

**Eugynon 30 Microgynon 30**

# less oestrogen

The greatest peace of mind comes from the lowest dose of oestrogen

# 30

## Eugynon 30 Microgynon 30

Both Eugynon 30 and Microgynon 30 are suitable for the vast majority of women.

However, no one pill suits every woman,  
and the choice of progestogen dosage provided by the system  
permits 'fine tuning' of prescribing, in order to maximise acceptability.

Eugynon 30, the established  
30mcg oestrogen product,  
is particularly suitable for the  
sexually mature woman owing  
to the marginally higher  
progestogen content.

New Microgynon 30 with a  
further reduction in progestogen,  
representing the lowest  
available hormone intake, is  
especially suitable for the  
younger or less sexually mature  
woman.

The first and only system of 30mcg oestrogen oral contraceptives,  
Eugynon 30 and Microgynon 30,  
specifically designed to suit the vast majority of new patients,  
and patients complaining of side-effects with other oral contraceptives.

The New Schering 30 System provides

Lowest daily intake of oestrogen

Choice of low daily intake of progestogen

Unsurpassed reliability

Outstanding tolerance

Excellent cycle control

#### Prescribing Information

Despite anxiety...  
drawings done, deadline met

Another example of  
'Stemetil' at work

Anxiety poses special problems in those who work.

Because anxiety, by blunting mental faculties, producing physical symptoms, or both, always impairs the capacity to work.

Because treatment, if it is the wrong kind, may easily do the same.

Both disorder and remedy in short may produce what few can afford for long: inefficient, "below-par" performance.

This in a nutshell is why 'Stemetil' \* makes such good sense.

Because 'Stemetil' effectively removes the initial incapacitation without itself causing fresh incapacitation.

As an efficient tranquillizer, it provides prompt, complete relief of anxiety and its physical symptoms.<sup>1,2</sup>

As an efficient daytime tranquillizer, it acts without clouding thought, impairing concentration or blunting alertness.<sup>1</sup>

With 'Stemetil', in short, neither the patient nor his work need suffer further. And what other treatment can make as good a job of things as that?

# Before you plan your next conference, this is the book you must read

Ireland is the big surprise in the conference and convention world. For good reasons.

And the reasons are all in this big, full colour, facts book. It will tell you exactly how, and exactly why Ireland is the location for your next conference.

## **Because**

Ireland is close, with 13 air and 4 sea departure points from Britain. Less than an hour away—close! Bring your car and enjoy a pre or post convention tour. It's an island, so your delegates get all the advantages of being "Abroad", the freedom from immediate pressures, the freedom to play a little, the freedom to think a lot.

## **Because**

Ireland offers you complete purpose built conference facilities, whether for 10 delegates, or 5,000.

## **Because**

The Convention Bureau of Ireland gives you centralised command of all Ireland's conference facilities.

