As the weather worsens, demands on your time increase. This winter you can relieve some of the pressure by prescribing Magnapen for the more serious chest infections which you see. For acute-on-chronic bronchitis. For pneumonia. For infections following flu.

Magnapen gives you a greater chance of first time success in these serious cases because it is active against virtually all bacteria encountered in General Practice. So you can rely on Magnapen even when there are no laboratory reports to guide you.

Magnapen's greater certainty means that the patient is more likely to respond quickly. More likely to be up and about again sooner. And Magnapen can save you the time which you might otherwise have to spend on repeat visits, second consultations or night calls to patients who may fail to respond to other antibiotics.

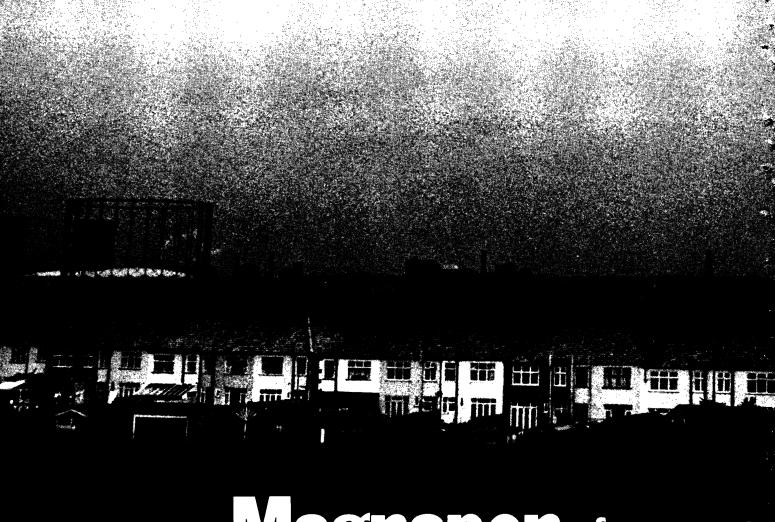

Full information is available on request.

Magnapen* (250mg ampicillin with 250mg flucloxacillin) is a British product originated by

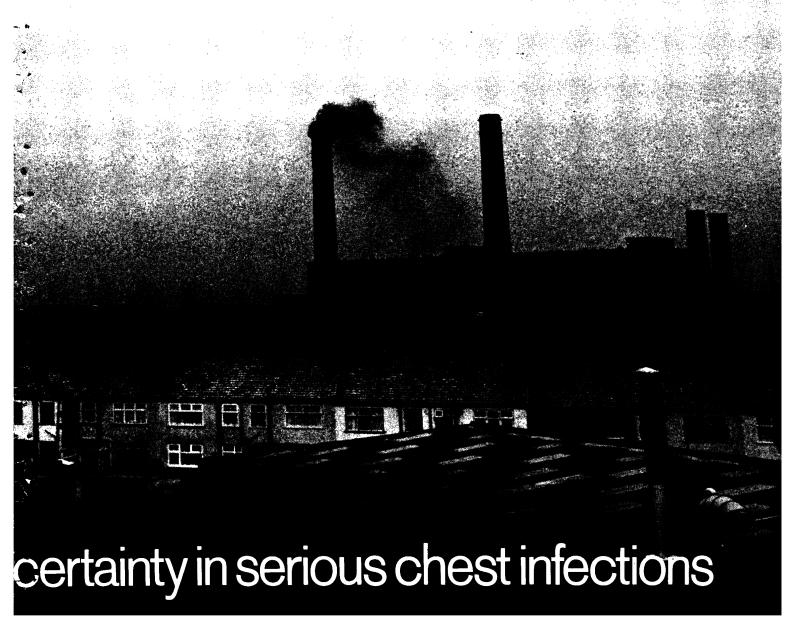

Beecham Research Laboratories Brentford, England. regd.

Magnapen-for greate

When chest infections clamp down Magnapen relieves the pressure.

Adventigation in Asthma

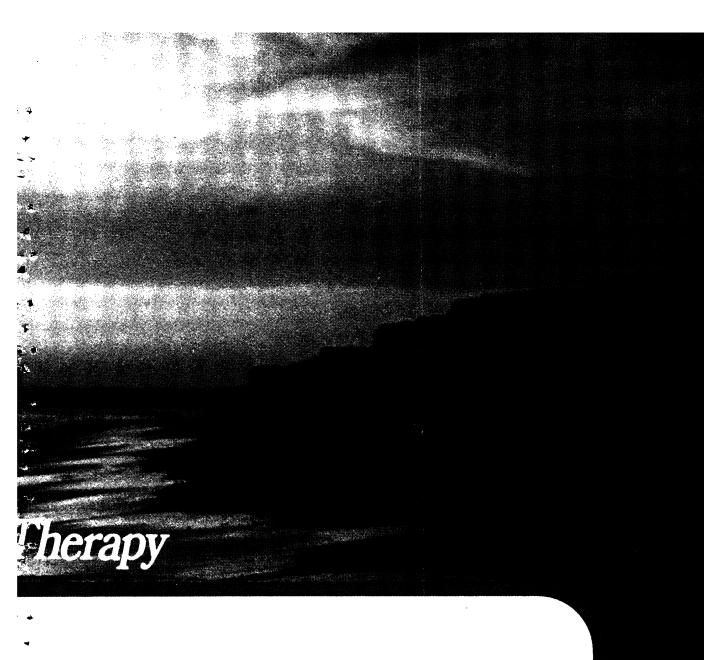

Becotide INHALER

STEROID CONTROL WITHOUT STEROID SIDE EFFECTS

Systemic steroids have, for many years, been recognized as the most effective form of treatment for moderate to severe bronchial asthma but their use is complicated by many serious side effects.

