"all patients are convinced they are much better"

Convinced

Anginal patients are *convinced* of the improvement brought about in their condition by Synadrin 60.

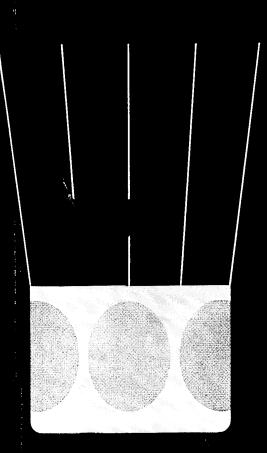

During 12 months treatment they suffered fewer attacks, less pain.

Earlier clinical studies ^{1,2,3,4,5,} have been strikingly confirmed by British papers published in the last few months.^{6,7,}

Try Synadrin 60 in your angina patients. They can convince *you*.

Synadrin 60

Why

so many hypertensive patients do well on Aldonet

Methyldopa BP

- 'Aldomet' offers smooth and even control of blood pressure when the dosage has been established.
- 'Aldomet' usually reduces lying as well as standing blood pressure.
- 'Aldomet' causes much less postural hypotension than other powerful antihypertensive agents.
- 'Aldomet' rarely causes exertional hypotension.
- The dosage of 'Aldomet' is simple, flexible and easily established.

Supplied as tablets containing methyldopa BP equivalent to 250 mg anhydrous methyldopa and, for emergency use, as an injection. Detailed information is available to physicians on request.

In a trial comparing three antihypertensive agents, it was shown that, '. . . in the patients who could take adequate doses methyldopa provided the best control of blood pressure, with the lowest levels of blood pressure when the patient was supine.'

Pyopen* (carbenicillin) is a product of British research at Beecham Research Laboratories, Brentford, England, originators of the new penicillins.

*regd.

We timed our launch rather late...

but we timed Nitrong better.

For longer relief from angina pectoris.

Independent studies confirm Nitrong consistently relieves angina for 10 – 12 hours.

I. Proven blood levels.

"Nitrate blood levels in patients given Nitrong tablets were the same after 8 hours as the levels found after 6 minutes in patients given a sublingual tablet of nitroglycerin. After 12 hours the blood level was still sustained above the value (6 to 9 μ g/ml) which correlates with good control of the anginal syndrome". West. Med. 7:11, 330, 1966.

2. Proven performance.

"A new type of tablet, Nitrong, containing controlledrelease nitroglycerin, which is stabilized to maintain a constant potency, and which is released in the alimentary tract over a period of approximately 10 hours...gave marked or good improvement in 17 of 20 cases with confirmed coronary insufficiency". Sartr. Op. Med. 10, 1965.

3. Proven prophylaxis.

"...the controlled-release tablets (Nitrong) benefited all patients in that their need for sublingual tablets was diminished. The mean diminution in the need for sublingual medication was 78 per cent. Ten of 19 patients required no sublingual tablets during 14 or more days of the test period". Curr. Ther. Res. 7:12, 1965.

Basic NHS prices: 14/9 for 50s, 67/6 for 250s.

Composition: Glyceryl trinitrate (2.6 mgm) in sustained-release form — mottled, scored tablets.

Baby Bunter?

A lot of babies are well-covered rather than well-fed.

Between meal 'treats' spring immediately to mind. But you would probably agree, that there is often too much emphasis on starchy foods at mealtimes—particularly at breakfast and tea.

Yet the 77 varieties of Heinz Strained and Junior Foods make it easy for any mother to give her baby a balanced diet of meats, vegetables, fruits, eggs, fish and cheese.

Last year special breakfast varieties were introduced. And, of course, any Heinz fruit variety is ideal for tea.

Heinz will gladly provide more information to help you to advise mothers. If you have any questions, write to the Baby Foods Information Service, H. J. Heinz Co. Ltd., Hayes Park, Hayes, Middx.

Heinz Baby Foods for a balanced diet

Ventolin INHALER

A different class of bronchodilator

MORE SELECTIVE · LONGER ACTING · MORE EFFECTIVE

A NEW STANDARD IN BRONCHODILATOR THERAPY

Previously available β -adrenergic stimulants such as isoprenaline and orciprenaline act on the β_1 receptors of heart muscle as well as on the β_2 receptors of bronchial muscle. Consequently, undesirable increases in heart rate and pulse pressure sometimes occur when these drugs are used to produce bronchodilatation. Ventolin is different: first because it is highly selective in its action, affecting primarily β_2 receptors: second, because it is more effective than existing bronchodilators: and third, because it is longer-acting.

MORE EFFECTIVE.

Clinical trials have shown that Ventolin Inhaler is a more effective bronchodilator than isoprenaline or orciprenaline when given by inhalation.

