You cannot prescribe a clear atmosphere for your bronchitics. But you can reliably eradicate *Haemophilus influenzae*, the most important single organism in chronic bronchitis.

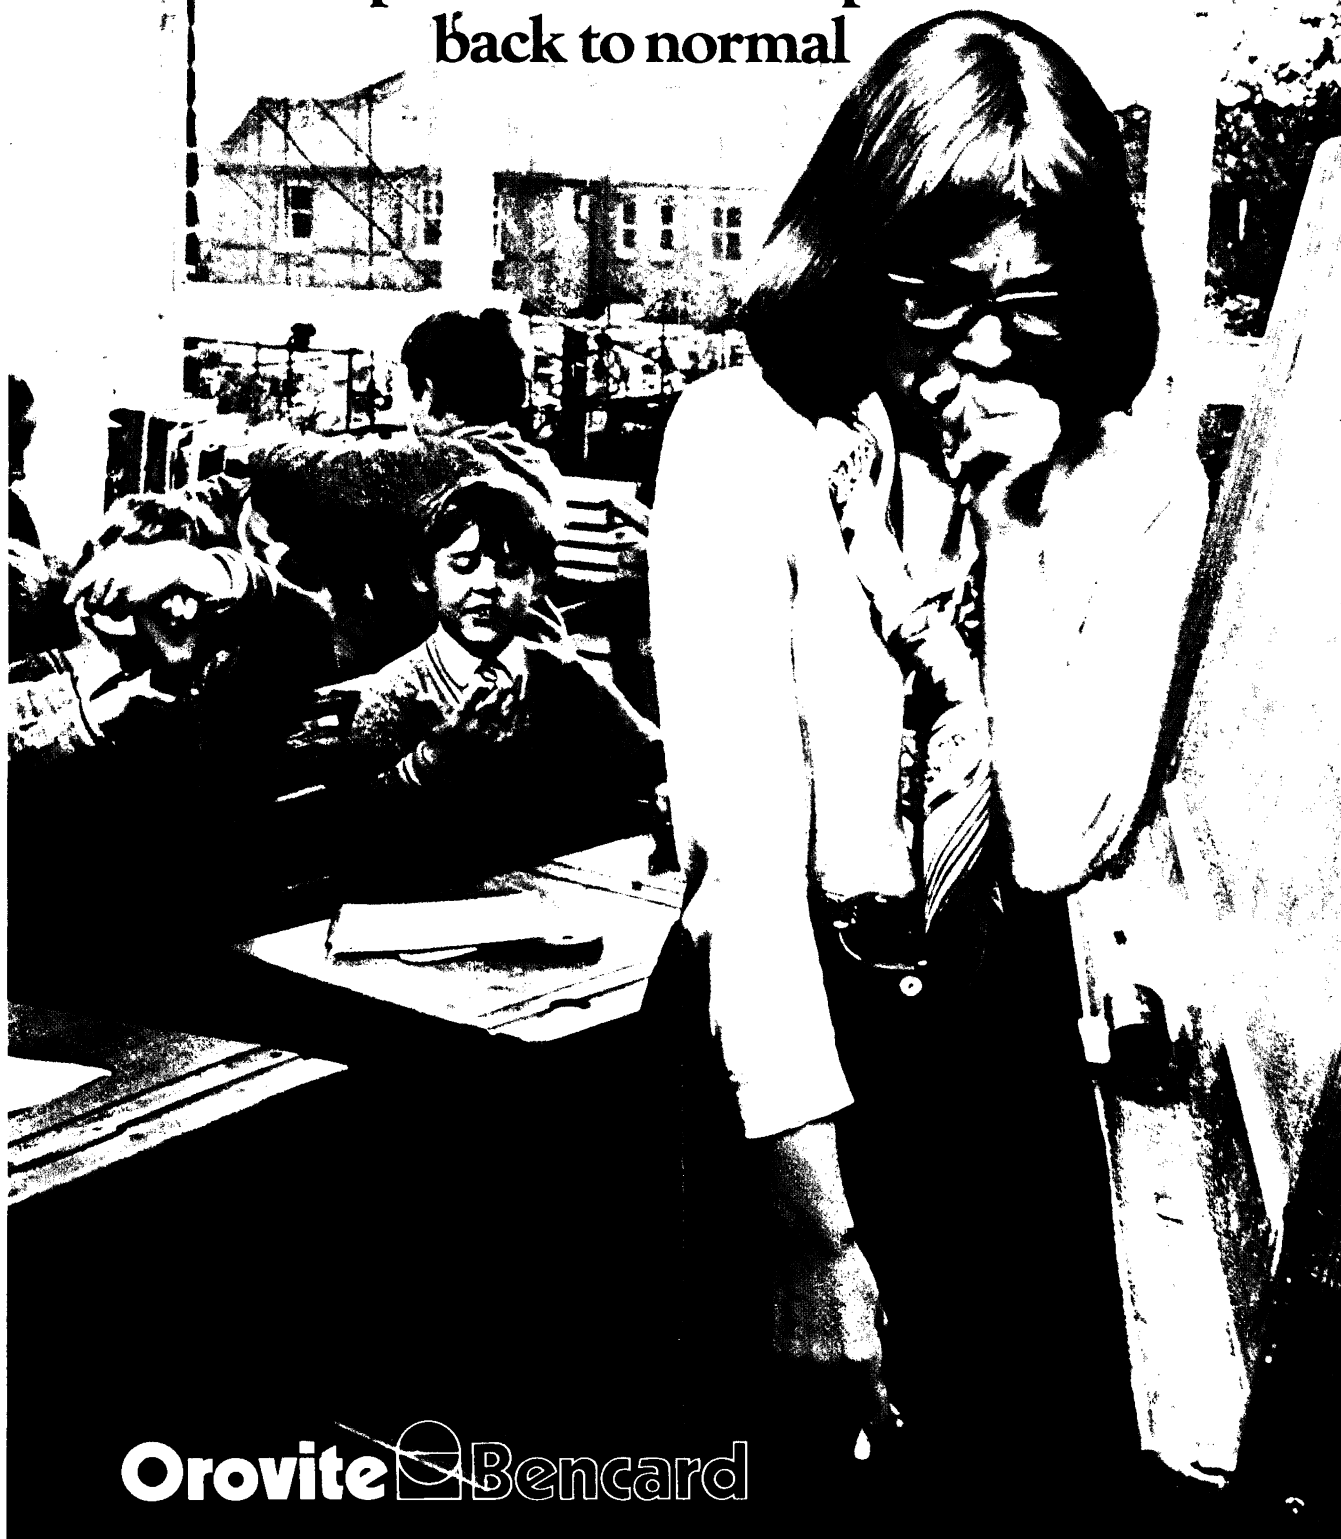

By prescribing Bactrim Roche you employ an action against Haemophilus more potent than that of ampicillin or the tetracyclines. You can also help your patients to deal with their most distressing symptom—breathlessness—by giving them our booklet 'Four ways to breathe more easily'.

## Cheap welfare milk ends on April 3rd

# Please help make sure that children continue to get all the milk they need

When cheap welfare milk goes,  $3\frac{1}{2}$  million families will be affected. Many may cut down their milk consumption—unless they realise the importance of milk in their diet.

**A daily pinta guarantees your child's calcium.** "A daily pinta guarantees your child's calcium" is the message the dairy industry will use on posters, television and in the press, to encourage mothers to keep up their milk order. The press advertising will also list the other important milk attributes like this:

### One pint of milk contains:

#### 1. Calcium

—all that children under five should have each day. Calcium feeds growing bones to make them stronger and thicker, and toughens growing teeth to help them resist decay.

#### 2. Protein

—nearly as much as in a quarter-pound of beef steak. Protein gives them the material they need to help build strong bodies and firm muscles.

#### 3. Riboflavine (Vitamin B<sub>2</sub>)

—all they should have each day. Children must have Riboflavine for proper growth.

#### 4. Vitamin A

—over 70% of their daily requirement. It helps maintain good eyesight and a clear skin.

#### 5. Thiamine (Vitamin B<sub>1</sub>), Vitamin C and Niacin

—*in addition*, one pint of milk guarantees *at least one sixth* of their daily requirement of Thiamine, Niacin and Vitamin C.

