# Penbritin the right-first-time antibiotic

Penbritin is a unique antibiotic. It combines the rapid decisive action of penicillin with broad-spectrum activity, a powerful combination which makes Penbritin a first-choice treatment for many infections seen in general practice.

Penbritin retains the safety of penicillin, an advantage no other broad-spectrum antibiotic can share. Where safety is particularly important, during pregnancy or in paediatrics for example, Penbritin may be prescribed with confidence.

Penbritin provides an appropriate presentation for all of your patients. There are capsules, scored paediatric tablets and fruit-flavoured syrup in two strengths. Penbritin can also be given by injection if the patient's condition demands it.

Penbritin is the preferred antibiotic for good reasons. The experience of nine years' extensive usage in hospitals and in general practice endorses Penbritin as the right-first-time antibiotic.

Further information is available on request.

# The smooth response to Seborrhoeic Dermatitis

Healthy hair is the envy of most people because scalp dermatoses, which are unsightly and disfiguring, are so common. These conditions include simple dandruff and seborrhoeic dermatitis.

'Synalar' Gel provides rapid

and effective treatment for the scalp and at the same time enlivens the hair. It does this in a pleasant and highly acceptable way because it is a clear, non-greasy, non-sticky preparation which leaves the hair clean and healthy.

'Synalar' Gel in 30G. tubes, sufficient for approximately two weeks' treatment. Full prescribing information is available on request.

# As a doctor, you'd be better off abroad. Or would you?

Obviously, the decision's a difficult one. Especially if you're only just about to register.

So may we suggest something?

Rather than taking up a normal practice here or leaving the country, try the Royal Army Medical Corps. And you'll get the chance to do both.

Because, for some of the time, in the RAMC you're likely to see something of the world: in Germany, Cyprus, or maybe on exercises in countries from Canada to the Far East.

You can join for 3 or 5 years. And in that time you'll not only travel, you'll also gain valuable medical experience.

You'll hold the rank of Captain. And at say 24 years of age you earn around £3395 gross p.a. On top of that, there are all sorts of allowances.

Your surgery is well equipped by the Army. And you won't just be dealing with soldiers. There are wives and children to care for, too.

What's more, you get 6 weeks' paid leave every year.

At any time during your service, you can apply to stay on for a Regular Commission. And have the opportunity of specialising. In fact, around 70% of all Regular Officers do take up post-graduate studies.

Alternatively, you can leave at the end of your Short Service Commission.

All the better for the experience and for a tax-free gratuity. You get £1500 after 3 years. £3000 after 5.

So think about it. And before you decide on anything, find out more about the RAMC.

If you want full details, or want to meet an RAMC Officer, write to **Colonel T. S. Hart, MB, DPH, DTM & H, RAMC, Ministry of Defence (AMD<sub>2</sub>), Dept. 711 Lansdowne House, Berkeley Square, London, W1X 6AA.**

Post when normal postal services are resumed, or contact your local Army Careers Information Office.

# "My whole face hurts"

Frank Adams has sinusitis. He gets it nearly every time he gets a cold. Over the years his doctor's prescribed a number of antibiotics without any great success. This time he's trying Ceporex.

In sinusitis "the choice of an antibiotic can be based on culture and sensitivity results obtained from nasal swabs or antral washings. When in doubt a broad-spectrum antibiotic should be administered, since mixed infections are often encountered".\* Ceporex kills both gram-positive and gram-negative bacteria, that's why it's so suitable. It's also very effective against

penicillin-resistant staphylococci and can be the logical alternative if penicillin hypersensitivity is suspected. Ceporex gives high serum levels within an hour of administration and penetrates fast to the tissues.

With Ceporex you have a broad-spectrum antibiotic that acts fast and is well tolerated. In sinusitis, it usually eradicates the bacterial infection, with the subsequent relief of both the congestion and pain. So make Ceporex your first choice.