ALLEN & HANBURYS LTD LONDON E2 6LA

- Becotide Inhaler contains beclomethasone dipropionate BP, a steroid which differs from those previously administered to asthmatics by aerosol in that it is highly active within
- the lungs in doses which are not systemically active.
- Effective control of asthma can be achieved without causing unwanted systemic effects.
- Because of the intrinsic properties of the steroid employed
- and the direct route of administration Becotide Inhaler
- provides an extremely selective and thereby safer form of steroid therapy for bronchial asthma.

In Asthma-Becotide Inhaler puts steroid therapy in its place

For full prescribing information see overleaf

Becotide INHALER

BECOTIDE INHALER PRESCRIBING INFORMATION

Indications for Becotide Inhaler

Becotide Inhaler is indicated for a wide range of patients with bronchial asthma. The simplest cases are those whose asthma is becoming worse and bronchodilators less effective. For their safety it is important that they receive additional treatment and not simply increase their intake of bronchodilators. Treatment with Becotide Inhaler restores the patient's response to bronchodilators and often reduces their rate of use. Another group of patients who respond well to Becotide Inhaler are those who are not controlled or are inadequately controlled by sodium cromoglycate in addition to bronchodilators.

An important group are severely asthmatic patients who are dependent on systemic steroids or ACTH for their

well being. The majority of these patients can be transferred to Becotide Inhaler with maintenance of good respiratory function and disappearance of dangerous steroid-induced systemic side effects. In others, a substantial reduction in systemic steroid intake is achieved with reduction in the risk of serious side effects. Patients who are receiving intermittent courses of steroids are also suitable for transference to Becotide Inhaler therapy.

Becotide Inhaler is particularly important for managing severe asthma in children because good control of asthma can be achieved without retardation of growth. Resumption of growth occurs in children transferred from systemic steroids.

DOSAGE

Adults

Two inhalations (100 mcg) three or four times a day is the usual maintenance dose. In severe cases it is advisable to start at 600 mcg -800 mcg per day and adjust the dose according to the response.

Children

One or two inhalations (50 – 100 mcg) should be given two, three or four times daily, according to the response.

The maximum daily intake should not exceed 20 inhalations (1 mg) in adults, or 10 inhalations (0.5 mg) in children below 12 years of age.

It is essential that the patient should understand that Becotide Ifihaler is *not* a bronchodilator aerosol. It should be used regularly and not for rapid relief of bronchospasm. It is also important to instruct the patient in the proper use of the pressurised aerosol. He should breathe out fully and then "fire" the aerosol early in inspiration to ensure that the particles of steroid are carried in the airstream as far down the bronchi as possible.

IMPORTANT ASPECTS OF CLINICAL MANAGEMENT

Patients to be treated with Becotide Inhaler fall into two broad groups:

- 1) Those not receiving systemic steroids.
- 2) Those who are steroid dependent.

Different consideration must be given to these groups in order that the full benefits of Becotide Inhaler can be achieved in clinical practice.

Patients not receiving systemic steroids

The use of Becotide Inhaler in patients who have never taken steroids or taken only occasional courses of steroids is straightforward. An improvement in respiratory function is obvious within a week. The few patients who do not respond during this period usually have excessive mucus in their bronchi so that the drug is unable to penetrate to its site of action. In such cases a short course of systemic steroid in relatively high dosage should be given to eliminate mucus and other inflammatory changes in the lungs. Continuation of treatment with Becotide Inhaler usually maintains the improvement achieved, the oral steroid being gradually withdrawn.

Exacerbation of the asthma caused by infection is usually controlled by appropriate antibiotic treatment and, if necessary, by increasing the dose of Becotide Inhaler.

Steroid-dependent patients

The transfer of steroid-dependent patients to Becotide Inhaler and their subsequent management needs more attention mainly because recovery from impaired adrenocortical function caused by prolonged systemic steroid

Side effects

No major adverse side effects attributable to the use of recommended doses of Becotide Inhaler have been reported but some patients have become hoarse. Localised infection with Candida albicans has occurred in the mouth and throat of a few patients; the condition rapidly cleared after appropriate topical antifungal therapy without discontinuing the treatment with Becotide Inhaler. Reduction of plasma-cortisol levels has been reported in patients who received twice the recommended maximum dose of Becotide Inhaler. (Brit. J. Dis. Chest (1972) 66, 101).

therapy is usually slow.

The patient should be in a reasonably stable state before being given Becotide Inhaler in addition to his usual maintenance dose of systemic steroid. After about a week, gradual withdrawal of the systemic steroid is started at a rate which must not exceed 1 mgm of prednisolone, or the equivalent of other drug, per day. Some patients feel unwell during the withdrawal phase despite maintenance or even improvement of respiratory function. They should be encouraged to persevere with the Inhaler and withdrawal of systemic steroid continued unless there are objective signs of adrenal insufficiency.

Most patients can be successfully transferred to Becotide Inhaler with good respiratory function but special care is necessary for the first months after the transfer until the pituitary-adrenal system has sufficiently recovered to enable the patient to cope with emergencies such as trauma, surgery or severe infections.

Transferred patients should carry a warning card indicating that they may need supplementary systemic steroid during periods of severe stress. The dose of Becotide Inhaler should be increased at this time and then reduced to the maintenance level after the systemic steroid has been discontinued.

