

In obesity

**It's simple-it's logical**  
the fatter they are - the higher the dose

'The effective dose range for most patients is 60-120mg/day and side effects can be minimised by beginning with the low dose and gradually increasing medication to the most effective level for that patient'.

# PONDERAX<sup>®</sup>

FENFLURAMINE

Dosage is the same for all obese patients for the first two weeks

*then it is  
related to  
the severity  
of the obesity*

	SEVERE Tabs. per day	MODERATE Tabs. per day	MILD Tabs. per day
1st Week	1 + 1	1 + 1	1 + 1
2nd Week	1 + 2	1 + 2	1 + 2
3rd Week	2 + 2	2 + 2	1 + 2
4th Week and maintenance	2 + 2 + 2	2 + 2	1 + 2
Percentage overweight	> 20%	15-20%	10-15%
Skinfold thickness	Men > 25 mm Women (> 30 mm)	20-25 mm (25-30 mm)	15-20 mm (20-25 mm)

Where twice a day dosage is shown, tablets are taken morning and evening. If three times a day, the third dose is taken at lunchtime

When weight has been stabilised the dosage should be reduced in reverse to starting treatment, to two tablets daily before stopping

**Note:** Weight loss will not usually be apparent during the first two or three weeks of treatment.

#### Contra Indications:

Although both human and animal studies have demonstrated that there is no harmful effect on the foetus, it is not recommended that PONDERAX be administered during the first trimester of pregnancy, unless the physician considers the benefit outweighs any possible risk.

#### Precautions:

Do not administer concurrently with MAOI's, or to depressive patients. PONDERAX may potentiate the action of some anti-hypertensive, anti-diabetic and sedative drugs. The dosage of these drugs should be re-assessed when the patient is taking PONDERAX.

#### Secondary Effects:

Principally mild sedation and increased bowel frequency. Very occasionally gastric upset, nausea, dizziness and headache have been reported. All these effects are reversible by reduction or cessation of dosage.

**Ponderax produces sustained, substantial weight loss through its unique glycoliptic action without stimulation.**

# A quiet revolution in the treatment of schizophrenia

ORAP is the codeword of a revolution. It is a new anti-psychotic, unrelated to existing drug therapies and designed as maintenance treatment of schizophrenia. Rehabilitation not relapse is the aim of ORAP therapy and this is achieved because

---

ORAP has a prolonged action making for an effective once-a-day dosage regime

---

ORAP rarely gives rise to Parkinsonian effects

---

ORAP has no sedative action

---

ORAP is presented as tablets of 2 mg pimozide  
Further information will be supplied on request

# Bad ear

That's all she knows, probably all she cares too. You know it's otitis. Infection . . . maybe fungal . . . and inflammation . . . with pain, irritation . . .

Only one topical ear product will treat bacterial infection *and* fungal infection *and* inflammation *and* pain *and* irritation. The name is Audicort – the ear solution that treats the lot, simply and effectively.

Supporting evidence: Audicort was compared in the treatment of otitis externa with ear drops containing polymixin B, neomycin sulphate and hydrocortisone.

"Fungal infection, usually with *Candida* species, was a factor in 20 cases. The 'Audicort' drops appeared to be more effective in eliminating this infection."

# Betnovate is better. So he is too.

**Infected  
seborrhoeic dermatitis:  
All the better for  
Betnovate-N**

Dermatitis patients respond better to Betnovate than to other topical steroids. Two clinical trials<sup>1,2</sup>, involving 916 patients and comparing Betnovate with 5 other leading topical steroids, proved this conclusively.

Their findings included:

"Betamethasone 17-valerate was statistically superior to the other topical corticosteroids in fourteen of the twenty separate sub-divisions of the trial; in no instance was it inferior."<sup>1</sup>

"A better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested."<sup>1</sup>

When you add the broad-spectrum antibiotic

neomycin to the most effective steroid you can prescribe, the result is Betnovate-N. In infected seborrhoeic dermatitis it gives rapid relief from itching and inflammation and thus achieves the best response. The one thing to remember is Betnovate. Add an N to fight the infection.