# is it gout?

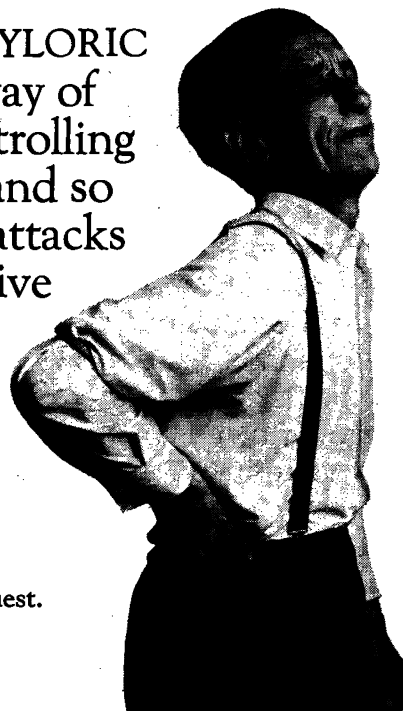

Gout does not always present in the classical manner, with an inflamed big toe. It can present as pain in almost any joint. Colicky pain due to urate stones is sometimes a precursor of gout.

In circumstances like these it is worth remembering gout and having the serum uric acid level checked.

If the diagnosis is gout, ZYLORIC\* is there to provide effective prophylactic treatment. ZYLORIC provides the rational way of treating gout by controlling uric acid formation and so preventing the acute attacks and the degenerative changes associated with the history of the disease.

# Floxapen

## simplifies antibiotic treatment

Floxapen simplifies antibiotic treatment in several ways that are important in general practice.

Floxapen is effective against streptococci, pneumococci and staphylococci, irrespective of their sensitivity to other antibiotics. It is also effective against resistant staphylococci, an increasing problem in general practice and a potential cause of treatment failure.

Floxapen dosage is simple, too. 250 mg. q.i.d. orally or by injection. Both methods of administration achieve similar blood levels.

Floxapen offers the traditional penicillin advantages of low toxicity and bactericidal action which destroys organisms rather than merely inhibiting growth. This eases the burden on the patient's own body defences.

It is these advantages which make Floxapen of special value when treating difficult cases—the young ; the elderly ; patients with underlying debilitating conditions such as diabetes or asthma ; patients with severe or recurrent infections ; patients with a history of treatment failure ; patients undergoing steroid therapy.

**Indications:** Infections due to Gram-positive organisms : cellulitis, abscesses, boils and carbuncles, furunculosis, infected wounds and burns, infected ulcers and other skin infections, pharyngitis, tonsillitis, otitis media, sinusitis, pneumonia (especially post-influenzal), empyema, osteomyelitis.

**Availability:** Capsules (black/caramel) and Vials, each containing 250 mg. flucloxacillin.

**Dosage:** Oral and Intramuscular :  
Adults : 250 mg. q.i.d.  
Children : 2-10 years—half adult dose.  
Under 2 years—quarter adult dose.

Oral doses should be taken one hour before meals.  
In severe infections dosages may be increased if required.

**Contra-indications:** Penicillin hypersensitivity.  
Subconjunctival injection.

**Side-effects:** As with other penicillins.

Gastric ulcers—endoscopic photograph

# Gefarnil brings the ulcer problem down to size.

Traditional treatment in suspected or confirmed peptic ulcer cases is mostly symptomatic — geared simply to relief of pain.

Now there is Gefarnil — the unique healing agent. Its anti-ulcer properties have already been well established in animal experiments and clinical trials<sup>1,2,3</sup>.

Its systemic action means that Gefarnil can reach ulcer sites in both stomach and duodenum, and while many other agents act by surface contact, merely providing an environment for healing, Gefarnil takes effect through its blood-tissue level, independent of conditions in the gut lumen.

The expected sequence of events with Gefarnil is as follows:

15 days—remission of symptoms (usual antacid/antispasmodic treatment advisable during this period)  
30 days—ulcers no longer detectable radiographically (but may still be evident endoscopically)  
60 days—ulcers no longer detectable endoscopically.

Only minor transient side effects occur with Gefarnil, which can thus be used with confidence not only in confirmed but also in suspected ulcer patients.

Gefarnil\* is presented as capsules, each containing 50 mg. Gefarnate, and as injection solution, 50 mg. per ml.

# 6 separate problems- solved with one antibiotic

*Lilly*  
**Keflex**  
PREPARATIONS OF CEPHALEXIN MONOHYDRATE

**multi-spectrum antibiotic**

Cephalexin is the oral antibiotic that could overcome the above problems – combining bactericidal action, broad-spectrum activity, and effectiveness even in the presence of penicillinase producers. With care, 'Keflex' may be used even in patients with renal damage. Its rapid action together with almost complete absorption, plus a very low incidence of gastro-intestinal side effects are the reasons why so many bronchitic patients recover so quickly with so few problems following 'Keflex' therapy. **500 mg 'Keflex' tablets** are a convenient dosage form for these bronchitic patients.