LONGER ACTING

Ventolin is unusually long-acting, its effect persisting for at least four hours. By contrast, isoprenaline, even in large doses, has a characteristically intense but transient effect. In another study using whole-body plethysmography, inhalation of 100 μg of Ventolin produced an almost immediate maximal increase in airway conductance which was sustained for four to six hours.

MORE SELECTIVE

No side effects have been reported with therapeutic doses of Ventolin Inhaler. In studies comparing Ventolin with isoprenaline, a major difference found was that Ventolin did not stimulate the heart or affect the blood pressure, even after inhalation of a relatively large dose.

MORE ACCEPTABLE TO PATIENTS

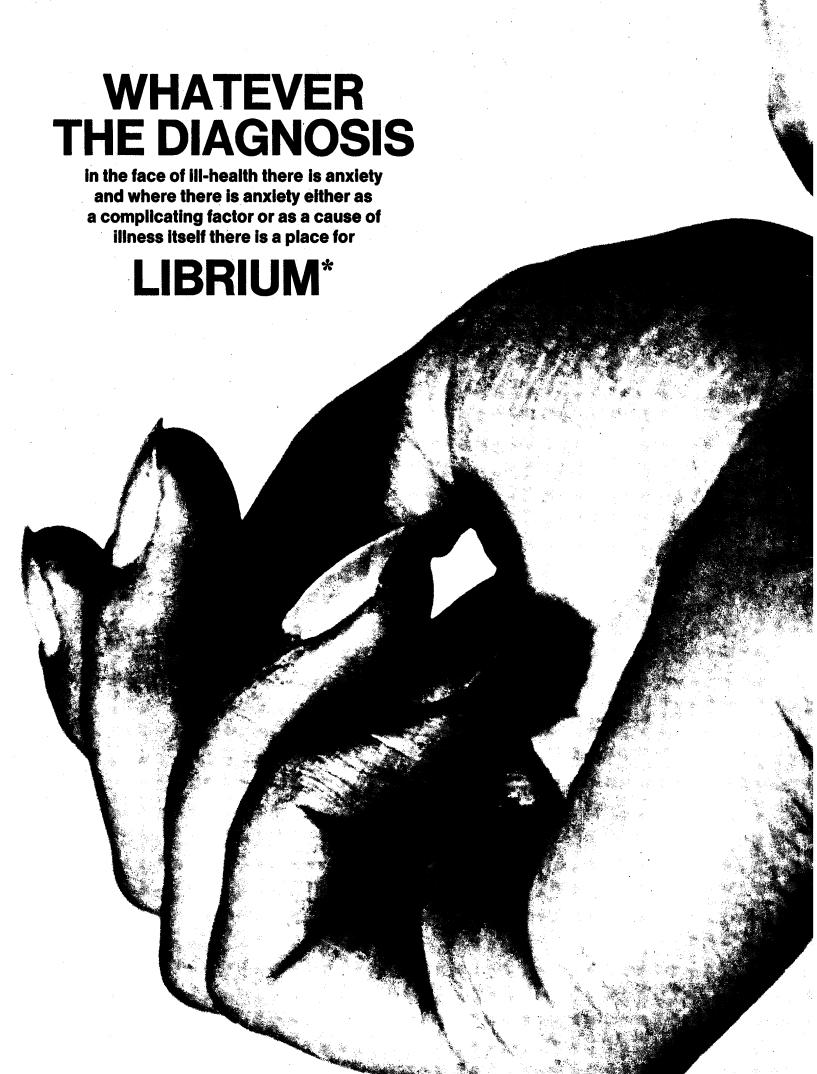

Patients expressed a marked preference for Ventolin Inhaler in double-blind studies comparing Ventolin with aerosols containing isoprenaline or orciprenaline.