## Today's Drugs

New 1970 Edition

The problem facing the prescribing doctor today is choice. Catalogues of drugs—no matter how detailed—are of little help unless accompanied by advice on which drug to give for what condition. So this new edition of "Today's Drugs" not only gives a full account of the drugs but also includes clear accounts of the management of common conditions such as urinary infections and epilepsy.

The new edition differs from the earlier one in other ways. It deals with only three subjects—infections, vitamin deficiencies and anaemias, and disorders of the nervous system. Further volumes will be published at intervals of about a year, and by the time the whole field of therapeutics has been covered this first volume will have become obsolete and due for replacement. In order to further emphasize the ephemeral nature of books on therapeutics—and to cut costs—the book is a paperback.

PRICE £1.00 (U.S.A. \$3.00), *including postage*

## Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

## Road Accidents and the Family Doctor

Road accidents are now acknowledged to be one of the major epidemics of our time. It has been estimated that many accident deaths could be saved by skilled treatment at the site of the accident, and recently doctors in Britain and abroad have been playing an increasingly active part in this. This booklet, which reprints a series of articles which appeared in the *B.M.J.* last autumn, contains contributions on organization and medical equipment, the management of soft-tissue injuries, resuscitation, fractures of the spine, and extrication of persons trapped in a vehicle. The introduction is written by Mr. Norman Capener, Chairman of the Medical Commission on Accident Prevention.

### Contra-indications and Precautions relating to Pregnancy

There is a possibility that live attenuated rubella virus administered during pregnancy could infect and damage the foetus, producing congenital abnormalities. Therefore **pregnant women must not be vaccinated** and pregnancy should be excluded before vaccination is undertaken. This danger to the developing foetus equally applies in the case of a pregnancy

conceived within two months following vaccination. Women of child-bearing age must be warned that for at least two months after vaccination they must take strict contraceptive precautions. If there is any possibility that they may become pregnant within this period they should not be vaccinated.

# HAPPILY EVER AFTER

'Keflex' offers a combination of effectiveness and safety which is unsurpassed by any other antibiotic.

