

IN ASTHMA

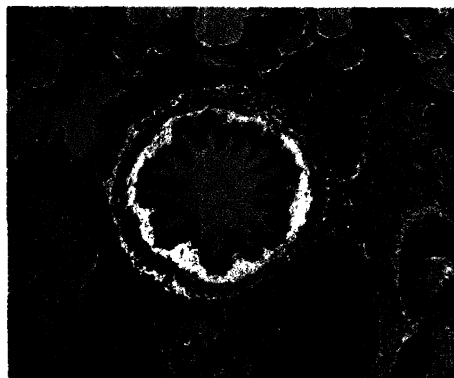

Becotide INHALER *puts steroid therapy in its place*

Becotide Inhaler contains beclomethasone dipropionate BP, a steroid which differs from those previously administered to asthmatics by aerosol in that it is highly active within the lungs in doses which are not systemically active. Used as an aerosol it provides remarkable control of asthma without causing significant systemic effects. This result is attributable to the intrinsic properties of the compound and to its localisation at the intended site of action.

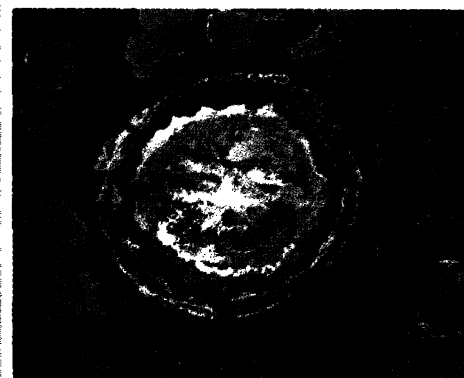

Becotide effectively controls the three pathological processes of asthma — bronchospasm, bronchial mucosal oedema and hypersecretion of mucus.

SELECTIVE STEROID THERAPY IN ASTHMA

Extensive clinical trials of Becotide Inhaler have shown that it gives effective control of asthmatic symptoms in patients who are no longer obtaining adequate relief from bronchodilators or sodium cromoglycate.

In addition it has been shown that Becotide Inhaler therapy can be used successfully to replace systemic steroids even in asthmatic patients who have become steroid dependent.

In a double-blind controlled trial involving asthmatic patients, Becotide Inhaler provided control which was at least as effective as that obtained from oral prednisolone; the only significant difference was that plasma cortisol levels were *not* depressed with Becotide Inhaler therapy.

(*Brit. med. J.*, 1972, 3, 314)

IMPORTANT

Clinical trials have highlighted the need for particular attention to the selection and clinical management of patients.

It is also important that the patient uses Becotide Inhaler correctly and regularly and that it is not confused with bronchodilator aerosols.

Full prescribing information, including details of clinical management, is available on request.

Becotide Inhaler ensures for your asthmatic patients:

- ☐ Highly effective treatment controlling the three main pathological processes involved in asthma—bronchospasm, oedema of bronchial mucosa, and hypersecretion of mucus.
- ☐ Freedom from steroid side effects including adrenal suppression.
- ☐ A fuller and less restricted life as the advantages of steroid therapy can be introduced at an earlier stage of the disease.

PRESENTATION

Becotide Inhaler is a metered aerosol which delivers 50 mcg beclomethasone dipropionate BP per inhalation. Each container of Becotide Inhaler provides 200 inhalations.

**Five species are responsible for most bacterial respiratory infections.
'Eskacef' is effective against all of them.**

Because more than one of these species may be cultured in respiratory infection, and some may be resistant to penicillin, you need 'Eskacef'.

'Eskacef' is rapidly bactericidal against most common Gram-positive and Gram-negative organisms.

It challenges both pneumococcus and

Haemophilus influenzae, organisms commonly associated with acute exacerbations of chronic bronchitis.

It is so low in toxicity that it can be used in children, may be suitable for long term use, and, with adjustment of dosage to avoid accumulation may be used in renal failure.

'Eskacef' is available in both capsule and suspension presentations. Use it... to be sure.

Each capsule contains cephadrine 250 mg or 500 mg. Each 5 ml of suspension contains 125 mg or 250 mg cephadrine.

Renal Biopsy

Second Edition

D. B. BREWER.

This book is a very fully illustrated account of renal diseases as revealed by a study of renal biopsies. Although the main emphasis is on the structural changes as seen by light microscopy, clinical details and prognosis are extensively discussed and closely related to the structural changes by means of numerous detailed clinical histories. In many cases the progress of the disease is illustrated by successive biopsies sometimes taken over a period of many years. All the material has been collected personally by the author and his clinical colleagues.