SAFETY IN USE

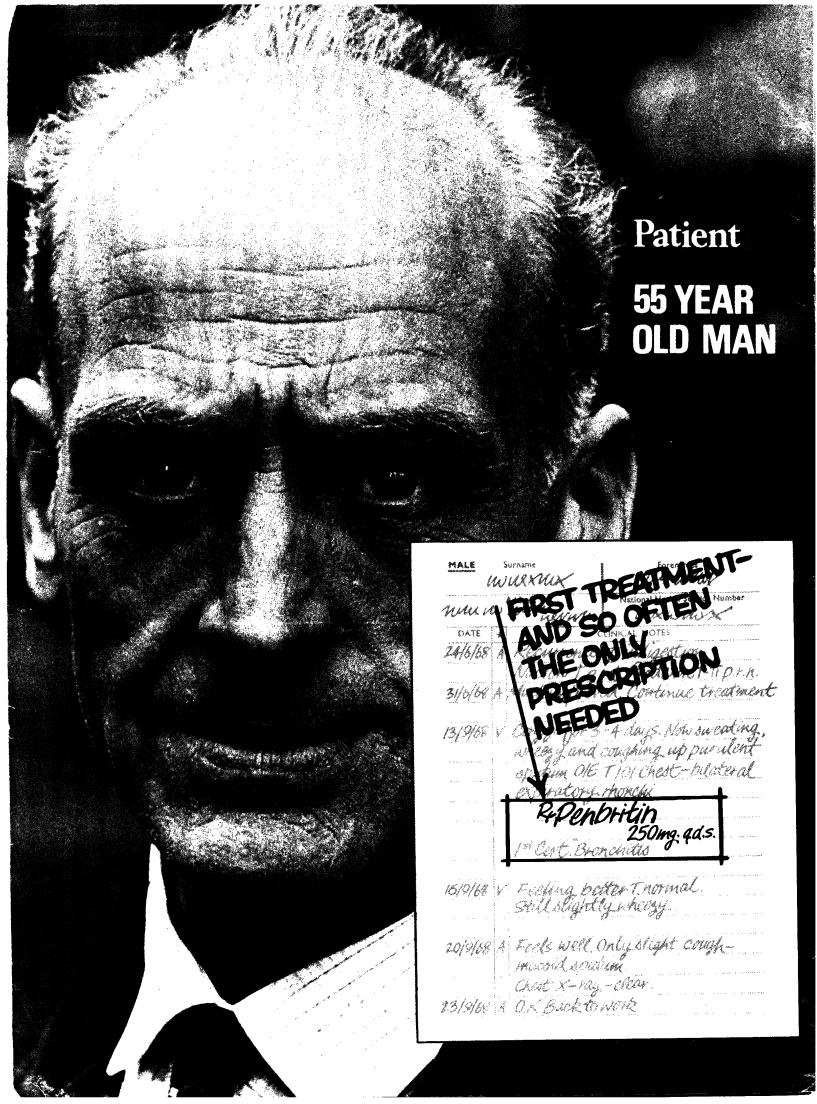

Past experience suggests that misuse of aerosol bronchodilators by asthmatic patients may lead to dangerous effects on the heart or give a false sense of security to patients with incipient status asthmaticus. Ventolin Inhaler has no effect on the heart in therapeutic dosage and has a long duration of action. Both these properties provide additional margins of safety: the lack of cardiac effects should reduce any likelihood of deaths due to ventricular fibrillation and the long duration of action makes it possible for patients to realise in time if the drug is becoming less effective. Because an effective treatment with Ventolin Inhaler should last for at least four hours, patients have been advised to consult their doctor immediately if the effect lasts for less than three hours, so enabling the doctor to take timely action.

Diagnosis

Treatment

BRONCHITIS

PENBRITIN

He didn't expect to be back at work so soon. Ten days ago he went down with Bronchitis—his first time off work in years. He's lucky—his was an isolated attack and he can now expect a trouble-free winter. For the Chronic Bronchitic the prognosis is not so good and repeated attacks must be expected.

Penbritin is the answer-first time

Whether your patient suffers from Acute or Chronic Bronchitis you want your first prescription to be the one which works. You need a broad spectrum antibiotic mainly because of the possibility of H. influenzae being involved. (British evidence, 1,2,3,4, shows this to be by far the most troublesome pathogen in Chronic Bronchitis – the "English Disease"). The most active of all antibiotics against haemophilus is Penbritin, which at normal dosage achieves bactericidal levels in both serum and lung tissue to ensure a rapid clinical response and minimise the risk of relapse or complications.

Being a penicillin, the dosage of Penbritin may be safely increased in severe illness: in severely disabling bronchitis high dosage Penbritin therapy can achieve bactericidal concentrations in the sputum, eliminating reservoirs of infection and affording the patient unprecedented freedom from infection ¹. Additionally, when more rapid control of infection is imperative, Penbritin may be given by injection.

In the treatment of Bronchitis, Penbritin is the answer – first time. And so often the only prescription needed.

Bronchitis Dosage:

Children under 2 years: 62.5-125 mg. 2-10 years: 125-250 mg. Adults: 250 mg.

All dosages q.d.s. a.c.

In severe infections these doses may be increased or Penbritin given by injection.

(High dosage regimen for severely ill Chronic

Bronchitics: 1 gram q.d.s.)

Contra-indication: Penicillin allergy. **Side-effects:** As with other penicillins. **Availability:** Penbritin (ampicillin B.P.):

Capsules, 250 and 500 mg. Syrup, 125 mg./5 ml.

Syrup Forte, 250 mg./5 ml. Paediatric Tablets, 125 mg.

Injections, 100 mg., 250 mg., 500 mg.

RIFOCIN-Marifamide LEPETIT

in GRAM-POSITIVE INFECTIONS

RIFOCIN - M is active at low concentrations against Gram-positive organisms including penicillinase-producing strains.

