

**BENYLIN\* Expectorant** is a time-honoured linctus that soothes and softens harsh, chesty coughs. Palatable, economical and suitable for all ages, it is the most widely prescribed ethical cough linctus in the U.K.

# **Benylin Expectorant**

## **loosens the tight chest, alleviates cough**

Each 100 ml. of BENYLIN Expectorant contains diphenhydramine hydrochloride B.P. 280 mg., ammonium chloride 2.7 G., sodium citrate B.P. 1.14 G., chloroform B.P. 450 mg. and menthol B.P. 22 mg.

There are tight, painful coughs that need loosening; there are dry, ticklish coughs that usually need to be suppressed.

Now there is an appropriate Parke-Davis product for each type of cough.

BENYLIN\* with Codeine is a new antitussive formulation combining the cough suppressant activity of codeine with the antihistaminic and antispasmodic effects of BENADRYL\* (diphenhydramine hydrochloride, Parke-Davis) in a soothing demulcent vehicle. It is a tasty red syrup acceptable to patients of all ages.

**\* *Medihaler-duo...***  
***"may have an additional  
margin of safety"***

*British Medical Journal* 5th December 1970

"The present results suggest that the changes in blood gases represent an improvement in the physiological state of the patients studied.

The combination aerosol\* has a satisfactory bronchodilator effect, and may have an additional margin of safety if used by a severely hypoxic patient unaware of the seriousness of his condition."

This new evidence confirms that *Medihaler-duo* is significantly different from other bronchodilator inhalers in preventing adverse changes in the blood gas picture in most patients.

In this latest paper the significant improvement following *Medihaler-duo* is contrasted with "well documented evidence" of falls in blood oxygenation caused by inhaled isoprenaline, orciprenaline and salbutamol.

***for insignificant effect on the heart  
improved gas exchange  
and the prospect of improving the  
patient's physiological state***

**Composition** *Medihaler-duo* contains a suspension of isoprenaline hydrochloride 8 mg./ml., phenylephrine bitartrate 12 mg./ml., and each puff delivers to the patient a measured dose containing 0.16 mg. isoprenaline hydrochloride and 0.24 mg. phenylephrine bitartrate. **Contra-indications** There are no absolute contra-indications, but *Medihaler-duo* should be used with caution in the presence of cardiac disease, hypertension or hyperthyroidism. **Side-effects** Over-dosage may cause dry mouth, palpitations, or nervousness. **Dosage** One to three puffs should be sufficient to provide relief in most cases. It should not be necessary for the patient to take further treatment for at least thirty minutes, or more than eight treatments a day. **Children** *Medihaler-duo* should be administered to children only under the supervision of a responsible adult. **Basic NHS price** Standard pack (complete 400-dose unit) 17/-. # Floxapen simplifies antibiotic treatment especially in difficult cases

Floxapen simplifies antibiotic treatment in several ways that are important in general practice.

Floxapen is effective against streptococci, pneumococci and staphylococci, irrespective of their sensitivity to other antibiotics. It is also effective against resistant staphylococci, an increasing problem in general practice and a potential cause of treatment failure.

Floxapen dosage is simple, too. 250 mg. q.i.d. orally or by injection. Both methods of administration achieve similar blood levels.

Floxapen offers the traditional penicillin advantages of low toxicity and bactericidal action which destroys organisms rather than merely inhibiting growth. This eases the burden on the patient's own body defences.

It is these advantages which make Floxapen of special value when treating difficult cases—the young; the elderly; patients with underlying debilitating conditions such as diabetes or asthma; patients with severe or recurrent infections; patients with a history of treatment failure; patients undergoing steroid therapy.

**Indications:** Infections due to Gram-positive organisms: cellulitis, abscesses, boils and carbuncles, furunculosis, infected wounds and burns, infected ulcers and other skin infections, pharyngitis, tonsillitis, otitis media, sinusitis, pneumonia (especially post-influenza), empyema, osteomyelitis.

**Availability:** Capsules (black/caramel) and Vials, each containing 250 mg. flucloxacillin.

**Dosage:** Oral and Intramuscular:  
Adults: 250 mg. q.i.d.  
Children: 2-10 years—half adult dose.  
Under 2 years—quarter adult dose.

Oral doses should be taken one hour before meals. In severe infections dosages may be increased if required.

**Contra-indications:** Penicillin hypersensitivity. Subconjunctival injection.

**Side-effects:** Rare and mild, as with other penicillins.  
*Further information is available on request.*

# As a doctor, you'd be better off abroad. Or would you?

Obviously, the decision's a difficult one. Especially if you're only just about to register.

So may we suggest something?

Rather than taking up a normal practice here or leaving the country, try the Royal Army Medical Corps. And you'll get the chance to do both.

