BRONCHITIS

PENBRITIN

He didn't expect to be back at work so soon. Ten days ago he went down with Bronchitis—his first time off work in years. He's lucky—his was an isolated attack and he can now expect a trouble-free winter. For the Chronic Bronchitic the prognosis is not so good and repeated attacks must be expected.

Penbritin is the answer-first time

Whether your patient suffers from Acute or Chronic Bronchitis you want your first prescription to be the one which works. You need a broad spectrum antibiotic mainly because of the possibility of H. influenzae being involved. (British evidence, 1,2,3,4, shows this to be by far the most troublesome pathogen in Chronic Bronchitis – the "English Disease"). The most active of all antibiotics against haemophilus is Penbritin, which at normal dosage achieves bactericidal levels in both serum and lung tissue to ensure a rapid clinical response and minimise the risk of relapse or complications.

Being a penicillin, the dosage of Penbritin may be safely increased in severe illness: in severely disabling bronchitis high dosage Penbritin therapy can achieve bactericidal concentrations in the sputum, eliminuting reservoirs of infection and affording the patient unprecedented freedom from infection ¹. Additionally, when more rapid control of infection is imperative, Penbritin may be given by injection.

In the treatment of Bronchitis, Penbritin is the answer – first time. And so often the only prescription needed.

Bronchitis Dosage:

Children under 2 years: 62.5-125 mg.

2-10 years: 125-250 mg. dults: 250 mg.

All dosages a.d.s. a.c.

In severe infections these doses may be increased or

Penbritin given by injection.

(High dosage regimen for severely ill Chronic Bronchitics: 1 gram q.d.s.)

Contra-indication: Penicillin allergy.

Side-effects: As with other penicillins. **Availability:** Penbritin (ampicillin B.P.):

Capsules, 250 and 500 mg. Syrup, 125 mg./5 ml.

Syrup Forte, 250 mg./5 ml.

Paediatric Tablets, 125 mg.

Injections, 100 mg., 250 mg., 500 mg.

A case for 'Neulactil'

The antisocial adolescent. The problem child. The difficult geriatric patient. Each a specific type of behaviour disturbance, calling for specific management methods.

Sedatives and tranquillizers can help, but more valuable still are compounds with greater specificity of action, particularly in controlling such symptoms as impulsiveness and aggressive tendencies. 'Neulactil' is such a compound.

'Neulactil' has been shown to be highly effective in the control of disordered behaviour in juvenile, adolescent and elderly patients, whether it is of the neurotic type, or associated with psychotic illness.

"The manufacturer's claims that this drug is a potent neuroleptic are justified."

S. Afr. med. J., 41, 995, 1967.

'Neulactil'* brand pericyazine is available as tablets of 2.5 mg. and 10 mg., syrup 2.5 mg. and 10 mg. per 5 ml., injection solution 10 mg. per ml.

An M&B brand Medical Product.

Full information is available on request May & Baker Ltd Dagenham Essex

We timed our launch rather late...

but we timed Nitrong better.

For longer relief from angina pectoris.

Independent studies confirm Nitrong consistently relieves angina for 10 – 12 hours.

I. Proven blood levels.

"Nitrate blood levels in patients given Nitrong tablets were the same after 8 hours as the levels found after 6 minutes in patients given a sublingual tablet of nitroglycerin. After 12 hours the blood level was still sustained above the value (6 to 9 µg/ml) which correlates with good control of the anginal syndrome". West. M. d. 7:11, 330, 1966.

2. Proven performance.

"A new type of tablet, Nitrong, containing controlledrelease nitroglycerin, which is stabilized to maintain a constant potency, and which is released in the alimentary tract over a period of approximately 10 hours...gave marked or good improvement in 17 of 20 cases with confirmed coronary insufficiency". Sartr. Op. Med. 10, 1965.

3. Proven prophylaxis.

"... the controlled-release tablets (Nitrong) benefited all patients in that their need for sublingual tablets was diminished. The mean diminution in the need for sublingual medication was 78 per cent. Ten of 19 patients required no sublingual tablets during 14 or more days of the test period". Curr. Ther. Res. 7:12, 1965.

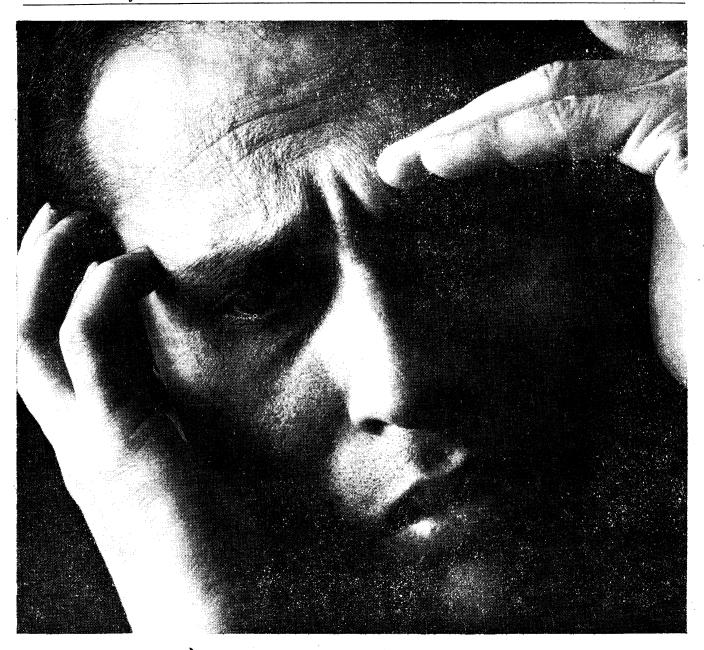

Basic NHS prices: 14/9 for 50s, 67/6 for 250s.

