New: Magnapen Syrup

For those children's infections which are always worrying. Otitis media and acute bronchitis. Tonsillitis and quinsy. In treating severe cases, you can be more certain of first-time success when you prescribe Magnapen syrup.

With Magnapen, your young patients are more likely to respond quickly. And that relieves anxiety at home.

Magnapen destroys virtually all the bacteria met in general practice. So you can rely on Magnapen even when there are no laboratory reports to guide you.

Dosage: Children under 10 years: One 5 ml spoonful, q.i.d. Dosage may be doubled where necessary.

Contra-indications: Penicillin hypersensitivity.

Ocular administration.

Side-effects: As with other penicillins. Erythematous rashes may occasionally occur as with ampicillin.

The incidence of this rash is particularly high in patients with infectious mononucleosis.

Each 5 ml of Magnapen Syrup contains 125 mg ampicillin with 125 mg flucloxacillin.

Further information is available on request.

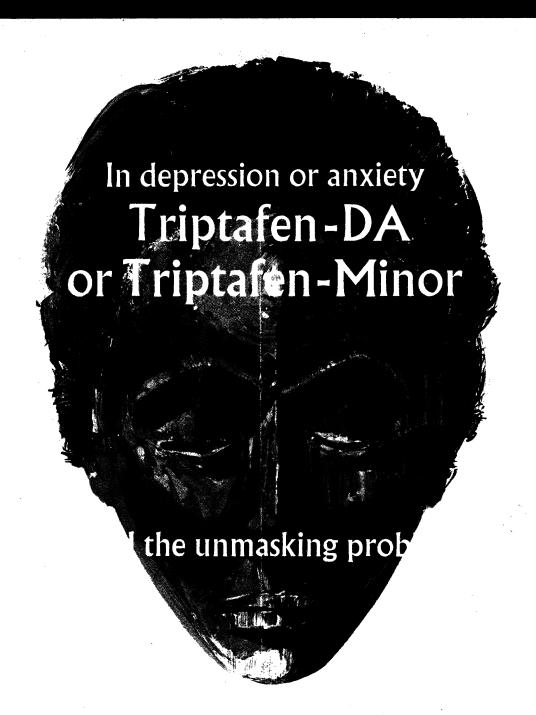

Magnapen* is a British product originated by:

When an infection causes concern call on the greater Certainty of Magnapen

"... often anxiety or agitation occurs in depressed patients treated with antidepressant drug therapy.

Serious depressive states can be uncovered when anxiety is treated by tranquillisers." (Practitioner, 1972, 208, 511.

Triptafen-DA treats the depression AND the masked anxiety. Triptafen-Minor treats the anxiety AND the masked depression.

Triptafen-DA Tablets and Suspension, and Triptafen-Minor Tablets contain amitriptyline hydrochloride BP (as amitriptyline embonate in the Suspension) with perphenazine BP.

Full information is available on request.

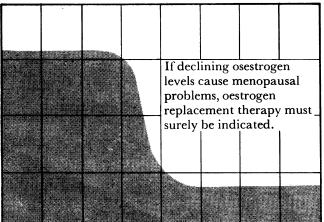

Triptafen is a trade mark of ALLEN & HANBURYS LIMITED LONDON E2 6LA

Harmogen offers her the menopause without tears

The dramatic decline in oestrogen production during the menopause has been held responsible for the many symptoms which cause a woman so much physical and mental distress-insomnia, nocturnal sweating, nervousness, headachesand 'hot flushes'-all the symptoms that mean tears are never far away. Currently these conditions are treated independently but Harmogen is specifically formulated to re-establish oestrogen levels during the menopausal syndrome and alleviate not one but all conditions.

Harmogen

Surgical hosiery provides venous support, but PAROVEN is a kind of 'physiological elastic stocking' for the capillaries.

"The most obvious effect of treatment with HR (Paroven) is the very constant relief of night cramps, with an improvement exceeding 90 per cent."

Brit J Clin Pract (1970) 23, 161

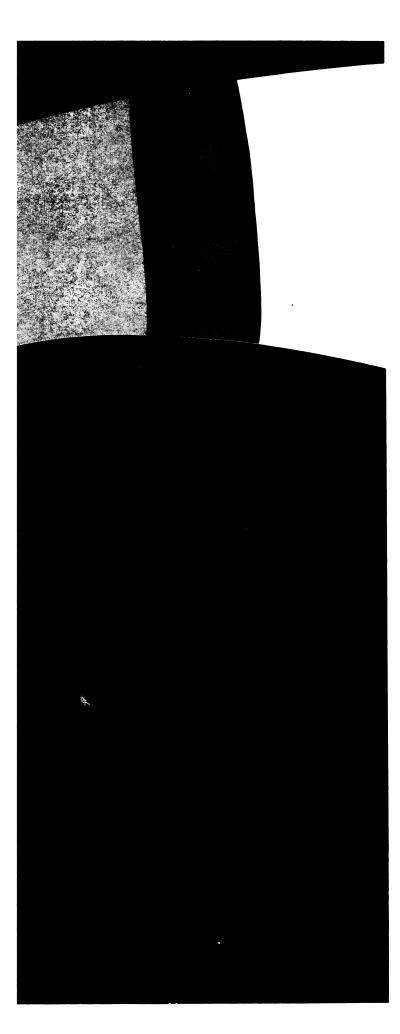

"The degree of relief in chronic aching pain in the legs was not so marked (compared with 90% improvement in night cramps and 70% improvement in heaviness of the legs), but still amounted to 54 per cent."

Brit J Clin Pract (1970) 23, 161

"Symptoms of heavy legs are improved in 70 per cent, and it was generally agreed that not only did legs feel lighter but the patients were more agile." Brit J Clin Pract (1970) 23, 161

"The improved venous blood oxygenation and the reduced tissue oxygen extraction indicated better tissue perfusion with less blood oxygen having been taken from the increased capillary blood flow."

Brit med J (1971) 2, 138

PAROVEN® improves capillary flow

Relief of symptoms in varicose disorders

Varicose veins, post-phlebitic syndrome, superficial thrombophlebitis, varicose ulcers, varicose eczema, ankle oedema, restless legs, paraesthesia, haemorrhoids.

Dosage Initial treatment: 4 capsules a day, preferably with meals. In most cases, at least four weeks treatment with PAROVEN is required before significant benefit is felt. At the point where the patient experiences benefit, the dosage may be adjusted to a maintenance level. Maintenance treatment: 1-2 capsules a day.

Side effects and Precautions In a few patients, slight gastro-intestinal disorders, flushes and headaches have been reported. These are usually overcome by taking the capsules with meals or by slight adjustment of dosage. There are no known contraindications to PAROVEN; it is virtually non-toxic and has no teratogenic effects. In keeping with current teaching and practice its use during the first trimester should, however, be avoided.

Availability Capsules, each containing 250 mg of $O-(\beta$ -hydroxyethyl)—rutosides (not less than 45% troxerutin) in bottles of 20 and 100 capsules.

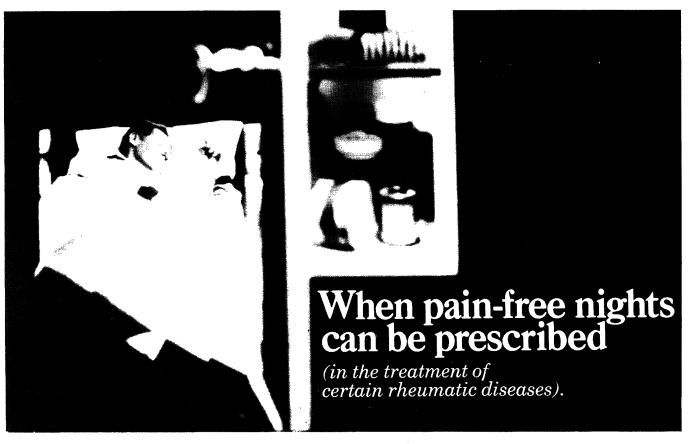

Further information is available on request. Zyma (UK) Ltd Godalming Surrey

how much easier are the days that follow

"... in those rheumatic diseases accompanied by tissue inflammation pain is often worse at night or in the early morning. This trial demonstrates the particular effectiveness of indomethacin in relieving these symptoms.'

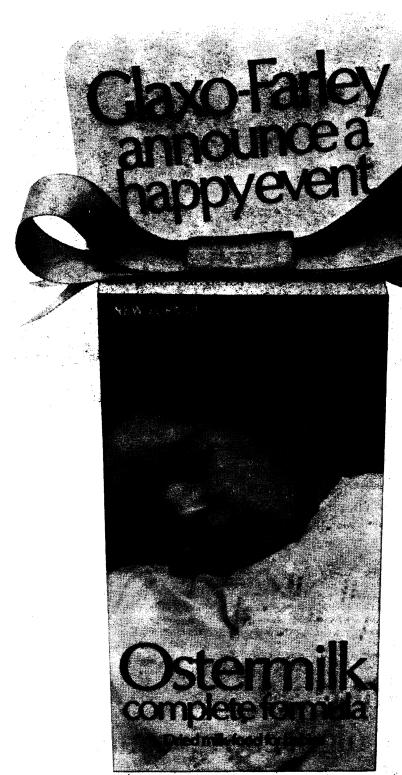

Practitioner, 1972, 208, 248 (Feb)

Clinical evidence shows that 'Indocid' Suppositories at night can often give up to 13 to 16 hours' relief. Supportive daytime dosage either with 'Indocid' Suppositories or Capsules can give 24-hour control of pain and stiffness.

