its many editions.

Pathology in the Tropics

G. M. EDINGTON and H. M. GILLES

766 pages. 137 illustrations

£10 net cloth; £5 net paper

A comprehensive volume covering every aspect of pathology in the tropics. Problems caused by diseases modified from the accepted descriptions in temperate climates by the environmental factors of the tropics are discussed as well as the diseases which occur exclusively in this area.

Folic Acid Deficiency in Pregnancy

It is now established that the body stores of folic acid decrease throughout pregnancy and may lead to megaloblastic anaemia, a common complication in the third trimester. 1,2

In addition to routine oral iron therapy, it is recommended that prophylactic administration of folic acid should be started in the early stages of pregnancy, preferably incorporated with the iron in a single tablet.3

PLESMET F.A. Tablets provide this facility in the most appropriate dosage combination and present advantages in convenience for the patient, together with economy both in dosage and cost of prescribing.

NEW Prophylactic dosage formula

PACKINGS AND PRICES:

Each tablet contains:-Ferrous aminoacetosulphate=50 mg.Fe plus Folic acid 150µg.

One tablet two or three times per day. REFERENCES:

COATES & COOPER PYRAMID WORKS, WEST DRAYTON, MIDDX.

when teen-agers want to know about menstruation one picture may be worth a thousand words

Never are youngsters more aware of their own anatomy than when they begin to notice the changes of adolescence. And never are they more susceptible to misinformation from friends and schoolmates.

To negate half-truths, give teen-agers the facts using illustrations from charts like the one pictured above. They'll help answer teen-agers' questions about anatomy and physiology. These 8½ x 11 coloured charts of the female reproductive system were prepared by R. L. Dickinson, M.D. and are supplied free by Tampax Limited. Laminated in plastic for permanence, they are suitable for grease pencil marking. And to answer their social questions on menstruation, we also offer 2 booklets; "Let's talk about you", for very young girls, which answers questions that have actually been asked of our Educational Staff, and "Accent on You", which explains menstruation and its part in womanhood for the older girl.

Tampax tampons are a convenient—and hygienic -answer to the problem of menstrual protection.

They're convenient to carry, to insert, to wear, and to dispose of. By preventing menstrual discharge from exposure to air. Tampax tampons prevent the embarrassment due to menstrual odour. Worn internally, they cause none of the irritation and chafing associated with perineal pads.

Tampax tampons are available in Regular and Super absorbencies, with explicit directions for insertion enclosed in each package.

Simply write to the address below for your free set of charts and sample booklets. These booklets may then be reordered in any quantity you need for your patients' personal use.

Neonatal Surgery

Edited by P. P. Rickham, MD, MS, FRCS, DCh, and J. H. Johnston, MB, FRCS, FRCSI

The extensive progress in the last decade in paediatric surgery has led to a considerable amount of necessary specialization within the field. This volume, believed to be the first to keep abreast of this specialization, concentrates wholly on the surgery of the newborn. A team effort in every sense of the phrase (chapters have been contributed by nursing staff, anaesthetists, paediatricians, otorhinolaryngologists and orthodontists), Neonatal Surgery will provide a valuable addition to the library shelves of all paediatric surgeons.

1969 608 pages Illustrated £8 10s.

Cerebral Angiography Second Edition

by H. A. Krayenbühl, MD, and M. G. Yaşargil, MD

This is the second edition of a well-known German textbook which, at the request of many authorities, now appears for the first time in English. The authors, both notable Swiss neurosurgeons, have formulated their angiographic experience together with the international literature on the subject to present it in a new monograph. The subject is approached from the clinician's viewpoint, and the particular needs of the neurosurgeon are given special consideration.

1968 410 pages Illustrated £18 10s.

Diagnosis and Treatment of Cardiac Arrhythmias

by J. P. P. Stock, MD, FRCP

The accent of cardiology today makes this book long overdue. It has been written at the request of many of the author's associates, and covers both the practical aspect entailing rapid diagnosis and treatment, and also the more academic aspect where careful study of arrhythmias may lead to a better understanding of their underlying mechanism in terms of cardiac physiology.

1969 268 pages Illustrated 75s.

The Surgical Management of Ulcerative Colitis

by Frank Couper Walker, CLM, FRCS, FRCSE This book presents the experiences which have emerged from the treatment of about four hundred patients afflicted with ulcerative colitis. It should be of great use to the surgeon having to care for the occasional case, and details of diagnosis, operation (primary and revisional) together with experiences of the management of ileostomy dysfunction are given.

1968 160 pages Illustrated 50s.

Paediatric Urology

by D. Innes Williams, MD, MChir, FRCS(Eng) This work presents an interdisciplinary review of the modern urological techniques available to paediatric surgeons. It covers the whole field primarily from the point of view of the urologist and the paediatric surgeon, but there is a full discussion of topics where the medical and surgical interests overlap, and an outline of paediatric nephrology.

When did you last see Bournemouth?

Was it that week-end just before the war when you hired a Lea-Francis with whitewall tyres and drank the very latest astonishing cocktails and danced into the early hours? You can still drink astonishing cocktails at The Bournemouth Carlton, though they aren't so often asked for now and you will find the service and amenities just as impeccable as they always were. You deserve a few days away, come to The Bournemouth Carlton – you'll remember them well!

COMMERCIAL APPOINTMENTS

Hoechst Pharmaceuticals

A Division of Hoechst U.K. Limited

is expanding further and two more Medical Advisers are required in the Medical Department.

Ideally these doctors should be recent graduates of a British Medical School. Whilst a higher medical qualification is not essential, experience in one or more of the following fields; Diabetes, Gastroenterology, Haematology, Fsychiatry or Pharmacology is an advantage as is also a definite interest in some field unconnected with clinical medicine. The Duties of these posts consist mainly of the setting up and continuous supervision of clinical studies of drugs developed by the parent company.

Salary and prospects will be good. There is an outstanding non-contributory pension and life insurance scheme. A company car will be provided.

Applications for these posts should be made in writing to:

The Personnel Manager, Hoechst U.K. Limited, Hoechst House, Kew Bridge, Brentford, Middx.

COMMERCIAL APPOINTMENTS—see also pp. xxxiv and xxxvi

IMMUNOLOGY

A bacteriologist is required at the Wellcome Research Laboratories for research in immunology, especially in relation to medical laboratory diagnosis. The post will give ample scope for basic work and the development of new techniques in an expanding Department at Beckenham. Applicants should have had relevant experience in academic or clinical bacteriology.

Please write for details of the post and conditions of employment, quoting reference AM.105, and briefly outlining your qualifications and experience to the Senior Personnel Officer,

THE WELLCOME RESEARCH LABORATORIES Langley Court, Beckenham, Kent.

ZYMA (U.K.) LTD.

Due to the expansion of its research activities in the United Kingdom, a progressive Swiss Company wishes to appoint a further

FULL-TIME MEDICAL ADVISER

Applicants should have sound clinical experience in hospital or general practice, and be in the 30-35 age group. Previous experience in the pharmaceutical industry would be an advantage. The activities will include liaison with the Medical Profession, the training of medical representatives, advice to the marketing department, and assistance to the Senior Medical Adviser.

The appointment will be based on Godalming, and will involve collaboration with the parent company in Switzerland; a knowledge of French would therefore be an advantage.

The initial salary will be negotiable. The Company operates a generous contributory pension and non-contributory life assurance scheme. A car is provided.

Applications (including if possible a recent photograph) will be treated in absolute confidence and should be addressed to

> The Managing Director, Zyma (U.K.) Ltd., Catteshall Lane, Godalming, Surrey.