Composition: Glyceryl trinifrate (2.6 mgm) in sustained-release form — mottled, scored tablets.

Asian 'flu is depressing too!

That's why Para-Hypon is so useful – in addition to paracetamol and codeine it contains caffeine to provide a mild stimulus. It helps the patient fight off the aches, the fever and the blues.

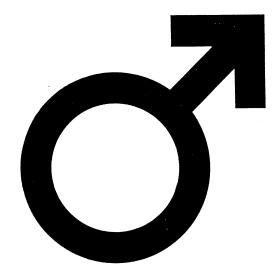

Each 'Para-Hypon' tablet contains Paracetamol B.P. 500 mg; Caffeine B.P. 10 mg; Codeine Phosphate B.P. 5 mg; Phenolphthalein B.P. 5 mg.

Further information is available on request. Calmic Limited, Crewe, Cheshire.

Para-Hypon

eases the aches without causing constipation.
Lowers the fever.
Fights the depression.

Sustanon makes a man a man again

in body and in mind

When gonadal activity is inadequate the young or middle-aged male may demonstrate diminished genital structure, and response, to the point of impotence. Understandably the repercussions reach far beyond the purely physical – often playing havoc with the patient's psyche, marriage and career.

Every physician knows how complex is diagnosis of the condition, with the patient frequently hiding the facts not only from his doctor but from himself. Even when the diagnosis is established, therapy is not straightforward and many factors must be considered. Nevertheless with Sustanon a clear, early and sustained response may occur at all levels, physical, mental, and emotional.

Sustanon is preferable to testosterone propionate as of course no single testosterone ester provides both lengthy activity and rapid onset of action. This Sustanon does. Its prolonged activity is such that only an occasional injection is needed to maintain the required therapeutic level.

Sustanon '100'

2 weeks' activity - contains 100mg testosterone per ml:

Testosterone Propionate B.P. 20mg Testosterone Phenylpropionate B.P. 40mg Testosterone Isocaproate 40mg

Sustanon '250'

4 weeks' activity - contains 250mg testosterone per ml:

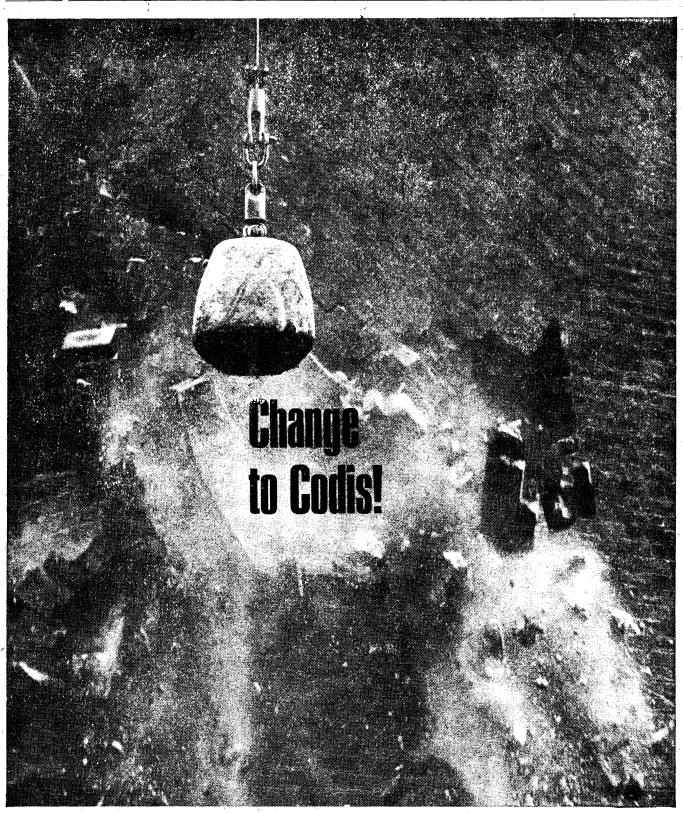

Testosterone Propionate B.P. 30mg
Testosterone Phenylpropionate B.P. 60mg
Testosterone Isocaproate 60mg
Testosterone Decanoate 100mg

Packs: Boxes of 3 ampoules of 1 ml in either strength.
Single 1 ml Orgaject disposable syringes in either strength.
Contraindication: in males, carcinoma of the prostate.

Further information available on request.

Organon Laboratories Limited · Crown House · Morden · Surrey

The writing's on the wall for Codeine Co.

Take the Codeine Co. formulation. Drop phenacetin because of its potential nephrotoxicity. Add more aspirin (highly soluble aspirin) to restore the full therapeutic effect. Now you have Codis—a safer, more effective formulation for long-term use.

Each Codis tablet contains Acetylsalicylic Acid B.P. 500 mg., Codeine Phosphate B.P. 8 mg., Calcium Carbonate B.P. 150 mg., Anhydrous Citric Acid B.P. 50 mg., Saccharin B.P. 6 mg.

use

first in chronic bronchitis

Bactrim[†] Roche: is highly effective in acute exacerbations of chronic bronchitis. It has an ultra-wide spectrum of activity; its dual action gives it great bactericidal potency, especially against Haemophilus influenzae-the most important pathogen in chronic bronchitis

In a trial Bactrim Roche* rapidly cleared purulent sputum and produced marked clinical improvement in every one of a group of 50 chronic bronchitics, where treatment with one or more antibiotics had already failed. Bactrim Roche produces its highly potent bactericidal activity from the potentiating action of its two components-trimethoprim and sulphamethoxazole. A leading article in the British Medical Journal on 18 May 1968 drew attention to the important therapeutic potential of this bactericidal synergy.

