Anxiety symptoms are often the ones that trigger a patient's visit to your surgery - these are generally relieved in a few hours. Depressive symptoms take at least a few days - and sometimes a few weeks - before they are resolved.

## LIMBITROL

**treats anxiety in a matter of hours and depression in a matter of days**

Anxiety symptoms are often relieved in 1 to 2 hours, and depressive symptoms usually respond within 7 to 14 days. Limbitrol is the trade mark for pharmaceutical preparations containing chlordiazepoxide and amitriptyline. Full information is available on request from Roche Products Limited, 15 Manchester Square, London W1M 6AP.

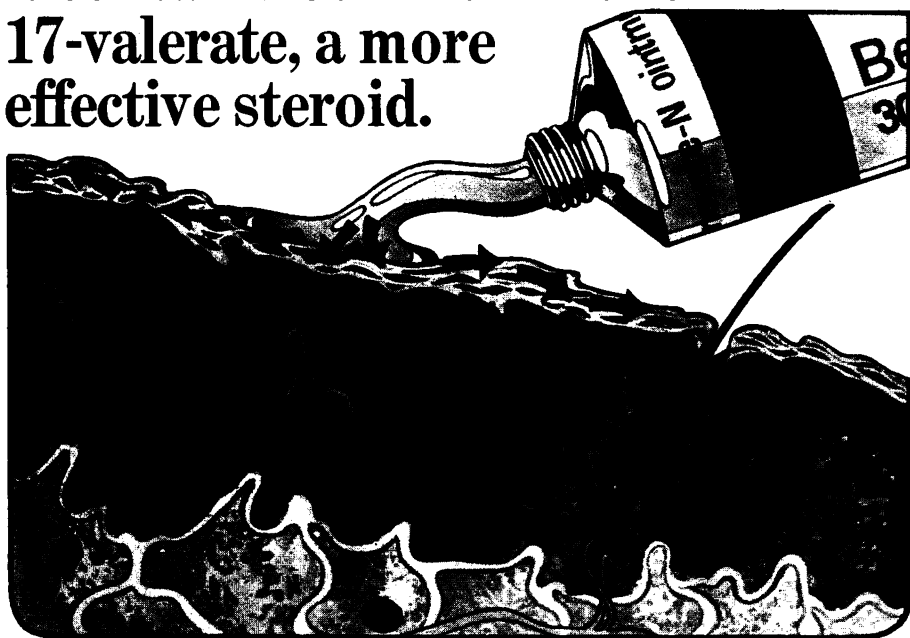

In infected eczema, it's the eczema you worry about.

And no combination of anti-infectives will stop the scratching that starts the infection that results in infected eczema.

**But Betnovate-N will.**

And it will do it quicker than other preparations designed to combat infected eczema, because it contains betamethasone as 17-valerate, a more effective steroid.

Betnovate-N also contains neomycin so it stops the infection at the same time.

All at a price others can't match.

# Meniere's syndrome is a specific condition Now there is a specific treatment **Serc**<sup>®</sup>

betahistine

Meniere's syndrome was first clearly defined over a century ago and since then has been recognised as a distinct disease entity characterised by vertigo, tinnitus and loss of hearing, frequently accompanied by nausea, earache and/or headache. To date, treatment of Meniere's syndrome has been mostly empirical in nature and variable in its results. But now there is SERC – a new and specific treatment for Meniere's syndrome. There is evidence that SERC acts against all the major manifestations of Meniere's syndrome. Its effect on the

episodes of vertigo, often the most disturbing symptom, is most striking<sup>1</sup>. SERC has been found to diminish, over a period of time, the intensity of tinnitus<sup>2</sup>. And it may also arrest hearing loss<sup>3</sup>. SERC is supplied as tablets containing 8 mg. betahistine dihydrochloride, in bottles of 100 tablets. Further information is available on request.

## Doctors in the Australian Army get the best of all worlds

A new life in Australia. With first class passage paid for you and your family. A job waiting—and all the advantages of a service practice.

