congestion**

A new oral agent capable of clearing viscous bronchial secretions, reducing hypersecretion and adjusting the chemical balance of mucus, MUCODYNE is a new, physiological approach to the management of mucous congestion.

The illustrations show how MUCODYNE cleared viscous secretions in rats with SO₂ induced bronchitis, and reduced hypersecretion despite continuing exposure to SO₂. In man MUCODYNE has proved clinically beneficial in trials involving 400 patients with chronic respiratory disease.

MUCODYNE is a flavoured, clear yellow syrup containing 5% w/v of S-carboxymethylcysteine. It is available in bottles of 200 ml.

There may be more to his insomnia than sleepless nights

**'Tryptizol' can help to relieve
the anxiety-depression that
disturbs sleep.**

Insomnia is one of the most frequent presenting symptoms of the anxiety-depressive syndrome. In addition to its antidepressant action, 'Tryptizol' has a rapidly apparent anti-anxiety effect. It can quickly relieve the sleep disturbance associated with depression, usually obviating the need for hypnotics. While the patient is encouraged by this early improvement, 'Tryptizol' can effectively treat other distressing symptoms of the illness, such as agitation, anorexia, lack of interest, and lowered mood.

Tryptizol®

Amitriptyline hydrochloride/MSD

a single solution to a dual problem

'Tryptizol' is supplied as tablets containing 10 mg, 25 mg, and 50 mg amitriptyline hydrochloride/MSD. The 50 mg tablet is especially convenient when a relatively large dose is prescribed at bedtime. 'Tryptizol' is also available as a syrup, and as an injection. Detailed information is available to physicians on request.

More effective than ampicillin or tetracycline

In clinical trials^{1,2} the reduction obtained in sputum volume and purulence with SEPTRIN was superior to results with either ampicillin or tetracycline.

Highly active against both primary and secondary invaders

... not only are the two primary pathogens *Strep pneumoniae* and *H influenzae* sensitive, but so are the secondary invaders such as klebsiella which often replace them after antibiotic treatment.³

CRESCORMON

human growth hormone

for pituitary dwarfism

Growth hormone is species-specific.
CRESCORMON (Human Growth Hormone Kabi)
is prepared from human pituitary glands.
(*Biochim. Biophys. Acta*, 74, 525, 1963).

Only carefully selected material is used; the homogeneity of the resultant highly purified human growth hormone is checked and its potency is assayed by double antibody radioimmuno and biological techniques.

Treatment with CRESCORMON results in accelerated growth velocity, most marked during the first months, and corresponding to age over the first year.

No adverse reactions have been observed. In a few patients a low titre of antibodies has developed. The growth rate of these patients, however, was not decreased.

THE HISTAMINE CHALLENGE:

Can any single antihistamine tablet fight off attacks for 24 hours?

In a study† designed to test the duration of protection afforded by PRO-ACTIDIL*, human volunteers were given intradermal injections of histamine and the areas of flare and weal response were measured. After the responses had completely disappeared one PRO-ACTIDIL tablet was administered to each volunteer and the histamine challenge was repeated. By measuring the reduction in areas of flares and weals the protective effect of PRO-ACTIDIL could be plotted for the 24 hours following administration. After 24 hours the weals still showed a reduction of 65 per cent and the flares a reduction of 83 per cent. The authors concluded that the antihistaminic effect of PRO-ACTIDIL lasts for 24 hours.

For the next ten minutes, you're the Dermatologist

It's one of the many hats you have to wear in the course of a normal working day. And while you're wearing it, your standard of diagnosis and treatment will be modelled on those of the dermatologists who taught you - and those whose advice and practice continue to give guidance. For you, now, there is the Ficoid range of topical skin preparations, bringing the standards of hospital dermatology to general practice.

The Ficoid rationale

In the Ficoid range, there are preparations meeting virtually all the specifications you may require in topical skin therapy. An anti-inflammatory effect appropriate to the clinical situation. Antibacterial cover when needed. A physical form appropriate to the lesion and the patient's skin. And all at a cost which makes Ficoid not only good dermatology but exceptionally good value for money as well. *

The Ficoid range

The anti-inflammatory agent in Ficoid is fluocortolone, a fluorinated steroid adequate for even the most severe inflammation - and there is a dilute as well as concentrated form. When you need antibacterial cover, Ficoid-plus offers a wide antipathogenic spectrum without the well-known drawbacks of antibiotics.

Cosmetically elegant

To cater for crusted, scaly, lesions and dry skin, Ficoid is available in ointment form. For moist or weeping lesions, Ficoid may be prescribed as a cream or a lotion. This is particularly suitable for pilose areas. For ease of prescribing, all the Ficoid range comes in 30 g tubes, except the lotion which is in 20 ml bottles.