Further information available on request.

**Eli Lilly & Company Limited Basingstoke Hants**

'Keflex' 500 mg tablets each containing 500 mg cephalexin\* (coded U49). Also available 250 mg\* capsules (coded H69), 250 mg\*/5 ml suspension and 125 mg\*/5 ml suspension. \*Cephalexin (as the monohydrate).

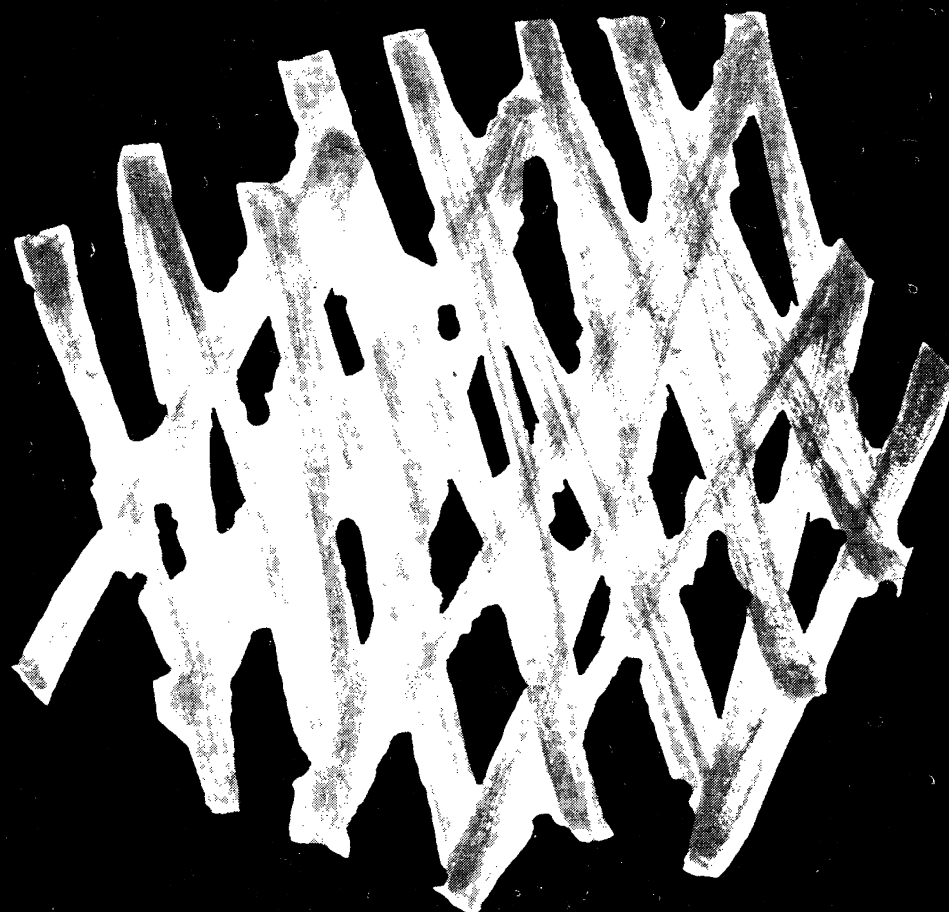

# control the itch-orally

'Vallergan' breaks the itch – scratch – itch cycle  
in urticaria and pruritus – whatever its aetiology. 'Vallergan' is also  
a potent sedative, invaluable when sleep is disturbed.