With extraneous administration taken off your hands, you can really do your job properly. You could be in an R.M.O. unit, field ambulance station or military hospital and there are opportunities for updating medical knowledge and techniques. Then there's the sports and social side, too.

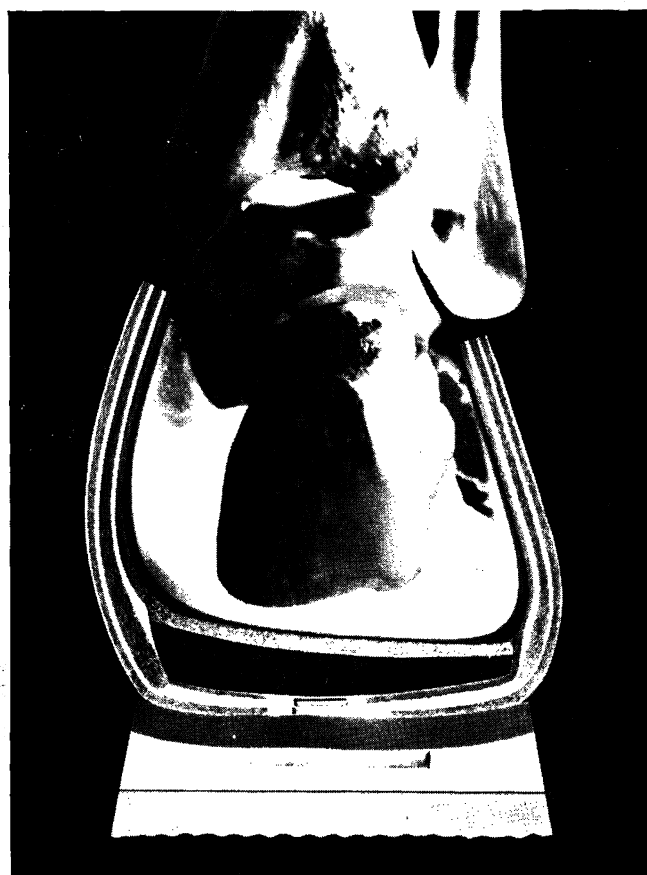

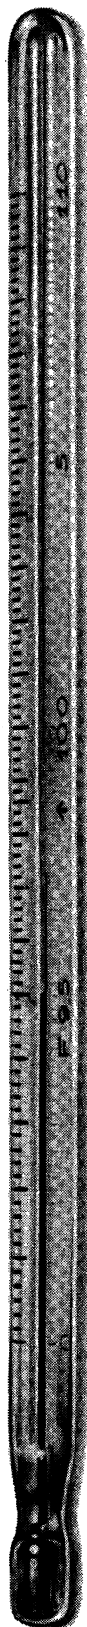

The sort of man we're looking for is preferably under 40—with medical qualifications registerable in the Commonwealth of Australia. He's medically fit—prepared to serve anywhere and is a British subject eligible for permanent residence in Australia. If this sounds like you, this is what we'll do for you.

You'll be appointed to a Short Service Commission for 4 years in the Medical Corps of the Australian Army in the minimum rank of Captain, where your pay would amount to £11.78 a day after the equivalent of 5 years service. (Your professional experience in England serves to ante-date your period of service). Tax and a refunded retirement benefit will be deducted from this—though your clothing and marriage allowances of £0.13 and £0.91 a day are not taxed. You also receive a bounty of about £1,540.

If this sounds like your sort of life, contact: Brigadier L. I. Hopton, MBE, Australian Army Representative, Australia House, Strand, London WC2. Telephone: 01-836 2435. Extn. 356.

## the 'inside secret' of treating in-rolling feet

Prescribe an external shoe wedge, and you only do part of the job. The wedge wears away to become largely ineffective—and in any case it disturbs the proper balance of the shoe. On top of that you run the risk of introducing a psychological problem too—what child wants to wear shoes that make him look and feel abnormal?