Full time specialists in Convention planning and

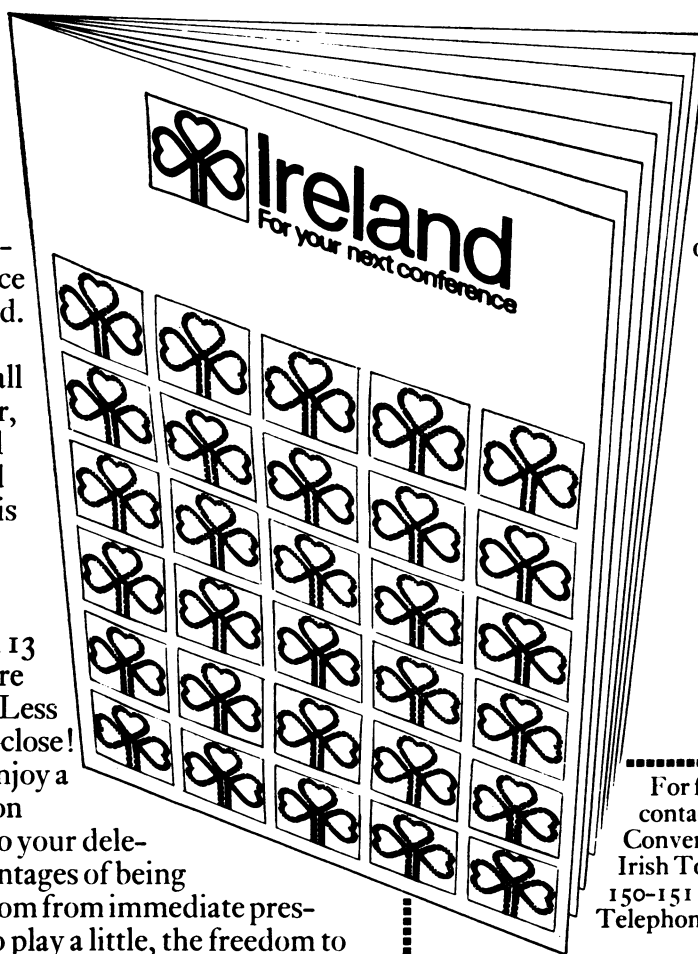

organisation will co-ordinate, follow through, and tailor arrangements to your company's needs.

## **Because**

Ireland gives you so much. Costs so much less than you think. Perhaps even less than you are accustomed to budgeting.

All the facts are in this book! So fill in the coupon and get the facts.

Or give Derek Mulrooney a ring.

# Alistair is an he has only one

It's all around him, all the time yet, he's never seen it. Because at only 0.3mm in length, the common dust mite doesn't advertise itself.

Yet this minute creature is responsible for a disabling disease in an estimated 300,000 Britons. Now, at last, there is a new answer. A short immunisation course that is simple and very effective. A fundamental treatment that for the first time gives you, the family doctor, real control over this type of allergic asthma. And a new quality of life for your asthma patients.

Migen is effective. Allergy has always been recognised as one of the most common causes of asthma. Recently it has been established that the most important allergenic factor in house dust is the house dust mite; in fact, more than 90% of house dust sensitive patients are sensitive to house dust mite. And, "The rise in the mite content of dust from September to October has been shown to be directly related to an increase in asthma during this period."\*

Migen immunises against the house dust mite. Immunisation against this powerful allergen raises the patients' overall level of tolerance. If he is multi-sensitive, he may well find that he no longer reacts to contact with other allergens which have previously provoked attacks. And the stress caused by fear of attack is reduced.