Replacement of systemic steroid treatment with Becotide Inhaler sometimes unmasks allergies such as allergic rhinitis or eczema previously controlled by the systemic drug. They should be treated with antihistamine and/or topical preparations.

Contra-indications

No specific contra-indications are known but special care is necessary in active or quiescent pulmonary tuber-culosis.

Caution

Unnecessary administration of drugs during the first trimester of pregnancy is undesirable.

Presentation

Becotide Inhaler is a metered aerosol delivering 50 mcg beclomethasone dipropionate per inhalation with a specially designed actuator. Each container of Becotide Inhaler provides 200 inhalations.

The Army asks a lot of a doctor. Here's what we give him in return.

Any young Doctor is bound to find his work demanding. And we won't pretend that the Army offers you a cushy life. What it does offer you, is opportunity and experience that you'd be hard put to surpass in civilian life.

You'll have ample opportunity to travel, anywhere in the world where the British Army is on exercises or operations.

You'll also gain considerable medical experience, with the chance of specialist post-graduate studies if you opt for a permanent commission.

Initially you can join for 3 or 5 years with the opportunity to convert to a regular commission.

You'll hold the rank of Captain and at the age of 24 you could be earning £3942 a year with 6 week's paid leave, plus allowances for educating your children, uniform etc.

Your surgery is equipped and staffed by the Army.

Your practice covers not only soldiers, but their wives and children as well. And if you want to set yourself up in civilian practice, you'll appreciate the tax-free gratuity that comes with all the valuable experience you've picked up in your short

service commission. The gratuity works out at £1500 after three years and £3000 after five.

If you're interested, we can arrange for you to visit one of our medical establishments and talk with serving RAMC Officers before you make your final decision.

For further details, phone 01-499 8040 ext. 322 or write to:

Colonel A. R. Worthington, MB, MFCM, DTM & H, RAMC., Ministry of Defence (AMD2), Dept. M1, Lansdowne House, Berkeley Square, London, W1X6AA.

HAY FEVER

THIS IS A
SIMPLIFICATION OF
THE SEQUENCE THAT
LEADS TO THE
IMMEDIATE
ALLERGIC RESPONSE

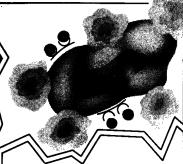

1. GRASS POLLEN
ANTIGENS ENTER
THE BLOODSTREAM,
CAUSING THE
FORMATION OF LARGE
NUMBERS OF
ANTIBODIES.

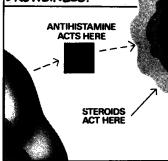

2.IN ALLERGIC PATIENTS SOME ANTIBODIES ATTACH THEM-SELVES TO CERTAIN CELLS, SENSITISING THEM. WHEN THE ANTIGENS AGAIN COME INTO CONTACT WITH THE ATTACHED ANTIBODIES...

3. THE CELLS DISRUPT RELEASING HISTAMINE AND OTHER PRODUCTS -SRS-A, BRADYKININ, ETC. THESE CAUSE THE CLASSIC HAY FEVER SYMPTOMS -TISSUE INFLAMMATION, OEDEMA, RHINORRHOEA, PAROXYSMALSNEEZING.

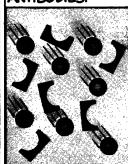

4. PALLIATIVE MEASURES
MERELY REDUCE THE EFFECTS
OF CELL-DISRUPTION
PRODUCTS, BUT THEY CAN
HAVE UNDESIRABLE SIDE
EFFECTS LIKE
DROWSINESS.

ALAVAC-P
OFFERS A
FUNDAMENTAL ANSWER

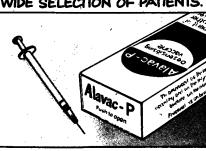

6.ALAVAC-P PROMOTES THE PRODUCTION OF CIRCULATING ANTIBODIES.

7. THESE CAPTURE THE ALLERGENS BEFORE THEY CAN EVER REACH THE SENSITISED CELL-PREVENTING THE SYMPTOMS OF HAY FEVER.

B.ALAVAC-P CONSISTS OF A SHORT, EASY-TO-ADMINISTER COURSE OF INJECTIONS, GIVEN WELL BEFORE THE HAY FEVER SEASON STARTS IN MAY / JUNE. ALAVAC-P IS SUITABLE FOR A WIDE SELECTION OF PATIENTS.

9.THREE SUCCESSIVE YEARS OF ALAVAC-P TREATMENT CAN CONFER EVEN LONGER-TERM FREEDOM FROM HAY FEVER.

10.YOU CAN PRESCRIBE ALAVAC - P FROM CASE HISTORY ALONE - AND TO SIMPLIFY THE RECORDING OF PATIENTS, BENCARD PROVIDE A PATIENT CHECK BOOK.

11.IMMUNISATION WITH ALAVAC • P GIVES SUMMER-LONG PROTECTION WITHOUT THE UNWANTED SIDE EFFECTS OFTEN ASSOCIATED WITH SYMPTOMATIC THERAPIES.

Here's why Alavac-P gives the most practical and effective action against hay fever and grass pollen asthma.

Alavac-P is an adsorbed, short-course (8-9 injections) hay fever vaccine.

It is a practical, more permanent alternative to temporary palliative measures.

It is formulated from the pollens of 12 common grasses that cause over 80% of hay fever and grass pollen asthma in the British Isles.

Minimal risk of reaction is ensured by the slow release of active material into the system.