Ficoid 2	fluocortolone 0.2%	cream, ointment; 30 g tubes
Ficoid 2-plus	fluocortolone 0.2% clemizole hexachlorophenate 2.5%	cream, ointment; 30 g tubes
Ficoid 5	fluocortolone 0.5%	cream, ointment; 10 g and 30 g tubes
Ficoid 5-plus	fluocortolone 0.5% clemizole hexachlorophenate 2.5%	lotion, 20 ml bottle ointment 10 g, and 30 g tubes

Clinical evidence for Ficoid

In one study* fluocortolone was assessed by 110 doctors in the treatment of 1,028 patients with a variety of skin conditions including eczema (44%), dermatitis (15%) and psoriasis (8%). The trial involved both general practice and hospital cases. Results were summarised as follows:

	No	Cleared or improved	Unchanged or worse
Fluocortolone/clemizole	605	543	62
hexachlorophenate			
Fluocortolone	423	376	47
Totals	1028	919	109
	100%	90%	10%

Contra-indications

In infants, long-term continuous topical steroid therapy should be avoided. Adrenal suppression can occur even without occlusion.

Precautions

Topical administration of corticosteroids to pregnant animals can cause abnormalities of foetal development.

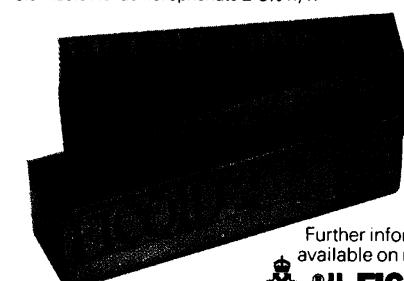

The relevance of this finding to human beings has not been established, however, topical steroids should not be used extensively during the first trimester of pregnancy, ie in large amounts or for prolonged periods.

As with all topical steroids, there is a risk of striae following extensive therapy.

"Let's keep it that way"

In urinary tract infection, antibiotics and other agents usually give prompt relief of acute symptoms. But all too often the infection is left smouldering, only to flare up again perhaps months later.

And even if the initial treatment is completely successful, the patient remains at risk from re-infection.^{1,2}

Yet this risk diminishes with time. If the patient can be kept free of infection, there should be progressively less chance of another flare-up.^{1,2}

Hiprex can help to buy this valuable time. *Hiprex*, given for months, meets the need for long-term therapy.

**When the "hot"
urinary tract infection
cools down — finish the job with**

Hiprex

1 Postgraduate Medical Journal (1971) Supplement vol. 47: 31.

2 New England Journal of Medicine (1970) 282: 1443.

Composition Each tablet contains hexamine hippurate 1g. **Indications** The treatment of urinary tract infections, such as pyelitis, cystitis and urethritis, but excluding acute pyelonephritis. The treatment of chronic pyelonephritis, and as maintenance therapy after successful antibiotic treatment of acute pyelonephritis. The treatment of asymptomatic bacteriuria, including that occurring during pregnancy. Prophylaxis before and after urological surgery. **Dosage** Adults: 1 tablet twice daily. Children: 6-12 years: $\frac{1}{2}$ tablet twice daily. In refractory cases the dosage may be increased to 1 tablet three or four times daily in adults, $\frac{1}{2}$ tablet three or four times daily in children aged 6-12 years. Tablets may be halved but should not be crushed. **Alkaluria** Some patients may have an alkaline urine as a result of a predominantly vegetarian diet or occasionally due to *Proteus* or *Pseudomonas* infection. In these cases, additional acidification may be necessary to lower the urinary pH to the level required to degrade the hexamine moiety. Administration of ascorbic acid 2 g. daily in divided doses (either as powder or as tablets) is recommended in these cases. **Side-effects** Occasionally, rashes,

gastric irritation, or irritation of the bladder may occur. With prolonged administration at high dosage, the latter may lead to haematuria. All side-effects are reversible on withdrawal of the drug. **Treatment of side-effects** If the symptoms of infection such as painful micturition or bladder irritation do not subside within seven days of starting treatment, or if such symptoms develop on prolonged treatment at high dosage, this probably indicates drug-induced bladder irritation. Prompt relief can be obtained by the consumption of copious quantities of water and 2-3 teaspoonfuls of bi-carbonate of soda. **Contra-indications** Hepatic insufficiency, severe dehydration, severe renal failure (serum creatinine level $> 5 \text{ mg\%}$) or metabolic acidosis. *Hiprex* may be used where mild to moderate renal insufficiency is present. *Hiprex* is also contra-indicated as the principal therapeutic agent in acute parenchymal infections of the kidney. *Hiprex* should not be administered concurrently with sulphonamides owing to the danger of crystalluria, or with alkalinising agents such as mixtures of potassium citrate.

How many of your really chronic cases of arthritis could benefit from Brufen?

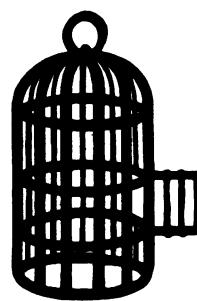

A recent study* in nearly 1,000 arthritic patients treated with Brufen included a number who had suffered with arthritis for more than 20 years.