Because, for some of the time, in the RAMC you're likely to see something of the world: in Germany, Cyprus, or maybe on exercises in countries from Canada to the Far East.

You can join for 3 or 5 years. And in that time you'll not only travel, you'll also gain valuable medical experience.

You'll hold the rank of Captain. And at say 24 years of age you earn around £3395 gross p.a. On top of that, there are all sorts of allowances.

Your surgery is well equipped by the Army. And you won't just be dealing with soldiers. There are wives and children to care for, too.

What's more, you get 6 weeks' paid leave every year.

At any time during your service, you can apply to stay on for a Regular Commission. And have the opportunity of specialising. In fact, around 70% of all Regular Officers do take up post-graduate studies.

Alternatively, you can leave at the end of your Short Service Commission.

All the better for the experience and for a tax-free gratuity. You get £1500 after 3 years. £3000 after 5.

So think about it. And before you decide on anything, find out more about the RAMC.

If you want full details, or want to meet an RAMC Officer, write to **Colonel T. S. Hart, MB, DPH, DTM & H, RAMC, Ministry of Defence (AMD<sub>2</sub>), Dept. 709 Lansdowne House, Berkeley Square, London, W1X 6AA.**

Post when normal postal services are resumed, or contact your local Army Careers Information Office.

# Heart-risk people and polyunsaturates

Diet is related to coronary disease. It is not the only factor and the relationship is still far from clear, but already considerable concern has been expressed about the amount of animal fats most of us are eating.

So to be on the safe side, it is suggested that we limit our consumption of fats to no more than 40% of our calorie intake, and as far as possible make sure the fats are polyunsaturated.

This means all of us, not just the incipient

heart case, and the younger we start the better.

Flora vegetable oil margarine was designed a few years ago to meet just this situation, and recently its polyunsaturate content—already high—was almost doubled. It tastes noticeably good, spreads easily, cooks well, and can be bought in almost any supermarket.

Everything you need to make Flora the kind of advice that people are likely to take.

*New Flora vegetable oil margarine contains 50% of polyunsaturates (natural cis-cis linoleic), ratio of polyunsaturates to saturates 2:1.*

# "It's the same every winter, doctor"

Michael's had asthma since he was three. Every winter it's the same old story — he gets a cold which quickly sets up the familiar pattern of bronchitis and severe asthma causing anxiety for Michael, his mother and his doctor.

Now Ceporex (cephalexin) is the effective answer to the bacterial infection because it kills most of the pathogens, including penicillin-resistant staphylococci, which commonly cause acute respiratory infections. The absorption of Ceporex is rapid and virtually complete, giving high serum levels within an hour of administration. Ceporex has very low toxicity, is well tolerated and can be considered the logical alternative for patients hypersensitive to the penicillins.

At the International Conference on Cephalosporins, 1970, twenty papers were presented on cephalexin. These reported on the treatment of 2,000 patients with a wide variety of conditions.

During a trial conducted in adults and children by General Practitioners, \*341 infections were treated, including those of the ear, nose, throat and soft tissue, as well as those of the urinary and respiratory tracts. An over-all success rate of 91% was achieved with Ceporex at a dosage of 20 mg/kg per day or over. Confirmation that Ceporex really works. Make it your first choice in bronchitis.

Gastric ulcers—endoscopic photograph

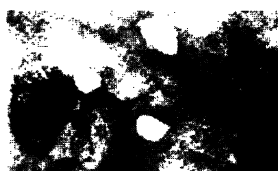

# Gefarnil brings the ulcer problem down to size.

Traditional treatment in suspected or confirmed peptic ulcer cases is mostly symptomatic – geared simply to relief of pain.

Now there is Gefarnil – the unique healing agent. Its anti-ulcer properties have already been well established in animal experiments and clinical trials<sup>1,2,3</sup>.

Its systemic action means that Gefarnil can reach ulcer sites in both stomach and duodenum, and while many other agents act by surface contact, merely providing an environment for healing, Gefarnil takes effect through its blood-tissue level, independent of conditions in the gut lumen.

The expected sequence of events with Gefarnil is as follows:

- 15 days—remission of symptoms (usual antacid/antispasmodic treatment advisable during this period)
- 30 days—ulcers no longer detectable radiographically (but may still be evident endoscopically)
- 60 days—ulcers no longer detectable endoscopically.

Only minor transient side effects occur with Gefarnil, which can thus be used with confidence not only in confirmed but also in suspected ulcer patients.

Gefarnil\* is presented as capsules, each containing 50 mg. Gefarnate, and as injection solution, 50 mg. per ml.