Alavac-P provides clinically effective pre-seasonal treatment for patients of all degrees of sensitivity over 5 years of age.

Long-term protection may be achieved and deterioration

 $reversed\ in\ many\ patients\ by\ repeating\ Alavac-P\ treatment\ in\ three\ successive\ years.$

Skin tests are not needed: Alavac-P may be prescribed from case history and clinical symptoms alone.

The course should be started by early March to ensure protection before the onset of the grass pollen season in mid-May.

Ready-assembled disposable syringes with attached needles are included with each set of vials together with instructions on administration, dosage and precautions.

administration, dosage and precautions.

Alavac-P is prescribable on N.H.S. form E.C.10.

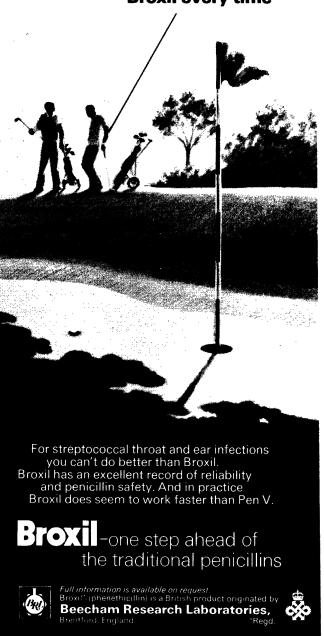

Basic N.H.S. price – £5.85 per set.

A booklet with further information on Alavac-P (regd)

A booklet with further information on Alavac-P (regd) and hay fever immunity is available from: Bencard, Freepost, Great West Road, Brentford, Middlesex.

But there's no two ways about treatment: Stemetil controls both

- Rapid, sustained relief of nausea and vomiting
- Intrinsic tranquillizing action simultaneously calms and relaxes

Migraine, vestibular disturbances, gastro-intestinal disorders, malignancy, cardiovascular disease — in these and many other organic and psychogenic conditions, anxiety, nervousness and tension are familiar concomitants of nausea and vomiting, and serve only to hinder definitive treatment of the underlying disorder. 'Stemetil'* not only stops the nausea and vomiting, but also effectively brings these accompanying emotional symptoms under control. Side-effects are minimal and transitory and the result is frequently such that the patient feels not just better, but better

than he's felt for a long time. Moreover, because it offers not just one, but two, essential effects, 'Stemetil' clearly makes economic, as well as therapeutic, sense.

R ACTIFED COMPOUND LINCTUS FOR COUGH

The only safe level of blood pressure is normal.

The definition of "normal" will obviously vary from patient to patient at the discretion of the doctor. There is now convincing evidence, however, that blood pressure must be maintained within this defined normal range. Any degree of hypertension—and by inference, incomplete therapeutic control—still carries a high long-term morbidity.

Complete control is usually impracticable with conventional antihypertensive agents because of prohibitive side effects.

This is not so with 'Inderal'.

'Inderal', added to a thiazide diuretic, gives smooth control of blood pressure in 80% of hypertensive patients, by night and by day, with none of the troublesome side effects of other treatments. It is a real step forward in preventive medicine.

Detailed information, available on request, should be consulted before prescribing.

IMPERIAL CHEMICAL INDUSTRIES LTD., PHARMACEUTICALS DIVISION, ALDERLEY PARK, MACCLESFIELD, CHESHIRE.

"Logically it would appear that beta-receptor blocking drugs are most suitable for patients in mild early hypertension, but the level of blood pressure can also be reduced in the more severe hypertensives."

Practitioner, (1971), 207, 43

"The mode of action of propranolol ('Inderal') compared with that of previous hypotensive drugs offers a new approach to the treatment of hypertension. Within its limitations propranolol has proved as effective as any other hypotensive agent, especially in moderate and severe cases, and has advantages over most."

Brit. J. Clin. Pract., (1971), 25, 326

Sudafed oral decongestant

When a child's infection shows in a mother's face

KEFLEX combines a degree of effectiveness and safety second to none. It is now well established as a particularly suitable antibiotic for the treatment of the very young. Where there is any doubt about the diagnosis, KEFLEX is the logical answer. Broad spectrum, even against penicillinase-producing pathogens, rapid absorption and high serum levels. KEFLEX therapy offers maximum coverage with minimum complications.

Further information is available on request.

GENERAL PRACTICE TRAINING POSTS

ILFORD AND DISTRICT HOSPITAL MANAGEMENT COMMITTEE King George Hospital, Ilford, Essex

HOSPITAL MANAGEMENT COMMITTEE
King George Hospital. Ilford. Essex

VOCATIONAL TRAINING SCHEME
FOR GENERAL PRACTICE
Applications are invited for the post of Trainee General Practitioner in the Ilford and District Group of Hospitals and a Health Centre Teaching Practice.
The course has been recognized by the Royal College of General Practitioners and on completion trainees will be eligible to sit the membership examination of that College.
The appointment is for three years and is intended for doctors who have completed their pre-registration training. Previous post-registration appointments, if recognized by the R.C.G.P., may be accepted instead of one or more six-month S.H.O. hospital posts.
On completion they will be entitled to the Vocational Training Allowance.
The appointment (on 1st July, 1973) will take the form of six months rotating posts in General Medicine. Obstetrics and Gynaecology Accident and Emergency in the new King energy Accident Department, associated with experience in the special practice.
Trainnes will be eligible to sit the D. R.C.O.G.
The final year will be in a Teaching General Practice.
Education in the organisation and practice of Family Medicine will be available in the area.
Applications to the Group Secretary by 5th February, 1973. (45518)

