

As the weather worsens, demands on your time increase. This winter you can relieve some of the pressure by prescribing Magnapen for the more serious chest infections which you see. For acute-on-chronic bronchitis. For pneumonia. For infections following flu.

Magnapen gives you a greater chance of first time success in these serious cases because it is active against virtually all bacteria encountered in General Practice. So you can rely on Magnapen even when there are no laboratory reports to guide you.

Magnapen's greater certainty means that the patient is more likely to respond quickly. More likely to be up and about again sooner. And Magnapen can save you the time which you might otherwise have to spend on repeat visits, second consultations or night calls to patients who may fail to respond to other antibiotics.

Intal doesn't relieve asthmatic attacks

It prevents them

Steroids, bronchodilators and antihistamines, whether in aerosol or tablet form, are only symptomatic treatments. Whereas INTAL actually *protects* the patient from asthmatic attacks—day in, day out.

By preventing the release of spasmogens INTAL affords daily prophylaxis for as long as any challenge exists. More than 150 clinical trials have proved its effectiveness, safety and ease of administration.

But only an asthmatic can really appreciate the difference it makes.

VENTOLIN

for effective bronchodilatation without cardiac stimulation

Ventolin is available in a wide range of preparations, all of which contain salbutamol BP. This compound has a highly selective action on bronchial muscle, causing maximal dilatation with low dosage. Therapeutic doses of salbutamol are virtually devoid of effects on heart or blood pressure; this is now so well established that Ventolin is the only adrenergic bronchodilator that is indicated for the treatment of bronchospasm in patients with concomitant heart disease or hypertension.

MEDICINE IN A TROPICAL ENVIRONMENT

Edited by A.G. Shaper, J.W. Kibukamusoke, M.S.R. Hutt.

Medicine in a Tropical Environment is intended for medical students and doctors working in tropical and developing countries. The essays bring together specific problems of the tropical environment which have been the subject of recent investigation, and the authors write on them from personal experience. Little of the material on which the essays are based was available more than five years ago. To doctors in temperate climates preparing themselves for medical work in developing parts of the world *Medicine in a Tropical Environment* is essential reading.

Nephrotic Syndrome of Quartan Malaria

JOHN W. KIBUKAMUSOKE

This book is based on ten years' work in a renal unit at a busy teaching hospital in the heart of Africa. Renal diseases are very common in the tropics and practice among them is dominated by the nephrotic syndrome. Studies at the clinic have demonstrated that 90% of them are due to *P. malariae*.

The information given is relevant to a much wider scope of renal work including current problems in Europe and North America.

When menstruation occurs do young girls want your help?

**Your requests
for 26,500
charts
indicate they do.**

Adolescence is nowhere near as frightening when young girls are prepared for it. And preparing them for menstruation is simplified when you use the illustrated charts and booklets provided free by Tampax Limited. The coloured charts, prepared by R. L. Dickinson, M.D., graphically help them to understand the changes taking place in their bodies. These charts are laminated in plastic for permanence and suitable for grease pencil marking and erasure. The booklets – one for beginning menstruants, the other for older girls – tell them what menstruation is – and how easily they can adjust to it normally and naturally.

In just five years, more than 26,500 charts and 350,000 booklets have been requested by doctors and nurses to prepare youngsters for menstruation – and to help dispel the fears that made them think of menstruation as the "curse".

The Tampax tampon embodies a number of distinctive features to provide the utmost in menstrual protection. Designed for intravaginal use, it is softly compressed for efficient absorption and maximum comfort. It's placed in correct position hygienically by means of a satin-smooth container-applicator, prelubricated to facilitate insertion. It expands in three dimensions for complete protection. Its removal cord is chain stitched, for safety, to the entire length of the tampon. Both tampon and applicator are readily disposable in the toilet.

Because Tampax tampons are worn internally, there's no irritation, no chafing, no embarrassing menstrual odour. And for sports-active girls, particularly swimmers, tampons are a must.

Tampax tampons are available in Regular and Super absorbencies, with explicit directions for insertion and use enclosed in each package.

Please order your charts and booklets by writing to the address below.

A good friend in

Amoxil can be relied on to treat commonly occurring bacterial infection of the ear, nose and throat. This was demonstrated in a recent clinical trial¹ involving 150 children where Amoxil was clinically successful in 94% of cases.