I. Proc. V int. Congr. Chemother., 1967, I, 293. *The formulation used in this trial was different from that which was subsequently found to produce the best results and which has now been adopted.

use

first in chronic bronchitis

Arlef* (flufenamic acid, Parke-Davis) possesses high anti-inflammatory and analgesic properties. It effectively relieves the symptoms of osteoarthritis, rheumatoid arthritis and other painful rheumatic conditions, and enables the patient to get to grips with everyday activities.

Arlef is available in Kapseals* containing 100 mg. flufenamic acid in containers of 50 and 250 (Overseas 30 and 100).

A morning's surgery brings a lot of Crystapen G patients

How many patients needing antibiotics do you see in a morning? Whatever the number, there is a strong case for using penicillin. It is still the drug of choice in so many infections. An established penicillin in a modern form is Crystapen G (penicillin G)—one you can rely on in the treatment of strep. throats for example. And Crystapen G is as effective clinically as penicillin V.2

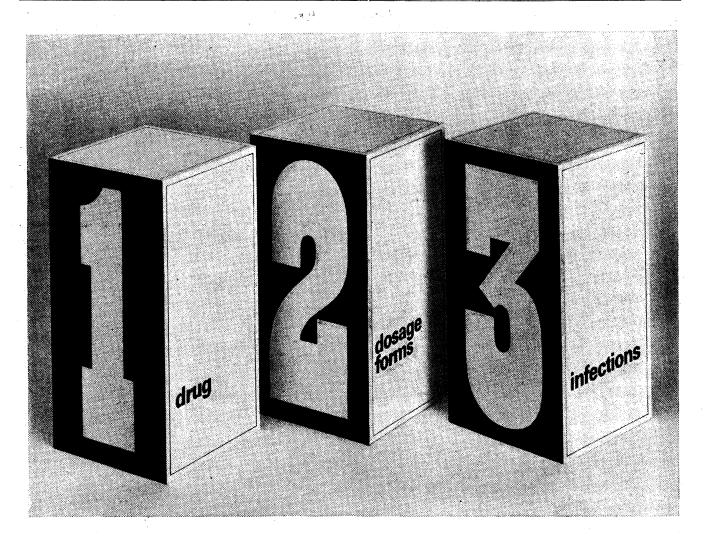

When your patients need oral penicillin, you can rely on Crystapen G.

Your patient's nightmare?

He'll get continuous relief with high, sustained theophylline blood levels.

Choledyl—choline theophyllinate BP—is readily absorbed by mouth, producing therapeutically effective theophylline blood levels up to 75% higher than those obtainable with equivalent doses of aminophylline. Choledyl rarely causes gastric irritation.

Choledyl is available as tablets containing 100 mg or 200 mg choline theophyllinate BP, in bottles of 100 and 500, and as syrup containing 62.5 mg choline theophyllinate BP in each 5 ml dose, in bottles of 150 ml and 2 litres. Full information is available on request.

CHOLEDYL*

In chronic bronchitis

and asthma...

quickly provides high theophylline blood levels

for more than 6 hours

he's changed his car six times in twenty years but he still won't change from SOLPRIN

He sees no reason to change from Solprin because, like many doctors, he knows that Solprin still maintains its reputation as the most acceptable form of aspirin. He knows that salicylate therapy is still the first choice treatment for rheumatoid arthritis, and that the aspirin in Solprin is an extremely soluble form to minimise the risk of gastric irritation – a point of particular importance when high doses are used.

A recent report from a London teaching hospital demonstrated the anti-inflammatory effect of salicylate in high dosage for the treatment of rheumatoid arthritis, and comparisons were made with prednisone and paracetamol. Both prednisone and high doses of salicylate produced measurable reduction in joint size, but paracet-

amol did not do so. The authors state,

"It is suggested that high dosage of salicylate, unlike low dosage, has a clinically measurable anti-inflammatory effect. If suppression of inflammation is desirable in rheumatoid arthritis high dosage of salicylate is indicated..."

Brit med J, 1967, 4, 264.

Each Solprin tablet contains Acetylsalicylic Acid BP 300 mg, Calcium Carbonate BP 100 mg, Anhydrous Citric Acid BP 30 mg, Saccharin Sodium BP 3 mg.

Reckitt and Sons Limited, Pharmaceutical Department, Hull.

Private treatment today

In this space BUPA reports from time to time on matters which may be of interest to those concerned with private treatment in this country. BUPA's own interest is clear and declared; we believe a strong private sector in medicine to be an essential corollary to a successful public sector. Alone among the provident associations, we are sponsoring (through Nuffield Nursing Homes Trust) the creation of new and expanded facilities for private treatment.

BUPA to Install Britain's First Autochemist

BUPA to Install Britain's First Autochemist
BUPA is to install the world's most advanced automated pathological laboratory—the £165,000 Swedish-made Autochemist—in the London Medical Centre which will open in the autumn. The machine can carry out automatically 24 different tests on blood or urine samples, and the results are printed out via a built-in computer in one hour. It has been calculated that the Autochemist can handle a work load which would normally need 100 qualified technicians using conventional analytical methods. The BUPA Autochemist will be the only machine of its kind operating in Europe apart from Sweden. The machine has a capacity of about a quarter of a million samples a year, and will automate some 90 per cent of the pathological work at the Medical Centre. In practice this means that a doctor referring a patient to the Centre would expect a detailed test profile to be posted back to him the same evening.