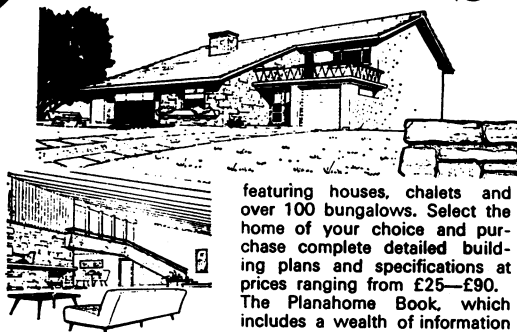

The answer can be found in Start-rite INNERAZE, the shoes that are orthopaedically designed to correct in-rolling with an invisible built-in wedge that can't wear or change shape.

For further information about the shoes with an 'inside secret' or details of the explanatory 12-minute INNERAZE 16mm colour film available on loan, write to: C. James, Fitting Consultant, Start-rite Shoes Ltd., Crome Road, Norwich, NOR 60A.

Many people

iron.

## 'Slow-Fe'<sup>TM</sup> patients don't have to...

Because the iron content of 'Slow-Fe' is released mainly in the duodenum and upper small intestine, providing efficient absorption with minimum intolerance. The precision-release principle of 'Slow-Fe', developed from the expertise of 'Slow-K', the most widely used potassium supplement, ensures iron is released evenly over a period of 1½ to 2 hours. This avoids high local concentrations of iron in the stomach which cause nausea and vomiting. It also prevents constipation and wastage of iron released in the lower gut.

**In two studies of 'Slow-Fe' and 'Slow-Fe folic' involving nearly 4,000 patients 93% reported no side effects<sup>1,2</sup>. This low incidence of side effects is comparable to that expected on placebo.** 'Slow-Fe' can be taken in an easy once daily dosage, presented in a press-through monthly pack. <sup>1</sup> *Clin. 'Slow-Fe' and 'Slow-Fe folic' tablets both contain 160mg dried ferrous sulphate (≡ 50mg Fe) in a specially formulated slow-release base. In addition 'Slow-Fe folic' contains 400 micrograms folic acid. 'Slow-Fe', 'Slow-Fe folic', and 'Slow-K' are trademarks

# Emotional distress.

The facade of vague symptoms presented by the depressed, anxious patient makes diagnosis and choice of therapy a particular challenge. For first line treatment, three factors are invaluable:

- Effectiveness against both anxiety and depression.
- Minimal side effects and no dietary restrictions.
- Patient acceptance.

Prothiaden has been shown<sup>1</sup> to be a real advance in combining all these features, in one substance, one strength capsule.

**The Problem** Most hay fever sufferers respond in some degree to symptomatic treatment. However, in every practice there are chronic sufferers who do not respond and whose social and business lives can be seriously affected during the grass pollen season.

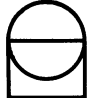

All these cases exhibit the Type 1 Immediate Allergic Response.

**The Treatment** The only fundamental treatment for hay fever is Immunisation: no other vaccine gives such broad-based protection as Alavac-P.

- ☐ Alavac-P contains extracts of the twelve grass pollens known to cause over 80% of hay fever in Great Britain.
- ☐ No skin tests are needed. Prescription can be from case history alone.
- ☐ A short course of only 8 or 9 injections gives a high degree of protection throughout the grass pollen season.
- ☐ Alavac-P developed by Bencard, leaders in allergy research.

# Broxil Syrup, compared

Broxil is specifically indicated for common infections in general practice – E.N.T., respiratory and skin and soft tissue. It provides blood levels twice those of penicillin V and four times those of oral penicillin G. Clinically, Broxil compares well in the treatment of routine infections. In practice, patients do seem to get better quicker with Broxil.