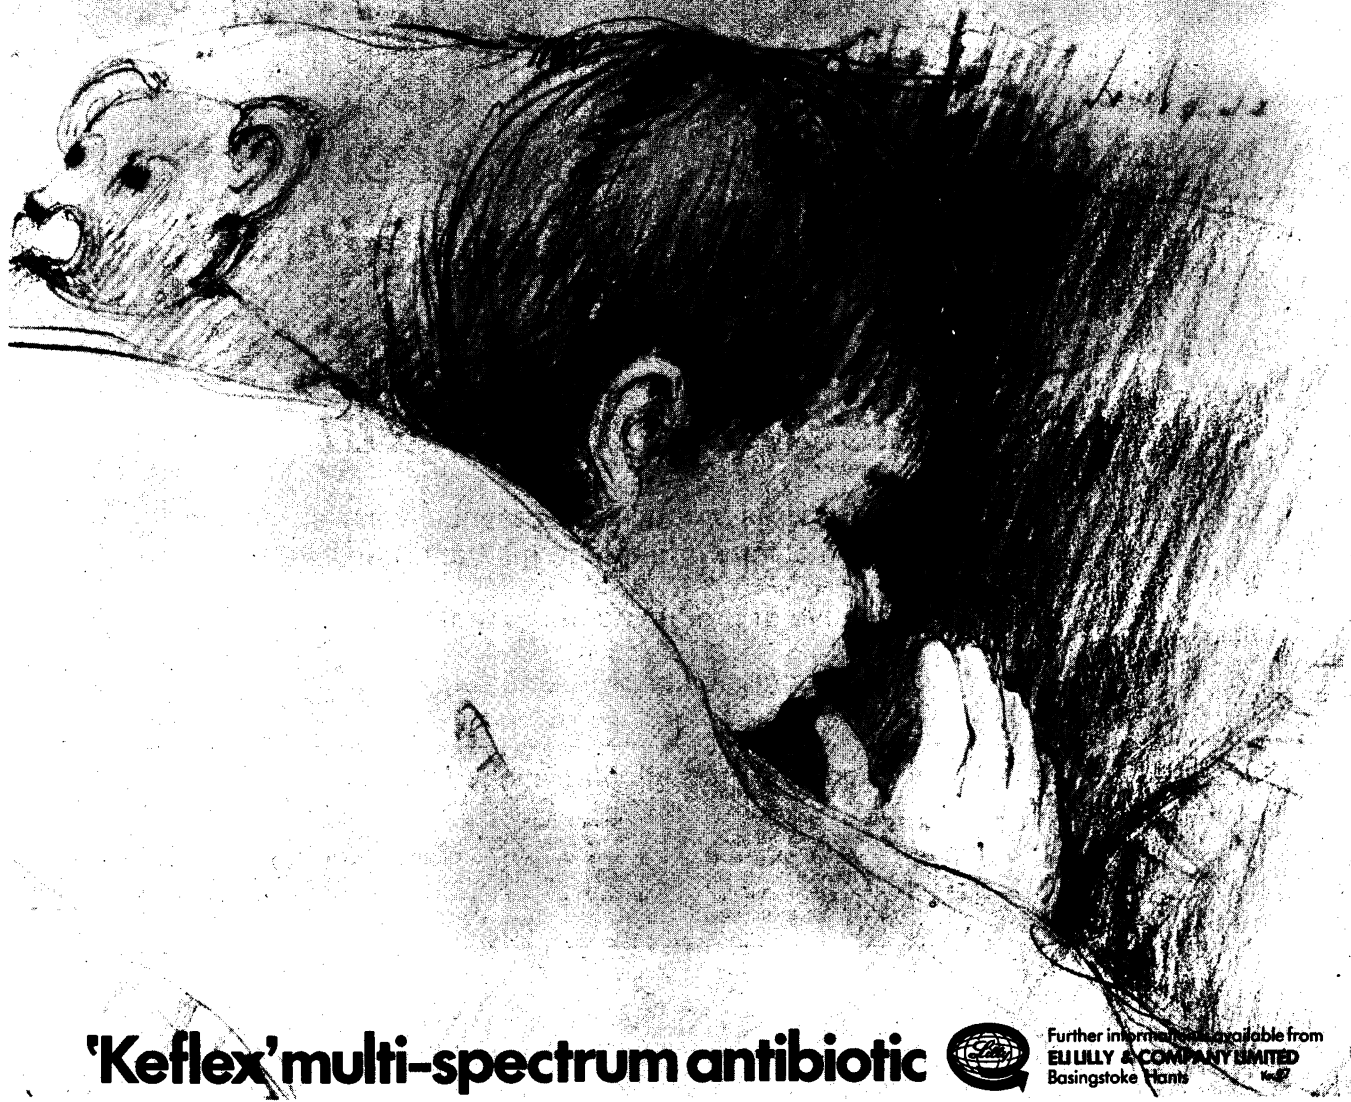

No reports of teeth staining or renal damage, a very low incidence of rash and gastrointestinal disturbance make it particularly suitable for the treatment of bacterial infections in children. Add broad-spectrum, bactericidal action and resistance to penicillinase and it's easy to see why so many children recover so quickly with so few complications after 'Keflex' therapy.

'Keflex' Suspension is supplied in 100 ml bottles containing 125 mg cephalosporin (as the monohydrate) per 5 ml. 'Keflex' is also available for older children and adults as capsules each containing 250 mg cephalosporin (as the monohydrate).

# Folic Acid Deficiency in Pregnancy

It is now established that the body stores of folic acid decrease throughout pregnancy and may lead to megaloblastic anaemia, a common complication in the third trimester.<sup>1,2</sup>

In addition to routine oral iron therapy, it is recommended that prophylactic administration of folic acid should be started in the early stages of pregnancy, preferably incorporated with the iron in a single tablet.<sup>3</sup>

# Let the blood flow through

In the treatment of ischaemia due to intermittent claudication, cerebral arteriosclerosis and vasospastic disorders, Bradilan® has achieved excellent results. Because Bradilan employs tetranicotinoylfructose, the molecule of which is gradually hydrolysed in the intestine, release is smooth and even – with no peaks or troughs. Consequently, efficient and prolonged vasodilation is maintained, with less risk of over dilation in flush areas. For the same reason, headaches are a rare occurrence. Bradilan acts directly on vessel walls and is especially indicated when ischaemia is due to vasospasm. Ideally, treatment should be continued for at least 12 weeks so that progress can be realistically evaluated.

# Day after day of freedom from asthmatic attack

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school, exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

## precision release of the right iron in the right place

Well tolerated in over 93% of patients

A multi-centre trial (Clin. Trials Jnl. (Lond), 1969, 6, 229) carried out by 258 G.P.s and involving over 2,300 patients has shown that 'Slow-Fe' is better tolerated than both plain iron and coated or delayed-release preparations.

The level of gastrointestinal side effects with 'Slow-Fe' was only 6½% — roughly the same as the expected incidence with placebo and considerably lower than that with plain ferrous sulphate B.P.

Fifty-seven patients unable to tolerate many other iron preparations were given 'Slow-Fe'. All but 3 of them found that 'Slow-Fe' was free from the usual side effects.

'Slow-Fe' contains 160mg exsiccated ferrous sulphate (≡ 50mg elemental iron).

'Slow-Fe folic' contains 160mg exsiccated ferrous sulphate (≡ 50mg elemental iron) and 400 micrograms folic acid in a special slow-release base.

# Chances are you have over 100 Psoriatics on your list... ...Alphosyl could help them.

A great many people in Britain suffer from Psoriasis. On average, more than 100 for every G.P. in the country. And that's why every G.P. should know about Alphosyl.

Alphosyl Lotion is the most widely prescribed treatment specifically for Psoriasis. Patients get complete clearing or a marked improvement without systemic reactions, without uncomfortable restrictive dressings and without serious side effects or contraindications.

Alphosyl Lotion is the primary treatment, for use all over the body. And its effectiveness is backed up by the Cream and Application PC. The Cream is particularly effective in the intertriginous areas, and Application PC removes scales from the scalp and prepares the head for treatment with the Lotion.

Alphosyl therapy (Lotion, Cream and Application PC) can be adjusted to suit the patients individual needs . . . or preferences.

Alphosyl is available as a 5% refined alcoholic extract of coal tar and allantoin (2%) in a Cream and Lotion. Alphosyl Application PC is a unique combination of coal tar extract (5%) and hexachlorophane (1%).

## Angina Pectoris. There's no need to give up.

There is a stage in the development of angina when the patient is suffering more and more attacks and is consuming an ever increasing amount of trinitrin.

But there is still no need for the patient - or his doctor - to give up.

It is in just this situation that 'Inderal' can be so helpful.

'Inderal' gives the heart continuous protection against the effects of physical or emotional stress.

Because the heart has less unproductive work to perform, it needs less oxygen.

The balance between myocardial oxygen demand and the supply from diseased coronary arteries becomes more favourable.

Attacks are fewer, capacity for exercise is substantially improved and lost confidence is regained.

Even in severe angina there is no need to give up.

There is irrefutable evidence from 21 double-blind trials to show that 'Inderal' helps make life worth living again.

Detailed information, available on request, should be consulted before prescribing.