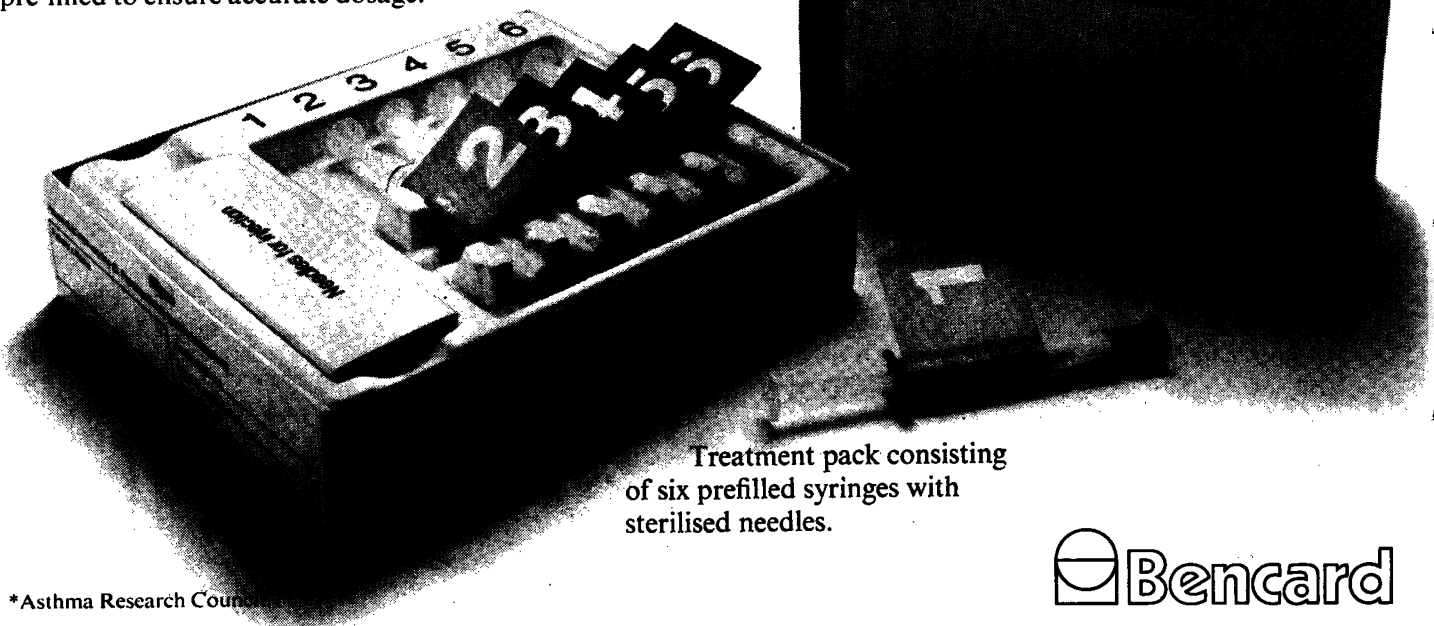

Migen is simple. Migen is a short course vaccine which contains pure extract of *Dermatophagoides pteronyssinus*, the most common British house dust mite. Just six injections form a complete course of treatment for asthma and perennial rhinitis. And each syringe is pre-filled to ensure accurate dosage.

Migen – minimal side effects. Migen's active material is released slowly but completely for maximum efficiency and minimum risk of adverse effects. Migen is adsorbed onto tyrosine, a naturally occurring amino acid, fully metabolisable in the human body.

Migen is a Bencard product. Prepared by Bencard, leaders in allergy research, Migen is the first asthma treatment to give *you* control over your asthma patients. Migen may usually be prescribed on the basis of a careful case history, no complicated testing techniques are necessary. However a simple confirmatory skin test kit is available on request, together with patient record cards and advice notes.

Migen. Many products have been advocated for use in the treatment of asthma. Most have drawbacks that you and your patients suffer for the sake of some relief. Now Migen offers an opportunity to treat asthma simply and effectively.