"Rifamide has a high bactericidal activity on Staphylococcus aureus, especially in the growing phase, even at very low concentrations."

in BILIARY TRACT INFECTIONS

"...it is unique in its action in acute cholecystitis and other bacterial diseases of the biliary tract, for which it is the only specific antibiotic."²

"A much higher proportion of the organisms found in cholangitis would be expected to be inhibited by this drug than by other antibiotics that achieve effective bile levels . . . "3

GENERAL INFORMATION:

* No cross-resistance or cross-allergenicity with other antibiotics has been demonstrated.

* Well tolerated.

* No toxic reactions have been reported.

RIFOCIN-M (rifamide) is a member of the RIFAMYCINS a new group of antibiotics discovered and developed in the Research Laboratories of LEPETIT.

Dose: by intramuscular injection:
In staphylococcal and other Gram-positive infections 150 mg every 6-8 hours
In biliary tract infections 150 mg every 8-12 hours

PAIN PARADE-DISMISS

Para-Hypon dismisses pain and fever with its powerful combination of codeine and paracetamol. Para-Hypon also contains caffeine to ensure that the patient does not become dispirited – and phenolphthalein to offset the constipating effect of codeine. A sound, balanced analgesic formulation with no aspirin to cause gastric irritation.

PARA-HYPON DISMISSES PAIN

Haelan certainly is effective—it contains flurandrenolone, one of the most powerful steroids for topical use. Haelan has the right concentration of flurandrenolone (0.0125%) to resolve most steroidresponsive skin conditions without undue risk of systemic side effects. But there's more to Haelan than that.

Because flurandrenolone is so active, Haelan provides an ample quantity of base for easy application, and the big 60G (2 oz) tube is large enough to treat the average patient without the need for repeat prescriptions. Last, but by no means least, Haelan, at less than $2\frac{1}{2}$ d per gramme is clearly economical.

flurandrenolone 0.0125% for most steroid-responsive skin conditions

Haelan-C

flurandrenolone 0.0125%, clioquinol 3% when infection is present or suspected

Haelan-X

flurandrenolone 0.05% in severe or stubborn cases

Happy go...

touchy!

'Saluric' can help

in the premenstrual syndrome

Women suffering from premenstrual tension with oedema cannot avoid the tiresome and inevitable signs and symptoms of this common condition, which may last for 7 to 10 days every month, prior to the menses. Because many of the distressing symptoms may be directly related to fluid retention, effective diuresis usually brings prompt relief.

'Saluric' can relieve swelling of the ankles, breast engorgement, and fullness of the abdomen. It may well help to alleviate the concomitant irritability and nervousness. 'Saluric' has been proved by 10 years of clinical experience to be a dependable diuretic which can be used for those few days every month to control premenstrual tension with oedema.

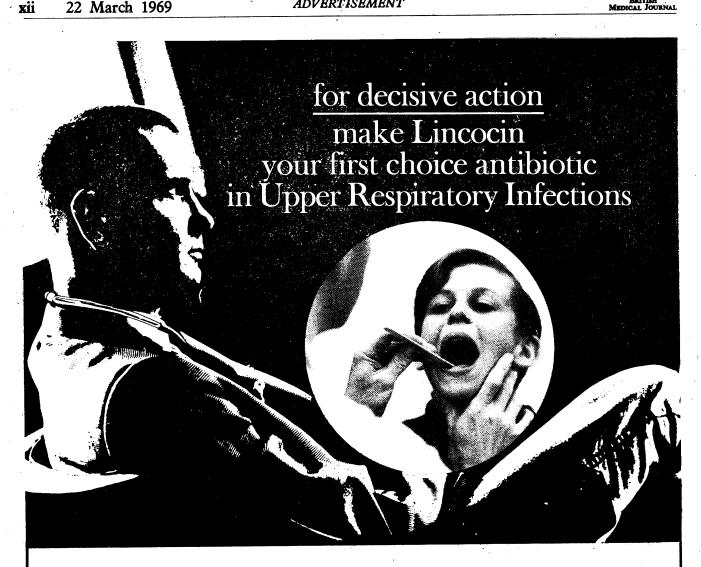

Each tablet of 'Saluric' contains 500 mg chlorothiazide BP. Detailed information is available to physicians on request.

Merck Sharp & Dohme Limited, Hoddesdon, Hertfordshire Telephone, Hoddesdon 67123

By markedly reducing the production of serum uric acid 'Zyloric' permits the gradual resorption of urates from tissues. Slowly and steadily the deposition of urates is reversed, joints become more mobile and tophi regress.

The decision to make Lincocin your antibiotic of first choice in upper respiratory infections assures you the advantage of prompt and sustained antibacterial action against Gram-positive invaders - the pathogens most frequently involved in tonsillitis, pharyngitis, otitis media and sinusitis. Thorough penetration into soft tissue and bone means effective antibiotic action at the site of infection. Lincocin is not affected by penicillinase; it may also be given to patients allergic to penicillin. For these reasons Lincocin is more likely to produce permanent resolution of the condition.

Numerous clinical reports have shown that Lincocin controls the majority of commonly encountered upper respiratory infections: 94% success in sinusitis;8 85% success in tonsillitis, pharyngitis and scarlet fever;3,4-9 85% success in otitis media.1,2,10 Upper Respiratory Infections call for a decisive antibiotic - decide on Lincocin.

Lincocin Capsules: Each capsule contains 500 mg. lincomycin (as lincomycin hydrochloride monohydrate), in bottles of 12 and 100.

Lincocin Sterile Solution: Ampoules (2 ml.) 600 mg. Each 2 ml. ampoule contains 600 mg. lincomycin (as lincomycin hydrochloride monohydrate).

Lincocin Syrup 250: Each 5 ml. contains 250 mg. lincomycin (as lincomycin hydrochloride monohydrate), in bottles of 60 ml.

Nobody has ever been sold a Daimler Sovereign

The Daimler Sovereign sells itself. When you go and look at one you will see why.

A Daimler Sovereign has two of many things of which most cars have only one. Two fuel tanks (with a changeover switch on the instrument panel). Twin carburettors. Two fuel pumps. Twin exhausts. Twin overhead cams. Twin reversing lamps. Two-speed windscreen wipers. Twin tone horns. Two controls for fresh air heating (a separate one for the back). Two speed air fan. Twin headlamps on each side.

You will also see a lot of items some cars don't have

at all. Power assisted steering. Alternator. Deep pile carpets. Reclining front seats. Electrically heated rear window. Underbody sealing. Disc brakes on all the wheels. Automatic choke. Pre-engaged starter. Independent suspension all round. Rev counter. Transistorized clock . . .

There is something else, too: only a Daimler has the distinguished Daimler radiator.

Go to your Daimler dealer and save him a job. Ask to be left alone with a Daimler Sovereign for a while. Let it talk to you. Prices start at £2,331.8.0.

BESPECIFIC LOSONEIS.

'Ilosone' specifically destroys the pathogens in tonsillitis, acute bronchitis, streptococcal pharyngitis, otitis media, and bacterial pneumonia.

'Ilosone' causes minimal interference with the natural gut flora, thus diarrhoea or gastrointestinal upset is rare.

In addition to its high activity against grampositive cocci, 'llosone' is also active against H. influenzae, and Mycoplasma pneumoniae. The clinical response is rapid, and the chance of relapse is small.

The range of presentations is such that 'Ilosone' can be prescribed for the whole family.

For Mum, and Dad. 250 mg† capsules.

For Baby, and Johnny. Pleasant tasting suspension, containing 125 mg[†] per 5 ml, for children under seven years of age.

For Jenny, and Grandad. Pleasant, orange flavoured Suspension Forte, containing 250 mg† per 5 ml. An ideal presentation for older children, and all adults who need full strength dosage, but have difficulty in taking solid dosage forms.

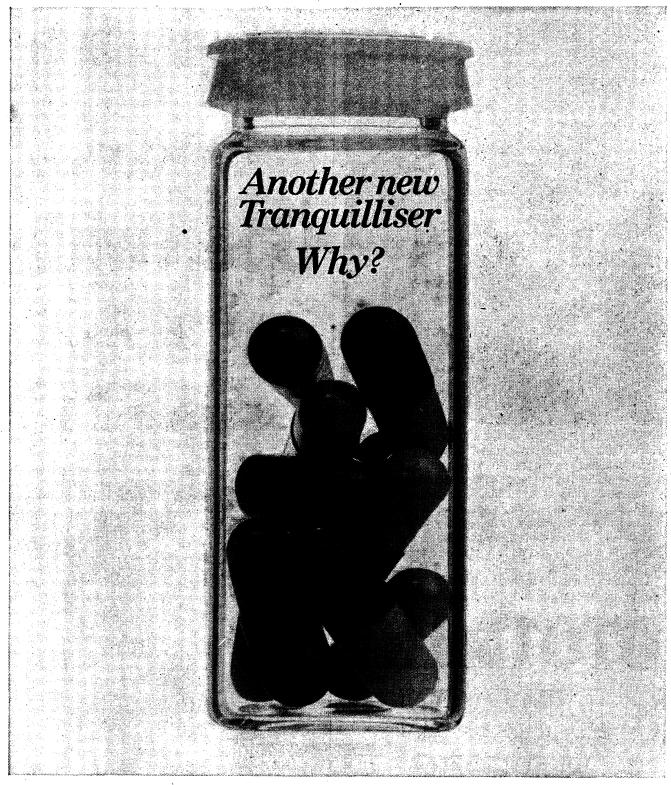

All suspensions are presented in 100 ml bottles.

†Base equivalent.

a service for disposal of dressings and waste

* SUFFERERS FROM ILEOSTOMY * THE PARALYSED * ★ THE MENTALLY RETARDED ★ S.R.Ns. & MIDWIVES ★ ★ FOR GENERAL HOSPITAL USE ★

This new service operates in two ways

Supplying completely disposable COMEX containers for use by S.R.Ns. & Midwives or in scattered households holding individual sufferers.

Supplying replaceable and reusable COMDISCAN containers for places such as Hospitals, where large amounts of dressings and waste are accumulated at some central point or points.

COMEX wholly expendable sanitary disposable Units (CWESDU) are supplied with the interior pre-treated with disinfectant. In addition, a plastic dispenser in the lid releases a measured amount of disinfectant every time the container is used. All waste is thus impregnated with a disinfectant (which is not acid) and development of germs and unpleasant odours is prevented.

COMEX Units can be put out for collection with normal household refuse.

COMDISCAN Units are completely hygienic to Hospital standards. They contain a concentrated aromatic disinfectant which effectively prevents the development of germs and bacteria but is harmless to people and property. COMDISCAN Units are collected regularly and replaced by newly-prepared sterile Units.

We'll help you feel at home abroad.

We have a couple of helpful schemes for people who want to take a car abroad.

If you're about to leave Britain you can take a 'tax-free' Ford with you. And, before you go, you can run it in this country for up to 6 months. So with this in mind, we rustled up our personal Export Scheme.

But if you're coming home temporarily, you can also buy a Ford free of purchase tax. Provided you've been away at least a year. And

you return abroad again within 12 months. In this case use our Visit Europe Scheme.

Both schemes mean that Ford's personal service doesn't stop at Dover. We'll arrange to ship your car anywhere in the world. And wherever you go, you'll find a Ford service depot. But if you do get stuck, we'll fly a spare part out specially.

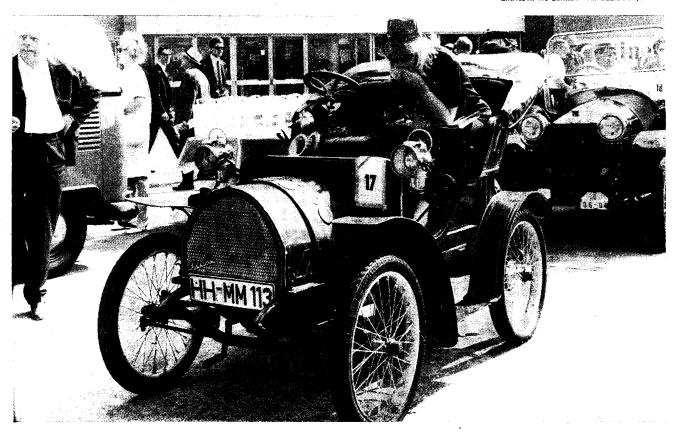

So, although you're abroad, it won't seem all that far from home.

For Information about the Ford Visit Europe or Personal Export Schemes, contact your local Ford dealer. Or write to the Showroom Manager, Ford Motor Company Ltd., 88 Regent Street, London W1.

For each of them the problem is pain

For all of them the answer is Paynocil

Lumbago or low back pain, fibrositis, muscular rheumatism—however you describe these rheumatic disorders, they mean the same thing to the patient. Pain. And the text-book therapy is the same, too—aspirin.

Then why prescribe Paynocil?

First, because Paynocil is aspirin. So it stops pain and relieves inflammation. Second, because Paynocil is aspirin with all these additional benefits:

Well tolerated: Paynocil also contains 300 mg. of glycine, which helps to distribute the aspirin rapidly into the stomach in the finest particles, thus minimising the risk of gastric irritation. Patients with rheumatic disorders who experience nausea, heartburn or epigastric pain after plain aspirin have found Paynocil acceptable.

Quick acting: Paynocil, at 600 mg. aspirin per tablet, has twice the strength of aspirin tablets B.P., and in equivalent dosage, is twice as rapidly absorbed. A property which could be of particular value—in combating the rheumatic's morning stiffness for example.

Convenient: Paynocil can be taken without water, for glycine masks the unpleasant taste of aspirin and allows the tablet to disperse instantly on the tongue in a burst of lemon flavour. The tablets come in protective foil strips which slip easily into handbag or pocket. All of which makes Paynocil a most practical form of aspirin for active people.

Junior Paynocil is available, for children, at 150 mg. aspirin per tablet.

We asked you,* the G.P...

"When you select an antihypertensive agent what essential features are you looking for?" and you replied

"It must work... and go on working"

Up to 90% of patients respond to Ismelin. Steady, continuous effectiveness gives reliable long-term control

"Dosage should be simple and easily regulated"

Control with Ismelin is often adequate on just 2 tablets daily. Dosage is flexible, adjustment simple

"It should be free from hidden effects and it should be reasonable in price"

Ismelin° meets your standards

guanethidine sulphate BP

Dosage

Initial dosage—two 10mg tablets daily. Frequent adjustment is unnecessary during stabilisation; depending on individual assessment, intervals between consultations may be up to one month. Should 20mg daily prove insufficient, increase daily dosage by one 10mg tablet. As the action of Ismelin is gradual and prolonged, allow at least one week before any increase, to observe full effect. The majority of patients will be symptom-free and adequately controlled on 40mg daily or less.

Prescribing notes

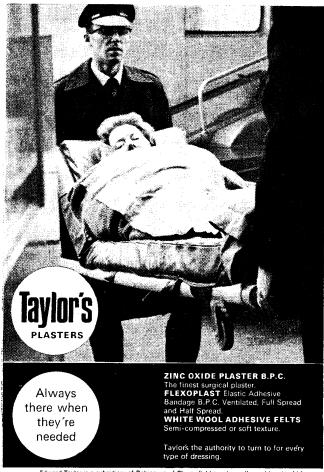

Ismelin is contra-indicated in the presence of phaeochromocytoma. Side effects attributable to postural hypotension normally reflect overdosage. Patients should be advised to avoid sudden changes of posture, or violent exertion, and if morning faintness on rising persists, to reduce the daily dosage by one 10mg tablet until the next consultation. If diarrhoea is troublesome, reduce or divide dose, or add ½gr. codeine phosphate t.d.s. Failure of ejaculation

has been reported and, rarely, exertional dyspnoea, nasal congestion, shivering, muscle weakness, paraesthesiae (due to latent cerebral arterial insufficiency), aggravation of intermittent claudication, and exacerbation of peptic ulcer. In heart failure, any tendency to fluid retention may be increased. As with any antihypertensive, prescribe cautiously for patients with renal failure and urea retention. Allowance should be made for the antagonistic pressor action of some antidepressants (MAOI), appetite suppressants and stimulants of the amphetamine class if administered

10 and 25mg tablets guanethidine sulphate BP, in 100's and 500's. Basic NHS price 100 \times 10mg: 27s. 8d. Also ampoules for i.m. injection 10mg in 1ml. Basic NHS price 6 amps: 17s. 4d.

COMMERCIAL APPOINTMENTS

MEDICAL ADVISER

22 March 1969

Applications are invited for the position of Medical Adviser to Smith & Nephew Pharmaceuticals Limited.

The duties are largely concerned with the development and marketing of established and new products, including the planning and administration of clinical investigations.

The Medical Adviser will also assist in negotiations with committees established by the Department of Health and Social Security and assist in the technical training of medical representatives.

The Company is situated in Welwyn Garden City, Herts, and maintains close liaison with the research company in Harlow, Essex.

Applicants should be in the age range 28 to 40, and previous experience in the pharmaceutical industry would be an advantage.

Initial salary will be by negotiation and subject to normal increments. A company car will be provided. The company operates a contributory pension scheme with life assurance.

Applications to:

F. Wilson, Esq., Managing Director, Smith & Nephew Pharmaceuticals Limited, Welwyn Garden City, Herts.

One of the Smith & Nephew Associated Companies

(16541)

ASSISTANT MEDICAL ADVISER

We are making two additional appointments to the Medical Advisory Department of Burroughs Wellcome & Co. (UK). They will be suitable for registered medical practitioners under 45, preferably with experience in the pharmaceutical industry and with an interest in clinical medicine and therapeutics.

One post will be primarily concerned with the initiation and organisation of clinical trials necessitating wide travel in the United Kingdom, for which purpose a company car will be provided. For this appointment, male candidates are preferred. The other post is suitable for a woman doctor and carries special responsibility for the provision of medical information.

Both doctors will be based at Dartford, Kent and will assist in the training of medical representatives and advising on the medical aspects of copy.

A good salary is offered with attractive conditions.

Please write, quoting reference AM.22, to the Senior Personnel Officer, Group Personnel Division,

The Wellcome Foundation Limited,

Euston Road, London, N.W.1.

HITCHCOCK CLINIC Hanover, New Hampshire NEUROLOGIST

vacancy for a suitably qualified graduate will be available July A vacancy for a suitably quantied graduate will be available July 1, 1969, at the Hitchcock Clinic, Hanover, New Hampshire, U.S.A. The Clinic comprises the clinical faculty of Dartmouth Medical School and is situated about three hours from Boston and four hours from Montreal. The area lies within the New England winter sports

region.

