When bronchitis causes concern

In acute-on-chronic bronchitis and other severe chest infections, you can be more certain of first-time success when you prescribe Magnapen.

Magnapen's greater certainty means that the patient is more likely to respond quickly, minimising the damage to lung tissue. And Magnapen can save you the time which you might otherwise have to spend on repeat visits, second consultations or night calls to patients who may fail to respond to other antibiotics.

Magnapen destroys virtually all the bacteria met in general practice. So you can rely on Magnapen even when there are no laboratory reports to guide you.

Full information on Magnapen is available on request.

CONTROVERSY IN INTERNAL MEDICINE II

This book replaces the original "Controversy in Internal Medicine" but, it is not a revision of the previous volume. It presents a new collection of 31 contemporary controversies, a stimulating mixture of socio-economic, scientific and everyday disputes.

Edited by Franz J. Ingelfinger, MD, *Editor, The New England Journal of Medicine;* Richard V. Ebert, MD, *Professor and Chairman of the Department of Medicine, University of Minnesota School of Medicine;* Maxwell Finland, MD, *George Richards Minot Emeritus Professor of Medicine, Harvard Medical School;* and Arnold S. Linthicum & Schwartzman:

AN ATLAS OF MICROPATHOLOGY OF THE TEMPORAL BONE

The organisation is atlas-style with descriptive histopathology for each figure on facing pages. With each temporal bone section a high-power magnification of the significant cellular detail is inserted. A three-dimensional illustration of the cut through the temporal bone accompanies each photomicrograph.

By Frederick H. Linthicum, Jr., MD, *Los Angeles Foundation of Otology,* and Jorge A. Schwartzman, MD, *Buenos Aires, Argentina.*

Brenda is and today she

For the first birthday in her life, Brenda can blow out her own candles. Because she has been treated with a new product called Migen – a short immunisation course that is simple and very effective. A fundamental treatment that for the first time gives you, the family doctor, real control over asthma.

It won't help all asthmatics but it will help those whose asthma is caused by, or complicated by, allergy. And that's no small number.

Migen is effective. Allergy has always been recognised as one of the most common causes of asthma. Recently it has been established that the most important allergenic factor in house dust is the house dust mite: in fact, more than 90% of house dust sensitive patients are sensitive to house dust mite. And, "The rise in the mite content of dust from September to October has been shown to be directly related to an increase in asthma during this period."*

Migen immunises against the house dust mite. Immunisation against this powerful allergen raises the patients' overall level of tolerance. If he is multi-sensitive, he may well find that he no longer reacts to contact with other allergens which have previously provoked attacks. And the stress caused by fear of attack is reduced.

Migen is simple. Migen is a short course vaccine which contains pure extract of Dermatophagoides pteronyssinus, the most common British house dust mite. Just six injections form a complete course of treatment for asthma and perennial rhinitis. And each syringe is pre-filled to ensure accurate dosage.

Migen – minimal side effects. Migen's active material is released slowly but completely for maximum efficiency and minimum risk of adverse effects. Migen is adsorbed onto tyrosine, a naturally occurring amino acid, fully metabolisable in the human body.

Migen is a Bencard product. Prepared by Bencard, leaders in allergy research, Migen is the first short course asthma treatment to give *you* control over your asthma patients. Migen may usually be prescribed

Treatment pack consisting of six prefilled syringes with sterilised needles.

on the basis of a careful case history, no complicated testing techniques are necessary. However a simple confirmatory skin test kit is available on request, together with patient record cards and advice notes.

Migen. Many products have been advocated for use in the treatment of asthma. Most have drawbacks that you and your patients suffer for the sake of some relief. Now Migen offers an opportunity to treat asthma simply and effectively.

Allergy has always had a strong hold on the asthmatic. From today a powerful and very common allergen can be controlled from your surgery, with Migen. It's asthma immunisation made easy.

Full information on Migen (regd.) is available on request from Bencard, Great West Road, Brentford, Middx.

Doctors in the Australian Army get the best of all worlds

A new life in Australia. With first class passage paid for you and your family. A job waiting—and all the advantages of a service practice.