Amoxil's broad spectrum of activity coupled with its outstanding oral absorption² ensure that high bactericidal serum levels are available to act quickly and decisively at the site of infection.

Add to this the convenience of a three times daily dosage regime, the degree of safety associated with penicillin therapy, treatment costing as little as 16p per day, and a wide range of highly acceptable oral presentations – further good reasons why Amoxil represents practical antibiotic therapy at its best.

Amoxil is a good friend in throat infections – this happy eight year old certainly thinks so.

Further information on Amoxil regd (amoxycillin) is available from: Bencard, Freepost, Great West Road, Brentford, Middlesex.

THE HISTAMINE CHALLENGE:

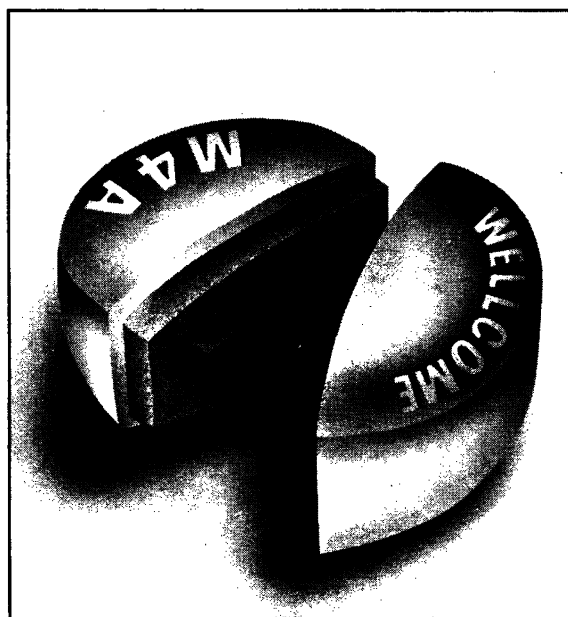

Can any single antihistamine tablet fight off attacks for 24 hours?

In a study† designed to test the duration of protection afforded by PRO-ACTIDIL*, human volunteers were given intradermal injections of histamine and the areas of flare and weal response were measured.

After the responses had completely disappeared one PRO-ACTIDIL tablet was administered to each volunteer and the histamine challenge was repeated. By measuring the reduction in areas of flares and weals the protective effect of PRO-ACTIDIL could be plotted for the 24 hours following administration. After 24 hours the weals still showed a reduction of 65 per cent and the flares a reduction of 83 per cent. The authors concluded that the antihistaminic effect of PRO-ACTIDIL lasts for 24 hours.

TEESSIDE EXECUTIVE COUNCIL (National Health Service)

PRACTICE VACANCY

STOCKTON-ON-TEES, TEESSIDE

Applications are invited for a single handed vacancy based on Stockton-on-Tees, which is classified as "Designated Type One". The vacancy is due to the retirement of the previous doctor and the list count is 2,145. Local Health Authority attachments will be available to the practice. The practice main surgery accommodation is the subject of a compulsory purchase order effective from approximately May, 1973 but the accommodation will be available for rental from the outgoing doctor until this date. It is hoped that the Local Authority will provide new surgery accommodation on a rental basis close to the existing surgery; this had been earmarked for the outgoing doctor. There is a branch surgery (which may be available on a rental basis) at Yarm some three miles south of Stockton to serve some 400 patients who live in the Yarm/Eaglescliffe area. The successful applicant will be required to commence practice as soon as possible after 1st April, 1973. Full details and Application Form E.C.16a can be obtained from the Clerk, Teesside Executive Council, 1 Grange Road, Middlesbrough, Teesside, TS1 5BB. Tel: Middlesbrough 48371. Closing date for the receipt of applications is the 2nd March, 1973. (H10604) 5

SCOTTISH HEALTH SERVICE

FELLOWSHIPS IN COMMUNITY MEDICINE

At least three Fellowships in Community Medicine are offered in 1973 to
medically qualified candidates.

FELLOWSHIPS are for three years, modified for candidates with relevant
qualifications or experience. The usual pattern is one year's full-time academic
study followed by opportunity for gaining practical experience in various fields of
community medicine and undertaking study projects.

Salary scale (senior registrar equivalent) £3,120 to £4,146. Approved University
Fees, and certain travel and subsistence expenses, are met.