NORTHERN REGIONAL HOSPITAL BOARD (SCOTLAND)

VOCATIONAL TRAINING SCHEME
FOR GENERAL PRACTICE
Applications are invited for four posts in a
Vocational Training Scheme commencing 1st
August, 1973 based on the Inverness Group of
Hospitals.
The training programme will last for three
years. The first and third years will be spent in
a rotational series of hospital appointments in
the Senior House Officer and Registrar grades
respectively and the intervening year in
general practice in the Senior House Officer
Grade.
Applicants must be fully registered on entry

VOCATIONAL TRAINING FOR GENERAL PRACTICE The Scheme at Epsom

Applications are invited for two vacancies in a new scheme of Vocational Training for General Practice which will occur on 1st April 1973

General Practice which will occur on 1st April, 1973.

The hospital appointments, which will be for a period of two years, will be in obstetrics and gynaecology, medicine, accident and emergency and either paediatrics or possibly psychiatry, and will be in the Senior House Officer Grade. One trainee will commence on 1st April in the hospital posts and will be attached to a training practice after completion of these posts. The second trainee will serve for six months in a teaching practice before entering the hospital rotation.

Opportunities will be provided during his general practice 12 months to attend a half-street and the servent of the second trainee will serve for six months in a teaching practice before entering the hospital rotation.

Applications, including the names and addresses of two referees, should be forwarded to the Group Secretary, Epsom District Hospital, Dorking Road, Epsom. Surrey, by 7th February, 1973, (45819)

Vocational Training for General Practice The Norwich Scheme

Applications are invited for a three year Traineeship for General Practice consisting of two years of hospital posts and a year in general practice. The hospital posts will be within the United Norwich Hospitals and will consist of a 6 month appointment in general medicine with neurology and dermatology, 6 months in obstetrics with gynaecology (approved for D.Obst.R.C.O.G.), three 3-month appointments in other specialties, including paediatrics and casualty, and a three month locum/elective period. The general practice traineeship will be in an approved general practice within the Norfolk and Norwich area. A weekly study half day programme and a course of monthly evening meetings on topics of special interest to general practice will be held. The scheme is approved by the Department of Health and Social Security as qualifying for the vocational training allowance and by the Royal College of General Practitioners for eligibility to take the M.R.C.G.P. on completion of the course.

Married accommodation will be available throughout the hospital period. Hospital posts commence on the 1st August, 1973, but the one year period in general practice can be divided to give an initial period of 3 months starting in May, 1973.

Applications and enquiries for further information should be addressed to Dr. P. Leney, N.A.N.I.M.E. Office, Norfolk and Norwich Hospital, St. Stephens Road, Norwich, Norfolk NOR 53A. Closing date for applications — 12th February. Provisional interviewing date — 28th February, 1973. UNIVERSITY OF GLASGOW

The University of Leeds (in association with the Leeds Regional Hospital Board)

SCHOOL OF MEDICINE Department of Radiotherapy

Applications are invited for the CHAIR OF RADIOTHERAPY, vacant on the resignation of Professor P. B. Kunkler. The Professor will also act as Adviser on the Regional Radiotherapy Service through a professional Regional Radiotherapy committee responsible to the Leeds Regional Hospital Board; and will be based at Cookridge Hospital, Leeds. It is hoped that he and his staff will take an active part in the work of the pilot Oncological Centre being formed under the Leeds Regional Hospital Board. The salary will be within the range for clinical professors (£5.190 to £7.350 a year). The University reserves the right to consider for appointment persons other than those who submit formal applications.

Applications (2 copies) stating age, qualifications and experience and naming three referees, should reach the Registrar, The University, Leeds LS2 9IT (from whom further particulars may be obtained), quoting reference number 74/2/1, not later than 16th March. 1973. Applicants from overseas may apply in the first instance by cable, naming three referees, preferably in the United Kingdom. (19732)

FELLOWSHIP AWARDS

THE WELLCOME TRUST

Travelling Research Fellowships Western and Eastern Europe 1973/74

Applications are invited from British research workers for the award of Wellcome-European Research Fellowships for 1973/74. These awards include the Trustees' special fellowships to Denmark, France, Germany, Hungary, and

The object of these fellowships is to encourage working visits to countries in Western and Eastern Europe by investigators in any branches of the natural and clinical sciences which have a bearing upon human or animal medicine. Candidates whose research is related to clinical problems will be given preference. These fellowships, which are normally for one year, are intended for graduates from the United Kingdom who already have some post-doctoral research experience. Stipends, according to age and experience, are within the range of £1.765 to £3.670 per annum. A special cost of living allowance applicable to the country in which the candidate wishes to work is given where necessary. Travelling and some incidental expenses are provided in addition.

The candidate must make his own arrangements with the department in which he proposes to work, and written evidence must be submitted confirming his arrangements. Application forms may be obtained from the Assistant Director, The Wellcome Trust, 52 Queen Anne Street, London W1M 9LA. Completed application forms must be returned by 31st March, 1973.

Chief **Medical Officer**

Our present Chief Medical Officer has decided to take a senior appointment with the Employment Medical Advisory Service. We wish to replace him with an experienced Occupational Health Physician who will have responsibilities for the health and safety services throughout the company. These will be based broadly on the recommendations of the Robens committee with particular emphasis on the environmental control of a wide range of potential hazards.

The company employs approximately 60,000 people with factories in Bristol, The Midlands and Scotland. The person appointed would be based in Derby.