And now, with the latest price reduction for Broxil Syrup, it compares economically, too. The average daily cost of treatment with Broxil Syrup (8p) is only a little more than ordinary penicillin and oxytetracycline syrups and well below erythromycin (11p), benzathine penicillin (14p) and lincomycin (23p). Tablets and capsules also available. *Further information is available on request.*

# Hand signals which can't be ignored

"Patients stated that their ischaemic digits had been much less painful while taking tetranicotinoylfructose (Bradilan) ..."

"During the past 10 years we have tried in a group of about 100 patients with impaired digital circulation most, if not all, oral adrenergic blocking agents with unsatisfactory clinical results. During the past 3 years we obtained more encouraging subjective and objective findings with oral tetranicotinoylfructose (Bradilan) ..."

In this double-blind controlled trial\* the patients had already taken most available oral vasodilators and were sceptical about further treatment. The authors, however, reported that most patients were delighted with Bradilan's beneficial effect. Bradilan® employs the molecule of tetranicotinoylfructose which is gradually hydrolysed in the intestine—the consequent slow, even release ensures prolonged effective vasodilation—with side reactions at a minimum.

# Diseases of the Joints

Arthritis and rheumatism are common complaints, even if patients are often vague about the exact meaning of the terms they use. In the last few years the diagnosis of joint disorders has become more exact, while the introduction of local and systemic steroid therapy and the powerful non-steroidal anti-inflammatory drugs has revolutionized treatment. In an attempt to bring doctors up to date in this field, the *B.M.J.* published in 1969 a series of short articles giving practical advice on the common disorders of the joints. The articles have now been revised by their authors and collected together to form this handbook on the management of arthritis.

**ADMINISTRATIVE****NEWCASTLE  
REGIONAL HOSPITAL BOARD****ADMINISTRATIVE  
MEDICAL OFFICER**  
(Trainee)

A comprehensive training in medical administration is offered to a keen young doctor with sound basic clinical experience. A full training programme tailored to the needs of the successful applicant will be arranged. This will initially consist of a period of in-service instruction, followed by secondment, in September/October, 1972, to a full-time course for two years organized by the London School of Hygiene and Tropical Medicine, leading to an M.Sc. Degree in Social Medicine from the University of London.

No administrative experience is required, nor is any particular pattern of previous clinical experience necessarily more appropriate than any other. The principal criteria will be a good general medical background and aptitude and enthusiasm for management, investigation, and the practice of medicine on a community scale. Salary scale £2,760 x increments of £126 (1), £174 (1), £177 (1), and £177 (1) to a maximum of £3,588. Post superannuable. Further particulars available on request. Canvassing will disqualify, but applicants are encouraged to visit the Senior Administrative Medical Officer by appointment.

Applications, giving particulars of age, qualifications and experience, together with names and addresses of three referees, should be addressed to the Senior Administrative Medical Officer, Newcastle Regional Hospital Board, Benfield Road, Newcastle upon Tyne NE6 4PY, by 5th February, 1972. ## SERVICES

# Travel with the Navy for three years before you go into practice.

Just because you've finished your training, it doesn't mean you have to settle down into practice or a routine hospital job.

Especially when you can spend three years, as a naval doctor, seeing something of the world and getting a lot of useful experience on the way.

You'll get plenty of variety and all the responsibility you can handle. And at sea, as the only doctor on board your ship, you will find yourself having to cope with medical emergencies of every kind.

But you're more than just a doctor. Above all you are a naval officer—with the ever-changing scene and the full, satisfying life that every naval officer enjoys.

How do you become a naval doctor?

If you are in your pre-registration year or are already a qualified practitioner, you simply apply to join for a 3-year or 5-year commission. Then, if selected, you enter the Navy as a Surgeon-Lieutenant at £3,395 p.a. You are then given a short course in the special problems of maritime practice (including nuclear and underwater medicine) after which you take up your first appointment.