# The Medical Protection Society

The Council of the Medical Protection Society invite applications from registered medical practitioners for the appointment of

## An Additional ASSISTANT SECRETARY (MEDICAL)

Experience of the National Health Service important, although service in the Armed Forces could be helpful; knowledge of committee procedure desirable. An aptitude for public speaking and interest in the law or medical jurisprudence would all be valuable. It is anticipated that the candidate appointed would not be under 32 years of age.

Salary will be on a scale which will be incremental and superannuated. The point of entry will have regard to experience and age and will lie between £4,500 and £5,325; thereafter there will be five annual increments of approximately £200.

The professional whole-time staff of the Society includes four doctors and two dental surgeons; one of the former is in charge of the Society's Northern Regional office at Leeds.

Further details of the post may be obtained either from the Secretary, Dr. Constable, 50 Hallam Street, London, W.1 or from Dr. Ford, 30 Park Square, Leeds 1.

Applications (envelope marked "Assistant Secretary"), giving full particulars, together with the names of not more than three referees, should reach

The Secretary,  
Medical Protection Society Ltd.,  
50 Hallam Street, London, W1N 6DE. Tel. 01-580 9241

not later than Monday, February 22, 1971. (H7864)

# B.M.A. DEPUTISING SERVICES

Applications are invited from Doctors interested in becoming full time or part time Locums in the Nottingham, Leicester and Coventry areas. Full time or part time positions are offered on either a short or long term basis and subject to a suitable probationary period. It will be possible to offer full time doctors a most advantageous contract with guaranteed security, both financially and in terms of tenure. To give some idea of the remuneration a basic week of 60/65 hours could produce an annual income in the region of £4,000 plus and those working less or more hours than this would be paid on a strictly pro rata basis. Applications to be sent to the B.M.A. Deputising Services, 47a, Low Pavement, Chesterfield.

## GENERAL PRACTICE TRAINING POSTS

### NORTH EASTERN REGIONAL HOSPITAL BOARD

Board of Management for the Foresterhill and Associated Hospitals University of Aberdeen.

### VOCATIONAL TRAINING FOR GENERAL PRACTICE

Applications for 12 places in this new three year scheme are invited for medical graduates who wish to train for a career in general practice and who are fully registered on August 1, 1971.

Trainees will spend the first two years in hospital service posts at Senior House Officer grade. These posts include experience in casualty, dermatology, E.N.T., ophthalmology, paediatrics, obstetrics and gynaecology. By a degree of flexible operation it is hoped to give each trainee additional experience in orthopaedics, general medicine and other subjects of his or her choice.

The third year will be spent mainly as an assistant in a local training practice from which two half days per week release will be arranged for courses in psychological and preventive medicine and for visits to other practices and to the social services relevant to the postgraduate studies. Those wishing to be considered for the first intake on August 1, 1971 should complete, within two weeks, an application form obtainable from the Group Secretary and Treasurer, Board of Management for the Aberdeen General Hospitals, Foresterhill House, Ashgrove Road West, Aberdeen AB9 8AQ. Details of the training schedule will be sent out with the application form but any additional entries about this scheme may be addressed to Professor I. M. Richardson, Department of General Practice, University Medical Building, Foresterhill, Aberdeen AB9 2ZB. (H7944) 11

HOSPITAL BOARD****ADMINISTRATIVE MEDICAL OFFICER  
(TRAINEE)**

A comprehensive training in medical administration is offered to a keen young doctor with sound basic clinical experience. A full training programme tailored to the needs of the successful applicant will be arranged. This will initially consist of a period of in-service instruction, followed by secondment, in September/October, 1971, to a full-time course for two years organized by the London School of Hygiene and Tropical Medicine, leading to an M.Sc. Degree in Social Medicine from the University of London.

No administrative experience is required, nor is any particular pattern of previous

clinical experience necessarily more appropriate than any other. The principal criteria will be a good general medical background and aptitude and enthusiasm for management, investigation, and the practice of medicine on a community scale.