# Vallergan

# NO BARKING

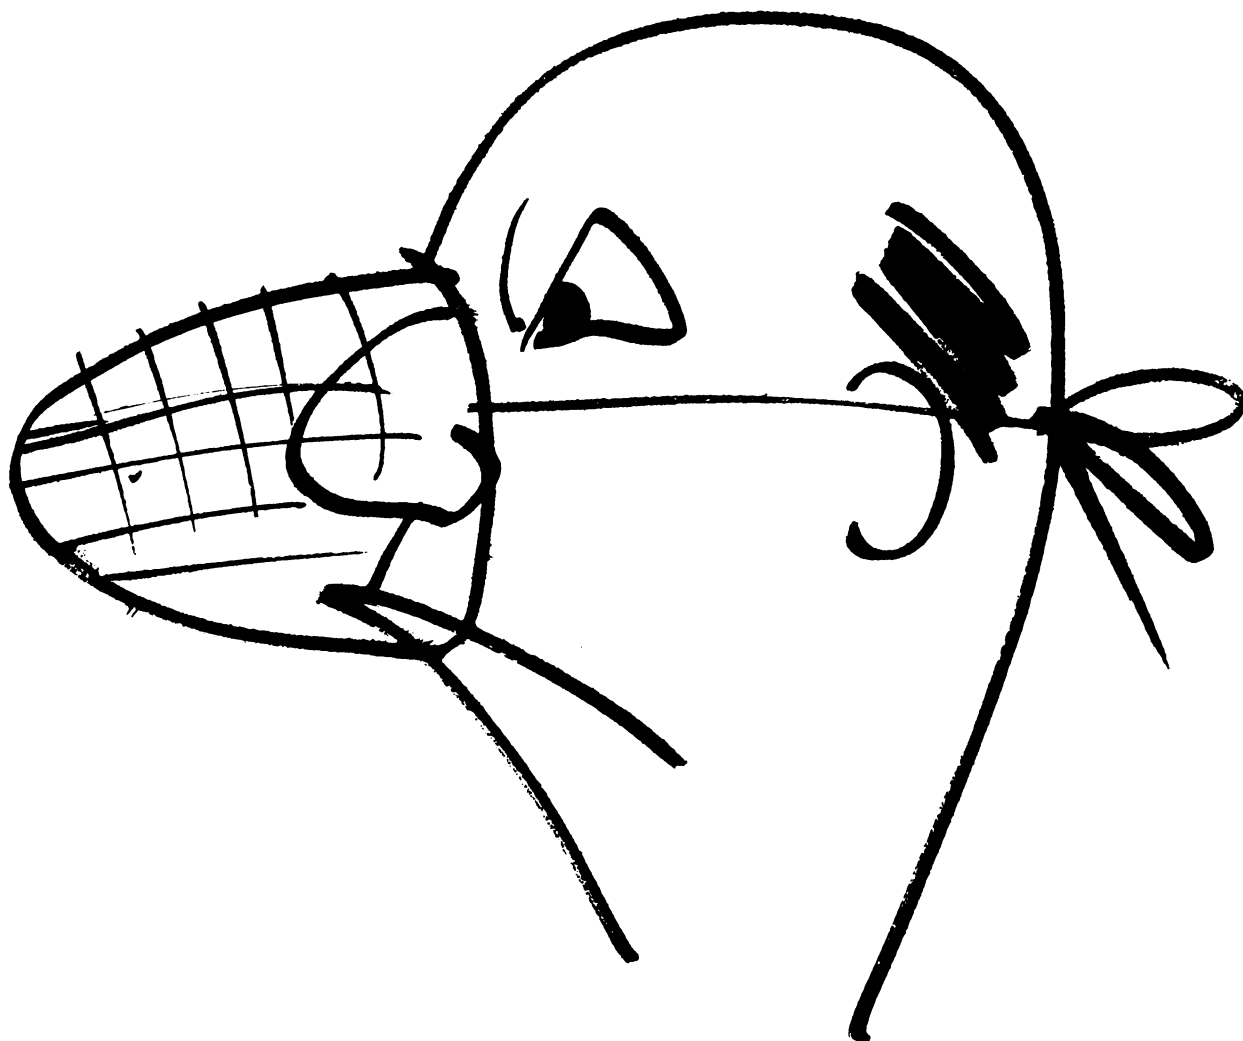

Because it is designed for cough control ACTIFED\* Compound Linctus can be relied upon when cough itself is the main cause for concern. Hack-ing, harrowing coughs; coughs that bring misery and sleeplessness. ACTIFED Compound Linctus contains codeine. Because it also includes the quick-acting antihistamine triprolidine and the decongestant and bronchodilator pseudoephedrine, ACTIFED Compound Linctus takes into account any associated congestion or allergy.

# Halt at the flashing light

Flashing lights and visual disturbances, classically early warnings of migraine, are signals for arresting all manifestations of an attack – at onset.