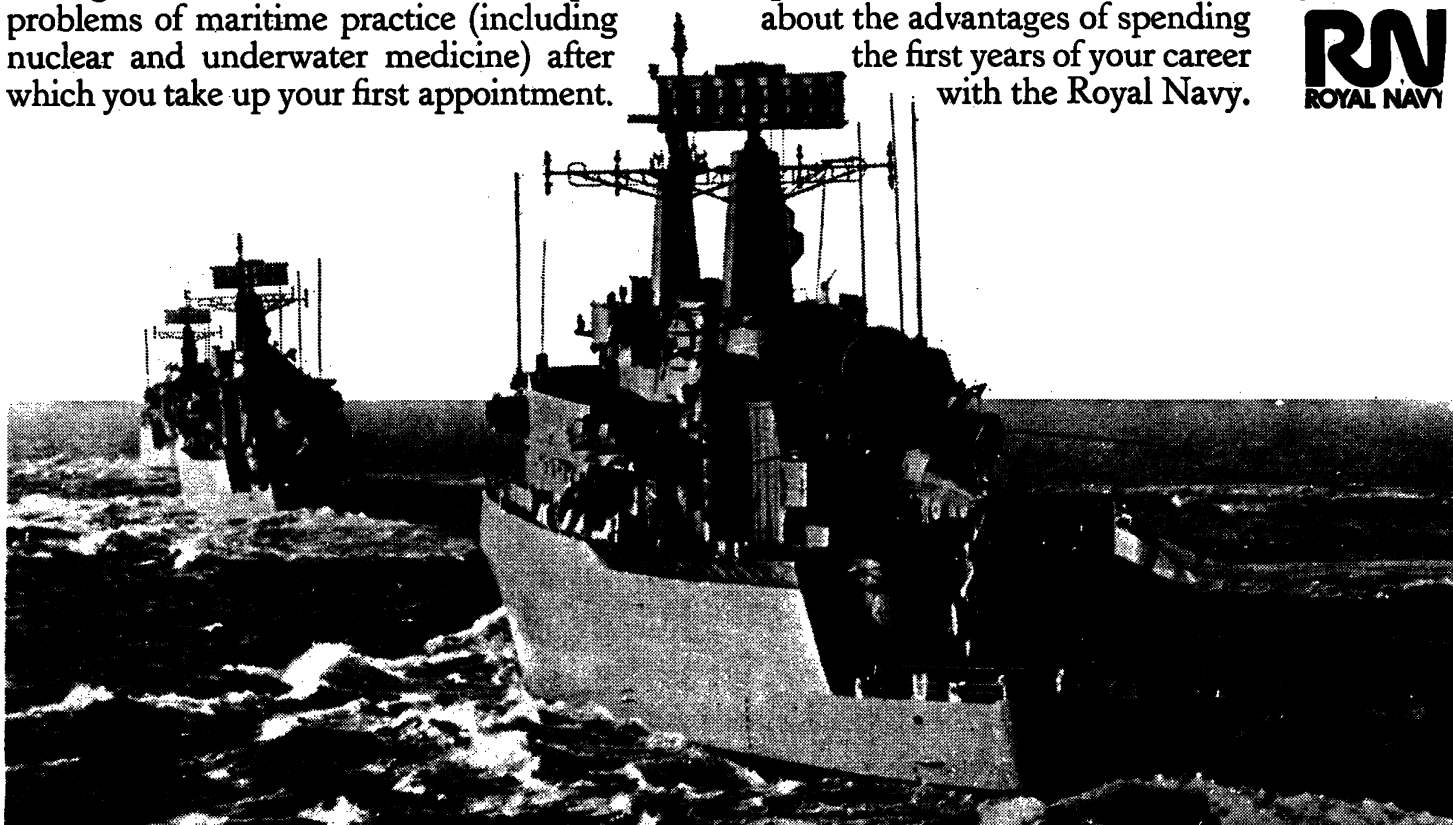

At sea, you would be looking after the health of a whole ship's company. Ashore, you may be looking after their families as well. (So we can even give you experience in obstetrics and paediatrics.)