A senior Medical Officer who has been responsible for more than 10,000 people would have the appropriate experience. A Diploma in Industrial Health or an appropriate higher medical qualification

The salary would be in excess of the minimum BMA recommendation for Chief Medical Officers in Industry.

GOVERNMENTAL

Foreign and Commonwealth Office

Medical Adviser

£7451

This appointment, based in London and involving some overseas travel, carries responsibility for advising on the technical and professional merits of plans and projects for medical development; assisting in recruiting and training professional and technical medical staff for service overseas; advising on training overseas medical staff in the United Kingdom. The Medical Adviser may also be called upon to represent H.M. Government at international and other conferences.

Candidates, aged at least 45, must be registered medical practitioners with considerable medical service abroad.

Ideally this experience will have been gained in a senior post carrying responsibility for organising and directing the medical services in a developing country.

Non-contributory pension scheme.

Fuller details of this appointment may be obtained by writing to the Civil Service Commission, Alencon Link, Basingstoke, Hants., RG21 1JB or by telephoning Basingstoke 29222 ext. 500 or London 01-839 1992 (24-hour answering service) quoting reference S/8145/AM. Closing date 23 February 1973.

xlvi BRITISH MEDICAL JOURNAL 20 JANUARY 1973 ADVERTISEMENT

MEDICAL OFFICER

£4.041-£4.557

The Health Education Council is responsible for developing and promoting health education activities in England, Wales and

The Council now requires a medical practitioner with an interest in health education, and preferably with a public health background, to join the executive team engaged on specific Council projects. His main responsibility will be to assist the Chief Medical Officer over a whole range of duties including:

■ building up a scientific intelligence service

advising on the medical content of the Council's programmes ■ bibliographical research and contact with relevant research institutions

editing the Council's journal

maintaining and promoting professional contacts.

The Medical Officer will also be required to undertake a certain amount of lecturing to professional groups on the medical and scientific basis of health education.

The Health Education Council

Please write for an application form, quoting reference AM.34, to: The Secretary, The Health Education Council, Middlesex House, Ealing Road, Wembley, Middlesex HAO

(19714)

113

Public Service Fonction publique Canada Canada

THIS COMPETITION IS OPEN TO BOTH MEN AND WOMEN

PSYCHIATRISTS DISCOVER CANADA

with the Canadian Penitentiary Service Department of the Solicitor General

Canada is a young and fast growing country where 80% of the population lives in cities.

Working in one of our institutions in the Provinces of Quebec, Ontario or British Columbia shall give you the opportunity to live in or close to a major city, such as Montreal, Kingston or Vancouver.

You will enjoy all the modern Canadian life commodities while doing clinical work, and acting as consultant to institutional directors in all matters relating to the mental health of inmates.

You will also participate, with other psychiatrists, in the further development of treatment programmes for the mentally ill and for special groups of offenders, and carry out these progressive changes in consultation with academic institutions.

Your salary could range up to \$32,500 and fringe benefits are very attractive.

Possession of a medical degree from an approved university or medical school and certification in psychiatry or equivalent qualifications, plus eligibility for a licence to practice medicine in a province of Canada may qualify you.

Send us a detailed resume of your education and experience before 15th February, 1973 to:

Officer-in-Charge, Dept. 3154, **Canadian Government Immigration** Office 38 Grosvenor Street London, W1X 0AA

Interviews will be held in London in the latter part of February. Please quote reference number 73-168-01A in all correspondence.

TARANAKI HOSPITAL BOARD New Plymouth, New Zealand

ASSISTANT MEDICAL SUPERINTENDENT TARANAKI BASE HOSPITAL

Applications are invited for the position of Assistant Medical Superintendent Taranaki Base Hospital (incorporating Barrett Street Hospital). The appointee will also be Deputy Superintendent-in-Chief.

The new Base Hospital comprises a five storey ward block of 150 beds and a large Clinical Services Block. The slightly older buildings on the site include two general wards and a 51 bed maternity wing. The Barrett Street Hospital, formerly the main hospital, has become a hospital catering for convalescent and geriatric patients plus a psychiatric unit of 17 beds.

The position is expected to carry the salary of Medical Officer of Special Scale with a salary rate determined within one of six scales. \$NZ6,962 — \$NZ12,099 p.a. or, if appointee possesses a higher qualification in an appropriate specialty, the automatic ten step Speciafists' Scale would apply: \$NZ9,946 — \$NZ13,393 p.a. The duties are both administrative and clinical.

The area has a temperate climate, attractive coastline and excellent educational facilities for the family. Sporting activities such as skiing, fishing, yachting, shooting, squash, golf, etc., are all easily accessible and relatively inexpensive. The cultural environment centred on New Plymouth is vigorous and stimulating. The medical atmosphere is a happy one and there is a minimum of social ills found in many other countries.

social ills found in many other countries.

Full particulars available from the High Commissioner for New Zealand, Haymarket. London. S.W.I.. England or upon airmail request. from the Secretary. Taranaki Hospital Board. Private Bag, New Plymouth. New Zealand, with whom applications close on 31 st March, 1973. (19734)

The Crippled Children's Association of South Australia Inc.

MEDICAL DIRECTOR

The Council of this Association invites applications from suitably qualified medical practitioners for the above position.

Applicants should have a higher qualification in Paediatrics, Orthopaedic Surgery or another appropriate specialty.

The Crippled Children's Association is planning a multi-diagnostic physically handicapped children's residential and day school rehabilitation centre on a 20 acre site which is due for completion late 1974. Approximately 80 children will be in residence and 170 children will attend daily.

Salary will be according to current State Public Service rates.

A negotiated number of sessions will be arranged with the Adelaide Children's Hospital which is the sole Children's Hospital in South Australia and is the Teaching Hospital in Paediatrics for the University of Adelaide.

A limited right of private practice may be negotiated.

Further particulars, including conditions of service and conditions governing private practice may be obtained from the Executive Director.

The successful applicant should anticipate commencement of duties in the latter half of 1974.

Applications in writing, giving full personal details and professional qualifications together with the names of two referees will be received by the undersigned until 28th February,

Executive Director, Crippled Children's Association of S.A. Inc., 67-69 Franklin Street, Adelaide, S.A. 5000.

Readers in the U.S.A. can send their subscription orders, with or without payment to: British Medical Journal, 1172 Commonwealth Avenue, Boston, Mass. 02134.

You're looking at the destruction of pathogens by 'Eskacef'. The new bactericidal antibiotic. Use it...to be sure.

The way to prevent infections becoming problems is to cope with them from the start ... with 'Eskacef'.

'Eskacef' is rapidly bactericidal against a wide range of Gram-positive and Gramnegative organisms - even penicillinase producing strains. It is one of the most rapidly absorbed antibiotics and reaches high

urinary concentration in active form.

It is so low in toxicity that it can be used in children, may be suitable for long term use, and, with adjustment of dosage to avoid accumulation, may be used in renal failure.

'Eskacef' is available in both capsule and suspension presentations.

Use it...to be sure.

Each capsule contains 250 mg or 500 mg cephradine. Each 5 ml of suspension contains 125 mg or 250 mg cephradine.

Further pharmacological and clinical data available on request.

Smith Kline & French Laboratories Limited Welwyn Garden City, Hertfordshire EF. PA272 col.

BRITISH MEDICAL JOURNAL 20 JANUARY 1973

"Compared to aminophylline it (Choledyl) is more soluble, more stable, better absorbed from the gastrointestinal tract, and less irritating to the gastric mucosa."

(Glodh an T. S. X & Iman. A. 1973) The Pharmacological Basis of Therapeutics, p. (Ph.)

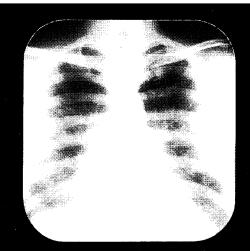

PRESENTATION

Choledyl is available as tablets of 100mg and 200mg choline theophyllinate BP in containers of 100 and 500 tablets; and as Choledyl Syrup in bottles of 150ml.

Fig. 1 information is available on request

Choledyl is manufactured under licence from Warner-Lambert Pharmaceutical Co. New Jersey, U.S.A. owners of the trade mark ALLEN & HANBURYS LTD LONDON E2-6LA

These lungs are old before their time.

They are asthmatic, have become bronchitic and are now emphysematous.

While antibiotics are fighting the infective component, INTAL provides constant protection from the asthmatic episodes that often accompany chronic bronchitis. It could save the lungs from further damage.

Sodium Cromoglycate BP has no bronchodilator or anti-inflammatory activity. Its principal action is to inhibit the release of spasmogens and inflammatory agents in immediate-type allergic reactions in the lungs.

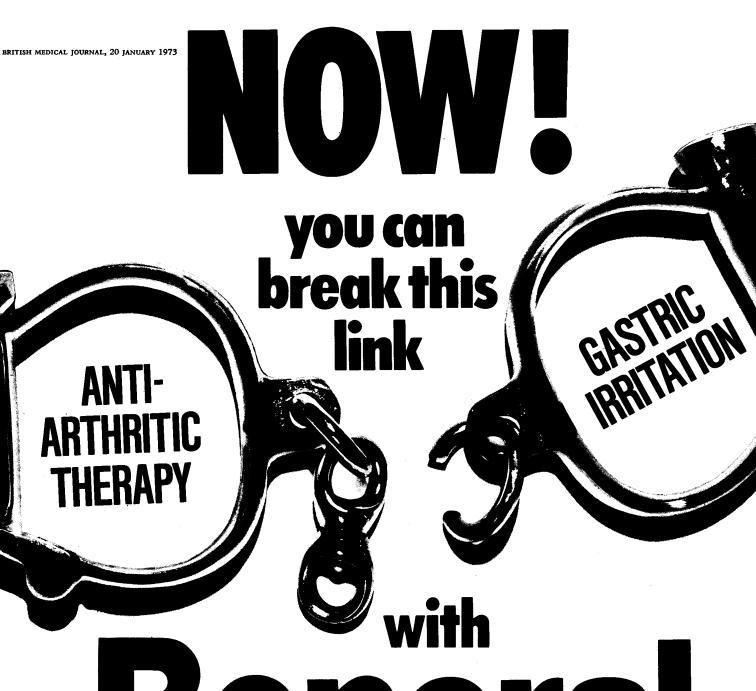

Where asthma complicates the treatment of bronchitis, INTAL can control the asthmatic component while the antibiotic clears the infective element. Because asthmatic attacks are actually prevented, there may be a concomitant reduction in the number of infective episodes, thus protecting the lungs from further damage.

INTAL contains 20 mg Sodium Cromoglycate BP. If inhalation of the fine dry powder causes transient bronchospasm INTAL CO is available which contains 0.1 mg Isoprenaline Sulphate BP in addition to sodium cromoglycate.

% FISONS &

Additional information is available from: FISONS LIMITED—PHARMACEUTICAL DIVISION Loughborough, Leicestershire.

Intal® 2022 daily prophylaxis in asthma

Benoral

suspension

Benoral Suspension, a new and highly effective anti-inflammatory analgesic, does not produce the gastric irritation which so often complicates therapy with aspirin and other anti-arthritic agents.

Because it has a long duration of effect, Benoral allows a simple twice-daily dosage regimen which controls swelling and pain and affords significant relief from night discomfort and early morning

Base your therapy now on **Benoral Suspension**

> the new superior anti-arthritic free from gastric irritation

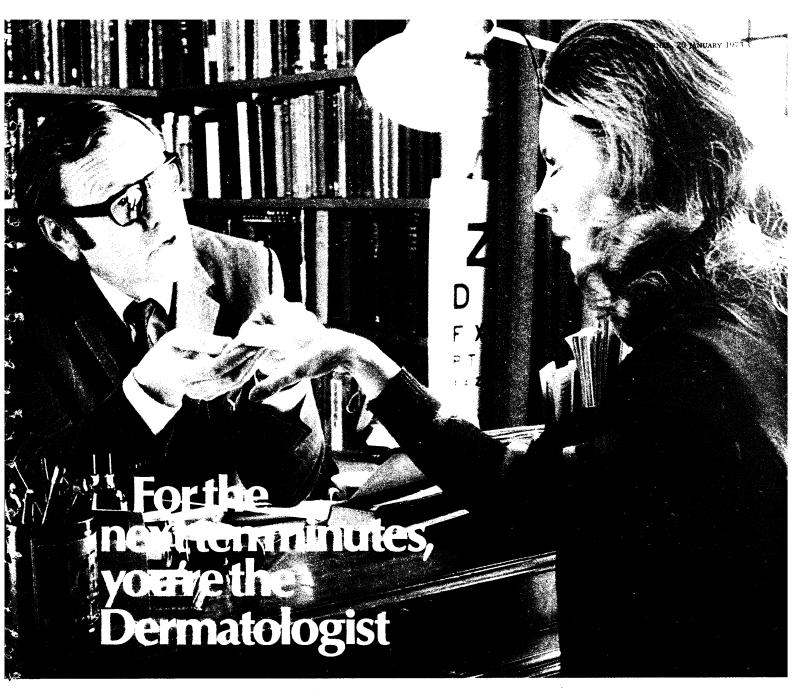

in acute and chronic arthritic conditions - including osteo-arthritis and rheumatoid arthritis - and many forms of soft-tissue rheumatism

Bronchitis is on the move again

But Ceporex can stop it.
Ceporex is cephalexin from Glaxo, the well tolerated, broad spectrum antibiotic with proven clinical success rates of 94% in acute bronchitis and 87% in chronic bronchitis.*

It's one of the many hats you have to wear in the course of a normal working day. And while you're wearing it, your standard of diagnosis and treatment will be modelled on those of the dermatologists who taught you - and those whose advice and practice continue to give guidance. For you, now, there is the Ficoid range of topical skin preparations, bringing the standards of hospital dermatology to general practice.

The Ficoid rationale

In the Ficoid range, there are preparations meeting virtually all the specifications you may require in topical skin therapy. An anti-inflammatory effect appropriate to the clinical situation. Antibacterial cover when needed. A physical form appropriate to the lesion and the patient's skin. And all at a cost which makes Ficoid not only good dermatology but exceptionally good value for money as well.

The Ficoid range

The anti-inflammatory agent in Ficoid is fluocortolone, a fluorinated steroid adequate for even the most severe inflammation – and there is a dilute as well as concentrated form. When you need antibacterial cover, Ficoid-plus offers a wide antipathogenic spectrum without the well-known drawbacks of antibiotics.

Cosmetically elegant

To cater for crusted, scaly, lesions and dry skin, Ficoid is available in ointment form. For moist or weeping lesions, Ficoid may be prescribed as a cream or a lotion. This is particularly suitable for pilose areas. For ease of prescribing, all the Ficoid range comes in 30 g tubes, except the lotion which is in 20 ml bottles.

Ficoid 2-plus	fluocortolone 0 · 2% clemizole	cream, ointment; 30 g tubes
	hexachlorophenate 2.5%	Ď
Ficoid 5	fluocortolone 0 · 5%	cream, ointment; 10 g and
		30 g tubes
		lotion, 20 ml bottle
Ficoid 5-plus	fluocortolone 0 · 5%	ointment 10 g, and 30 g tubes
•	clemizole	
	hexachlorophenate 2.5%	ó

cream, ointment; 30 g tubes

Clinical evidence for Ficoid

fluocortolone 0.2%

Ficoid 2

In one study* fluocortolone was assessed by 110 doctors in the treatment of 1,028 patients with a variety of skin conditions including eczema (44%), dermatitis (15%) and psoriasis (8%). The trial involved both general practice and hospital cases. Results were summarised as follows:

	No	Cleared or improved	Unchanged or worse
Fluocortolone/clemizole hexachlorophenate	605	543	62
Fluocortolone	423	376	47
Totals	1028	919	109
	100%	90%	10%

Contra-indications

In infants, long-term continuous topical steroid therapy should be avoided. Adrenal suppression can occur even without occlusion.

Precautions

Topical administration of corticosteroids to pregnant animals can cause abnormalities of foetal development.

The relevance of this finding to human beings has not been established, however, topical steroids should not be used extensively during the first trimester of pregnancy, ie in large amounts or for prolonged periods.

As with all topical steroids, there is a risk of striae following extensive therapy.