## Let the blood flow through

In the treatment of ischaemia due to intermittent claudication, cerebral arteriosclerosis and vasospastic disorders, Bradilan® has achieved excellent results. Because Bradilan employs tetranicotinoylfructose, the molecule of which is gradually hydrolysed in the intestine, release is smooth and even – with no peaks or troughs. Consequently, efficient and prolonged vasodilation is maintained, with less risk of over dilation in flush areas. For the same reason, headaches are a rare occurrence. Bradilan acts directly on vessel walls and is especially indicated when ischaemia is due to vasospasm. Ideally, treatment should be continued for at least 12 weeks so that progress can be realistically evaluated.

## a little knowledge is not enough . . . give teen-agers the facts about menstruation

Some teen-agers have heard they shouldn't bathe or wash their hair during their menstrual periods. Some think unmarried girls shouldn't use tampons. Others say exercise brings on "cramps". No wonder they call it the "curse".

Give them the facts... with the help of the illustrations in charts like the one above prepared by R. L. Dickinson, M. D. and available to you free from Tampax Limited. These 11"x8½" coloured charts are laminated in plastic for permanence and are suitable for marking with grease pencil. Social myths can be exploded, too, by giving teen-agers either of the two booklets we will be glad to send you in quantity for distribution. One booklet is written for the young girl just beginning menstruation and the other for the older teen-ager. The booklets tell them what menstruation is, how it will affect them, and how easily they can adjust to it normally and naturally.

Unmarried girls, of course, can use tampons. And

they have many good reasons to do so. Tampax tampons are easy to insert—comfortable to wear. Because they're worn internally there's no irritation or chafing; no menstrual odour.

Tampax tampons are available in Regular and Super absorbencies, with explicit directions for insertion and use enclosed in each package.

Simply write to the address below for your free set of charts and sample booklets. These booklets may then be reordered in any quantity you need for your patients' personal use.

### UNIVERSITY OF SURREY DEPARTMENT OF MECHANICAL ENGINEERING

#### M.Sc. DEGREE COURSE IN BIOMECHANICS

Applications are invited for a one-year course in Biomechanics commencing in October 1971.

The course, which leads to the degree of M.Sc. by examination, is intended for graduates in engineering or the physical sciences on the one hand and graduates in medicine or the biological sciences on the other.

The branch of the course for graduates in engineering and the physical sciences aims to fit them for research and development work in the medical field and to introduce them to the physiological problems which they can help solve.

The branch of the course for graduates in medicine or the biological sciences aims to introduce them to the mathematical and engineering methods and techniques which are applicable to medical and physiological practice and research.

Studies on the clinical aspects of biomechanics are provided by King's College Hospital and by visiting lecturers from other medical establishments. The course is supported by an active research group with special interest in problems related to internal and external prostheses, physical properties of tissues, perfusion techniques, blood flow measurement and low temperature medicine. The Science Research Council has accepted the course as suitable for the tenure of its Advanced Course Studentships.

Further details and application forms may be obtained from the Department of Mechanical Engineering, University of Surrey, Stag Hill, Guildford, Surrey. (15708) 2

## SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

**HOUSE OFFICER:** Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

**SENIOR HOUSE OFFICER:** £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

**REGISTRAR:** £2,328 per annum × £144(3) × £126(1)—£2,886.

Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

**SENIOR REGISTRAR:** £2,760 per annum × £126(1) × £174(1) × £177(1) × £174(1) × £177(1)—£3,588.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANT:** £2,520 per annum × £144(1) × £156(3) × £144(10)—£4,572.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

**CONSULTANT:** £4,512 per annum × £201(8) × £210(1)—£6,330.

Deductions of £420 per annum in respect of lodging only for voluntary residence.

**COMPULSORY RESIDENCE:** The Terms and Conditions of Service of Hospital Medical and Dental Staff state:

173. A practitioner who is required as a condition of his appointment to reside in a hospital shall be provided with lodging without charge, except where the practitioner elects to occupy a house, flat or apartment for which a rental is appropriate.

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters may be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association. (November, 1970)

## **More published evidence**

Many patients have now been safely treated with Trasacor, and its effectiveness has been confirmed in well-designed double-blind studies. Comprehensive evidence of the value of Trasacor is found in the Symposium proceedings carried in the November (1970) Supplement to the Postgraduate Medical Journal. Copies are available on request to CIBA Laboratories, Horsham, Sussex.

Radiotelemetric studies  
with Trasacor

# natural movement at night denied to the arthritic

“To get through the day is a hard enough fight for the patient with crippling osteoarthritis or severe rheumatoid arthritis, but when nights have been sleepless and pain-wracked, the next day is started with physical and psychological stores depleted and the patient already exhausted at the starting-post.”

*Lancet*, 1970, i, 881 (25 Apr)

For many patients afflicted by arthritis, ‘Indocid’ Suppositories can bring about a noticeable improvement during the night. Many will enjoy a better night’s sleep, less interrupted by pain and stiffness, and find it easier to get started in the morning. The addition of ‘Indocid’ Capsules will help to keep them mobile during the afternoon and evening.