THE HOSPITAL GAZETTEER 1972

A guide to the Hospitals in the United Kingdom

The gazetteer occupies 304 pages, and is designed especially to help the junior doctor seeking a hospital appointment to choose the one most suited to his needs.

This new edition is even more comprehensive than those previously published with a new easy read format. It is possible to tell at a glance:

The number of beds;
the establishment of medical staff;
nature of special departments;
study leave, off duty time, etc.;
opportunities for preparation for postgraduate diplomas;
the kind of accommodation provided;
facilities for recreation and other relevant facts.

Lilly
Keflex
SUSPENSIONS OF CEPHALEXIN MONOHYDRATE

KEFLEX combines a degree of effectiveness and safety second to none. It is now well established as a particularly suitable antibiotic for the treatment of the very young. Where there is any doubt about the diagnosis, KEFLEX is the logical answer. Broad spectrum, even against penicillinase-producing pathogens, rapid absorption and high serum levels. KEFLEX therapy offers maximum coverage with minimum complications.

When infection is anything but simple

The only safe level of blood pressure is normal.

The definition of "normal" will obviously vary from patient to patient at the discretion of the doctor. There is now convincing evidence, however, that blood pressure must be maintained within this defined normal range. Any degree of hypertension—and by inference, incomplete therapeutic control—still carries a high long-term morbidity.

Complete control is usually impracticable with conventional antihypertensive agents because of prohibitive side effects.

This is not so with 'Inderal'.

'Inderal', added to a thiazide diuretic, gives smooth control of blood pressure in 80% of hypertensive patients, by night and by day, with none of the troublesome side effects of other treatments. It is a real step forward in preventive medicine.

Detailed information, available on request, should be consulted before prescribing.

"Logically it would appear that beta-receptor blocking drugs are most suitable for patients in mild early hypertension, but the level of blood pressure can also be reduced in the more severe hypertensives."

Practitioner, (1971), 207, 43

"The mode of action of propranolol ('Inderal') compared with that of previous hypotensive drugs offers a new approach to the treatment of hypertension. Within its limitations propranolol has proved as effective as any other hypotensive agent, especially in moderate and severe cases, and has advantages over most."

Intal doesn't relieve asthmatic attacks

It prevents them

Steroids, bronchodilators and antihistamines, whether in aerosol or tablet form, are only symptomatic treatments. Whereas INTAL actually *protects* the patient from asthmatic attacks—day in, day out.

By preventing the release of spasmogens INTAL affords daily prophylaxis for as long as any challenge exists. More than 150 clinical trials have proved its effectiveness, safety and ease of administration.

But only an asthmatic can really appreciate the difference it makes.

Either way you'll get an individually designed, no-compromise car. (The estate is a proper estate, with a long chassis

And a trustworthy car.

Because we're fanatical about reliability. For instance, to get the quality we want, we make a lot of parts ourselves that are usually bought from outside suppliers (e.g. shock-absorbers). We bench-test every single engine. And road-test every single car.

It's an unusual attitude, and it makes for unusual cars.

Interest rates offered to big investors and small savers alike are many and varied, but each investment has its own particular set of terms and conditions.

Some investments tie up your savings for a fixed period of years, whilst others offer prompt withdrawal facilities.

Some are designed to provide regular income; others offer capital growth. Either may or may not be taxable.

Both may incorporate life assurance and the income tax relief then obtainable can further improve the attractiveness of the investment.

It's all very confusing unless you are a financial expert. How else can you choose a plan to suit your own particular needs and be safe in the knowledge that the Company to which you are to entrust your savings is absolutely secure?

Whether you are interested in saving a monthly sum out of salary, or making a single investment, you would be wise to consult the experts at the M.I.A. They are there to help you, as they have helped thousands of your colleagues—their advice is free and entirely without obligation.

Flora margarine can help prevent heart disease.

In 1973, one in four deaths will be caused by coronary heart disease. Many victims dying before retiring age.

Some premature deaths might be prevented, however, by substituting Flora margarine, the spread highest in polyunsaturated fats, for animal fats in normal diet.

For 50% of Flora's fat content is natural cis-cis linoleic essential fatty acid.

And it is widely accepted that substituting polyunsaturated fats for

saturated fats can lower the risk of coronary heart disease.