Closing date for application is 2nd March, 1973.

JUNIOR FELLOWSHIPS

A limited number of posts in the S.H.O./Registrar grades are being made
available for graduates with two to three years basic professional experience who
have not decided finally which branch of medicine will provide for them a
satisfying career, but who might consider the specialty of Community Medicine.

These posts would in most cases be limited to one year's duration. The holders
would continue half-time with clinical duties and would be given the opportunity
of undertaking or assisting with a research project in a subject related to
community medicine.

These posts are intended to provide an introduction to Community Medicine
whilst enabling the successful candidates to gain further clinical experience.

SERVICES

AS A NAVAL DOCTOR, YOU'D GET A WHOLE LOT MORE OUT OF LIFE.

(AND SO WOULD YOUR FAMILY)

Right from the start, you'd have a complete change of scene.

Serving either with the Navy at sea or among service personnel and their families at a naval establishment. Very likely in another part of the world.

Either way, you'd never find yourself short of assistance. (Every naval doctor is fully supported by medical staff).

Equally important, you'd never find yourself getting into a rut – for in two years or so you'd receive a new appointment.

In a new place. Doing a different job. Perhaps with the chance to learn something of the special problems of diving, aviation, or tropical medicine for example.

It's a stimulating life. Not only for yourself but for your family too.

For in most cases they'd accompany you. And wherever you go there are usually married quarters – fully furnished houses or flats, equipped with everything you need. And at very reasonable rents.

What's more, a generous education

allowance is made for your children if they are at boarding school. £363 p.a. for a first child, £432 p.a. for a second, £519 p.a. for a third. On top of this, removal and other allowances are also provided.

Add this to the salary and you'll see how well a naval doctor's pay compares with a civilian doctor's.

For instance, with five years' post registration experience you would join us as a Surgeon Lieutenant-Commander on £4,767 a year.

And any specialist qualifications/experience you have could increase your salary even more.

There are opportunities, too, to keep up with the latest developments in medicine. For the Navy fully recognises the need for such opportunities both in the interests of naval medicine and a doctor's professional advancement.

That's not all. You can join on a 3-year or 5-year commission (each carrying a tax-free terminal gratuity of £1,500 and £3,000 respectively) and you can transfer to a full 16-year pensionable commission if you wish.

To find out more, write to Surgeon Cdr. L. C. Banks, M.B., B.Ch., R.N. (724ABC), Dept. of the Medical Director-General (Navy), Empress State Building, London S.W.6.

Unique opportunity for neuropsychiatrist in Europe

A major pharmaceutical company in Belgium requires a new medical adviser to join its team of clinical experts. Based in Brussels, he will travel extensively in Europe organising and monitoring clinical trials for a range of psychotropic products.

He should have worked in a neuropsychiatric unit and have a good knowledge of the pharmacology of psychotropic drugs. He will probably be at the Registrar or equivalent grade and hold the DPM or be a Member or Fellow of the Royal College of Psychiatry.

There are already thousands of Britons living in Brussels and the number is expected to

increase considerably. Although a good knowledge of French is a desirable requirement for the Medical Adviser himself, he will find his family, if he has one, will be able to manage very well with just a limited knowledge of the language. There are also several English-speaking schools, and even a thriving cricket club.

The remuneration will be up to £10,000 p.a. depending on experience and qualifications.

For further details please write to Dr Philip Brown, Deltakos Division, J. Walter Thompson Company Ltd., 40 Berkeley Square, London, W1E 7QZ, giving details of qualifications and experience.

ASSISTANT CLINICAL CHEMISTS (MEDICAL)

\$8,104 — \$9,604

DIVISION OF CLINICAL CHEMISTRY

Applications are invited from suitably qualified medical officers for immediate appointment to two (2) positions of Clinical Chemist (Medical) or Assistant Clinical Chemist (Medical) in the Division of Clinical Chemistry. Salary will be in the above ranges commensurate with experience.

The Division of Clinical Chemistry performs all the routine and special investigations for the Royal Adelaide Hospital, for peripheral hospitals and for a proportion of the private practitioners in South Australia.

The medical staff of the Division provide the consultant service in chemical pathology for the Royal Adelaide Hospital, certain other hospitals and private practitioners.

In addition, the Division is associated with establishing the Metabolic Ward within the Royal Adelaide Hospital. One of the appointees will have considerable responsibility in the organization and running of this ward. An applicant with a particular interest in this latter field, who has, or is studying for, the membership of the R.A.C.P., is preferred.

The department is engaged in a range of different research projects and is in receipt of grants for these purposes. The N.H. & M.R.C. has provided a grant for a study to assess the clinical value of multiple laboratory screening procedures of patients admitted to hospital. The other appointee will be responsible for the continuation of planning, organization and running of this study.

The Future General Practitioner

Learning and Teaching

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

Health and Diseases

Human Development

Human Behaviour

Medicine and Society

The Practice

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

Doctor in Denmark

D.Kr. 140,000

The discovery of a major new group of drugs leads this British company to develop its Scandinavian markets. Sales in the United Kingdom have quickly reached exceptionally high levels, and the new Medical Adviser will be principally concerned with demonstrating the drugs' efficiency to medical opinion. The work will entail arranging clinical trials and studies with the co-operation of medical authorities, consultants and family doctors. It offers an interesting alternative career to a doctor seeking wider horizons. Negotiations at senior levels will be involved, as well as frequent contacts with the U.K. research centre and close liaison with the marketing department. We envisage the appointment of a doctor whose qualifications are recognised in Denmark, in the age range 30-45, and who can converse easily in Scandinavian. The post will be based in the Copenhagen office. Salary will be negotiated in the region of D.Kr. 140,000 p.a., with a car provided. Interviews will be held in London or in Denmark.

(Personnel Services: Ref. PF26/4670/BMJ)

The identity of candidates will not be revealed to our client without prior permission given during a confidential discussion. Please send brief career details, quoting reference number to the address below, or write for an application form, and advise us if you have recently made any other applications.

**Five species are responsible for most bacterial respiratory infections.
'Eskacef' is effective against all of them.**

Because more than one of these species may be cultured in respiratory infection, and some may be resistant to penicillin, you need 'Eskacef'.

'Eskacef' is rapidly bactericidal against most common Gram-positive and Gram-negative organisms.

It challenges both pneumococcus and

Haemophilus influenzae, organisms commonly associated with acute exacerbations of chronic bronchitis.

It is so low in toxicity that it can be used in children, may be suitable for long term use, and, with adjustment of dosage to avoid accumulation may be used in renal failure.

'Eskacef' is available in both capsule and suspension presentations. Use it... to be sure.

Each capsule contains cephadrine 250 mg or 500 mg. Each 5 ml of suspension contains 125 mg or 250 mg cephadrine.

ALLERGIC RHINITIS

A completely fresh approach

The unique way in which sodium cromoglycate prevents asthmatic reactions has been the subject of over 150 clinical trials. Prompted by this success, more recent investigators have shown that, in the form of RYNACROM, sodium cromoglycate has a similar protective effect on the nasal mucosa and can provide year-round prophylaxis in allergic rhinitis²

RYNACROM is not a decongestant, anticholinergic, antihistamine or steroid. Its action is unlike any other form of treatment.

In the face of challenge – pollen, house dust, feathers, pets, etc. – RYNACROM (sodium cromoglycate) prevents the degranulation of those cells which would normally rupture and release histamine and inflammatory agents. Thus regular insufflation of RYNACROM provides continuous prophylaxis from a condition which, hitherto, has been difficult to control symptomatically and even more difficult to prevent. A number of patients who have failed

to respond to other forms of treatment have greatly benefited from RYNACROM!

RYNACROM does not produce inconvenient side effects associated with conventional therapy.

Hazard Ahead...

but with care, one that is readily overcome.

The 'Hazards' facing you and your family are not so easily tackled, but with the same care you can provide for yourself and your dependants with the right type of insurance.

Understandably, you may not know where to start, but the Medical Insurance Agency, with its knowledge of the insurance market and of the needs of the medical and dental professions, will help you to find the policy that is exactly right for you.

'...the active constituent of a preparation, to which alone the generic name refers, does not necessarily constitute the sole basis for its effect...what may appear to be minor changes in formulation — coating, capsuling, particle size, disintegration time, and so forth — may well make all the difference to the therapeutic efficacy of the active constituent!'