And, at the end of your commission, you'll not only have a lot of useful experience and happy memories, but you'll also have a pretty useful tax-free gratuity. £1,500 after three years and £3,000 after five years.

Even if you're still at medical school, it's not too early to join us. Every year, we award about twenty-five Medical Cadetships to selected 2nd M.B. students. Each award pays for tuition fees and gives a salary of £1,814 a year in the rank of Surgeon Sub-Lieutenant. When you're registered, you're promoted to Surgeon Lieutenant and you begin your five-year commission.

Write now to Surgeon-Commander F. M. Kinsman, R.N., (724AA5), Dept. of the Medical Director-General (Navy), Empress State Building, London, S.W.6, and tell him your age and qualifications. In return he'll tell you more about the advantages of spending the first years of your career with the Royal Navy.

Consultant Pathologist  
Zambia

Applications are invited for the position of Consultant Pathologist with the Rokana Division of Nchanga Consolidated Copper Mines Limited at Kitwe, Zambia.

The successful candidate will have a higher degree in pathology and will be primarily a morbid anatomist, preferably with experience in cytology. In addition to providing a histopathology and cytology service he will supervise the sections of bacteriology, parasitology, haematology, blood transfusion and biochemistry.

The central pathological laboratory of Rokana Division has a staff of five qualified laboratory technologists in addition to a number of local laboratory assistants. This laboratory also performs histopathology and cytology for the medical departments of the other three mines in the N.C.C.M. group. At present the qualified technical staff is entirely expatriate. However, in co-operation with the group training department and the Evelyn Hone College of Further Education in Lusaka, the Rokana pathological laboratory takes part in a scheme of technician training for Zambians. A training officer/laboratory supervisor has been appointed to supervise the student technicians in the practical part of the

course. The Pathologist will be required to take particular interest in this training.

The appointment is on a one to three year contract, renewable. The basic starting salary will be dependant upon experience and qualifications, but will not be less than K9,200 (£5,152). In addition to the basic salary a company house is provided free of charge and a furniture allowance is payable. Leave is at the rate of 66 days per annum. Children receiving education overseas are granted up to £500 per child towards school fees and are given two return passages per year to visit their parents during holidays. *Income tax is lower than in the U.K. and Exchange Control Regulations allow for up to 33% gross income to be remitted home.*

# Opportunities abroad as Company Medical Officers Important: varied: well-rewarded

ANGLO CHARTER  
INTERNATIONAL  
SERVICES  
APPOINTMENTS  
DIVISION

You are offered the prospect of a tour of duty – for as little as one year – in Zambia. The nation's major mining organisation is Nchanga Consolidated Copper Mines Ltd., with an international staff of technical specialists. The engineering complexes on the copperbelt are among the most modern in the world.

The company is responsible for providing full medical care to its employees and their families. Its employees number over 30,000, and the total of persons to be looked after is about 150,000. Zambia is one of the most prosperous and rapidly developing of the newly independent African countries, but it still has to turn to the older countries for its medical staff (mostly to the U.K.) and there is still a lot to be done medically for its people, especially the children.

Where you fit in. N.C.C.M. Ltd. employs a staff of over 40 doctors and specialists, and approximately 147 fully qualified nurses. There are 5 well-equipped hospitals (814 beds), together with 16 clinics and 8 main first aid dressing stations.

General Duty Medical Officers will be involved in preventive and curative medicine, surgery, anaesthetics, gynaecology/obstetrics, public health and nutrition; and although the mines have a strict safety code, an amount of accident work can be expected.

Contracts may be negotiated for periods of one to three years. Locums can also often be arranged. There will certainly be time to enjoy the almost unique facilities for recreation and social activity in an interesting African country.

Salaries will depend on experience, but the minimum is K7,200 (£4,032) per annum. In addition there is a cash settling-in allowance: a detached, furnished house with garden is provided for £1.50 per week; and children receiving secondary education overseas are granted up to £500 per child per year towards school fees and two free return passages to visit their parents during holidays.