Supplied as suppositories containing 100 mg indomethacin/MSD, as capsules containing 25 mg and 50 mg indomethacin/MSD, and as a suspension, containing in each 5 ml, 25 mg indomethacin/MSD. Detailed information is available to physicians on request. R denotes registered trademark.

Indocid

at night can give many rheumatic patients an easier life

Simple, safe and convenient,
Ostermilk Complete Formula has been
developed to accord with present
medical thinking. A low-solute milk-food
complete with sweetness in the form of
the carbohydrate maltodextrin,
it has shown the following reactions
in wide-scale clinical trials:—

Babies are more contented. Weight gain is steady, comparing favourably with that of babies fed on breast milk. There is less vomiting. Wind is less severe. Nappy rash decreases.

Ostermilk Complete Formula virtually eliminates the problems caused by excess solute absorption, and builds babies who develop at a natural, healthy rate without becoming fat.

Easy to mix. Complete in itself. The new Ostermilk will bring a lot more contentment to a whole generation of babies, mothers and everyone concerned with infant-feeding and care.

The habitual offender. Flatulent dyspepsia.

His is a common enough case. He has been before you many times. And it's always the same old trouble. Flatulent dyspepsia. Antacids and a variety of other preparations have failed to provide the complete answer. His symptoms keep recurring.

Now, with Maxolon, you can break this unpleasant routine. Maxolon, in contrast to antacids, overcomes the motility defects which are so often the cause of flatulent dyspepsia. So Maxolon can work where antacids would fail.

Prescribe Maxolon for your flatulent dyspepsia patients and judge the results for yourself.

Full information is available on request.

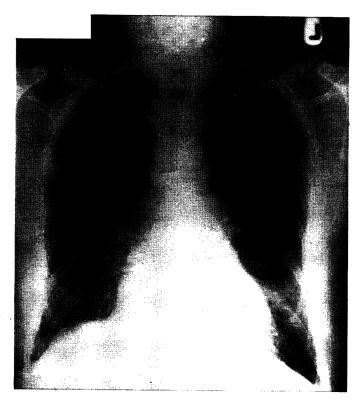

Maxolon* (metoclopramide) is a product of **Beecham Research Laboratories,** Brentford, England.

Maxolon breaks the routine of flatulent dyspepsia

WE WOULD LIKE TO MAKE IT PERFECTLY CLEAR

LINCTIFED EXPECTORANT effective expectoration in bronchitis

non-ergotamine migraine treatment

SHOULD BE TRIED FIRST!

This was the conclusion to the report of a trial in which Migraleve was compared with an ergotamine/cyclizine tablet in the treatment of 59 patients with well defined symptoms of migraine.

Both preparations were effective in relieving the symptoms of migraine, but vomiting was less severe with Migraleve - calling into question the use of ergot preparations, particularly in view of the limited period over which they could be administered with safety. In contrast, therapy with Migraleve can be continued as long as necessary.¹

This confirms the results of an earlier trial² which showed that 65% of regular ergotamine users preferred Migraleve and that Migraleve successfully treated the migraine attack in 79% of patients.

With Migraleve, many migraine sufferers feel that for the first time in the history of their condition they have something which is effective in averting or relieving their attacks. A typical response to a first trial with Migraleve is . . .

 $^{\prime\prime}$ RELIEF! Only a fellow migraine sufferer can appreciate what it means! $^{\prime\prime}$

Migraleve®

Rx 'Migraleve-24' for duo-treatment pack containing 16 Pink and 8 Yellow tablets. Detailed dosage instructions enclosed in each pack.

Each Pink tablet contains buclizine dihydrochloride 6.25mg, paracetamol 500mg, codeine phosphate 8mg, dioctylsodium sulphosuccinate 10mg. Each Yellow tablet contains paracetamol 500mg, codeine phosphate 8mg, dioctylsodium sulphosuccinate 20mg.