With extraneous administration taken off your hands, you can really do your job properly. You could be in an R.M.O. unit, field ambulance station or military hospital and there are opportunities for updating medical knowledge and techniques. Then there's the sports and social side, too.

The sort of man we're looking for is preferably under 40—with medical qualifications registerable in the Commonwealth of Australia. He's medically fit—prepared to serve anywhere and is a British subject eligible for permanent residence in Australia. If this sounds like you, this is what we'll do for you.

You'll be appointed to a Short Service Commission for 4 years in the Medical Corps of the Australian Army in the minimum rank of Captain, where your salary would amount to £4,773 per annum after the equivalent of 5 years service. (Your professional experience in England serves to ante-date your period of service). Tax and a refunded retirement benefit will be deducted from this—though your clothing and marriage allowances of £51 and £345 per annum are not taxed. You also receive a bounty of about £1,540.

If this sounds like your sort of life, contact: Brig. C. F. Flint, O.B.E., Australian Army Representative, Australia House, Strand, London WC2. Telephone: 01-836 2435 Extn. 356.

Water Transport in Cells and Tissues

No. 24 in the Monographs of the Physiological Society

C. R. HOUSE

The author's aim is to provide a comprehensive yet critical guide to studies on the movement of water across cell membranes. Experimental results are described within a theoretical framework so that a unified account may be given. The book contains the minimum of necessary mathematics and should therefore suit readers whose interest is primarily biophysical. Nevertheless, the author has also borne in mind those whose main interest is water transport in some particular biological system, and these readers should find it useful introductory literature.

Q

How much Caved-S can an intractable duodenal ulcer patient take?

A

For a full year without relapse, 12 tablets a day for up to 16 weeks*

The Practitioner

June 1973 Vol. **210** pp. 820 - 823

* This dosage regimen was established in a recent trial of Caved-S on patients all with intractable duodenal ulcer and a history of more than six relapses in the year prior to the trial. Of twenty patients receiving 12 Caved-S tablets a day for 16 weeks, 12 had no relapse in a full year's follow-up, and the other 8 had two or one relapse in the follow-up year. All these patients had actually been referred for surgery, but surgery was avoided in all cases. Another similar group of 20 patients received 8 Caved-S tablets a day for 8 weeks – the condition of patients selected was too serious for controls with a placebo. Of this second group 3 had no relapse, 7 up to two relapses, and 10 up to 4 relapses in a year's follow-up.
No significant side effects occurred. Only one patient discontinued treatment, and he later resumed treatment successfully.
The authors conclude:
"Caved-S . . . should be given in high dosage before surgery is attempted in patients with duodenal ulcer who fail to respond to a low dose or other treatments."

THE HISTAMINE CHALLENGE:

Can any single antihistamine tablet fight off attacks for 24 hours?

In a study† designed to test the duration of protection afforded by PRO-ACTIDIL*, human volunteers were given intradermal injections of histamine and the areas of flare and weal response were measured. After the responses had completely disappeared one PRO-ACTIDIL tablet was administered to each volunteer and the histamine challenge was repeated. By measuring the reduction in areas of flares and weals the protective effect of PRO-ACTIDIL could be plotted for the 24 hours following administration. After 24 hours the weals still showed a reduction of 65 per cent and the flares a reduction of 83 per cent. The authors concluded that the anti-histaminic effect of PRO-ACTIDIL lasts for 24 hours. *Trade Mark

Bencard inject commonsense into the hay fever picture

Pollinex is a new vaccine from Bencard consisting of a course of only three injections. These are administered pre-seasonally and protect the hay fever patient right through the summer. Pre-filled disposable syringes ensure trouble-free administration and accuracy of dosage.

This commonsense approach to preventive therapy results from two recent advances in allergy research by Bencard. Firstly, the grass pollen extracts are modified by a unique process so that unwanted side-effects are largely eliminated without diminution of antibody production. Secondly, the modified material is adsorbed on to a natural base which is metabolised in the body.

Pollinex provides safer, simpler, immunological treatment of hay fever, so more patients can experience the relief which comes from preventive therapy. Pollinex is directly available from stock on an E.C.10 – and can be prescribed any time from now till early April.

Before you prescribe another bronchodilator, read this.

Asthmatic attacks in older patients can be serious.

They may damage lung tissue and affect the ability to expel pus and phlegm. This can lead to chronic infection.

Bronchodilator aerosols help, but usually only when much of the damage has been done.

Often they don't get through to the affected areas and succeed only in hyperventilating unaffected areas.

The patient may panic, overdose, and this may result in cardiac stimulation.

Only Intal prevents the attack and eliminates these problems.

With Intal, there is no danger of side effects, no risk of misuse and no diminution of therapeutic effect.

Put them on Intal.

TUTORIALS IN DIFFERENTIAL DIAGNOSIS

E. R. BECK, J. L. FRANCIS and R. L. SOUHAMI

Each chapter discusses a common symptom or sign which is related to normal and abnormal function. Clinical features important in the differential diagnosis are emphasized, and there is a discussion of investigations which will help to establish the diagnosis. At the end of each chapter is an illustrative case history with questions, followed by a detailed discussion of the case. This approach derives from the experience of the authors, who some years ago founded Medical Tutors Ltd, and the book is an expanded version of the series which appeared in British Journal of Hospital Medicine.

Serc is the first drug to offer comprehensive action against all the manifestations of Meniere's syndrome. A British trial* now confirms its clinical value. Objective tests of hearing and vestibular function in 11 patients before and after treatment with Serc showed a dramatic improvement in many cases. 'There was an overall average gain in hearing over the whole group in both ears.' Studies of nystagmus suggested an improvement in vestibular function. 'Subjectively, 9 out of 11 patients claimed an improvement in the symptom of vertigo and all 11 claimed reduction in tinnitus.'

There's now considerable evidence to show that Amoxil is more effective than other broad spectrum antibiotics in the treatment of chest infections.[1,2,3,4]

There are some good reasons for this:

Firstly, Amoxil is extremely well absorbed by the oral route,[5] attaining high bactericidal concentrations.

And secondly, the overall absorption is unaffected by the presence of food[5] which means your patient doesn't have to remember to take Amoxil half an hour or whatever before meals.

Couple this with Amoxil's apparently excellent ability to penetrate into bronchial secretions[3,6], and you've probably explained why Amoxil out-performs other broad spectrums.[1,2,3,4]

the days of aspirin are numbered

New trial shows:- In 13 weeks time your patients would be doing a lot better on Prinalgin than on aspirin.

A recent trial* shows Prinalgin to be superior to high dose aspirin by all the normal criteria of improvement in rheumatoid arthritis.

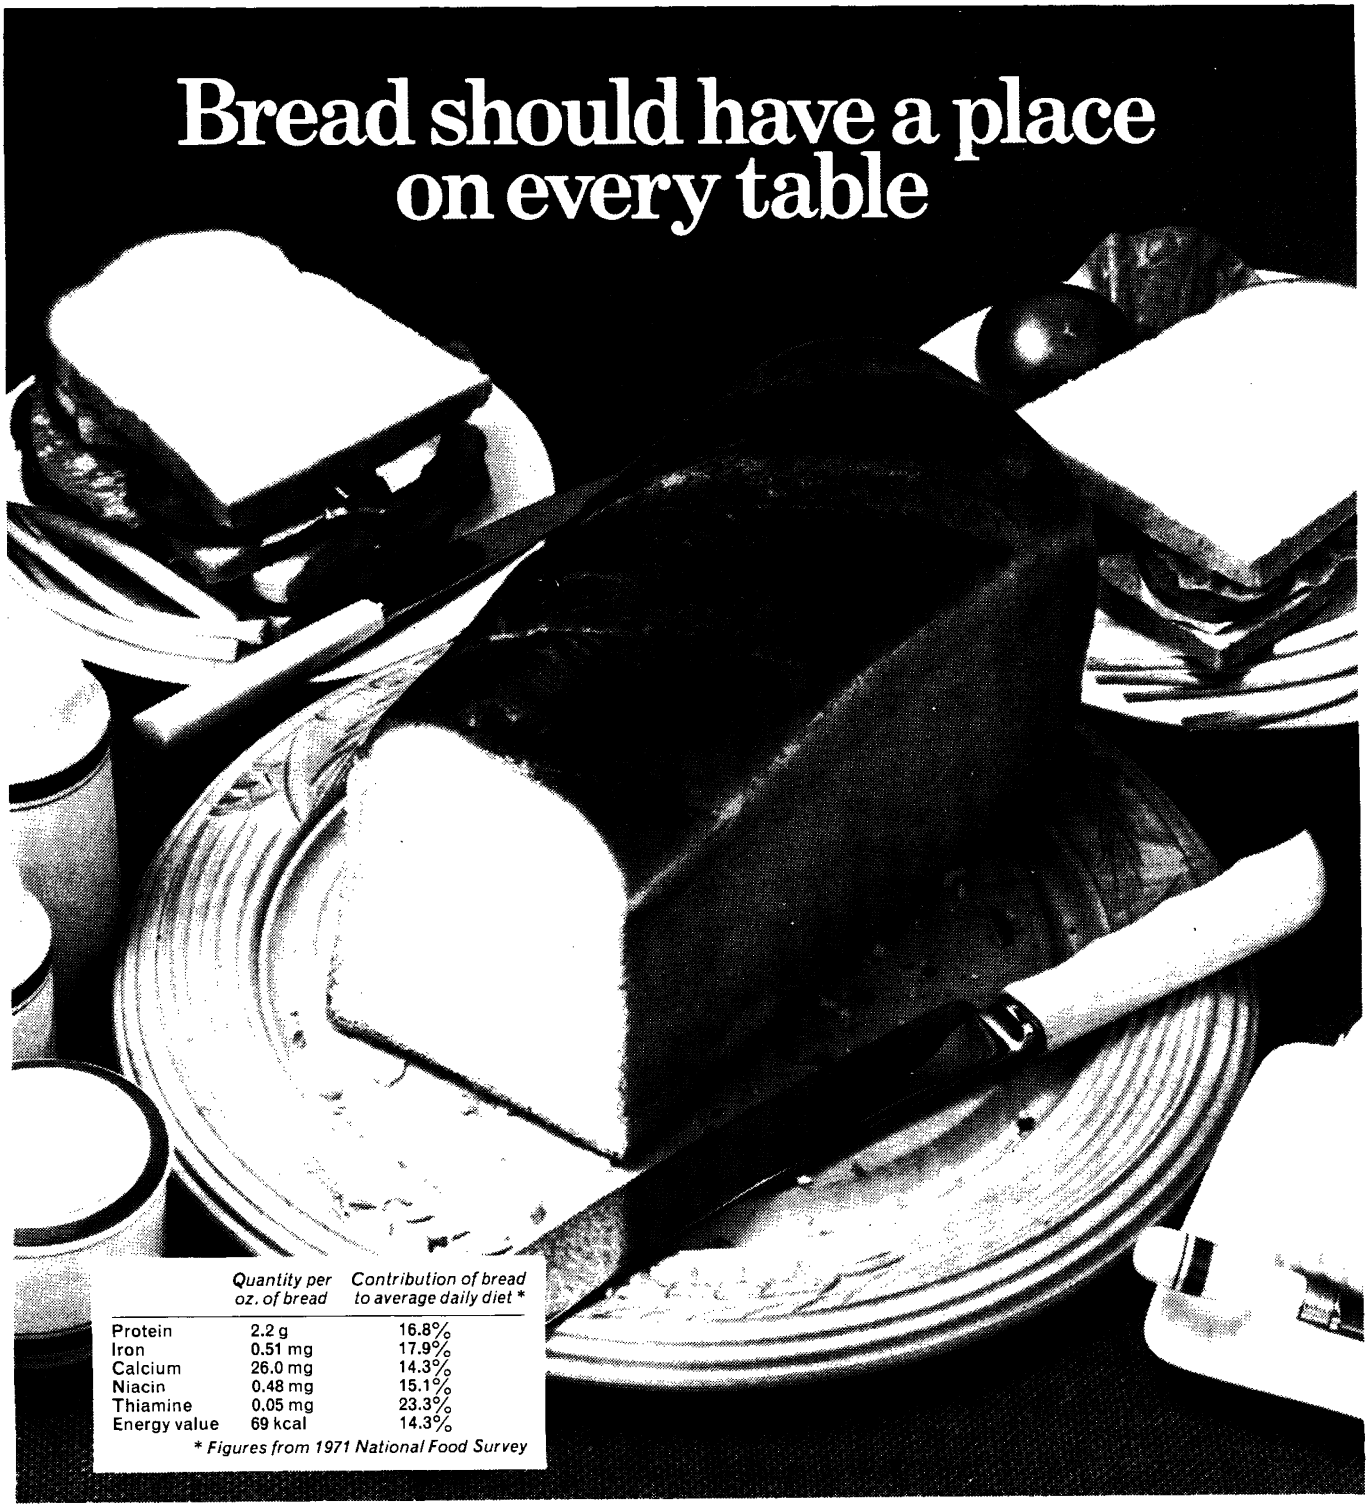

In particular, one feature of the trial really stands out: After 91 days (13 weeks) the superiority of Prinalgin becomes increasingly significant.

The conclusion is obvious: long lasting improvement in rheumatoid arthritis is better achieved with Prinalgin than high dose aspirin.

Our daily bread is often underestimated as an essential source of goodness and nourishment.

In the average national diet (according to the 1971 National Food Survey), bread plays a key part, providing over one-sixth of a person's daily protein and iron intake; over one-fifth the daily thiamine; and nearly one-sixth the daily calcium, niacin and energy value.

This means, of course, that the importance of including bread in one's diet should never be underestimated. To cut out bread, even when slimming, may produce an unsatisfactory diet. For health's sake, it's worth recommending bread in *every* diet.

Penny for penny, bread provides nearly twice as much protein as cheese, and nearly three times that of white fish or beef. Which makes our daily bread one of the best food bargains in the world.

MUCODYNE presents a completely different concept in the treatment of mucus congestion. Experimentally, it has been shown to reduce the pathological increase in mucus-producing cells. Clinically it reduces the volume of bronchial secretions and restores pathologically sticky mucus to a more normal consistency. A consistency that enables it to be removed more easily. And more quickly. Recent British evidence* has shown that MUCODYNE shifts sticky mucus 4 days faster than bromhexine. For your next congested patient therefore this mucodynamic action of MUCODYNE will mean relief comes that 4 days earlier.

NATIONAL HEALTH SERVICE
INNER LONDON EXECUTIVE COUNCIL
GUY'S HOSPITAL MEDICAL SCHOOL

THAMESMEAD

An experience general practitioner is required to establish and lead the first of three teams of doctors to be based on the Thamesmead Main Health Centre and to take an active part in teaching and research.

An integrated health service is being planned for the new community of Thamesmead and the Main Health Centre, which is expected to open in 1978, will be the principal base for an ambitious teaching programme for medical and dental students, nurses and others. It will also provide a wide range of specialist clinics and diagnostic services. The centre will serve an ultimate population of up to 40,000 in the northern (Greenwich) area of Thamesmead, the first of whom will arrive in the spring of 1974.

Until 1978 the new practice will be based on temporary premises and will be supported by nurses and other staff attached to the Area Health Authority. Teaching activities will be arranged in co-operation with the staff of the Lakeside Health Centre which serves 7,000 people now living in the Southern (Bexley) area of Thamesmead. Out of hours duties may be arranged similarly.

It is expected that the successful applicant will be eligible for a Type D allowance which takes the form of a guarantee that the doctor's income will be made up to an amount agreed with the Executive Council; he will be offered an appointment as Senior Lecturer in the Department of General Practice at Guy's Hospital Medical School. He will be expected to take up his appointment as early as possible in 1974.

Application forms and further information may be obtained from **The Clerk, Inner London Executive Council, Addison House, 32-43 Chart Street, London N1 6EF.** Further information may also be obtained from **The Secretary, Department of General Practice, Guy's Hospital Medical School, London Bridge, S.E.1.**

The closing date for receipt of completed application forms is Monday, 4th March, 1974. (H18000) 5

OPHTHALMOLOGY

SOUTH EAST METROPOLITAN
REGIONAL HOSPITAL BOARD

Applications are invited for the appointment of a

CONSULTANT OPHTHALMOLOGIST

whole-time or maximum part-time, to Clinical Area No. 7, consequent upon a resignation.

For the next few months the out-patient services for the area will be concentrated into a 50-bedded unit at the new District General Hospital at Queen Mary's, Sidcup, which will deal with all branches of ophthalmic medicine and surgery and will be fully equipped to do so. Consultants from another area will also be using these beds. The establishment of a new service with this degree of concentration within a period of one year should present an interesting challenge and opportunity further to develop a special interest for the consultant appointed.

Possession of F.R.C.S. and wide experience of ophthalmology is essential.

Bromley, Beckenham and Farnborough Hospitals may be visited by arrangement with the respective Hospital Secretaries.

Application forms from the Secretary, Advisory Appointments Committee, South East Metropolitan Regional Hospital Board, Randolph House, Wellesley Road, Croydon, Surrey CR9 3QA, to be returned by 25th February. (54757) 76-1

(Scotland)

CONSULTANT IN OPHTHALMOLOGY

Applications are invited for appointment to a new post of Ophthalmologist (Consultant) in the Regional Ophthalmology Service based on Perth Royal Infirmary and the new teaching hospital at Ninewells. The principal duties associated with the post will relate to out-patient and in-patient services in the Perth District but the successful candidate will also have a definite commitment to work in Dundee in relation to any special interest he may have, e.g. paediatrics ophthalmology. Re-organisation of the Ophthalmology Service is at present under consideration and the duties of the post may be amended with an increased commitment to work in Dundee. It is likely that the University of Dundee will grant an associated honorary appointment.

The appointment will be on a whole-time or maximum part-time basis on the option of the successful candidate.

Forms of application and further particulars from the Secretary to the Board, Vernonholme, Riverside Drive, Dundee, with whom applications should be lodged not later than 2nd March, 1974. (H18006) 76-1

COMMUNITY MEDICINE

NORTH WESTERN
REGIONAL HEALTH AUTHORITY

TRAINING IN COMMUNITY MEDICINE
There are two posts suitable for doctors with at least two years post-registration clinical experience who are interested in a career in community medicine. The posts will be rotating and will offer practical experience in the work of the specialty by attachment to health districts and areas in Greater Manchester. They will normally be held for about two years and during this period the holders will be expected to undertake the course offered by Manchester University Department of Community Medicine. This is a part-time course, involving attendance at the University for 2½ days weekly in term time, over two years. Both formal instruction and preparation of a thesis are involved, and the course will prepare participants for an M.Sc., as well as enabling them to sit for the membership of the Faculty of Community Medicine.
The training posts established are equivalent to Registrar in the clinical specialties and carry the same salary scale (£2,850 x £171 (3) x £168 (1) £3,531); where doctors currently earning higher salaries are appointed it will be at the discretion of Boards to allow protection of salary.
Application forms and further particulars may be obtained from the Regional Medical Officer, North Western Regional Health Authority, Gateway House, Piccadilly South, Manchester M60 7LP. Applications should be received not later than 25th February, 1974. (22743) 110

MEDICAL ADVISER

For West Africa, East Africa and the Middle East

Medical Advisers are employed by our principal companies and organisational units overseas to provide professional medical advice and support services, including the setting up and monitoring of promotional trials of marketed products, the dissemination of medical information, and assisting in the training of medical representatives.

We now wish to appoint a Medical Adviser who will provide these services to our operating companies in Nigeria and East Africa and for our substantial export business to the remainder of West Africa and the Middle East. Reporting to the Zone General Manager responsible for these areas, he will be based at Berkhamsted, Hertfordshire, but will be required to undertake considerable travel.

This appointment offers an excellent opportunity either to Medical Advisers with experience in the pharmaceutical industry, who now wish to extend their activities into international operations, or to newcomers to the industry for whom a comprehensive training programme will be arranged.

We offer a good salary and conditions of employment, including a generous pension scheme, the use of a Company car, and assistance with removal expenses.

The Future General Practitioner

Learning and Teaching

General or family practice is a special subject. This book is written by six experienced teachers selected by the Council of the Royal College of General Practitioners. It is intended chiefly for teachers, but it will also be valuable to those who are learning and to all who are concerned about the place of family practice within a country's medical services.

A syllabus is developed in five main parts:

Health and Diseases

Human Development

Human Behaviour

Medicine and Society

The Practice

Throughout the book the authors have tried to indicate ways in which the teacher may approach the task of passing on what he had learned by his own experience. The theme is the search for objectives which will satisfy the needs of learner and teacher. The belief is that this search will benefit the future family practitioner and through him the community of his patients.

A recent clinical trial* again confirms that Ventolin is superior to isoprenaline in improving respiratory function.

Ventolin sets a higher standard in bronchodilator therapy

The duration of effect was at least 4 hours with Ventolin but with isoprenaline it was only about 2 hours.

*The body plethysmograph was used to compare the effectiveness of salbutamol, administered as Ventolin Inhaler, with that of isoprenaline by aerosol in a double blind, controlled trial in patients with stable asthma *(J. Amer. med. Ass.* 1972, **221**, 682). The results showed that statistically significant differences in favour of Ventolin were observed in all the parameters measured (See Table).

Ventolin is the ONLY adrenergic bronchodilator which is recommended for asthmatic or bronchitic patients who also have any form of heart disease or severe hypertension.

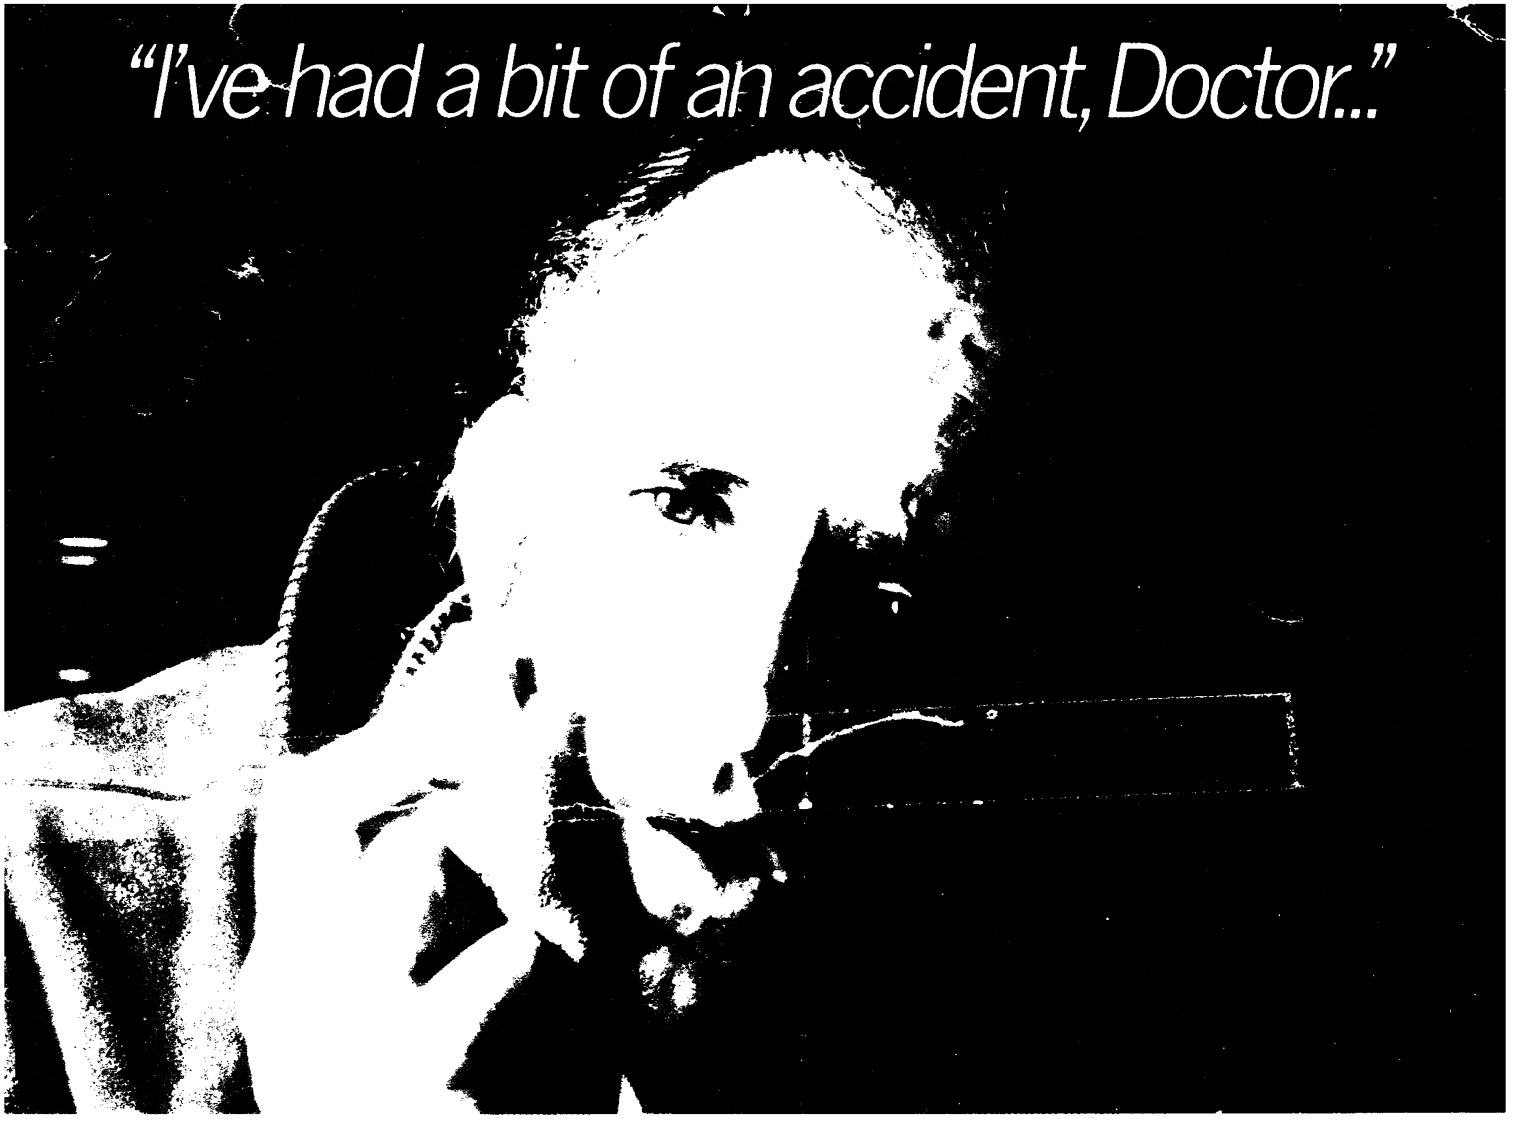

VENTOLIN INHALER – for rapid, long-lasting relief of acute bronchospasm.
VENTOLIN TABLETS 2mg and 4mg – for routine oral bronchodilator therapy.
VENTOLIN SYRUP – fruit-flavoured for ready acceptability by children.
VENTOLIN SPANDETS – sustained-action tablets, particularly suitable where nocturnal bronchospasm is a problem.
Ventolin Inhaler contains salbutamol BP. Oral preparations of Ventolin contain salbutamol BP as sulphate.

For the relief of bronchospasm... prescribe VENTOLIN
