

# A good friend in

Amoxil can be relied on to treat commonly occurring bacterial infection of the ear, nose and throat. This was demonstrated in a recent clinical trial<sup>1</sup> involving 150 children where Amoxil was clinically successful in 94% of cases.

Amoxil's broad spectrum of activity coupled with its outstanding oral absorption<sup>2</sup> ensure that high bactericidal serum levels are available to act quickly and decisively at the site of infection.

Add to this the convenience of a three times daily dosage regime, the degree of safety associated with penicillin therapy, treatment costing as little as 16p per day, and a wide range of highly acceptable oral presentations – further good reasons why Amoxil represents practical antibiotic therapy at its best.

Amoxil is a good friend in throat infections – this happy eight year old certainly thinks so.

Further information on Amoxil regd (amoxycillin) is available from: Bencard, Freeport, Great West Road, Brentford, Middlesex.

 **Bencard**

#### Prescribing information.

**Dosage:** Adults 250 mg three times a day. Children – up to ten years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

**Presentation:** Amoxil capsules 250 mg. Amoxil syrup 250 mg/5 ml, 100 ml bottle. Amoxil syrup 125 mg/5 ml, 100 ml bottle. Amoxil Paediatric Suspension 125 mg/1.25 ml, 20 ml bottle with pipette.

Amoxil presentations contain amoxycillin as the trihydrate.

**Contra-indication:** Amoxil is a penicillin and should not be given to penicillin-hypersensitive patients.

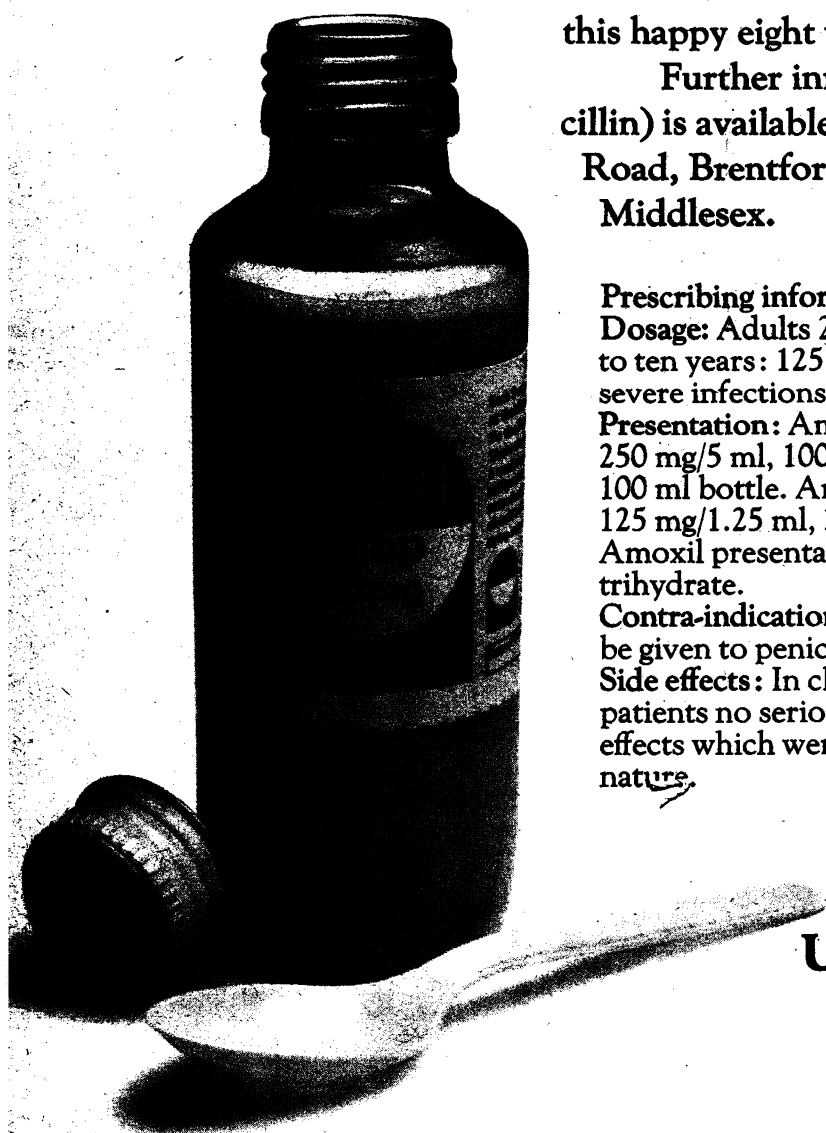

**Side effects:** In clinical trials involving more than 1,500 patients no serious side effects were reported. Those side effects which were encountered were of a mild transitory nature.

# Intal doesn't relieve asthmatic attacks

## It prevents them

Steroids, bronchodilators and antihistamines, whether in aerosol or tablet form, are only symptomatic treatments. Whereas INTAL actually *protects* the patient from asthmatic attacks—day in, day out.

By preventing the release of spasmogens INTAL affords daily prophylaxis for as long as any challenge exists. More than 150 clinical trials have proved its effectiveness, safety and ease of administration.

But only an asthmatic can really appreciate the difference it makes.

## CANCER OF THE UTERINE CERVIX

This book describes the evolution of the comprehensive, co-ordinated, and multi-disciplinary cancer control programme for cervical cancer in a population approaching five million. This programme, centred at the Christie Hospital, Manchester, England, includes preventive cytological screening, early diagnosis by public and professional education, the treatment of patients with established cervical cancer, rehabilitation, follow-up and statistical evaluation, and finally, terminal care for those requiring it. Each of these aspects of cancer control is discussed in detail.

The aim was to write a balanced book, the emphasis being on the need for a holistic approach to cervical cancer in a large population. The reader will, however, find a full description of the Manchester Radium Technique, the rationale of which is often ill-understood and misquoted. Hitherto unpublished reports on a series of six clinical trials are presented, as well as a report on a study of radio-resistance in cervical cancers. The statistical details of curability will be new to some readers, especially perhaps to gynaecologists.

## Doctors in the Australian Army get the best of all worlds

A new life in Australia. With first class passage paid for you and your family. A job waiting—and all the advantages of a service practice.

With extraneous administration taken off your hands, you can really do your job properly. You could be in an R.M.O. unit, field ambulance station or military hospital and there are opportunities for updating medical knowledge and techniques. Then there's the sports and social side, too.

The sort of man we're looking for is preferably under 40—with medical qualifications registerable in the Commonwealth of Australia. He's medically fit—prepared to serve anywhere and is a British subject eligible for permanent residence in Australia. If this sounds like you, this is what we'll do for you.

You'll be appointed to a Short Service Commission for 4 years in the Medical Corps of the Australian Army in the minimum rank of Captain, where your salary would amount to £4,773 per annum after the equivalent of 5 years service. (Your professional experience in England serves to ante-date your period of service). Tax and a refunded retirement benefit will be deducted from this—though your clothing and marriage allowances of £51 and £345 per annum are not taxed. You also receive a bounty of about £1,540.

If this sounds like your sort of life, contact: Brig. C. F. Flint, O.B.E., Australian Army Representative, Australia House, Strand, London WC2. Telephone: 01-836 2435 Extn. 356.

# Medicine in a Tropical Environment

Edited by A. G. Shaper, J. W. Kibukamusoke, M. S. R. Hutt

*Medicine in a Tropical Environment* is intended for medical students and doctors working in tropical and developing countries. The essays bring together specific problems of the tropical environment which have been the subject of recent investigation, and the authors write on them from personal experience. Little of the material on which the essays are based was available more than five years ago. To doctors in temperate climates preparing themselves for medical work in developing parts of the world *Medicine in a Tropical Environment* is essential reading.

**CONTENTS:** Measles — Buruli Ulcer — Myositis — Schistosomiasis — Parotitis — Fungal infections — Tuberculosis — Scleroma — Meningitis — Melanoma — Nasopharyngeal carcinoma — Burkitt's lymphoma — Kaposi sarcoma — Growth and development — Kwashiorkor — Malnutrition — Thyroid disease — Tropical splenomegaly syndrome — Neutrophils and eosinophils — Psychiatry — Endomyocardial fibrosis — Intestinal malabsorption — Pancreatic disease — Necrotizing enteritis — Liver disease — Portal hypertension — Nephrotic syndrome.

## Gynaecology in General Practice

As in other branches of medicine, the pattern of gynaecological problems likely to be encountered by the general practitioner will probably change in the future. Moreover, many doctors, now in practice were taught little about some of the topics which are important today and are likely to become even more so. In 1971 the *B.M.J.* published a series of articles in the "Medical Practice" section discussing the management of various gynaecological disorders in a domiciliary setting. These have now been collected together as a booklet entitled *Gynaecology in General Practice* and provides a useful and up-to-date account of gynaecology in general practice.