Because of its cholesterol-reducing properties, Flora margarine is particularly effective as part of the dietary treatment of hyperlipidaemia.

For people at risk from coronary heart disease, indeed for almost anyone, Flora margarine makes very good advice.

4

UNIVERSITY OF EXETER Postgraduate Medical Institute

A full-time postgraduate course lasting 10 weeks will begin on 25th April, 1973. These courses are held 3 times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventative medicine, pathology, psychiatry, orthopaedics, and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students are taught in each of the main clinical departments. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training, but these are normally reserved for students sponsored by some official body.

It is sometimes possible to accept general practitioners for 1 or 2 weeks of a course, and attendance for this period is recognized under Section 63 of the Health Services and Public Health Act 1968. These courses are also recognized under the special scheme for the re-training for general practice of doctors who have been out of the Health Service for at least 5 years.

The fee for this course will be £40 (£83 for students from outside the United Kingdom).

Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devonshire. (207647)

GENERAL PRACTICE TRAINING POSTS

OXFORD REGIONAL COMMITTEE FOR POSTGRADUATE MEDICAL EDUCATION & TRAINING Oxford County & City Executive Council Reading & District Hospital Management VOCATIONAL TRAINING FOR GENERAL PRACTICE

An unexpected vacancy has arisen in this Scheme as a result of the resignation for personal reasons of the present holder.

This appointment will be for 2 years from 1st April, 1973 and would be suitable for a doctor wishing to train for general practice who has already completed one post-registration year, preferably in obstetric and paediatric appointments. He or she would then be eligible for the Vocational Training Allowance and to sit the M.R.C.G.P. examination.

The post would consist of six months at S.H.O. level, partly in a teaching general practice and partly in a supernumerary hospital post consisting of psychiatry and other subjects of the applicant's choice, followed by six months as an S.H.O. in general medicine, followed by nine months in the same general practice (making twelve months in all).

A day release course for general practice trainees is organised by the R.C.G.P. at Oxford. Single and married accommodation will be available during the hospital period of the appointment.

For further details and application forms, to be returned by 19th March, 1973, contact the Postgraduate Clinical Tutor, The Library, Royal Berkshire Hospital, Reading. Tel: (0734) 85111, Ext. 508, (H10994) 22

COMMERCIAL APPOINTMENTS

Highly Experienced CLINICAL PHARMACOLOGIST

We seek a highly experienced clinical pharmacologist to head up an international medical research team comprising some ten clinicians.

The group is engaged on a number of advanced projects, including the investigation of an interesting series of psychotropic agents discovered by computer-assisted quantitative pharmaco-electroencephalography after being 'missed' by conventional animal pharmacology test systems. (See, for example, *Current Therap. Res.*, 1972, 14 : 395 – 413.)

In addition to psychotropics, our client—Organon International—has strong interests in the fields of endocrinological and cardiovascular research.

To attract the right man, our client is certainly envisaging a five figure salary, and would give strong consideration towards providing him—in addition to his normal holiday—with a paid 'sabbatical' of around 4 weeks per year, to enable him to keep at the forefront of new techniques in this fast developing speciality.

If you have a good background in clinical pharmacology and would like to talk further about the opportunity with a view to visiting the research headquarters in Holland (where the appointment would be based), please contact:

Dr. A. E. F. Chandler, Talentmark Limited, 14 New Burlington Street, London W1X 1FF. Tel: 01-437 6244.

Applications (12 copies) should be lodged not later than 30th March, 1973, with the undersigned, from whom further particulars may be obtained.

In reply please quote Ref. No. 3262J. Robt. T. Hutcheson, Secretary of the University Court. (21435) 25

UNIVERSITY OF NEW SOUTH WALES PROFESSOR OF ANATOMY

Applications are invited for appointment to the above-mentioned chair. Reference will be given to medically qualified applicants and in particular to clinicians with a special interest in applied anatomy. Opportunity to engage in clinical teaching might be negotiated.

The successful applicant will be Head of the School of Anatomy and will organize and participate in teaching and research within the School. The Faculty of Medicine is revising its undergraduate curriculum to integrate the teaching in anatomy, physiology and biochemistry in a broad programme of human structure and function relevant to instruction in the clinical fields.

Salary: \$A15,368 per annum (under review). Subject to the consent of the University Council, professors may undertake a limited amount of higher consultative work. The University reserves the right to fill any chair by invitation.

Details of appointment, including superannuation, study leave and housing scheme, may be obtained from the Secretary-General, Association of Commonwealth Universities (Appts), 36 Gordon Square, London WC1H 0PF. (Tel. 01-387 8522).

Applications close in Australia and London 6th April, 1973. (21439) 25

WESSEX
REGIONAL HOSPITAL BOARD
AND UNIVERSITY OF SOUTHAMPTON
POSTGRADUATE TRAINING
IN PSYCHIATRY

The Wessex Regional Scheme has an impressive eight-year record of examination successes. Regular local instruction is supplemented by a three-year programme of regional day-release courses, aimed at the Joint D.P.M. and the M.R.C.Psych. In the First-Year course there are thirty-five full "study-days". The Second-Year course includes two weeks of whole-time attachment to the Wessex Medical Centre.

Sub-specialities. Within the Region there are organized "career structures", of adult mental illness or in various other sub-specialities. Already there are special day-release courses in subnormality and in the psychiatry of children and adolescents. Courses in group work are available at the University of Southampton. Specialist teaching is being developed in psychotherapy and in forensic psychiatry.

Present opportunities. The new regulations of the D.P.M. make the present time of year particularly convenient for trainees to start in psychiatry. Trainees at any psychiatric hospital in the Wessex Region are entitled to take part in the Training Scheme, without tutorial fees and with the reimbursement of necessary travelling expenses.

Over the next 1-3 months, owing to promotions, Registrar and S.H.O. vacancies will arise at individual hospitals in the Wessex Region, possibly at Portsmouth and Basingstoke. These will be advertised in the usual way. Preliminary enquiries will be welcomed now by the Regional Postgraduate Adviser in Psychiatry, Wessex Regional School of Psychiatry, Knowle Hospital, Fareham, Hants. (Wickham 2271). (47713) 84-8

SERVICES

Are you in your Pre-Registration Year —or recently fully registered?

Before you commit yourself to your permanent pattern of life, consider what the RAF has to offer

The chance to practise total medical care, as a GP

Your first job would probably be a Junior Medical Officer on a large RAF Station. There would be at least one other doctor. Between you, you would have a 'list' of 2000 to 3000 people—servicemen and their families. You would meet all the usual clinical problems of a GP—and get plenty of experience in paediatrics. As well as this, you would be actively involved in the practice of aviation medicine and gain experience in the preventive, occupational and social fields.

Conditions of work are extremely good. You would have a consulting room in a specially built *Medical Centre*—like a small hospital with its own treatment room, theatre and resuscitation room, and wards for a dozen or so short-stay patients. There is a full secretarial and nursing staff. Your clinical freedom would be absolute.

The chance to specialise, too

Because General Practice is so highly developed in the RAF, this does not mean you have no chance to specialise. The contrary is true. 47% of all RAF doctors are now working in specialist departments. On a 'full career' contract you have every opportunity to reach consultant status in your late or middle thirties; perhaps earlier.

The chance to study for higher qualifications

Any RAF doctor, whether specialist or GP (as long as he is not on the very shortest of contracts) can apply for six months study leave on full salary. On a permanent commission, he may have up to two years' external study leave.

The chance to travel

The RAF operates in many different conditions and climates. Abroad, the RAF doctor looks after RAF personnel and their families and, very often, the local population as well. Your gain in clinical experience would be marked.

The chance of a good social and family life

The RAF is a young community, with a full and active social life. There are facilities for almost every kind of sport and, which is most important, the time to enjoy your family while you are still a young man. Living conditions are excellent. If you are single you live in the Officers' Mess, which has all the amenities of a good hotel. If you are married, you will nearly always have a furnished house that goes with the job; rent for this is very modest; and it can save a large financial outlay at the beginning of your career.

Flying. As well as being responsible for the medical care of aircrew, RAF doctors are encouraged to fly and thereby gain first-hand knowledge of the operational environments. Their responsibilities can also include aero-medical evacuation, by the RAF's remarkable, long-range airborne ambulance service, using Britannias and VC 10s of Strike Command. In 1971, 2431 patients were flown back to the United Kingdom. Equipment on the aircraft is most elaborate, and can include Radcliffe ventilators, dialysis machines, air-conditioned oxygen cots and a number of items specially designed by RAF consultants. A doctor—say a physician, a surgeon or an anaesthetist—may often be needed as part of the team to 'special' a patient.

A realistic pay scale

Pay is based on the average earnings of a civilian GP. Immediately after full registration, the present basic salary is £3942; after 5 years it rises to £4767; after 13 years to £5898. There are various other allowances; for instance, with children at boarding school the figures are £363 (net) for one child, £795 (net) for two children, £1314 (net) for three children. There are tax-free gratuities of £1500 after 3 years, or £3000 after 5 years. After service of 16 years or more there is a pension, payable for life, and a generous terminal grant.

For full information please write, giving your age, nationality, and date of full registration, to Group Captain D. G. M. Hills, OBE, MB, BS, DPH, RAF, Ministry of Defence, 1-6 Tavistock Square (724 KN2), London, WC1H 9NL. Or visit your nearest RAF Careers Information Office.

ALLERGIC RHINITIS

A completely fresh approach

The unique way in which sodium cromoglycate prevents asthmatic reactions has been the subject of over 150 clinical trials. Prompted by this success, more recent investigators have shown that, in the form of RYNACROM, sodium cromoglycate has a similar protective effect on the nasal mucosa and can provide year-round prophylaxis in allergic rhinitis²

RYNACROM is not a decongestant, anticholinergic, antihistamine or steroid. Its action is unlike any other form of treatment.

In the face of challenge – pollen, house dust, feathers, pets, etc. – RYNACROM (sodium cromoglycate) prevents the degranulation of those cells which would normally rupture and release histamine and inflammatory agents. Thus regular insufflation of RYNACROM provides continuous prophylaxis from a condition which, hitherto, has been difficult to control symptomatically and even more difficult to prevent. A number of patients who have failed

to respond to other forms of treatment have greatly benefited from RYNACROM!

RYNACROM does not produce inconvenient side effects associated with conventional therapy.

WINTHROP

A good friend in

Amoxil can be relied on to treat commonly occurring bacterial infection of the ear, nose and throat. This was demonstrated in a recent clinical trial¹ involving 150 children where Amoxil was clinically successful in 94% of cases.

Amoxil's broad spectrum of activity coupled with its outstanding oral absorption² ensure that high bactericidal serum levels are available to act quickly and decisively at the site of infection.

Add to this the convenience of a three times daily dosage regime, the degree of safety associated with penicillin therapy, treatment costing as little as 16p per day, and a wide range of highly acceptable oral presentations – further good reasons why Amoxil represents practical antibiotic therapy at its best.

Amoxil is a good friend in throat infections – this happy eight year old certainly thinks so.

Further information on Amoxil regd (amoxycillin) is available from: Bencard, Freepost, Great West Road, Brentford, Middlesex.

 **Bencard**

Prescribing information.

Dosage: Adults 250 mg three times a day. Children – up to ten years: 125 mg three times a day. In the case of severe infections the dosage should be doubled.

Presentation: Amoxil capsules 250 mg. Amoxil syrup 250 mg/5 ml, 100 ml bottle. Amoxil syrup 125 mg/5 ml, 100 ml bottle. Amoxil Paediatric Suspension 125 mg/1.25 ml, 20 ml bottle with pipette.

Amoxil presentations contain amoxycillin as the trihydrate.

Contra-indication: Amoxil is a penicillin and should not be given to penicillin-hypersensitive patients.

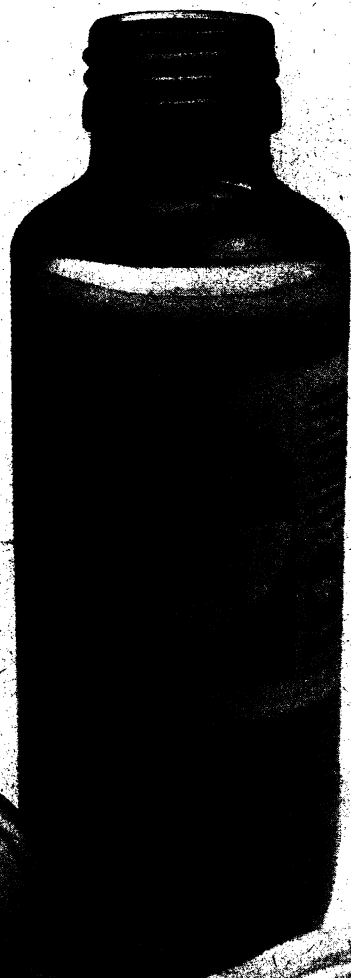

Side effects: In clinical trials involving more than 1,500 patients no serious side effects were reported. Those side effects which were encountered were of a mild transitory nature.