It is thought that the Medical Centre will be used mostly for patients without any apparent symptoms, referred by their doctors for a periodic health check, although the Centre will also obviously be of use to doctors seeking urgent and detailed tests for patients already showing symptoms of illnesses.

Mr. Eric D. Roberts, BUPA's General Manager, emphasises that the services of the Centre will only be available to patients referred by their doctors, and that the test profile will be sent direct to the doctor, not to the patient.

"We see this machine as a new and more effective tool for the doctor's

by their doctors, and that the test profile will be sent direct to the doctor, not to the patient.

"We see this machine as a new and more effective tool for the doctor's use," says Mr. Roberts. "We have obtained the Autochemist for Britain as part of our policy of contributing, wherever possible, additional facilities for the use of the medical profession as a whole. We hope that the Medical Centre will remove a lot of the donkey work and delay which the doctor faces when he calls for tests—for at the moment these have to be done mostly by hand, often in widely separated and overworked hospitals and laboratories." Since the BUPA Medical Centre will be able to handle a large number of tests at one time, it will actually be quicker and cheaper to provide a doctor with a full medical profile than to run a few selected tests by conventional means.

New X-ray for Nuffield's Woking Home

New X-ray equipment costing £12,500 has been installed in the 30-bed Nuffield Nursing Home in Shores Road, Woking. This Home, which was opened in 1962 by the Trust in response to a local appeal for a modern surgical nursing home, is now financially self-supporting having paid off all its initial capital commitments, and this has enabled improvements to be made in the X-ray equipment which will ensure that it compares favourably with any similar department. During installation of the new Philips equipment provision was made for incorporating, at a later date, an image intensifier and medical TV chain for gastrointestinal and all other fluoroscopically controlled examinations.

ANTIBIOTICS THE INTESTINAL AND

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of Lactobacillus acidophilus which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria¹² and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant L. acidophilus in the form of ENPAC has been shown to eliminate Candida from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight³ 4 and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.5

Latest news about PYOPEN

IN THE TREATMENT OF REFRACTORY GRAM-NEGATIVE INFECTIONS

27 patients with infections caused by <u>Pseudomonas aeruginosa</u> (<u>Ps. pyocyanea</u>) are considered in a recent issue of the Medical Journal of Australia (1968) Vol. 2 No. 20 p. 890.

Septicaemia

8 patients - all of whom were bacteriologically cured.

Urinary Tract Infection

9 patients - bacteriologically cured in each case.

Respiratory Tract Infections

Of 5 patients, 2 were cured and two were clinically improved.

Wound Infections

4 of 5 patients were cured of pseudomonas infection.

Since the paper was submitted, thirteen further patients have been successfully treated. No side effects attributable to Pyopen were met. The author concludes -

When the appropriate dosage is used, Pyopen (carbenicillin) is without doubt the best available antibiotic for infections due to <u>Ps. aeruginosa</u>.

an achievement of British research in the treatment of rheumatic disease

This announcement comes after fifteen years of intensive research directed towards the development of a compound which would be effective in the treatment of rheumatic disease and without many of the disadvantages commonly associated with other antirheumatic drugs. Brufen is a potent, non-steroidal antirheumatic agent which possesses powerful analgesic, anti-inflammatory and antipyretic properties. Extended clinical studies have indicated that Brufen exerts a high level of clinical activity without serious side-effects. Information about Brufen is now being mailed to general practitioners and to physicians in relevant fields.

We took the best iron and improved it simply by putting it in the best form

'SPANSULE' CAPSULES

'Feospan' means more efficient dose-absorption, convenient once-daily therapy, and little risk of gastric upset. Each 'Spansule' Capsule contains 150 mg. exsiccated ferrous sulphate. Literature giving full prescribing information is available on request. 'Feospan' and 'Spansule' are trade marks.

Less income tax and surtax now-more pension later!

Allowing for inflation, a doctor in a General Practice for 35 years may get about half his final income as a pension from the Superannuation Scheme. But is that sufficient to promise a carefree and comfortable retirement?

You could increase your pension by 50%-often more-with one of our Personal Pension Policies. In addition you receive full relief of income tax and surtax on the premiums you invest.

Bonuses declared every three years increase the pension. You are not committed to pay a fixed annual premium. You pay as you like in accordance with your earnings.

Should you die before pension age all payments are returned to your estate plus compound interest at 4%. You may take the pension at any age between 60 and 70.

For full details of these unique policies, specially designed for General Practitioners, write for details quoting ref. No. 001.

What's available in Canada?

Askus.

ONTARIO, CANADA

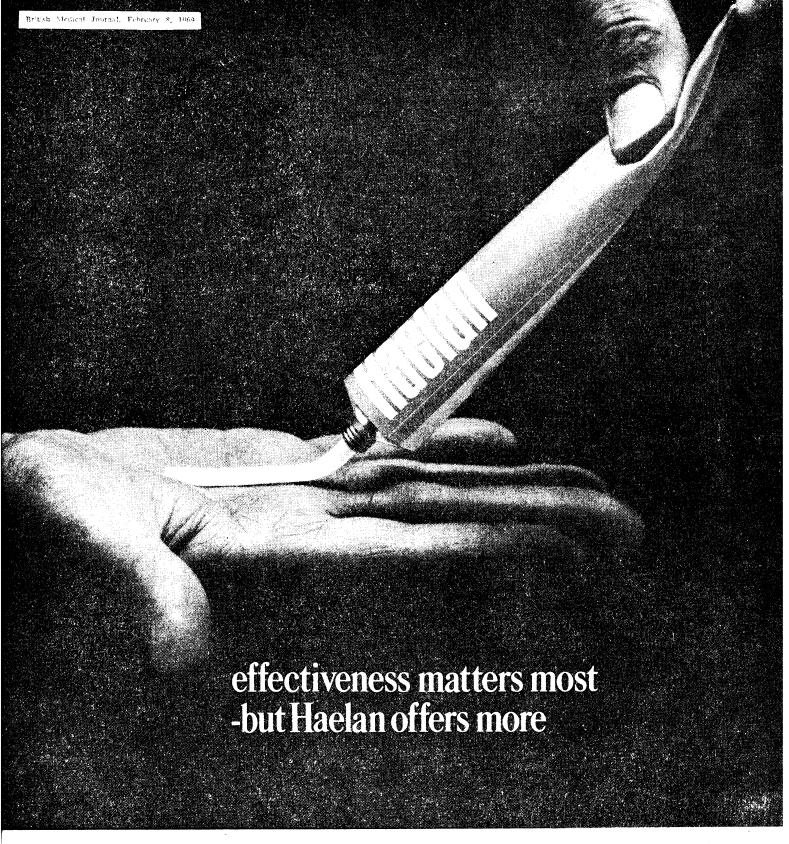

MPS is a private company formed to co-ordinate the needs of hospitals, clinics, communities and individual doctors requiring assistants, in the Province of Ontario, Canada.

If you are interested, we will place you in the practice that best suits your requirements for location, housing, educational and recreational facilities, growth potential, and other factors of interest to a potential resident physician.

An experienced medical practitioner on our staff, familiar with the positions and practices available, will be conducting interviews in Britain in the near future. He will be able to discuss every aspect of the available positions. He will answer all your questions fully and frankly.

If required, we will also assist you in contract negotiations, using Ontario Medical Association guidelines for salary and working conditions. There is no charge to you for any of these services. We are compensated by the other party in all cases. Medical Placement Services Limited is directed and operated by medical practitioners within the ethics of the profession.

If you are a qualified family practitioner or specialist interested in a practice in Ontario, please write for full particulars.

Haelan certainly is effective—it contains flurandrenolone, one of the most powerful steroids for topical use. Haelan has the right concentration of flurandrenolone (0.0125%) to resolve most steroidresponsive skin conditions without undue risk of systemic side effects. But there's more to Haelan than that.

Because flurandrenolone is so active, Haelan provides an ample quantity of base for easy application, and the big 60G (2 oz) tube is large enough to treat the average patient without the need for repeat prescriptions. Last, but by no means least, Haelan, at less than 2½d per gramme is clearly economical.

flurandrenolone 0.0125% for most steroid-responsive skin conditions

Haelan-C

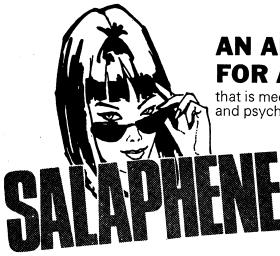

flurandrenolone 0.0125%, clioquinol 3% when infection is present or suspected

Haelan-X

flurandrenolone 0.05% in severe or stubborn cases

provides rapid and effective relief.
It combines the decongestant
properties of pseudoephedrine and
the antihistaminic effect of
triprolidine with the proven coughcontrolling action of codeine.

'ACTIFED' brand COMPOUND LINCTUS
Also available 'Actifed' Tablets
and Syrup, each containing pseudoephedrine and triprolidine for
the relief of nasal and
respiratory congestion.

ASTHMATIQUES

S T H M

ALLERGIES of the RESPIRATORY SYSTEM
ASTHMA and its allied conditions.
Hay Fever—Catarrh—Sinusitis.

EMPHYSEMA and CHRONIC BRONCHITIS

After effects of acute respiratory
infections.

Many patients have been alleviated successfully from respiratory diseases at the famous Thermal Establishment of Le Mont-Dore. Situated in a high and beautiful valley surrounded by mountains and forests the Spa could hardly be improved upon for the treatment in a holiday setting. Write for details or advise your patients to do so:

Director General, Thermal Establishment, **Le MONT-DORE (PUY de DOME)** France.

After this coffee the patient can sleep

Favourite decaffeinated coffee on the Continent for over 50 years. H·A·G is recommended whenever caffeine is contraindicated. Send for a free sample of H·A·G coffee from:

They call it the 'good-night' coffee!

The Dean of Graduate Studies.

The Dean of Graduate Studies, Trinity College, Dublin, 2.

The latest date for the receipt of completed applications is Monday, March 31, 1969. (15560)

UNIVERSITY OF EXETER Postgraduate Medical Institute

UNIVERSITY OF EXETER
Postgraduate Medical Institute

A full-time postgraduate course lasting ten excess will begin on April 23, 1969. These courses are held three times a year starting includes instructive medicine, pathology, psychiatry, orthopaedics, and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official general practitioners for one or two weeks of a course, and attendance for this period is recognized under section 63 of the Health Services and Public Health Act, 1968. These courses are also recognized under the special scheme for the retraining for general practice of doctors who have been out of the Health Service for at least five years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom). Further particular and function the Director. The Postgraduate Medical Institute, The University, Exeter, Devonshire.

KILEMBE MINES, UGANDA SENIOR MEDICAL OFFICER REQUIRED

The successful candidate will be responsible for the health of all employees including European and Asian Staff and will be in charge of a modern hospital of approximately 100 beds with a fully equipped theatre, etc. He must be fully qualified and experienced in general medicine and surgery and capable of administering a staff of two Medical Officers and approximately 70 others.

Kilembe Mines is situated in the foothills of the Ruwanzori Mountains in Western Uganda at an elevation of approximately 4,500 ft. and has a delightful, healthy climate with sunshine throughout the year.

Employment is on contract, 18 months' single and 24 months' married with passages paid both ways for employee and his family and generous paid leave plus the following amenities:

Furnished accommodation at Sub economic rents.

Excellent Primary School on the mine.

Generous scholarship and passages scheme for Secondary Boarding Schools.

Full Medical attention at nominal charge.

First class sporting facilities including a golf course and swimming pool.

Good salary and living conditions.

Applicants with suitable qualifications and experience should send full particulars of age, qualifications, experience, marital status, etc., to Personnel Manager, Kilembe Mines Ltd., P.O. Box I, Kilembe, Uganda, East Africa.

MINISTRY OF OVERSEAS DEVELOPMENT

The Need GENERAL DUTY MEDICAL OFFICERS

For duty both in large new hospitals and in the outlying districts of the Developing Countries overseas, for contract appointments of 2 to 3 years. The Opportunity Overseas service offers a unique chance for world travel, an opportunity to widen professional experience, and to acquire a broader understanding of the world and its people.

The Advantages Doctors' skill and knowledge will be used to the full on people who have a crying need for their service. Salaries reflect the local cost of living and are normally higher than one would expect to receive in the United Kingdom. There are generous gratuities on satisfactory completion of contract, education allowances for children, free family passages. Accommodation provided usually at a low rent. In most cases superannuation rights can be preserved or maintained. Salaries Vary widely from country to country with the local cost of living. However, with certain exceptions they range from approximately £1,650 to £2,900 per annum. Training Scheme for Recently Qualified Doctors In return for an undertaking to serve for at least two years in the developing countries overseas the Ministry offers a course of training to recently qualified doctors which is designed to fit them for service overseas and which will be attractive professionally and financially. During the period of training of 12 to 15 months the doctor will receive a retaining fee of £200 per annum in addition to his hospital salary. Write now for full details of the scheme.

Where required KENYA, LESOTHO, ZAMBIA, FIJI (SOUTH PACIFIC HEALTH SERVICE)

SPECIALISTS MALAWI

Require a Senior Pathologist at the Central Hospital at Blantyre to assume control of the Central Pathological Laboratory. Also to carry out and report on normal and police post-mortems. Candidates must possess the M.C.Path. or the Diploma in Pathology, plus at least seven years' approved experience in the fields of morbid anatomy and histopathology. Appointment for two to three years. Salary £3,350 per annum, plus an allowance of £200 per annum in lieu of private practice.

FIJI

Have a vacancy for a **Clinical Tutor** in Medicine to teach students at the Fiji School of Medicine, and for part-time clinical duties at the Colonial War Memorial Hospital, Suva. Candidates should possess the M.R.C.P. or equivalent and some teaching experience at undergraduate level, and must possess at least five years' postgraduate experience. Appointment for three years. Salary, basic, $\pounds(\text{Fiji})1,350-2,511$ (£1,291-£2,402) per annum, plus a non-taxable inducement allowance of £596-£841 per annum.

GILBERT AND ELLICE ISLANDS

Woman Medical Officer is required to take charge of the Gilbert and Ellice Islands Colony's family planning campaign and the maternity and child welfare service. Candidates, (who must be single) will be required to plan and supervise a family planning campaign in the Colony and to supervise an expanding maternity and child health service. These duties will involve travelling between the Atolls of the Colony, but the officer will be based at the Headquarters of the Medical Department at Bikenibeu, Tarawa. Experience in family planning work is essential, and experience is also desirable in maternity and child health services. A D.Obst.R.C.O.G. would be an advantage but is not essential. Salary, basic, \$(Australian)2,952-4,752 (£1,377 – £2,217) per annum, plus a non-taxable inducement allowance of £802-£1,085 per annum. Appointment, two years.

BRITISH HONDURAS

Require a Medical Officer of Health to take up duties as soon as possible. Candidates should possess the D.P.H. or equivalent. Appointment for two to three years. Salary, basic, \$B.H.7,800 (£1,950) per annum, plus an inducement allowance of £1,072 per annum. Private practice is not allowed, but an allowance of \$B.H.700 (£175) per annum is payable in lieu.

Candidates should be citizens of, and normally resident in, the United Kingdom. They must possess medical qualifications and be able to meet all other requirements for full registration in the United Kingdom.

For application forms, full details of salaries and allowances and further information, please write, stating full name, to the

Appointments Officer, Room 444A, Ministry of Overseas Development, Eland House, Stag Place, London S.W.1.

Pro-Banthine PROPANTHELINE BROMIDE

relieves the pain of peptic ulcer.

Duodenum—Conventional X-ray. Duodenal motility makes radiological diagnosis difficult.

Same Duodenum—Hypotonic X-ray. 60 mg. Pro-Banthine i.m. produces prompt aperistalsis.

Duodenum intubated and double-contrast vision achieved with barium and air.

The action of Pro-Banthine in rapidly reducing gastric motility and relaxing spasm is strikingly demonstrated by the accompanying X-rays. This ability to bring rapid relief is the reason for the widespread use of Pro-Banthine in the treatment of peptic ulcer, gastritis and other conditions causing gastro-intestinal distress.

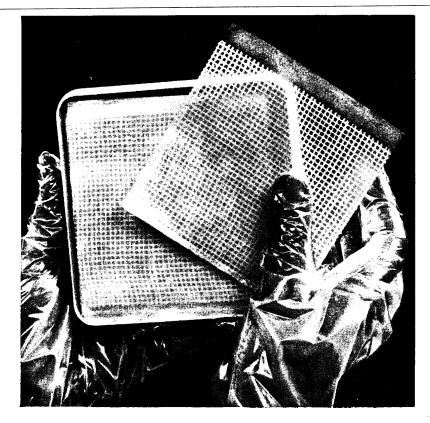

In a controlled study² on the effects of four anticholinergic compounds on gastric acid secretion it was demonstrated that Pro-Banthine lowered the secretion of gastric acid by an average of 82 %.

- 1. Hypotonic Duodenography. Radiology, 89, 438-443, 1967.
- 2. Gut, 3, 65, 1962.

Pro-Banthine is a Registered Trade Mark.

CANADA—THE ONTARIO CANCER INSTITUTE RESIDENT TRAINING IN THERAPEUTIC RADIOLOGY

The Ontario Cancer Institute incorporating The Princess Margaret Hospital offers a two-year Diploma Course which combines clinical work on the wards and in the Out-patient Department of the hospital, and didactic courses in Physics, Anatomy, Pathology, Radiobiology, and Radiotherapy. This course leads to the Diploma in Medical Radiotherapy from the University of Toronto and is accredited by the Faculty of Radiologists in London. The hospital is also accredited by the Royal College of Physicians and Surgeons of Canada and the American Board of Radiology for complete training in Radiotherapy over a period of three years. In addition it is also accredited for Internal Medicine and Anatomic Pathology for a period of one year and for six months in Diagnostic Radiology. An additional year of training may be undertaken and a limited number of one year appointments are also made.

The Princess Margaret Hospital provides complete facilities for cancer

The Princess Margaret Hospital provides complete facilities for cancer research, diagnosis and treatment, exclusive of major surgery. Over 3,500 new patients are seen annually; there are 185 active treatment beds, and facilities include seven Cobalt Units, two Caesium Units and a Betatron. Salaries range from \$7,100 to \$9,500 per annum. Applications are invited for the year beginning July 1, 1969. For

further details enquiries should be addressed to:

low, for the rst tin a clinical roved abbetite stimulant

'Periactin' induces a marked improvement in the appetite of many patients. The resulting weight gain is due only to the increased food intake—there is no disturbance of endocrine function, no evidence of fluid retention.

'Periactin' does not reproduce the effects of 'tonics', haematinics or vitamins. 'Periactin' acts promptly, and its dosage is simple.

'Periactin' will be invaluable for many of those situations in which patients, adults and children, require food and yet have no appetite for it.

Supplied as tablets containing the equivalent of 4 mg anhydrous cyproheptadine hydrochloride, and as a syrup containing the equivalent of 2 mg anhydrous cyproheptadine hydrochloride in each 5 ml. Detailed information is available to physicians on request. ® denotes registered trademark. 'Periactin' is also established as an antihistamine for allergic conditions.

Cyproheptadine hydrochloride BP

A different class of bronchodilator

MORE SELECTIVE · LONGER ACTING · MORE EFFECTIVE

A NEW STANDARD IN BRONCHODILATOR THERAPY

Previously available \(\mathbb{R}\)-adrenergic stimulants such as isoprenaline and orciprenaline act on the \(\mathbb{R}\)_1 receptors of heart muscle as well as on the \(\mathbb{R}_2\) receptors of bronchial muscle. Consequently, undesirable increases in heart rate and pulse pressure sometimes occur when these drugs are used to produce bronchodilatation.

Ventolin is different: first because it is highly selective in its action, affecting primarily β_2 receptors: second, because it is more effective than existing bronchodilators: and third, because it is longer acting.

MORE EFFECTIVE

Clinical trials have shown that Ventolin Inhaler is a more effective bronchodilator than isoprenaline or orciprenaline when given by inhalation; a comparison of the effects of inhaled Ventolin, isoprenaline, and orciprenaline on Forced Expiratory Volume in one second (FEV₁) in severely asthmatic patients is shown in Fig. 1.

LONGER ACTING

Ventolin is unusually long acting, its effect persisting for at least four hours. By contrast, isoprenaline, even in large doses, has a characteristically intense but transient effect. In another study using whole-body plethysmography, inhalation of 100 μg of Ventolin produced an

almost immediate maximal increase in airway conductance which was sustained for four to six hours.

MORE SELECTIVE

No side effects have been reported with therapeutic doses of Ventolin Inhaler. In studies comparing Ventolin with isoprenaline, a major difference found was that Ventolin did not stimulate the heart or affect the blood pressure, even after inhalation of a relatively large dose. (See Fig. 2.)

MORE ACCEPTABLE TO PATIENTS

Patients expressed a marked preference for Ventolin Inhaler in double-blind studies comparing Ventolin with aerosols containing isoprenaline or orciprenaline.