The post will involve full-time clinical neurology with some teaching of undergraduates. The minimum salary, depending on qualifications, is \$12,000 per year for one year with the possibility of extending the appointment. Allowance for travel will be provided in

Temporary licence to practise medicine in the State of New Hampshire is available to suitably qualified candidates.

For further details, please write to Jarrett H. Folley, M.D., Hitchcock Clinic, Hanover, New Hampshire 03755, U.S.A.

THE UNIVERSITY OF ADELAIDE

Applications invited for appointment as a

READER IN OBSTETRICS AND GYNAECOLOGY

The Department has clinical responsibilities and facilities for reaching and research at the Queen Elizabeth Hospital and the Queen Victoria Hospital, and for clinical teaching in gynaecology at the Royal Adelaide Hospital. It is expected that the Reader will work mainly at the Queen Victoria Hospital. At present the hospital has only an obstetric service in which the University Department has a clinical unit, but a gynaecology service, in which the University will have a suitable commitment, is planned to commence in 1970. The hospital has just been rebuilt, and the research laboratories are not yet fully committed, but the department hopes to undertake joint projects with the University Department of Child Health.

SALARY: \$A9,900 a year, with superannuation on the F.S.S.U. basis, plus special allowance for registrable medical qualification of \$A1,000 a year.

\$A1,000 a year.

FURTHER INFORMATION, including list of particulars required of applicants, is available from the Registrar of the University or from the Secretary-General, Association of Commonwealth Universities (Appts.), 36 Gordon Square, London W.C.1.

APPLICATIONS should reach the Registrar of the University at North Terrace, Adelaide, South Australia 5001, not later than April 30, 1969.

February 28, 1969.

(16490)

UNIVERSITY OF OTAGO Dunedin, New Zealand MEDICAL RESEARCH OFFICER (HYPERTENSION RESEARCH) WELLCOME MEDICAL RESEARCH INSTITUTE,

DEPARTMENT OF MEDICINE

Applications are invited from medical graduates, with a higher qualification, for an appointment within the Hypertension Research Group. This group is supported by a project grant from the Medical Research Council of New Zealand and is under the direction of Associate Professor F. O. Simpson.

Applicants should have some experience in hypertension or, alternatively, in cardiovascular or renal work or in clinical pharmacology. The successful applicant will be expected to carry out clinical and non-clinical research in some aspect of hypertension, to share in the care of in-patients and out-patients attending the Hypertension Clinic, and to take part in some clinical teaching. For an appointee with suitable qualifications, some general cardiological work would be available.

Salary according to qualifications and experience within the following range: \$NZ4,270 to \$NZ6,800 per annum with a bar at \$NZ5,600 per annum. (Note: \$NZ100 equals £46 13s. 4d. sterling; \$US112; \$A100.)

Further particulars are available from the Secretary-General, Association of Commonwealth Universities (Appts.), Mariborough House, Pall Mall, London S.W.1 (address after March 29, 1969: 36 Gordon Square, London W.C.1), or from the Registrar of the University.

Applications close in New Zealand and London on April 30, 1969.

Superior to amitriptyline alone in the treatment of depression . . . ?

*Brit J Psychiat. (1967) 113, 201-207

Triptafen-DA

The Triptafen range of products (each containing amitriptyline and perphenazine) provides a rational approach to the treatment of depression and allows adjustment of dosage to suit the needs of the individual patient.

Triptafen-DA tablets and suspension for depression and anxiety

Triptafen-Minor tablets for minor depression and anxiety

Triptafen-Forte tablets and suspension for depressive and schizophrenic disorders

Full information is available on request.

Triptafen is a Trade Mark of

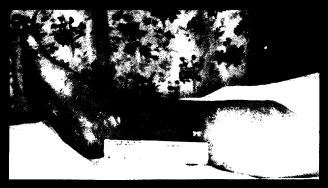

ALLEN & HANBURYS LIMITED LONDON E2

OCTOBER 4—THE PROBLEM. A large weeping ulcer infected with staph. pyogenes and with a dirty central slough. Previous treatment with paraffin gauze and a local steroid antibiotic merely enlarged the ulcer four times.

TWO WEEKS LATER—DESLOUGHING. After treatment with Aserbine Cream to the ulcer and Aqueous Icthyol to the surrounding skin, complete desloughing has taken place.

NOVEMBER 14—HEALING. The ulcer is completely healed. After desloughing with Aserbine Cream, the ulcer was treated with a closed dressing.

When the presence of slough delays healing...

... in varicose ulcers, burns, pressure sores, trophic ulcers, etc.

.. experience has shown that ASERBINE is a true desloughing agent which does not affect living tissue

Presentation: Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

Method of Application: Aserbine Cream should be applied once or twice daily. Aserbine Solution should be applied as a wet dressing and it is important to keep

Aserbine is	100 G.	500 ml.