The Betadine pack contains 14 vaginal pessaries, an applicator and patient's instructions. Also available Betadine vaginal gel - 80g tube with applicator, and Betadine vaginal douche - 500ml.

## a certain way to treat a lady

The certainty of positive microbicidal action, against all classes of vaginitis pathogens, is provided by Betadine vaginal pessaries. Therefore the risk of overgrowth of non-susceptible organisms associated with specific therapies is avoided.

Because of povidone iodine's decisively microbicidal action Betadine pessaries deodorize, which is particularly important in all forms of infective vaginitis.

Oral systemic anti-protozoal agents, antifungals and antibiotics may be used concomitantly if this is desired.

The following alternative forms of Betadine vaginal therapies are recommended:

Betadine Vaginal Pessaries - night and morning  
Each pessary contains povidone-iodine 200 mg (USNF)

Betadine Vaginal Gel - at night  
contains povidone-iodine 10% w/w (USNF)

Betadine Vaginal Douche - in the morning  
contains povidone-iodine 10% w/w (USNF)

### A CONFERENCE ON REHABILITATION ENGINEERING IN PAEDIATRIC ORTHOPAEDICS

Will be held at the University of Dundee from 25th-29th June, 1973.

Sponsored by the Eastern Regional Hospital Board and in association with the Scottish Home and Health Department, the University of Dundee and The International Society for Prosthetics and Orthotics.

The Conference will outline and review the various locomotor and functional disabilities in children with particular reference to the application of those engineering principles and techniques essential to effective rehabilitation.

The programme will consider all those conditions requiring prosthetic, orthotic and other technical equipment including: Congenital and acquired amputations. Other deformities of the musculo-skeletal system. Paralytic conditions. Haemophilia etc.

Working groups composed of internationally recognized persons will meet immediately prior to the Conference to examine the field of rehabilitation engineering and to identify the critical areas for future progress. The Reports of these groups will be submitted to the Conference for discussion in the light of the Conference proceedings. The Conference contributions, reports and discussions will be published.

The Conference is properly multidisciplinary and is intended for general and orthopaedic surgeons, physical medicine specialists, prosthetists, orthotists or orthopaedic technicians, therapists and remedial gymnasts, biomedical engineers and others with a stated interest in the field.

It is anticipated that the consolidated registration fee inclusive of board and accommodation will be of the order of £45. Members of the International Society for Prosthetics and Orthotics will be afforded a reduction in the registration fee.

Excellent but limited hostel accommodation is available. Early application is recommended. Details may be obtained from the Dundee Limb Fitting Centre, 133 Queen Street, Broughty Ferry, Dundee, Scotland. (20961)

## **suspension**

Benoral Suspension, a new and highly effective anti-inflammatory analgesic, does not produce the gastric irritation which so often complicates therapy with aspirin and other anti-arthritic agents.

Because it has a long duration of effect, Benoral allows a simple twice-daily dosage regimen which controls swelling and pain and affords significant relief from night discomfort and early morning stiffness.

**WINTHROP**

Benoral Suspension contains 40% w/v benorylate. Benoral is a registered trade mark  
Full information is available on request from Winthrop Laboratories, Surbiton-upon-Thames, Surrey

## **Prescribe Penbritin with Confidence for infections in children**

Confidence is born of experience. And experience with Penbritin in the treatment of ear, nose and throat infections has established an outstanding record of safety and effectiveness.

Penbritin gives you broader cover than penicillin V—yet retains all the benefits of penicillin safety.

And Penbritin has none of the tooth-staining problems associated with the use of tetracyclines in young children.

# VENTOLIN

## for effective bronchodilatation without cardiac stimulation

Ventolin is available in a wide range of preparations, all of which contain salbutamol BP. This compound has a highly selective action on bronchial muscle, causing maximal dilatation with low dosage. Therapeutic doses of salbutamol are virtually devoid of effects on heart or blood pressure; this is now so well established that Ventolin is the only adrenergic bronchodilator that is indicated for the treatment of bronchospasm in patients with concomitant heart disease or hypertension.

*Ventolin Inhaler* for rapid, effective relief of asthmatic attacks.

*Ventolin Tablets 2 mg and 4 mg* for routine oral bronchodilator therapy.

*Ventolin Syrup* fruit flavoured for ready acceptability by children.

*Ventolin Spandets* sustained-action tablets, particularly suitable where nocturnal bronchospasm is a problem.

### Ventolin sets a higher standard in bronchodilator therapy

Full information is available on request.