MIGRIL\* acts in the minutes between initial warning and the otherwise inevitable full-blown attack.

As well as containing an effective dose of ergotamine (2 mg in each tablet), enhanced by caffeine, MIGRIL contains the anti-emetic, cyclizine. Nausea and vomiting, due to migraine itself or to ergotamine, are very effectively relieved.

MIGRIL, taken at the first warning of an attack, provides a specific treatment that the patient will learn to rely on. Full information is available on request.

\*Trade Mark.

## UNIVERSITY OF EXETER

POSTGRADUATE MEDICAL INSTITUTE  
A full-time Postgraduate Course lasting 10 weeks will begin on the 21st April, 1971. These courses are held 3 times a year starting in October, January and April. Each course includes instruction in General Medicine, Paediatrics, Preventive Medicine, Pathology, Psychiatry, Orthopaedics and General Surgery. The programme is planned so that students wishing to specialise in a particular clinical subjects are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body. It is sometimes possible to accept General Practitioners for 1 or 2 weeks of a course, and attendance for this period is recognised under Section 63 of the Health Services and Public Health Act, 1968. These courses are also recognised under the special scheme for the re-training for general practice of Doctors who have been out of the Health Service for at least 5 years. The fee for this course will be £40 (£83 for students from outside the United Kingdom). ### GENERAL PRACTICE TRAINING POSTS

#### READING AND DISTRICT HOSPITAL MANAGEMENT COMMITTEE

## VOCATIONAL TRAINING GENERAL PRACTICE

Two vacancies for two year appointment, approved by University of Oxford Committee for Postgraduate Medical Studies recognised by Oxford Regional Hospital Board occurring May 1st 1971. Posts meet requirements for D. Obst., R.C.O.G., and M.R.C.P.

The first year, in S.H.O. grade, consists of six months obstetrics, three months paediatrics, one month residence in adult psychiatry and two months in various departments of the trainees choice. Then would follow six months each in an urban and a rural general practice within the clinical area served by the Group, at the current scale of remuneration for trainees. Further information from the Clinical Tutor, The Library, Royal Berkshire Hospital, Reading, Berks.

Applications to Group Secretary, Reading and District Hospital Management Committee, 3 Craven Road, Reading, Berks. (16146) 11

### Regional Postgraduate Institute for Medicine and Dentistry Newcastle upon Tyne.

## VOCATIONAL TRAINING FOR GENERAL PRACTICE

Applications are invited from recently qualified medical graduates for three year courses of training starting in July, 1971. Two programmes are offered, one based on Newcastle upon Tyne, the other on Teesside. Each comprises three stages.

1. A six month appointment in a teaching general practice.
2. Successive six month appointments in four of the following specialities: Obstetrics, Paediatrics, Medicine, Psychiatry, Emergency Medicine and (on Teesside only) a combined E.N.T., Skin and Eyes.
3. A final six month appointment in a teaching general practice.

Regular weekly seminars and visits augment practical experience and cover major aspects of general practice with particular reference to the examination of M.R.C.G.P. In addition experience for the D.C.H. and D.R.C.O.G. examinations is provided.

The courses described in the B.M.J. of 2nd January, 1971, are now well established with 20 trainees in post. Salaries are at the Trainee Assistant and Senior House Officer Scale. (£2184 — 2472).

Further details are available from: Dr. Andrew Smith, Lecturer in Family Medicine, Department of Family & Community Medicine, The Medical School, Newcastle upon Tyne, NE1 7RU. H8241 — 11

## ELECTIONS

### ROYAL COLLEGE OF SURGEONS OF ENGLAND

#### ELECTION OF PROFESSORS AND LECTURERS

The Council invites applications for election to the office of Hunterian Professor, Arris and Gale Lecturer, Arnott Demonstrator and Erasmus Wilson Demonstrator for the ensuing year.

Of the Hunterian Lectures, at least twelve are delivered by Fellows or Members of the College. Additional Hunterian Lectures, not exceeding three in number, on medical or dental subjects may be given by Fellows, Members, Fellows in Dental Surgery or Fellows in the Faculty of Anaesthetists of the College.

The three Arris and Gale Lectures are on subjects relating to Human Anatomy and Physiology, the six Arnott Demonstrations on the contents of the Museum, and the six Erasmus Wilson Demonstrations on the pathological contents of the Museum.