Salary scale £2,760 x increments of £126 (1), £174 (1), £177 (1), £174 (1), and £177 (1) to a maximum of £3,588. Post superannuable.  
Further particulars available on request. Canvassing will disqualify, but applicants are encouraged to visit the Senior Administrative Medical Officer by appointment.

Applications, giving particulars of age, qualifications and experience, together with names and addresses of three referees, should be addressed to the Senior Administrative Medical Officer, Newcastle Regional Hospital Board, Benfield Road, Newcastle-upon-Tyne, NE6 4PY, within 21 days. (42001) 54

# What is the word for emotional distress?

The presenting symptoms? "Can't sleep . . . irritable . . . no appetite . . . tired . . . aches and pains"—consultation after consultation.

The task? To penetrate behind the facade to the underlying condition.

The aim? To make the patient feel better quickly and reveal the problem, without unnecessary consultations.

Tranquillizers or hypnotics may deal with part of this aim, but only part.

Prothiaden can meet all the requirements. It is rapidly effective in both anxiety and depression. One ingredient, a single-strength capsule means straightforward dosage.

Prothiaden is well tolerated even by the elderly.

Prothiaden can mean trouble-free treatment of anxiety, depression, in fact any manifestation of emotional distress.

## WELLINGTON HOSPITAL BOARD Wellington, New Zealand

### VISITING ORTHOPAEDIC SURGEON Hutt Hospital

The Wellington Hospital Board invites applications from qualified medical practitioners for the position of Visiting Orthopaedic Surgeon at Hutt Hospital, a general hospital of 390 acute beds about 12 miles from Wellington. Planning is well advanced for development into a 600 bed hospital within 5 years, including a completely new Orthopaedic Unit of 90 beds. Applicants must be registered in New Zealand or hold qualifications entitling them to registration. A higher qualification is essential. The appointment will be on the basis of over 17½ hours but not over 21 hours per week, and remuneration will be six tenths of the whole-time rate with opportunities for private consultant practice in the district. A new private hospital is under construction about 20 minutes' drive from the Hutt, and a good opportunity is available immediately for associated consultant private practice. Details could be obtained from Mr. G. R. Laurenson, F.R.C.S., 14 Rarua Road, Lower Hutt, New Zealand.

Conditions will be in accordance with the New Zealand Hospital Employment (Medical Officers) Regulations and the appointee must qualify for specialist status as defined in the regulations. Whole-time salary scale by Specialism: Automatic Scale NZ\$7,500—NZ\$10,100, Higher Grading NZ\$10,625—NZ\$11,150; NZ\$11,750; NZ\$12,500. NZ\$2,149 equal £1,000 approximately. A schedule of conditions of appointment and an application form are available from the Office of the High Commissioner for New Zealand, New Zealand House, Haymarket, London, S.W.1.

Applications, preferably on the form provided, will be received by the Secretary, Wellington Hospital Board, P.O. Box 10245, Wellington, New Zealand up to 9.00 a.m. on Monday, March 1, 1971. (H7911) 61-1

# even chests need a good night's rest

Bronchospasm has a nasty habit of disturbing people's rest:  
the patient's rest if he is on q.d.s. treatment;  
yours when he calls you for help in the middle of the night.

The simple answer is often the best: truly effective  
prophylactic cover given at a dosage which disturbs no one.

**Theograd®**  
bronchodilation night and day

Theophylline gradually, consistently, predictably released from the Gradumet in the small intestine; reliably absorbed to give relief from bronchospasm over a 24-hour period, from one 350 mg. tablet b.d.

Recommended dosage: 2 tablets initially, followed by 1 b.d. As with all theophylline preparations, some patients may experience gastrointestinal side effects; the Gradumet® presentation reduces these to a minimum. No clear contraindications; relatively non-toxic.