On Brufen, over half these extremely chronic cases of arthritis improved

— and improved consistently in the real terms of less pain, greater mobility. It's never too late to start treatment with Brufen.

COMMERCIAL APPOINTMENTS

Young Physician

Pharmacological Research

The recent addition of laboratory facilities for the study of drug absorption, distribution metabolism and excretion in animals and man has created a challenging opportunity within our Medical Division for a young Physician with a strong interest in and preferably experience of Pharmacokinetics and Clinical Pharmacology. A higher medical or scientific qualification is desirable but the prime requirements are demonstrable interest, drive and ability.

The successful applicant will become one of a multidiscipline team of

scientists and doctors bringing together skills in assay development, biochemistry, medicine, medical physics, mass spectrometry, experimental pathology and pharmacokinetics. The job involves the definition, design and execution of studies on the effect on man of drugs at an early stage of development. Colleagues will include Research Fellows engaged in similar activities in the industrial phase of joint university/industrial appointments, and physicians

in our Department of Clinical Research. Some overseas travel will be necessary. Publication will be encouraged and expected.

An attractive salary will be negotiated, a company car provided, and there are excellent fringe benefits. If you would like to apply, please send details of your age, qualifications and experience, or write for further information, to: The Medical Director, G. D. Searle & Co. Ltd., Lane End Road, High Wycombe, Bucks.

The Future General Practitioner

Learning and Teaching

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

Health and Diseases

Human Development

Human Behaviour

Medicine and Society

The Practice

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

Medical Officer

General duties & obstetrics

In Zambia, Roan Consolidated Mines provides a comprehensive medical service for its employees. Based at Mufulira, the doctor appointed will undertake general duties involving hospital out-patient sessions and domiciliary and clinic visits. He will also have medical and obstetrical in-patient responsibilities and will share hospital obstetrical call duties on a rota basis, with the principal obstetrician and one other medical officer. Experience in hospitals and general practice is called for which must include obstetrics. This is a post for a doctor holding the DRCOG rather than MRCOG.

Curative medical services are centred on two well-equipped hospitals totalling 460 beds. There are a total of 13 medical officers, including those with higher qualifications working in their specialised fields. The services are provided for employees and their dependants which comprises about 55,000 local and 2500 expatriate personnel.

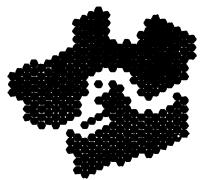

A competitive salary will be negotiated, depending on experience and qualifications. Employment will be on a two or four year contract by agreement. Benefits include ■ children's education allowances ■ return passages ■ low rental housing ■ paid leave which accrues at the rate of 55 days per annum.

Immediate interviews are offered but because of documentation procedures it will be about three months before the man appointed will take up his duties in Zambia.

Fight cancer with a will

When testators ask your advice, please remind them of the urgent work of the Imperial Cancer Research Fund. In the Fund's up-to-date laboratories trained minds are using every weapon of modern science to fight all forms of cancer, including leukaemia.

Now one of the world's great research centres, the I.C.R.F. relies entirely on public support. The cancer problem *must* be solved. Please help now.

Patron:
H.M. THE QUEEN
President:
The Honourable Angus Ogilvy

Form of Bequest

I hereby bequeath the sum of pounds free of duty to the Imperial Cancer Research Fund, Lincoln's Inn Fields, London, WC2A 3PX for the purpose of scientific research, and I direct that the receipt of the Honorary Treasurer or Secretary shall be a good discharge for such legacy.

Please write for further information to: The Secretary, I.C.R.F. (Dept101), PO Box 123, Lincoln's Inn Fields, London WC2A 3PX

The Army asks a lot of a doctor. Here's what we give him in return.

Any young Doctor is bound to find his work demanding. And we won't pretend that the Army offers you a cushy life. What it does offer you, is opportunity and experience that you'd be hard put to surpass in civilian life.

You'll have ample opportunity to travel, anywhere in the world where the British Army is on exercises or operations.

You'll also gain considerable medical experience, with the chance of specialist post-graduate studies if you opt for a permanent commission.

Initially you can join for 3 or 5 years with the opportunity to convert to a regular commission.

You'll hold the rank of Captain and at the age of 24 you could be earning £3942 a year with 6 week's paid leave, plus allowances for educating your children, uniform etc.

Your surgery is equipped and staffed by the Army.

Your practice covers not only soldiers, but their wives and children as well. And if you want to set yourself up in civilian practice, you'll appreciate the tax-free gratuity that comes with all the valuable experience you've picked up in your short

service commission. The gratuity works out at £1500 after three years and £3000 after five.

If you're interested, we can arrange for you to visit one of our medical establishments and talk with serving RAMC Officers before you make your final decision.

For further details, phone 01-499 8040 ext. 322 or write to:
