tabs **Flagyl** (21) 1 t.d.s.

Her kind of T.V., trichomonal vaginitis, is always an acutely distressing condition, not least because of the special anxieties that inevitably attend any genital disorder.

With 'Flagyl' one of the things you can count on is dramatic relief of the disquieting clinical symptoms. And because 'Flagyl' is an exceptionally effective trichomonacide, producing cure in 90 to 100 per cent of cases within a week¹, you can be equally sure of definitively eradicating the parasite without fear of worrying relapses or problems of resistance. Moreover, as an easily administered oral medication gratifyingly free from unwanted effects², 'Flagyl' is both an extremely convenient and a highly acceptable form of treatment.

Flagyl still unsurpassed in trichomonal vaginitis

— and for those cases where monilial infestation co-exists: the combined 'Flagyl'/nystatin treatment pack, 'Flagyl Compak'.

Each 'Flagyl' tablet contains 200 mg metronidazole

Let's keep it that way"

In urinary tract infection, antibiotics and other agents usually give prompt relief of acute symptoms. But all too often the infection is left smouldering, only to flare up again perhaps months later.

And even if the initial treatment is completely successful, the patient remains at risk from re-infection.^{1,2}

Yet this risk diminishes with time. If the patient can be kept free of infection, there should be progressively less chance of another flare-up.^{1,2}

Hiprex can help to buy this valuable time. *Hiprex*, given for months, meets the need for long-term therapy.

When the "hot" urinary tract infection cools down — finish the job with **Hiprex**

1 *Postgraduate Medical Journal* (1971) Supplement vol. 47: 31.

2 *New England Journal of Medicine* (1970) 282: 1443.

Composition Each tablet contains hexamine hippurate 1g. **Indications** The treatment of urinary tract infections, such as pyelitis, cystitis and urethritis, but excluding acute pyelonephritis. The treatment of chronic pyelonephritis, and as maintenance therapy after successful antibiotic treatment of acute pyelonephritis. The treatment of asymptomatic bacteriuria, including that occurring during pregnancy. Prophylaxis before and after urological surgery. **Dosage** Adults: 1 tablet twice daily. Children: 6-12 years: $\frac{1}{2}$ tablet twice daily. In refractory cases the dosage may be increased to: 1 tablet three or four times daily in adults, $\frac{1}{2}$ tablet three or four times daily in children aged 6-12 years. Tablets may be halved but should not be crushed. **Alkalinuria** Some patients may have an alkaline urine as a result of a predominantly vegetarian diet or occasionally due to *Proteus* or *Pseudomonas* infection. In these cases, additional acidification may be necessary to lower the urinary pH to the level required to degrade the hexamine moiety. Administration of ascorbic acid 2 g. daily in divided doses (either as powder or as tablets) is recommended in these cases. **Side-effects** Occasionally, rashes,

gastric irritation, or irritation of the bladder may occur. With prolonged administration at high dosage, the latter may lead to haematuria. All side-effects are reversible on withdrawal of the drug. **Treatment of side-effects** If the symptoms of infection such as painful micturition or bladder irritation do not subside within seven days of starting treatment, or if such symptoms develop on prolonged treatment at high dosage, this probably indicates drug-induced bladder irritation. Prompt relief can be obtained by the consumption of copious quantities of water and 2-3 teaspoonfuls of bi-carbonate of soda. **Contra-indications** Hepatic insufficiency, severe dehydration, severe renal failure (serum creatinine level > 5 mg%) or metabolic acidosis. *Hiprex* may be used where mild to moderate renal insufficiency is present. *Hiprex* is also contra-indicated as the principal therapeutic agent in acute parenchymal infections of the kidney. *Hiprex* should not be administered concurrently with sulphonamides owing to the danger of crystalluria, or with alkalinising agents such as mixtures of potassium citrate.

Hiprex is a regd. trade mark.

IN ASTHMA

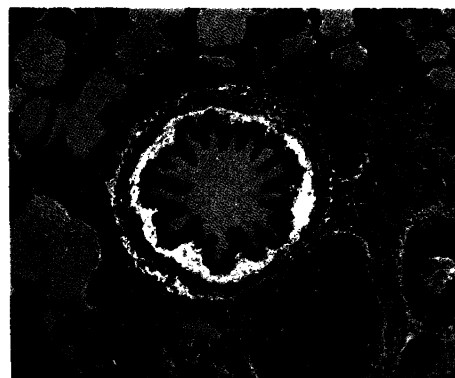

Becotide INHALER *puts steroid therapy in its place*

Becotide Inhaler contains beclomethasone dipropionate BP, a steroid which differs from those previously administered to asthmatics by aerosol in that it is highly active within the lungs in doses which are not systemically active. Used as an aerosol it provides remarkable control of asthma without causing significant systemic effects. This result is attributable to the intrinsic properties of the compound and to its localisation at the intended site of action.

Becotide effectively controls the three pathological processes of asthma — bronchospasm, bronchial mucosal oedema and hypersecretion of mucus.

Cross section of a bronchiole showing **BRONCHOSPASM**.

Cross section of a bronchiole showing **BRONCHIAL MUCOSAL OEDEMA**.

Cross section of a bronchiole showing the effect of **HYPERSECRETION OF MUCUS**.

SELECTIVE STEROID THERAPY IN ASTHMA

Extensive clinical trials of Becotide Inhaler have shown that it gives effective control of asthmatic symptoms in patients who are no longer obtaining adequate relief from bronchodilators or sodium cromoglycate.

In addition it has been shown that Becotide Inhaler therapy can be used successfully to replace systemic steroids even in asthmatic patients who have become steroid dependent.

In a double-blind controlled trial involving asthmatic patients, Becotide Inhaler provided control which was at least as effective as that obtained from oral prednisolone; the only significant difference was that plasma cortisol levels were not depressed with Becotide Inhaler therapy.

(Brit. med. J., 1972, 3, 314)

IMPORTANT

Clinical trials have highlighted the need for particular attention to the selection and clinical management of patients.

It is also important that the patient uses Becotide Inhaler correctly and regularly and that it is not confused with bronchodilator aerosols.

A full prescribing information, including details of clinical management, is available on request.

Becotide Inhaler ensures for your asthmatic patients:

- ☐ Highly effective treatment controlling the three main pathological processes involved in asthma—bronchospasm, oedema of bronchial mucosa, and hypersecretion of mucus.
- ☐ Freedom from steroid side effects including adrenal suppression.
- ☐ A fuller and less restricted life as the advantages of steroid therapy can be introduced at an earlier stage of the disease.

PRESENTATION

Becotide Inhaler is a metered aerosol which delivers 50 mcg beclomethasone dipropionate BP per inhalation. Each container of Becotide Inhaler provides 200 inhalations.

For the next ten minutes, you're the Dermatologist

It's one of the many hats you have to wear in the course of a normal working day. And while you're wearing it, your standard of diagnosis and treatment will be modelled on those of the dermatologists who taught you – and those whose advice and practice continue to give guidance. For you, now, there is the Ficoid range of topical skin preparations, bringing the standards of hospital dermatology to general practice.

The Ficoid rationale

In the Ficoid range, there are preparations meeting virtually all the specifications you may require in topical skin therapy. An anti-inflammatory effect appropriate to the clinical situation. Antibacterial cover when needed. A physical form appropriate to the lesion and the patient's skin. And all at a cost which makes Ficoid not only good dermatology but exceptionally good value for money as well.

The Ficoid range

The anti-inflammatory agent in Ficoid is fluocortolone, a fluorinated steroid adequate for even the most severe inflammation – and there is a dilute as well as concentrated form. When you need antibacterial cover, Ficoid-plus offers a wide antipathogenic spectrum without the well-known drawbacks of antibiotics.

Cosmetically elegant

To cater for crusted, scaly, lesions and dry skin, Ficoid is available in ointment form. For moist or weeping lesions, Ficoid may be prescribed as a cream or a lotion. This is particularly suitable for pilose areas. For ease of prescribing, all the Ficoid range comes in 30 g tubes, except the lotion which is in 20 ml bottles.

Ficoid 2	fluocortolone 0.2%	cream, ointment; 30 g tubes
Ficoid 2-plus	fluocortolone 0.2% clemizole hexachlorophenate 2.5%	cream, ointment; 30 g tubes
Ficoid 5	fluocortolone 0.5%	cream, ointment; 10 g and 30 g tubes lotion, 20 ml bottle
Ficoid 5-plus	fluocortolone 0.5% clemizole hexachlorophenate 2.5%	ointment 10 g, and 30 g tubes

Clinical evidence for Ficoid*

In one study* fluocortolone was assessed by 110 doctors in the treatment of 1,028 patients with a variety of skin conditions including eczema (44%), dermatitis (15%) and psoriasis (8%). The trial involved both general practice and hospital cases. Results were summarised as follows:

	No	Cleared or improved	Unchanged or worse
Fluocortolone/clemizole hexachlorophenate	605	543	62
Fluocortolone	423	376	47
Totals	1028	919	109
	100%	90%	10%

Contra-indications

In infants, long-term continuous topical steroid therapy should be avoided. Adrenal suppression can occur even without occlusion.

Precautions

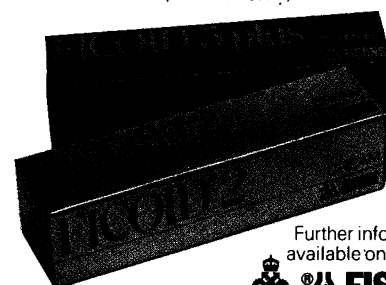

Topical administration of corticosteroids to pregnant animals can cause abnormalities of foetal development.

The relevance of this finding to human beings has not been established, however, topical steroids should not be used extensively during the first trimester of pregnancy, ie in large amounts or for prolonged periods. As with all topical steroids, there is a risk of striae following extensive therapy.

The Army asks a lot of a doctor. Here's what we give him in return.

Any young Doctor is bound to find his work demanding. And we won't pretend that the Army offers you a cushy life. What it does offer you, is opportunity and experience that you'd be hard put to surpass in civilian life.

You'll have ample opportunity to travel, anywhere in the world where the British Army is on exercises or operations.

You'll also gain considerable medical experience, with the chance of specialist post-graduate studies if you opt for a permanent commission.

Initially you can join for 3 or 5 years with the opportunity to convert to a regular commission.

You'll hold the rank of Captain and at the age of 24 you could be earning £3942 a year with 6 week's paid leave, plus allowances for educating your children, uniform etc.

Your surgery is equipped and staffed by the Army.

Your practice covers not only soldiers, but their wives and children as well. And if you want to set yourself up in civilian practice, you'll appreciate the tax-free gratuity that comes with all the valuable experience you've picked up in your short

service commission. The gratuity works out at £1500 after three years and £3000 after five.

If you're interested, we can arrange for you to visit one of our medical establishments and talk with serving RAMC Officers before you make your final decision.

HAY FEVER

THIS IS A SIMPLIFICATION OF THE SEQUENCE THAT LEADS TO THE IMMEDIATE ALLERGIC RESPONSE

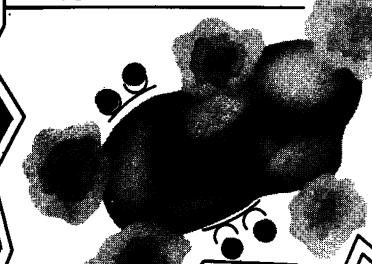

1. GRASS POLLEN ANTIGENS ENTER THE BLOODSTREAM, CAUSING THE FORMATION OF LARGE NUMBERS OF ANTIBODIES.

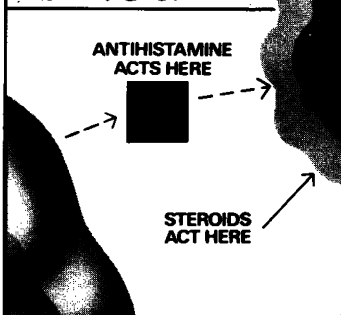

2. IN ALLERGIC PATIENTS SOME ANTIBODIES ATTACH THEMSELVES TO CERTAIN CELLS, SENSITISING THEM. WHEN THE ANTIGENS AGAIN COME INTO CONTACT WITH THE ATTACHED ANTIBODIES...

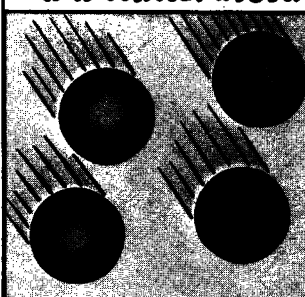

3. THE CELLS DISRUPT RELEASING HISTAMINE AND OTHER PRODUCTS - SRS-A, BRADYKININ, ETC. THESE CAUSE THE CLASSIC HAY FEVER SYMPTOMS - TISSUE INFLAMMATION, OEDEMA, RHINORRHOEA, PAROXYSMAL SNEEZING.

4. PALLIATIVE MEASURES MERELY REDUCE THE EFFECTS OF CELL-DISRUPTION PRODUCTS, BUT THEY CAN HAVE UNDESIRABLE SIDE EFFECTS LIKE DROWSINESS.

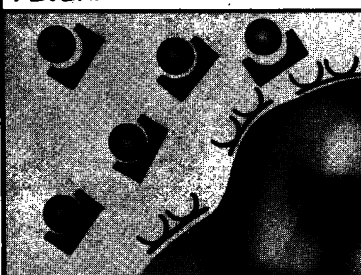

5. **ALAVAC-P** OFFERS A FUNDAMENTAL ANSWER IMMUNISATION.

6. ALAVAC-P PROMOTES THE PRODUCTION OF CIRCULATING ANTIBODIES.

7. THESE CAPTURE THE ALLERGENS BEFORE THEY CAN EVER REACH THE SENSITISED CELL - PREVENTING THE SYMPTOMS OF HAY FEVER.

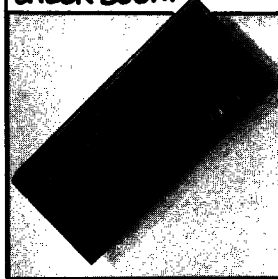

8. ALAVAC-P CONSISTS OF A SHORT, EASY-TO-ADMINISTER COURSE OF INJECTIONS, GIVEN WELL BEFORE THE HAY FEVER SEASON STARTS IN MAY / JUNE. ALAVAC-P IS SUITABLE FOR A WIDE SELECTION OF PATIENTS.

9. THREE SUCCESSIVE YEARS OF ALAVAC-P TREATMENT CAN CONFER EVEN LONGER-TERM FREEDOM FROM HAY FEVER.

10. YOU CAN PRESCRIBE ALAVAC-P FROM CASE HISTORY ALONE - AND TO SIMPLIFY THE RECORDING OF PATIENTS, BENCARD PROVIDE A PATIENT CHECK BOOK.

11. IMMUNISATION WITH ALAVAC-P GIVES SUMMER-LONG PROTECTION WITHOUT THE UNWANTED SIDE EFFECTS OFTEN ASSOCIATED WITH SYMPTOMATIC THERAPIES.

Here's why Alavac-P gives the most practical and effective action against hay fever and grass pollen asthma.

Alavac-P is an adsorbed, short-course (8-9 injections) hay fever vaccine.

It is a practical, more permanent alternative to temporary palliative measures.

It is formulated from the pollens of 12 common grasses that cause over 80% of hay fever and grass pollen asthma in the British Isles.

Minimal risk of reaction is ensured by the slow release of active material into the system.

Alavac-P provides clinically effective pre-seasonal treatment for patients of all degrees of sensitivity over 5 years of age.

Long-term protection may be achieved and deterioration

reversed in many patients by repeating Alavac-P treatment in three successive years.

Skin tests are not needed: Alavac-P may be prescribed from case history and clinical symptoms alone.

The course should be started by early March to ensure protection before the onset of the grass pollen season in mid-May.

Ready-assembled disposable syringes with attached needles are included with each set of vials together with instructions on administration, dosage and precautions.

Alavac-P is prescribable on N.H.S. form E.C.10.

Basic N.H.S. price - £5.85 per set.

A booklet with further information on Alavac-P (regd) and hay fever immunity is available from: Bencard, Freeport, Great West Road, Brentford, Middlesex.

We're proud of our old boys

Take this class at the turn of the century for instance. Then, as now, Hoechst employed some of the finest scientists of the age.

On the left of the picture you see Friedrich Stolz (who proudly insisted that his bicycle should be included), one of the most illustrious of Hoechst's early pioneers. Stolz synthesised Pyramidon and went on to produce Adrenaline, the first synthetic hormone.

In our album you'd find three Nobel Prize winners, Robert Koch, the bacteriologist, Emil von Behring, the founder of immunology, and Paul Ehrlich, pioneer of chemotherapy; men who changed the course of medical history, in close collaboration with Hoechst.

Our old boys have given us good reason to be proud, but we don't rest on our laurels. Today Hoechst is Europe's largest chemical company, with 140,000 employees throughout the world - 10,300 of them engaged solely on research and development with a budget last year of over £60 m.

Current product successes include Lasix, the most widely prescribed diuretic in clinical practice, Daonil, a

treatment for maturity-onset diabetes, Streptase, Synadrin, Daneral-SA, and many more.

Today, medical science is moving at a startling pace and we are at the threshold of, perhaps, the most significant era in the fight against disease. Hoechst is in the forefront of progress and has established a medical research centre at Milton Keynes. Here, Hoechst will use the most advanced nuclear techniques to test and assess new and more advanced drugs and materials for the early diagnosis and treatment of the major diseases of our time.

We're proud of our "new boys" too.

Less pain, greater mobility – these are true measures of effectiveness in the treatment of arthritis. In a recent study* of nearly 1000 arthritic patients treated with Brufen, 70% of the patients showed consistent improvement in terms of relief of pain and increased activity. Highly effective, Brufen is also well tolerated – almost certainly better tolerated than any other anti-arthritic drug. **Practitioner*, 1971, 207, 343

Flatulent dyspepsia. And not for the first time.

Or even the second or third. For this patient it is a recurring problem, and one which a wide variety of antacids and other medications have so far failed to control.

Maxolon offers a real break in this all too familiar routine. It treats the disturbed motility which is often the underlying cause of flatulent dyspepsia. Maxolon prevents symptoms arising in four out of five patients. In a month, normal motility may be re-established.

Prescribe a month's course of Maxolon for your next regular patient. She'll get *effective* relief, probably for the first time.

Prove Maxolon for yourself. Use Maxolon on your regular flatulent dyspepsia patients. For a 7 day starter pack write to Beecham Research, Freepost, Brentford, Middlesex—post-free in the United Kingdom. *Full information is available on request.*

Interest rates offered to big investors and small savers alike are many and varied, but each investment has its own particular set of terms and conditions.

Some investments tie up your savings for a fixed period of years, whilst others offer prompt withdrawal facilities.

Some are designed to provide regular income; others offer capital growth. Either may or may not be taxable.

Both may incorporate life assurance and the income tax relief then obtainable can further improve the attractiveness of the investment.

It's all very confusing unless you are a financial expert. How else can you choose a plan to suit your own particular needs and be safe in the knowledge that the Company to which you are to entrust your savings is absolutely secure?

Whether you are interested in saving a monthly sum out of salary, or making a single investment, you would be wise to consult the experts at the M.I.A. They are there to help you, as they have helped thousands of your colleagues—their advice is free and entirely without obligation.

Fast touring. Plus vast storing.

The one on the left seats five in limousine comfort, cruises all day in the nineties, corners very fast indeed and handles just beautifully.

The one on the right seats five in limousine comfort, cruises all day in the nineties, corners very fast indeed, handles just beautifully and takes nearly half a ton of luggage.

Take your pick.

Either way you'll get an individually designed, no-compromise car. (The estate is a proper estate, with a long chassis

and special suspension—not just a boxy-backed saloon with heavy duty springs).

And a trustworthy car.

Because we're fanatical about reliability. For instance, to get the quality we want, we make a lot of parts ourselves that are usually bought from outside suppliers (e.g. shock-absorbers). We bench-test every single engine. And road-test every single car.

It's an unusual attitude, and it makes for unusual cars.

We think you'll appreciate it. And them.

UNIVERSITY OF EXETER
Postgraduate Medical Institute

A full-time postgraduate course lasting 10 weeks will begin on 25th April, 1973. These courses are held 3 times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventative medicine, pathology, psychiatry, orthopaedics, and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for 1 or 2 weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act 1968. These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least 5 years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom).

Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire.

PRACTICE VACANCY

STOCKTON-ON-TEES, TEESSIDE
Applications are invited for a single-handed vacancy based on Stockton-on-Tees, which is classified as "Designated Type One". The vacancy is due to the retirement of the previous doctor and the list count is 2,145.

Local Health Authority attachments will be available to the practice. The practice main surgery accommodation is the subject of a compulsory purchase order effective from approximately May, 1973 but the accommodation will be available for rental from the outgoing doctor until this date. It is hoped that the Local Authority will provide new surgery accommodation on a rental basis close to the existing surgery; this had been earmarked for the outgoing doctor. There is a branch surgery (which may be available on a rental basis) at Yarm some three miles south of Stockton to serve some 400 patients who live in the Yarm/Eaglescliffe area. The successful applicant will be required to commence practice as soon as possible after 1st April, 1973. Full details and Application Form E.C.16a can be obtained from the Clerk, Teesside Executive Council, 1 Grange Road, Middlesbrough, Teesside, TS1 5BB. Tel: Middlesbrough 48371. Closing date for the receipt of applications is the 2nd March, 1973. (H10604)

**NORTH EAST METROPOLITAN
REGIONAL HOSPITAL BOARD
Chelmsford Group
Hospital Management Committee****SURGICAL REGISTRARS**

Applications are invited for the following three Surgical Registrar posts becoming vacant early in May. The appointments offer wide responsibility and experience in elective and emergency surgery, in very busy hospitals in the Home Counties.

First Post — duties mainly at Broomfield and St. John's Hospitals in general and vascular surgery.

Second Post — duties mainly at Chelmsford & Essex and St. John's Hospitals in general and genito-urinary surgery.

Third post — duties mainly at Broomfield Hospital in general and thoracic surgery.

The posts carry equal seniority and the emergency "on duty" is shared between them with their respective consultants. A fellowship of one of the recognized colleges would be an advantage. The posts are tenable for one year, renewable. Applicants are expected to take part in the functions of the Academic Unit which include undergraduate and postgraduate teaching. Married accommodation is available.

SERVICES

Are you in your Pre-Registration Year —or recently fully registered?

Before you commit yourself to your permanent pattern of life, consider what the RAF has to offer

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in paediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties; perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years' external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large financial outlay at the beginning of your career.

Flying. As well as being responsible for the medical care of aircrew, RAF doctors are encouraged to fly and thereby gain first-hand knowledge of the operational environments. Their responsibilities can also include aero-medical evacuation, by the RAF's remarkable long-range airborne ambulance service, using Britannias and VC 10s of Strike Command. In 1971, 2431 patients were flown back to the United Kingdom. Equipment on the aircraft is most elaborate, and can include Radcliffe ventilators, dialysis machines, air-conditioned oxygen cots and a number of items specially designed by RAF consultants. A doctor—say a physician, a surgeon or an anaesthetist—may often be needed as part of the team to 'special' a patient.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3942; after 5 years it rises to £4767; after 13 years to £5898. There are various other allowances; for instance, with children at boarding school the figures are £363 (net) for one child, £795 (net) for two children, £1314 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain D. G. M. Hills, OBE, MB, BS, DPH, RAF, Ministry of Defence, 1-6 Tavistock Square (724 KN1), London, WC1H 9NL. Or visit your nearest RAF Careers Information Office.

2 Medical Advisers

AFRICA

Our client—Fisons Limited, Pharmaceutical Division—is expanding its overseas operations. As part of this expansion programme, the following new medical appointments are to be made.

1. Resident Medical Adviser, Middle East

This man will have his headquarters at the Company's offices in Beirut, and will operate throughout the Middle East.

2. Resident Medical Adviser, Africa

This man will be based in Nairobi, and will operate throughout most of the African continent except for South Africa, Rhodesia and the Portuguese territories.

Interviews will be held in the UK and/or locally, as appropriate. In the first instance, please write briefly and in strict confidence to:

Each physician will be responsible for designing, initiating, coordinating and evaluating clinical trials on new and established therapeutic products, for arranging medical meetings, for negotiating with local health and drug registration authorities, and for the many other and varied medical activities of the Company.

After several weeks at the UK headquarters learning about the Company and its products, the men appointed will be accorded wide scope for personal initiative within the territories for which they are responsible.

Applicants should be fully qualified medical practitioners, ideally within the age range 30–45. Some previous residential experience within the area to be covered is important. So, too, is a flexible and energetic disposition, in view of the extensive travel involved. Apart from a good knowledge of English, a working knowledge of other relevant languages, especially French, would be a definite asset.

Benefits are those to be expected of a progressive international organisation, and include a first class salary and a company car. The posts should prove particularly attractive to internationally-minded physicians seeking a new challenge and the opportunity to contribute directly to medical progress.

CANADA CANADIAN RED CROSS SOCIETY 95 Wellesley Street East, Toronto M4Y 1H6, Ontario

Applications are invited for the post of National Director of the Canadian Red Cross Blood Transfusion Service. The position involves the administrative and medical direction of the service on a national basis, its relationships with hospitals and hospital commissions across Canada and with the Federal Department of Health and Welfare. The Service collects, processes, tests and delivers blood to hospitals along with coagulation and fractionation products. The latter are manufactured by the Connaught Laboratories. Research is carried out in the National Laboratory and in some of the fifteen B.T.S. centres across the country.

Besides a medical degree the successful applicant should have a degree in public health, or a fellowship in internal medicine. Training and experience in the field of haematology and at least a working knowledge of French are highly desirable. Applicants should possess a high degree of good judgment, originality, maturity and leadership; be capable of accepting independent responsibility; able to write clearly and concisely and to summarize and abstract.

Commensurate with qualifications and experience, the salary will be open for negotiation. The Society has a subsidized comprehensive programme of employee benefits including pension plan and life, income protection, medical and health insurance plans.

While the position does not become vacant until the Autumn of 1973, it is hoped to make an appointment in the near future. Applications should include a complete resume and should be sent to the National Commissioner, at the above address, under confidential cover, to reach his office not later than the 1st June, 1973. In infected eczema,
it's the eczema you worry about.

Betnovate-N

stops the scratching that starts the
infection that results in infected eczema.

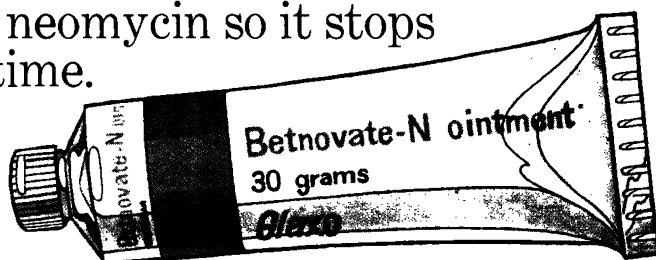

And does it quicker than other preparations designed
to combat infected eczema, because it contains
betamethasone as 17-valerate, a more effective steroid.

Betnovate-N also contains neomycin so it stops
most infections at the same time.

And at a price others
can't match.

PROBLEMS OF THE NEWBORN

from the British Medical Journal

Many doctors outside the neonatal and paediatric field may be unaware of the rapid advances made in the care of the newborn in the last decade. Last year the *B.M.J.* published a series of articles discussing the diagnosis and management of common conditions affecting newborn babies. The articles have been revised by their authors and collected together as a booklet, forming a useful guide to both serious problems and more everyday topics which confront doctors in their practice.

When chest infections clamp down Magnapen relieves the pressure.

As the weather worsens, demands on your time increase. This winter you can relieve some of the pressure by prescribing Magnapen for the more serious chest infections which you see. For acute-on-chronic bronchitis. For pneumonia. For infections following flu.

Magnapen gives you a greater chance of first time success in these serious cases because it is active against virtually all bacteria encountered in General Practice. So you can rely on Magnapen even when there are no laboratory reports to guide you.

Magnapen's greater certainty means that the patient is more likely to respond quickly. More likely to be up and about again sooner. And Magnapen can save you the time which you might otherwise have to spend on repeat visits, second consultations or night calls to patients who may fail to respond to other antibiotics.

Full information is available on request.
Magnapen* (250mg ampicillin with 250mg flucloxacillin)