*Figures derived from recommendations of the Health Departments of the United Kingdom.*

**Free leaflets and posters for your waiting room.** Attractive leaflets and posters have been designed to inform mothers about the importance of milk. You can get these free from: Dept. WM, The National Dairy Council, National Dairy Centre, John Princes Street, London, W1M 0AP.

### New scheme for free milk

An estimated 150,000 extra families will qualify for *free* milk under the new scheme that begins on April 4th—the Government will be advertising this from mid-April. Other responsible bodies and individuals should also take every opportunity to inform people about the new scheme, otherwise thousands of needy families may lose their free milk. You can help by advising your patients of their entitlement. Details are obtainable from your local Social Security office.

## the 'inside secret' of treating in-rolling feet

Prescribe an external shoe wedge, and you only do part of the job. The wedge wears away to become largely ineffective—and in any case it disturbs the proper balance of the shoe. On top of that you run the risk of introducing a psychological problem too—what child wants to wear shoes that make him look and feel abnormal?

The answer can be found in Start-rite INNERAZE, the shoes that are orthopaedically designed to correct in-rolling with an invisible built-in wedge that can't wear or change shape.

For further information about the shoes with an 'inside secret' or details of the explanatory 12-minute INNERAZE 16mm colour film available on loan, write to: C. James, Fitting Consultant, Start-rite Shoes Ltd., Crome Road, Norwich, NOR 60A.

## Nursing in Depth

March 1971 sees the publication of the first four titles in this important new series of nursing handbooks. The authors are all well known in British nursing, and the intention is to provide in each volume a detailed survey of facts and practice in a specific aspect of the nurse's work. Pocket-size and at an incredibly low price, they will be ideal for the student nurse as study guides, revision aids or as the basis of refresher courses for women returning to the profession after a break.

# 'All dark and comfortless'

*King Lear Act 3, Sc 7*

The Duke of Gloucester's anguish in 'King Lear'—after his torture and blinding, and the revealed treachery of his son, Edmund—may not find many exact parallels in modern society, but his mood 'all dark and comfortless' is seen often enough in patients suffering from depression and anxiety. In such cases

Triptafen-DA can often help; lifting the basic depression and calming any underlying or overt anxiety. The combined action of amitriptyline and perphenazine relieves the symptoms of depression and anxiety, no matter which condition predominates.

Each Triptafen-DA tablet contains amitriptyline hydrochloride BP 25mg and perphenazine BP 2mg. Also available: Triptafen-DA Suspension.

## Today's Drugs

1970 Edition

The problem facing the prescribing doctor today is choice. Catalogues of drugs—no matter how detailed—are of little help unless accompanied by advice on which drug to give for what condition. So this new edition of "Today's Drugs" not only gives a full account of the drugs but also includes clear accounts of the management of common conditions such as urinary infections and epilepsy.

The new edition differs from the earlier one in other ways. It deals with only three subjects—infections, vitamin deficiencies and anaemias, and disorders of the nervous system. Further volumes will be published at intervals of about a year, and by the time the whole field of therapeutics has been covered this first volume will have become obsolete and due for replacement. In order to further emphasize the ephemeral nature of books on therapeutics—and to cut costs—the book is a paperback.

PRICE **£1.00** (U.S.A. \$3.00), *including postage*

## Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

# The New General Practice 2

What important developments are there in General Practice? Does the General Practice Team work successfully? What is the Family Doctor's future role in the Hospital Service? These and other questions are answered in *The New General Practice 2* which, published two years after the first volume in this series, also deals with topics such as the use of computers, plans for the new towns, and Scandinavian developments in general practice. This second volume contains 27 articles published in the *B.M.J.* in the last two years. The introduction has been written by Professor J. D. E. Knox, Professor of General Practice at Dundee University.

# So who cares if they don't eat properly?

## Heinz do.

And so, probably, do you. After all, you know the problem.

As people get older they become less and less inclined to go to the trouble of preparing themselves a proper meal every day. Particularly if they're living on their own. And many of them don't eat well at all.

Health authorities have approached us at Heinz, suggesting that we prepare foods that would be suitable for these people.

So we did - we made Heinz new Dinners for One.

Heinz Dinners for One aren't just another snack-in-a-can. They're complete, easy meals, specially prepared with vegetables and meats, supplemented with extra vegetable protein and fortified with iron and calcium.