FRONTIER PRACTICE in Vellowknife, Northwest Territories, Canada, Top salary offered, plus bonuses. This position is available for one year and is an excellent oppotyunity for a young man with an adventurous spirit who would like to work for a year before completing his residency. Some specialty training in Paediatries is essential, Apply: Dr George J. Gibson, P.O. Box 780, Vellowknife, Northwest Territories, Canada, 4115697)

This is what we call practising medicine.

A career in Naval medicine can be a rewarding experience. Opportunities to specialise abound. And perhaps above all else, there is an immense satisfaction to be gained from the wide variety of work you will be involved in.

At sea, for instance, you could be anywhere from the Mediterranean to the Pacific Ocean. Looking after the health and well being of the company of a modern warship.

And though you could spend as long as the first eighteen months of your five year Short Service Commission on board different ships, you need have no fear of losing contact with mainstream medicine. For no matter where you are, you will be kept informed of current medical opinion.

After this, the choice is yours. Post graduate medical training and a career in the clinical disciplines at one of our naval district general hospitals. Haslar or Plymouth, for instance, with their wide spectrum of clinical material drawn from naval personnel, their dependants and the local civilian population as well. There are also naval hospitals in Malta, Gibraltar and Mauritius, with opportunities for exchange appointments elsewhere.

Or you might prefer occupational medicine in our research orientated naval dockyards. Aviation medicine with its accent on rotary wing support of the Fleet. And for those with an administrative turn of mind, community medicine.

Royal Naval expertise in maritime medicine is recognised world wide and research into underwater medicine, nuclear medicine and the closed submarine environment is centred

at the Institute of Naval Medicine at Alverstoke.

Naval general practice in well staffed and equipped medical centres extend as far afield as Hong Kong and Singapore. And new training schemes are now under way in the United Kingdom.

Should you be moved or sent abroad at any time, all expenses will be paid by us. We will help you with accommodation (at very reasonable rents) and provide allowances for the education of your children, if you have a family.

If you enter the Royal Navy immediately after registration you will be given the rank of Surgeon Lieutenant and a salary of £4,099, rising to £4,249 after four years.

On the other hand, if you are older (up to the age of forty) and more experienced, we can offer you a number of opportunities in general practice and the specialities. And, depending on your post-registration experience, you could enter as a Surgeon Lieutenant Commander at a salary of £5,161, rising to £5,658.

Then, at the end of your five year Short Service Commission you could leave with a tax free gratuity of £3,000.

But if it is mutually agreeable, you could apply for a Full Career Commission or a 16 year pensionable commission. The choice is yours.

In the meantime if you would like further information, write giving details of your age and qualifications to Surgeon Commander L.C. Banks, R.N., (724BU2) Department of the Medical Director General (Naval),

Empress State Building, Fulham, London SW6.

EMOTIONAL PROBLEMS IN CHILDHOOD AND ADOLESCENCE

During 1972 a series of articles appeared in the B.M.J. on emotional problems in childhood and adolescence. These articles, revised and brought up to date by their authors in 1973, have been collected to form a useful handbook on practical advice to the practising doctor on a subject which may give rise to many difficulties.

Vibramycin* the quick route to success

Over 98% absorption . . . 80% in the first hour rapid tissue penetration in lung tissue, sinus secretions and soft tissue; no accumulation in the presence of renal impairment; less than 1% incidence of diarrhoea in 3,250 patients; action so rapid and persistent one dose a day is ample.

Capsules 100mg. in packs of 10 and 50. Syrup also available.

Full information on request.

Before you prescribe another bronchodilator, read this.

Asthmatic attacks in older patients can be serious.

They may damage lung tissue and affect the ability to expel pus and phlegm. This can lead to chronic infection.

Bronchodilator aerosols help, but usually only when much of the damage has been done.

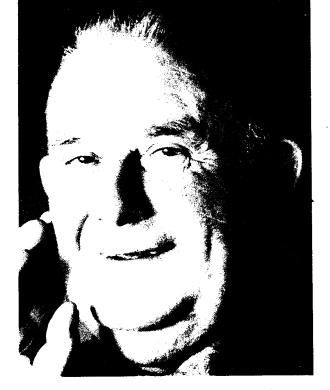

Often they don't get through to the affected areas and succeed only in hyperventilating unaffected areas.

The patient may panic, overdose, and this may result in cardiac stimulation.

Only Intal prevents the attack and eliminates these problems.

With Intal, there is no danger of side effects, no risk of misuse and no diminution of therapeutic effect.

Put them on Intal. Give them a fighting chance.