Income Tax is lower than in the U.K. Also, Exchange Regulations allow you to send home up to 33½% of gross income.

WHEN IT COMES TO BLOWING TRUMPETS . . .

**There's more to Ventolin than any other bronchodilator**

*For aerosol therapy in asthma and chronic bronchitis*

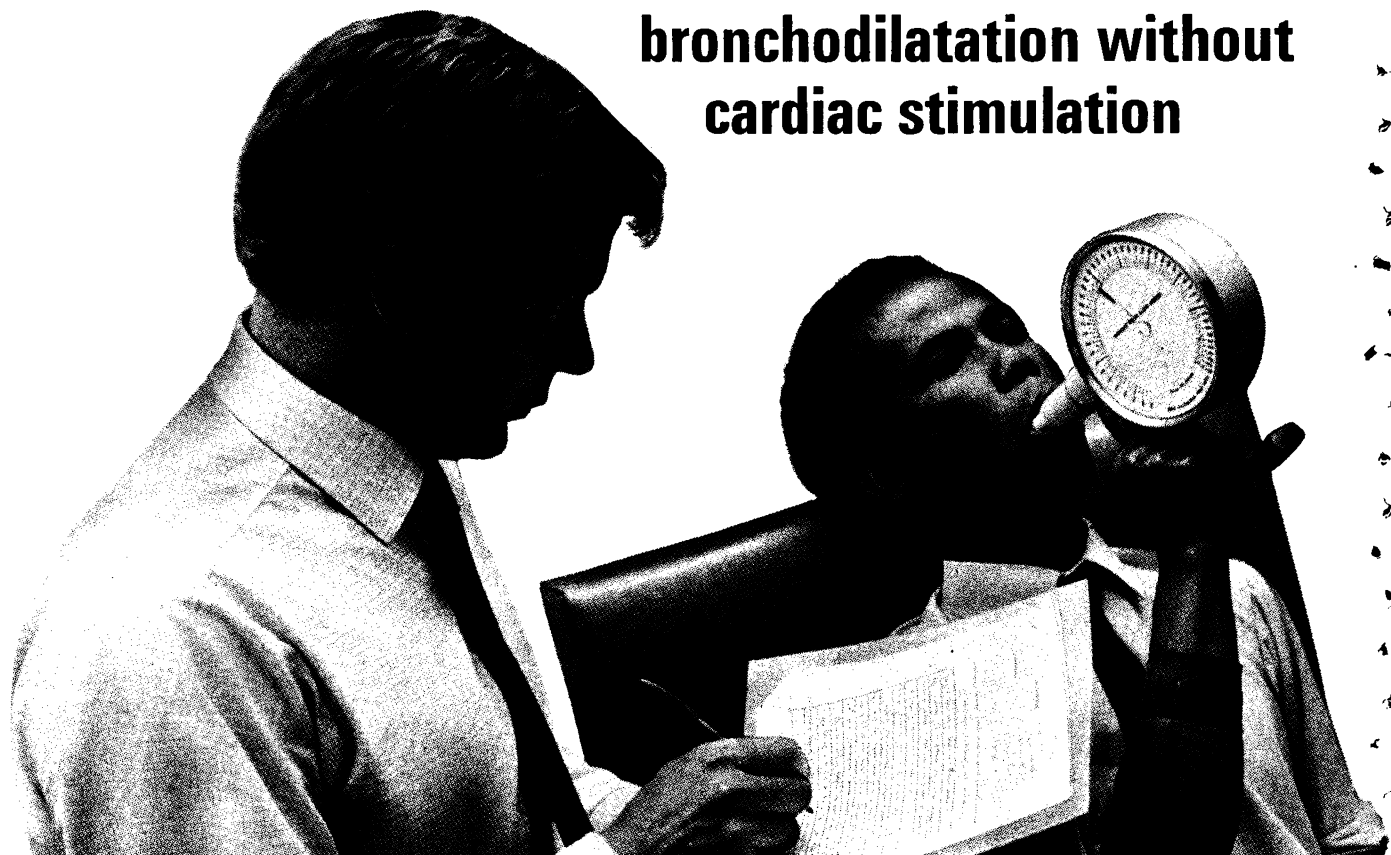

## **Ventolin Inhaler provides the drug of choice.**

"It seems clear, therefore, that because of its effectiveness in producing bronchodilatation, its long duration of action, its lack of cardiovascular stimulant action, and its lack of tendency to produce falls in  $\text{PaO}_2$ , salbutamol (Ventolin) is the most effective drug at present available by aerosol inhalation for the relief of asthmatic airway obstruction."  
(*Brit. med. J.*, 1970, 2, 23)

"It is suggested that salbutamol (Ventolin) is the aerosol of choice."  
(*Brit. J. Dis. Chest*, 1970, 64, 37)

Ventolin Inhaler is a metered aerosol, delivering 100mcg of salbutamol per inhalation, with a specially designed actuator. Each canister provides 200 inhalations.

### **VENTOLIN for effective bronchodilatation without cardiac stimulation**

*And for oral therapy in asthma and chronic bronchitis...*

## **Ventolin Tablets and Ventolin Syrup provide the drug of choice**

Of the available oral bronchodilators with  $\beta$ -adrenergic stimulant activity, Ventolin "is the drug of choice at the present time".