They are a delicious and satisfying way for

elderly people to get more of the goodness and nourishment they need without having to eat too much.

There are four ready meals in the range: Steak and Kidney and Vegetable, Lamb and Vegetable, Irish Stew, Beef and Vegetable.

If you have anyone under your care whom you think would benefit from these foods, we shall be pleased to supply you with descriptive leaflets for them. Write to us, Special Foods Division, H.J. Heinz Company Ltd., Hayes Park, Hayes, Middx.

# Day after day of freedom from asthmatic attack

The unique mode of action of disodium cromoglycate offers the asthmatic patient outstanding benefits. A prophylactic treatment, it prevents the onset of asthmatic episodes - thus minimising long-term damage to lung tissue. Freedom from asthma attacks permits a happier, more normal life for the asthmatic patient.

Published clinical reports confirm that with INTAL COMPOUND, the incidence and severity of acute attacks is considerably reduced - even in patients on conventional therapy such as bronchodilators, antihistamines and corticosteroids. Less time is lost from work or school, exercise tolerance is improved and a consistent clinical comment on disodium cromoglycate has been the total absence of serious side effects.

INTAL COMPOUND - supplied in SPINCAPS (each containing 20 mg disodium cromoglycate, and 0.1 mg Isoprenaline Sulphate BP in powder form, together with an inert carrier). For use in a special insufflator - SPINHALER.

## precision release of the right iron in the right place

Well tolerated in over 93% of patients

A multi-centre trial (Clin. Trials Jnl. (Lond), 1969, 6, 229) carried out by 258 G.P.s and involving over 2,300 patients has shown that 'Slow-Fe' is better tolerated than both plain iron and coated or delayed-release preparations.

The level of gastrointestinal side effects with 'Slow-Fe' was only  $6\frac{1}{2}\%$  – roughly the same as the expected incidence with placebo and considerably lower than that with plain ferrous sulphate B.P.

Fifty-seven patients unable to tolerate many other iron preparations were given 'Slow-Fe'. All but 3 of them found that 'Slow-Fe' was free from the usual side effects.

'Slow-Fe' contains 160mg exsiccated ferrous sulphate ( $\equiv$  50mg elemental iron).  
'Slow-Fe folic' contains 160mg exsiccated ferrous sulphate ( $\equiv$  50mg elemental iron) and 400 micrograms folic acid in a special slow-release base.

# Autohaler

ISO-AUTOHALER OR DUO-AUTOHALER

A new kind of inhaler  
operated by breath alone

## Breath-triggered operation

A dose is automatically released at exactly the right moment in the patient's breathing cycle.

## Built-in synchronism

The patient no longer has to co-ordinate pressing a vial and inhaling to be sure of an effective dose. *Autohaler* makes every patient an expert in inhalation technique with little instruction.

## Controlled action

Patients cannot pump the *Autohaler* unit and take several puffs while inhaling. And *Autohaler* eliminates wasted doses resulting from test-firing or faulty use.

## Treatment economy

Treatment costs as little as 0.33p per inhalation.\* (Some ordinary aerosols cost more per puff.)

\*Average cost per dose calculated from cost of one *Iso-Autohaler* complete plus one replacement cartridge.

## Governed doses

With *Autohaler* it is more difficult for the patient to take excess dosage because the unit must be reset between inhalations.

## Unparalleled inhalation efficiency

Because every dose from *Autohaler* is made to count, a patient is more likely to get full benefit from treatment and therefore less likely to take extra, ill-advised doses.

*Iso-Autohaler* and *Duo-Autohaler* are supplied as complete units for which replacement cartridges are available.

**Composition** *Iso-Autohaler* contains a suspension of Isoprenaline Sulphate B.P. 4 mg./ml. and delivers to the patient 0.08 mg. in each dose. *Duo-Autohaler* contains a suspension of isoprenaline hydrochloride 8 mg./ml. and phenylephrine bitartrate 12 mg./ml., and delivers to the patient 0.16 mg. isoprenaline hydrochloride and 0.24 mg. phenylephrine bitartrate in each dose.

**Indications** *Iso-Autohaler* and *Duo-Autohaler* give immediate relief of bronchospasm in bronchial asthma, chronic bronchitis and emphysema. **Dosage** One to three puffs should be sufficient to provide relief in most cases. It should not be necessary for the patient to take further treatment for at least thirty minutes, or more than eight treatments a day. Children: *Iso-Autohaler* and *Duo-Autohaler* should be administered to children only under the supervision of a responsible adult. **Side-effects** Overdosage may cause dry mouth, palpitations, or

nervousness. **Cautions and contra-indications** There are no absolute contra-indications, but *Iso-Autohaler* and *Duo-Autohaler* should be used with caution in the presence of cardiac disease, hypertension or hyperthyroidism. **Basic NHS prices** *Iso-Autohaler*, complete unit £1.97, replacement cartridge £0.72. *Duo-Autohaler*, complete unit £2.10, replacement cartridge £0.85. *Autohaler*: registered trade mark. *Iso-Autohaler*, *Duo-Autohaler*: trade marks.

# Chances are you have over 100 Psoriatics on your list... ...Alphosyl could help them.

A great many people in Britain suffer from Psoriasis. On average, more than 100 for every G.P. in the country. And that's why every G.P. should know about Alphosyl.

Alphosyl Lotion is the most widely prescribed treatment specifically for Psoriasis. Patients get complete clearing or a marked improvement without systemic reactions, without uncomfortable restrictive dressings and without serious side effects or contraindications.

Alphosyl Lotion is the primary treatment, for use all over the body. And its effectiveness is backed up by the Cream and Application PC. The Cream is particularly effective in the intertriginous areas, and Application PC removes scales from the scalp and prepares the head for treatment with the Lotion.

Alphosyl therapy (Lotion, Cream and Application PC) can be adjusted to suit the patients individual needs . . . or preferences.

Alphosyl is available as a 5% refined alcoholic extract of coal tar and allantoin (2%) in a Cream and Lotion. Alphosyl Application PC is a unique combination of coal tar extract (5%) and hexachlorophane (1%).

# Let the blood flow through

In the treatment of ischaemia due to intermittent claudication, cerebral arteriosclerosis and vasospastic disorders, Bradilan® has achieved excellent results. Because Bradilan employs tetranicotinoylfructose, the molecule of which is gradually hydrolised in the intestine, release is smooth and even – with no peaks or troughs. Consequently, efficient and prolonged vasodilation is maintained, with less risk of over dilation in flush areas. For the same reason, headaches are a rare occurrence. Bradilan acts directly on vessel walls and is especially indicated when ischaemia is due to vasospasm. Ideally, treatment should be continued for at least 12 weeks so that progress can be realistically evaluated.

# is it gout?

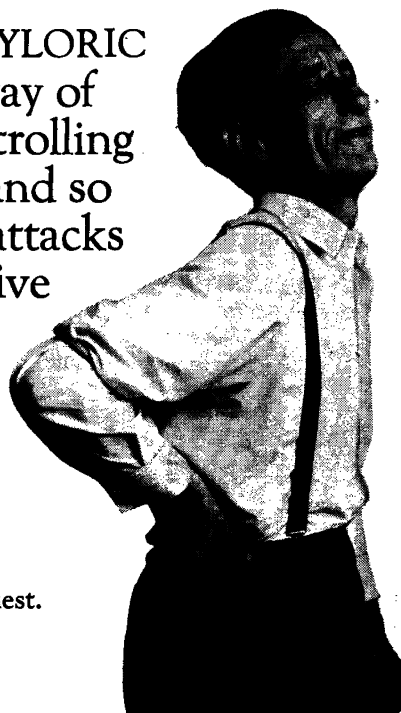

Gout does not always present in the classical manner, with an inflamed big toe. It can present as pain in almost any joint. Colicky pain due to urate stones is sometimes a precursor of gout.

In circumstances like these it is worth remembering gout and having the serum uric acid level checked.

If the diagnosis is gout, ZYLORIC\* is there to provide effective prophylactic treatment. ZYLORIC provides the rational way of treating gout by controlling uric acid formation and so preventing the acute attacks and the degenerative changes associated with the history of the disease.

## Hypertension is a danger sign

## Half measures can be fatal

There is now convincing evidence that in hypertension, whether mild or severe, blood pressure must be maintained in the normal range.