SAFETY IN USE

Past experience suggests that misuse of aerosol bronchodilators by asthmatic patients may lead to dangerous effects on the heart or give a false sense of security to patients with incipient status asthmaticus. Ventolin Inhaler has no effect on the heart in therapeutic dosage and has a long duration of action. Both these properties provide additional margins of safety; the lack of cardiac effects should reduce any likelihood of deaths due to ventricular fibrillation and the long duration of action makes it possible for patients to realise in time if the drug is becoming less effective. Because an effective treatment with Ventolin Inhaler should last for at least four hours, patients have been advised to consult their doctor immediately if the effect lasts for less than three hours, so enabling the doctor to take timely action.

CLINICAL STUDIES

The onset of action of Ventolin by inhalation is rapid; near maximal bronchodilatation occurs within five minutes. The duration of action of Ventolin is much greater than that of isoprenaline. The results of a comparative study in severe asthmatics are summarised in Fig. 1. The effect of 1,000 µg of isoprenaline by inhalation on Forced Expiratory Volume in one second (FEV₁) reached its peak at six minutes and thereafter diminished rapidly; The peak effect on Forced Vital Capacity (FVC) was reached a little later, but the pattern was otherwise similar. A significant increase in heart rate was noted soon after administration of isoprenaline. After 200 µg of Ventolin, however, near maximal response persisted for two to three hours and substantial improvement was still present after five hours. No side effects were observed after Ventolin.

CHEMISTRY

Ventolin is 2-t-butylamino-1-(4-hydroxy-3-hydroxymethyl)-phenylethanol. Its approved name is salbutamol.

The inhaler contains Ventolin base, suspended in microcrystalline form,

PHARMACOLOGY

Ventolin was discovered in the research laboratories of Allen & Hanburys Limited during a search for a β -adrenergic stimulant free from undesirable cardiovascular actions. Replacement of the 3–OH group in isoprenaline by the primary alcohol group, -CH₂OH, gave rise to a new series of potent β -adrenergic stimulants. Ventolin was chosen for development because of its highly selective action on bronchial muscle, its lack of effect on heart muscle and its long duration of action.

ANIMAL STUDIES

In all the species used, Ventolin was a more potent bronchodilator than isoprenaline when administered by aerosol or by mouth and about equally active by intravenous injection. It differs from isoprenaline in being able to prevent bronchospasm without having obvious effects on the cardiovascular system. Ventolin is unusually long acting because it is not affected by catechol o-methyl transferase, an enzyme which rapidly inactivates isoprenaline in the body.

HUMAN STUDIES

Studies on asthmatic volunteers using a whole-body plethysmograph revealed that doses of 100 µg of Ventolin by inhalation produced a substantial and almost immediate increase in airway conductance which was sustained for several hours. In normal volunteers, doses of 400 µg by inhalation had no effect on heart-rate, ECG or blood pressure. 200 µg of isoprenaline had marked cardiovascular effects in the same subjects.

INDICATIONS

Ventolin Inhaler is indicated for the relief of bronchospasm in:

Bronchial asthma of all types \square Chronic bronchitis \square Emphysema \square

DOSAGE

One or two inhalations, repeated four-hourly if required. The bronchodilator effect of each administration of Ventolin Inhaler lasts for at least four hours and more frequent use should be unnecessary. This long duration of action provides a margin of safety. The patient can readily recognise any reduction in the length of action and should be instructed to consult a doctor if the effect of a previously adequate dose lasts for less than three hours.

The patient's instruction leaflet enclosed with each Ventolin Inhaler therefore contains the following paragraph:

'Dosage; use Ventolin Inhaler only as directed by your doctor. He will tell you how many puffs to take for a treatment. An effective treatment with Ventolin Inhaler lasts for about four hours. Consult your doctor immediately if the effect lasts for less than three hours. No more than eight treatments should be taken in any 24-hour period without consulting your doctor.'

SIDE EFFECTS

No side effects have been reported from Ventolin given by inhalation in therapeutic doses.

Doses greatly in excess of those needed for full bronchodilatation could cause short-lived secondary effects such as peripheral vasodilatation, minor increase in pulse rate, and skeletal muscle tremor.

CONTRA-INDICATIONS

There are at present no known contraindications to the use of Ventolin. However, care should be taken with patients suffering from hypertension, myocardial insufficiency or thyrotoxicosis. Notice should be taken of recent suggestions that the administration of any drug during the first trimester of pregnancy is undesirable.

PRESENTATION

Ventolin Inhaler is a metered aerosol, delivering 100 µg of Ventolin per inhalation, with a specially designed actuator. Each canister provides 200 inhalations.

Ventolin is a Trade Mark ALLEN & HANBURYS LTD LONDON E 2

*Now prescribable on the NHS except in

Indications

All steroid-responsive dermatoses including

Betnovate-N preparations should be used if bacterial infection is present or suspected. As an alternative or when there is fungal infection, Betnovate-C preparations may be used.

Application

Ointment, cream, lotion and scalp application Apply a small quantity once or twice daily Rectal ointment

Apply a small quantity two or three times daily

Apply direct to the lesion and cover with an absorbent dressing if necessary.

Adverse reactions

Betnovate preparations are usually tolerated well but if signs of hypersensitivity appear, application should be stopped immediately. When used with occlusive dressings on extensive areas, or for prolonged periods, as with all topical steroids, there is a possibility of systemic absorption. When using Betnovate-C reparations, cover lesions with a dressing to protect clothing.

Betnovate is a Glaxo trade mark