Applications in writing must be made to the Secretary on or before Monday 26th April. Candidates for the Hunterian Professorships and Arris and Gale Lectureships are requested to submit with their application thirty-five copies of a synopsis of approximately 500 words describing the subject matter of their proposed lecture. Each copy of the synopsis must have the name of the applicant in the top right hand corner, and must state his present appointments, where the work was carried out, and the extent to which the work submitted is original. Work carried out under a superior must be shown to have the latter's approval before being submitted.

Appointments to Professorships and Lectureships are made on the condition that those elected will give the College first refusal of publishing their Lecture in the Annals. R. S. Johnson-Gilbert, M.A. Secretary, Lincoln's Inn Fields, London, W.C.2. (16216) 14-8

## SALARY SCALES OF HOSPITAL MEDICAL STAFF

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

**HOUSE OFFICER:** Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

**SENIOR HOUSE OFFICER:** £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

**REGISTRAR:** £2,328 per annum x £144(3) x £126(1) — £2,886.

Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

## SERVICES

# Travel with the Navy for three years before you go into practice.

Just because you've finished your training, it doesn't mean you have to settle down into practice or a routine hospital job.

Especially when you can spend three years, as a naval doctor, seeing something of the world and getting a lot of useful experience on the way.

You'll get plenty of variety and all the responsibility you can handle. And at sea, as the only doctor on board your ship, you will find yourself having to cope with medical emergencies of every kind.

But you're more than just a doctor. Above all you are a naval officer—with the ever-changing scene and the full, satisfying life that every naval officer enjoys.

How do you become a naval doctor?

If you are in your pre-registration year or are already a qualified practitioner, you simply apply to join for a 3-year or 5-year commission. Then, if selected, you enter the Navy as a Surgeon-Lieutenant at £3,395 p.a. You are then given a short course in the special problems of maritime practice (including nuclear and underwater medicine) after which you take up your first appointment.