Since its introduction over ten years ago, many thousands of hypertensive patients have been treated, and are still being successfully treated, with 'Aldomet'.

To be certain that your hypertensive patient receives 'Aldomet', please be sure to prescribe 'Aldomet' by name.

Only 'Aldomet' is available in three tablet strengths: 125 mg, 250 mg, and 500 mg — which makes treatment easier for you and more convenient for your patient.

Pain and restricted movement can be a 24-hour-a-day problem

Consider 'Indocid' Capsules by day and Suppositories by night in the active stages of

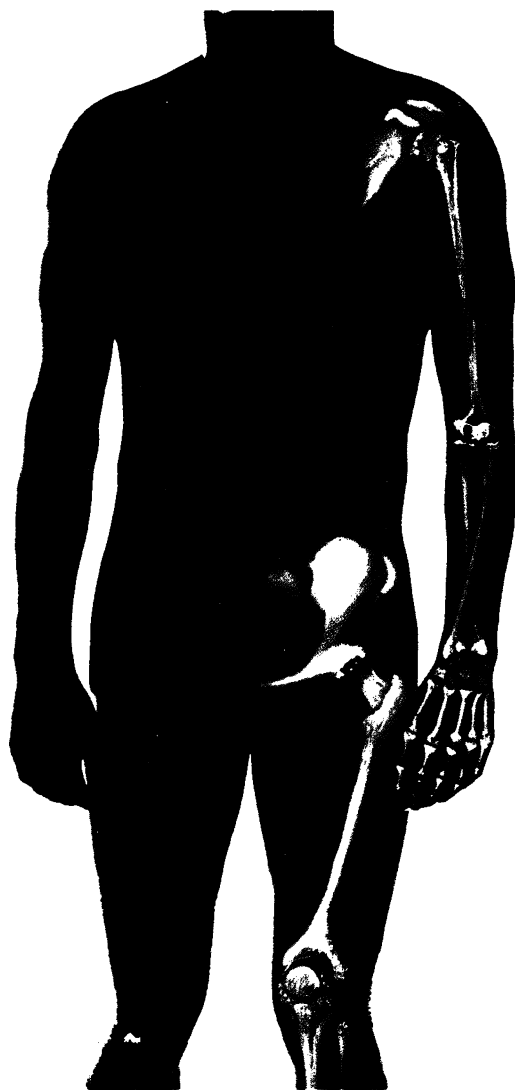

Osteoarthritis

'Indomethacin is consistently effective in relieving the pain of osteoarthritis of the hip.'

Drug Therapy, 1971, 1, 34 (Jan)

In 644 patients with osteoarthritis treated with 'Indocid', 82.9% showed a positive response.

A new antirheumatic agent: indomethacin. 2nd Laurentian Rheumatology Conference, Ste Marguerite, P.Q., Canada, Oct 1966, *Excerpta Medica Foundation*, 1968 (Apr)

Rheumatoid arthritis

'... in the classical [rheumatoid arthritic] group, which is notoriously resistant to treatment, the percentage of favorable results [with indomethacin] was surprisingly high ...'

J. Amer. med. Ass., 1966, 195, 1102 (28 Mar)

'In my own experience, the results [with indomethacin in rheumatoid arthritis] have been most gratifying ... a large number of patients who had been on maintenance corticosteroid therapy for long periods of time, were able to have the corticosteroid discontinued entirely or the dose reduced by 50 per cent.'

Med. Clin. N. Amer., 1967, 51, 1213 (Sep)

Ankylosing spondylitis

'... indomethacin seems to be almost consistently effective in ankylosing spondylitis.'

Arthr. and Rheum., 1968, 11, 56 (Feb)

'Indomethacin has been found to be highly effective and may be considered the treatment of choice in ankylosing (rheumatoid) spondylitis ...'

Med. Clin. N. Amer., 1967, 51, 1213 (Sep)

'Indocid' is available as capsules containing 25 mg and 50 mg indomethacin, and as 100 mg suppositories. Detailed information is available to physicians on request ® denotes registered trademark.

rapidly reduces
inflammation, relieves pain,
increases mobility
throughout day and night

By day, 'Indocid' Capsules exert the desired anti-inflammatory effect that permits many patients to move with less pain. At night, 'Indocid' Suppositories can provide 13 to 16 hours of relief, to allow more normal body movement in sleep.