*(Postgrad. med. J., 1971, 47, 181)*

"Oral salbutamol (Ventolin) appeared to be as effective a bronchodilator as the aerosol."

*(Brit. med. J., 1970, 1, 65)*

Ventolin Tablets each contain salbutamol 2mg as sulphate and are supplied in packs of 100 and 500.

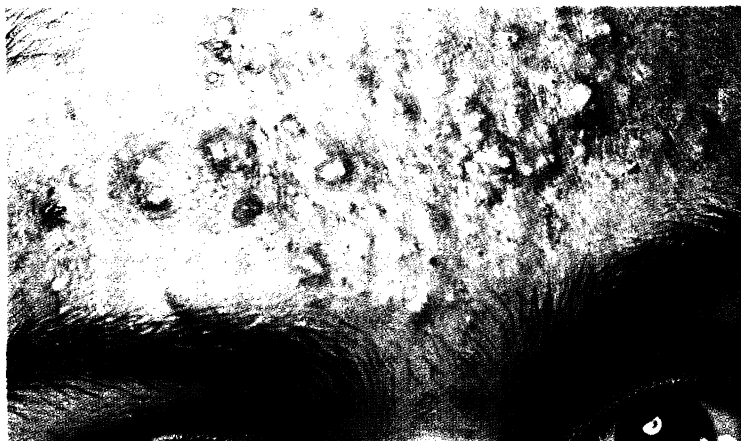

Ventolin Syrup contains salbutamol 2mg as sulphate per 5ml dose and is supplied in bottles of 150ml.

## **VENTOLIN—a real advance in bronchodilator therapy**

Full information provided on request. Ventolin is a trade mark of ALLEN & HANBURY LTD LONDON E2 6LA

Announcing the  
latest form of the  
most widely  
prescribed topical  
antibiotic—FUCIDIN®

# Fucidin® H Gel

**for the treatment of inflamed, weeping skin conditions  
where a greasy preparation is undesirable**

Fucidin H Gel – fusidic acid against infection, hydrocortisone acetate B P against inflammation, in a fat free, true gel base, combining the qualities of both cream and lotion.

Because of its formulation, Fucidin H Gel should prove particularly suitable in the treatment of such conditions as **'weeping' eczemas, seborrhoeic or contact dermatitis, and infected acne.** It is particularly suited for use on the scalp.

2% fusidic acid with 1% hydrocortisone acetate B P in an aqueous gel base.  
Available in 10 & 25G tubes.

Full information is available on request.