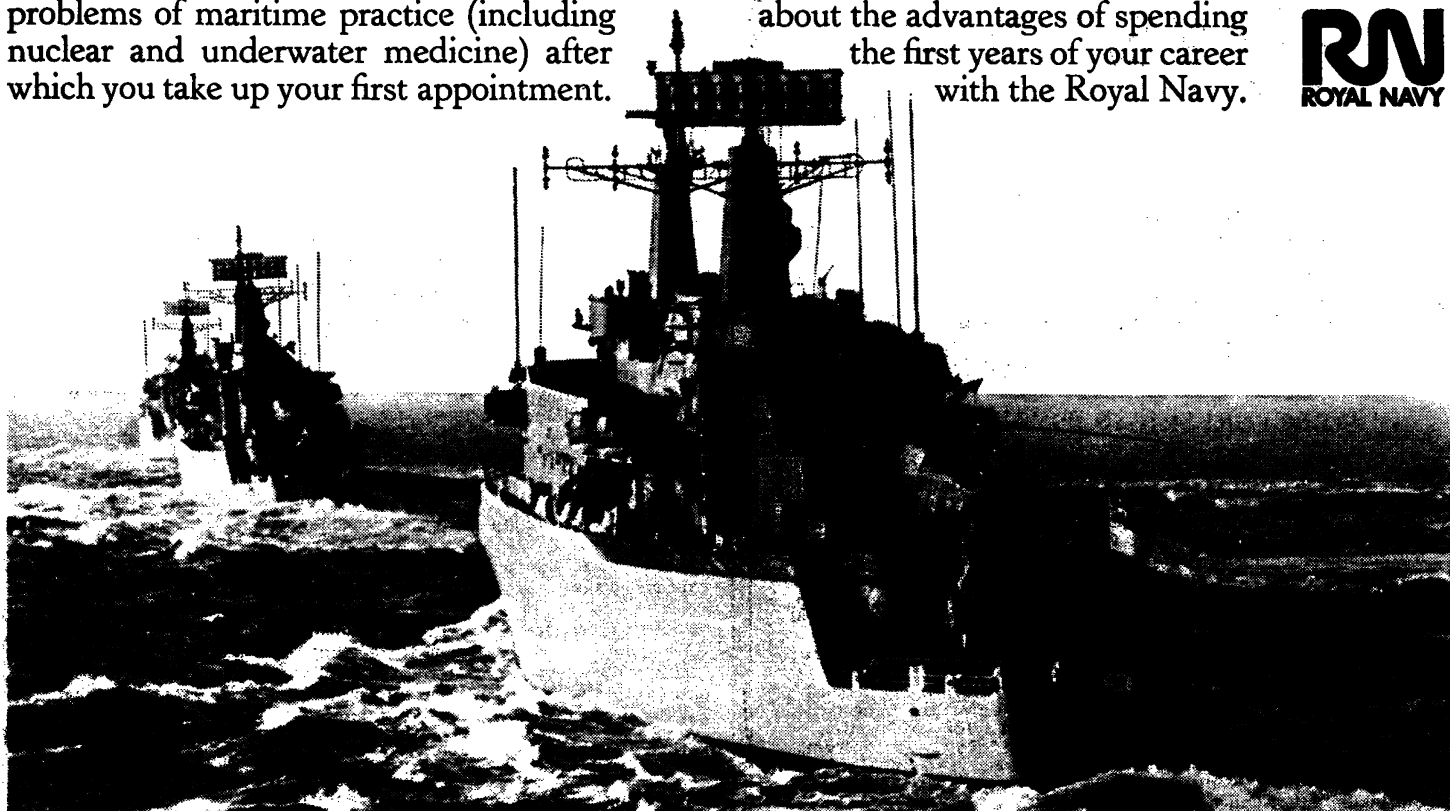

At sea, you would be looking after the health of a whole ship's company. Ashore, you may be looking after their families as well. (So we can even give you experience in obstetrics and paediatrics.)

And, at the end of your commission, you'll not only have a lot of useful experience and happy memories, but you'll also have a pretty useful tax-free gratuity. £1,500 after three years and £3,000 after five years.

Even if you're still at medical school, it's not too early to join us. Every year, we award about twenty-five Medical Cadetships to selected 2nd M.B. students. Each award pays for tuition fees and gives a salary of £1,697 a year in the rank of Surgeon Sub-Lieutenant. When you're registered, you're promoted to Surgeon Lieutenant and you begin your five-year commission.

Write now to Surgeon-Commander F. M. Kinsman, R.N., (724AY4), Dept. of the Medical Director-General (Navy), Empress State Building, London, S.W.6, and tell him your age and qualifications. In return he'll tell you more about the advantages of spending the first years of your career with the Royal Navy.

# LAMCO

Some 170 miles inland from the West African Atlantic seaboard port of Buchanan, Liberia, is the location of the industrial and residential complex of the Lamco Joint Venture community. The project is involved in the extraction of iron ore from the Nimba mine, and its transportation via a specially constructed railway to Buchanan for processing and shipment.

As managing agents for LAMCO Gränges International Mining of Sweden requires the following staff.

## pediatrician

The organisation maintains two hospitals, one at Yekepa and the other at the ore-loading port of Buchanan, with 100 and 50 beds respectively. Both hospitals are very well equipped with excellent nursing, operation and X-ray facilities. Out-patient treatment is carried out at both hospitals and at dispensaries.

The hospital staff comprises at present 10 doctors, one dentist, one pharmacist, 24 nurses, two laboratory technicians, one sanitary inspector, and 50 other employees.

LAMCO now requires a physician with at least two years' paediatric experience and two years' experience in other medical fields.

In Bremen in 1905  
Dr. Ludwig Roselius discovered  
how to remove caffeine from  
coffee without altering its flavour.

Since then, it has been possible  
for everyone to enjoy good  
coffee and good sleep. And in,  
nearly every country of the  
world, H.A.G. Decaffeinated  
Coffee is recommended by  
Doctors whenever caffeine is  
contraindicated. Liberal  
samples are free to any Doctor

## More published evidence

Many patients have now been safely treated with Trasacor, and its effectiveness has been confirmed in well-designed double-blind studies. Comprehensive evidence of the value of Trasacor is found in the Symposium proceedings carried in the November (1970) Supplement to the Postgraduate Medical Journal. Copies are available on request to CIBA Laboratories, Horsham, Sussex.

Radiotelemetric studies  
with Trasacor  
yield intriguing results

**Trasacor also effectively controls  
and prevents a variety of cardiac arrhythmias**