Any degree of hypertension – and by inference, incomplete therapeutic control – still carries a high long-term morbidity.

Complete control is usually impracticable with conventional antihypertensive agents because of prohibitive side effects.

Not so with 'Inderal'-80. This drug maintains normal blood pressure by night as well as day. Hypotensive crises due to changes in posture, activity or external temperature do not occur. Mental, sexual and gastro-intestinal functions are unimpaired.

'Inderal'-80, with a thiazide diuretic, controls some 80% of hypertensive patients. It is a real step forward in preventive medicine.

Detailed information, available on request, should be consulted before prescribing.

## GENERAL PRACTICE TRAINING POSTS

# Vocational Training for General Practice The Ipswich Scheme

This established training scheme for general practice invites a new entry of eight doctors to start their hospital training on 1st August, 1971.

Two years of rotating appointments in the Ipswich Hospitals will be followed by one year attached to local training general practices.

During the hospital period, each doctor will hold six month appointments in General Medicine and in Obstetrics (alternative appointment possible), and three month appointments in Paediatrics, Geriatrics and Casualty. All appointments will provide extensive clinical experience and organised teaching. A one month elective period will be held.

The teaching of psychological skills required of the family physician will be a particular feature of the scheme. Weekly seminars will offer training in psychiatry including its psychodynamic and psychosomatic aspects, and in the relevant areas of sociology and psychology.

Personal contact with the family physicians involved in the teaching programme will be maintained throughout the hospital period and experience with general practice will be included during this time.

The hospital posts will be at S.H.O. level and the normal salary scale will apply. A proportional increase in salary can be expected during the year in general practice.

This is an important scheme in the field of vocational training for general practice. It offers an exceptional opportunity to doctors who wish to prepare themselves for the general practice of the future, and who may wish to play an active role in bringing it about.

Further enquiries are invited from potential candidates who should have completed their pre-registration appointment by 1st August, 1971. The entry this Summer will be offered a period of 4-8 weeks in a local general practice before starting the hospital rotation. Family accommodation is available during the period of hospital rotation.

A detailed description of the scheme is available on request. Those seeking further information should contact Dr. John W. Mills, The Clinical Tutor, Ipswich and East Suffolk Hospital, Anglesea Road Wing, Ipswich, Suffolk.

## COMMERCIAL APPOINTMENTS

# Do you appreciate the implications of computers in hospitals?

Computers in medicine is a market with great potential. To help channel our software-creation and marketing efforts in exactly the right direction, we need another (young) qualified doctor—alternatively, a hospital-experienced dentist.

You will join a small team of medical experts—your senior is also a doctor—highly trained in computer science. Your own training will take the form of residential courses between periods in the field, alongside graduate entrants from other disciplines.

With the title of Systems Engineer, your responsibilities will be to identify and develop new applications of computers to medicine and hospitals; to support and advise marketing staff; to establish and assist communication between medical and computer professionals; to represent the benefits of specialised DP techniques to hospital boards and the health service; to represent new market and product opportunities to ICL management for internal discussion.

Starting salary: good—the exact figure will depend on age, experience etc. Location: London, with some travel in the UK and abroad. Future: excellent, for that rare professional with two sets of skills.

Please write with career details quoting ref BM669U, to Dr. A. E. Davis, Medical Area, International Computers Limited, Victoria House, Southampton Row, London WC1.

# Clinical Investigation

You can derive great intellectual satisfaction from being involved in the birth of a new drug—the financial rewards are also worthwhile.

We are a research orientated company with considerable recent success to our credit in anti-rheumatic drugs.

The doctors we are seeking will join a group of Medical Advisers with world-wide responsibilities. They will primarily be concerned with initiating and progressing clinical trials of compounds arising from our research programme. When established they will be expected to organise and discuss their work with the leaders of the medical profession.

Career prospects and material benefits will be particularly attractive to

## Hospital Registrars

The appointments will also be attractive to doctors with other experience. These posts are based in Nottingham and will give opportunities for travel both in the UK and overseas.

Applications should be addressed in the first instance to Dr. J. Warwick Buckler, Head of Medical Sciences, Research Department, Boots Pure Drug Company Ltd., Nottingham Nottingham (0602) 56255 ext. 301).

# Medical Adviser

Allen & Hanburys Limited which is concerned with research, development, manufacture and marketing a range of pharmaceutical products, is seeking an additional Medical Adviser to join the Medical Services Department of its expanding Research Division at Ware, Hertfordshire.

The man appointed will work closely with members of the medical profession as well as the company's own scientists, organising clinical trials on both established, and new products. A part-time clinical appointment will be encouraged.

Applications are invited from registered medical practitioners, preferably aged 30 to 40, with a good medical background and experience of, or an interest in, clinical investigation and human pharmacology.

Initial salary is likely to be within a range — £3,750 to £4,250 per annum, and a company car will be provided. The company is a member of Glaxo Group Limited and other conditions of employment include an attractive pension scheme and the opportunity to participate in the Group's profitability in the UK. Some assistance with removal expenses will be given where appropriate.

Following the Twelfth Report of the Review Body, new salary scales have been approved. These came into force on April 1, 1970. The scales are set out below:

**HOUSE OFFICER:** Each post in this grade shall be tenable for six months. £1,626 per annum for the posts held during the first year; £1,755 per annum for posts held during the second year; £1,884 per annum for posts held during the third and subsequent years, subject to full registration.

Deductions of £177 per annum in respect of lodging only for voluntary residence.

**SENIOR HOUSE OFFICER:** £2,040 per annum in the first year; £2,184 per annum in the second year; £2,328 per annum in the third or subsequent years.

Deductions of £210 per annum in respect of lodging only for voluntary residence.

**REGISTRAR:** £2,328 per annum x £144(3) x £126(1) — £2,886. Deductions of £210 per annum for those with remuneration at the first incremental point on the scale, and £243 per annum for those on the second and subsequent points will be made in respect of lodging only for voluntary residence.

On assimilation to the scale for Registrars, one increment and one only shall be given for any year or part of a year in excess of two spent previously in the senior house officer grade.

Allowances at rates up to £183 per annum shall be payable to house officers, senior house officers and registrars occupying posts approved for such allowances in peripheral hospitals.

**SENIOR REGISTRAR:** £2,760 per annum x £126(1) x £174(1) x £177(1) x £174(1) x £177(1) — £3,588.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

On assimilation to the salary scale for senior registrars, increments to a maximum of two shall be given for each year or part of a year in excess of three spent previously in the registrar grade.

**MEDICAL ASSISTANT:** £2,520 per annum x £144(1) x £156(3) x £144(10) — £4,572.

Deductions of £270 per annum in respect of lodging only for voluntary residence.

**ST. ANDREW'S HOSPITAL**  
NORTHAMPTON

Medical Director: James Harper M.B., F.R.C.P. (Edin), D.P.M.

St. Andrew's Hospital is a private psychiatric hospital situated in 130 acres of parkland in the county town of Northampton. In general, patients are admitted to Vantage House, a reception unit in the grounds, which is equipped for the investigation and treatment of all forms of mental and nervous illness. In addition, there is accommodation mainly in private rooms, both in the main hospital and in various villas for longer-stay patients and geriatric patients.

The hospital's amenities include Gloucester House, which comprises an Occupational Therapy department, a swimming pool, a squash court and library, while in the grounds there are tennis courts, a nine-hole golf course, etc.

Fees range from £31.50 per week, and subscribers to private medical insurance schemes, such as British United Provident Association and Private Patients Plan, may claim benefit in respect of these charges.

Further particulars may be obtained from the Medical Director, St. Andrew's Hospital, Northampton (Tel Northampton 34354), who can be seen in consultation by appointment, either at the hospital or at 55 Harley Street, London, W.1. 99

# Fucidin<sup>®</sup> H Ointment *First*

Whenever a topical antibiotic/steroid preparation is indicated.

Combines the proven antipruritic/anti-inflammatory action of hydrocortisone with the rapid, bactericidal action of Fucidin. In view of the mounting concern about the adverse effects of the more potent steroids "and the proven clinical effectiveness of Fucidin H Ointment in the treatment of a variety of common dermatoses, "... there would seem to be no case for the use of a more potent steroid until hydrocortisone has been first tried."

Available in packs of 10g and 25g.