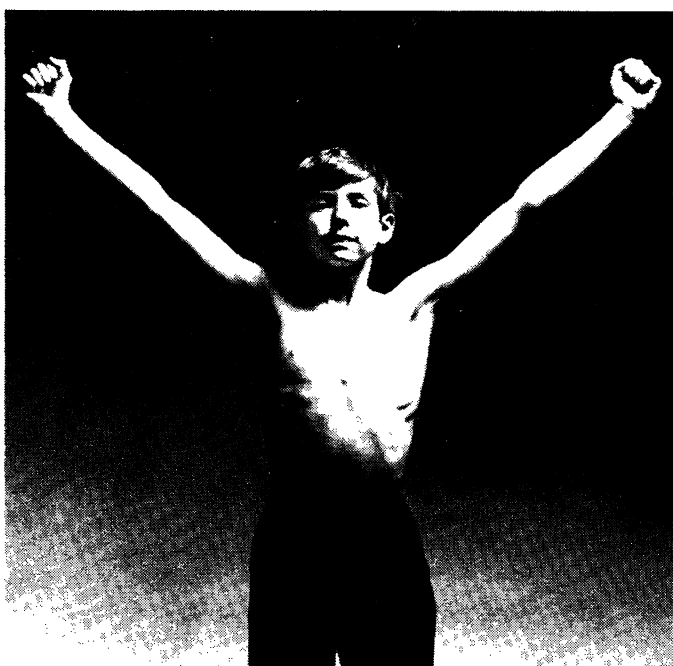

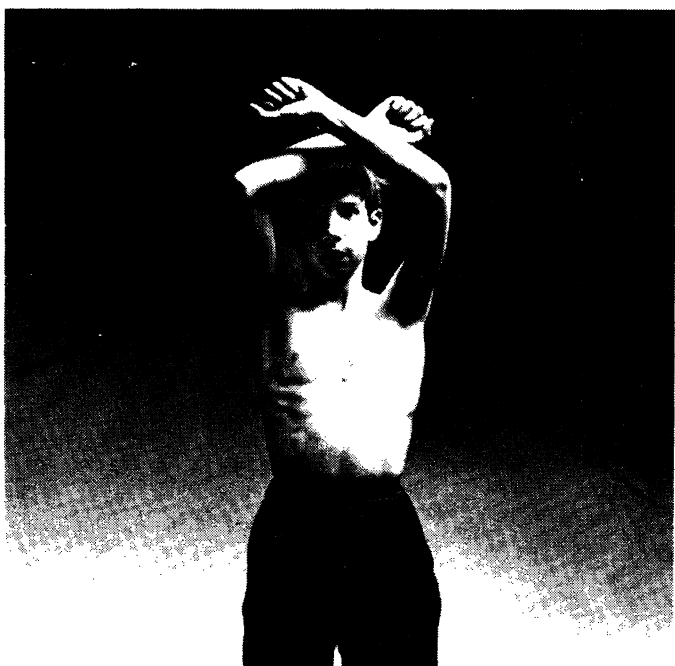

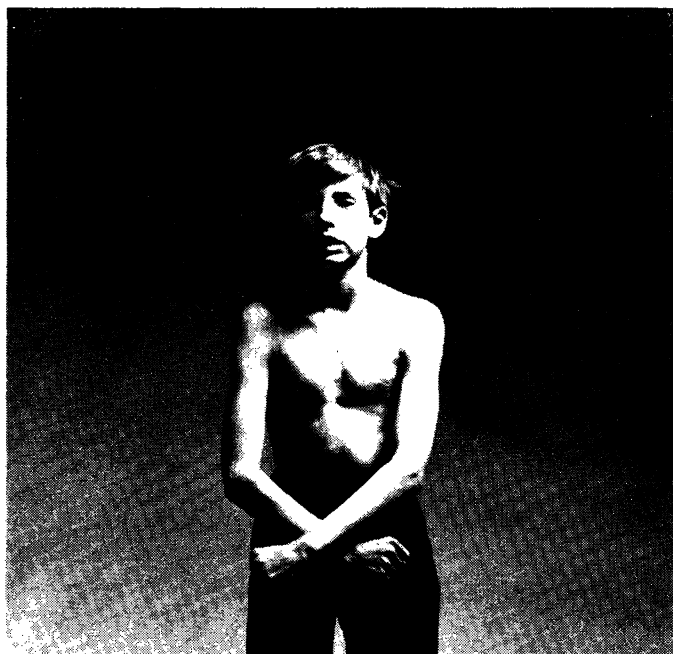

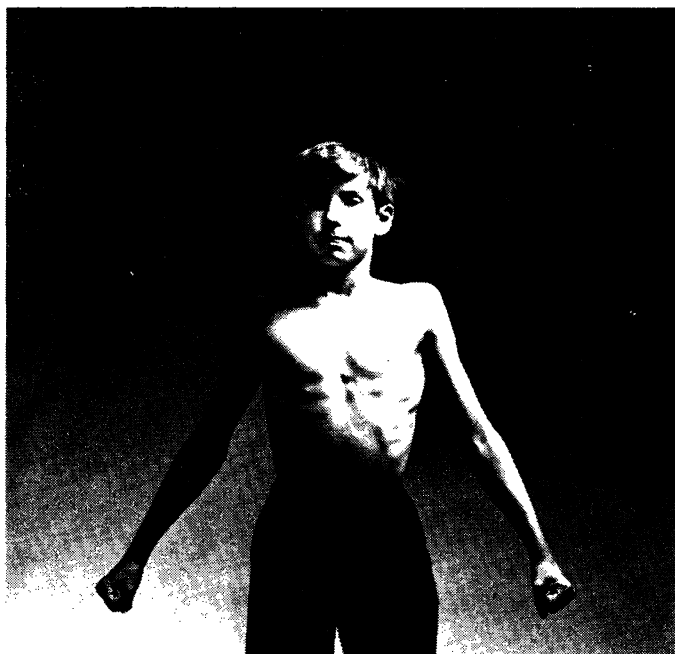

Allergy has always had a strong hold on the asthmatic. From today a powerful and very common

Treatment pack consisting of six pre-filled syringes with sterilised needles.

# He's back with a

There's now considerable evidence to show that Amoxil is more effective than other broad spectrum antibiotics in the treatment of chest infections.<sup>1,2,3,4</sup>

There are some good reasons for this:

Firstly, Amoxil is extremely well absorbed by the oral route,<sup>5</sup> attaining high bactericidal concentrations.

And secondly, the overall absorption is unaffected by the presence of food<sup>5</sup> which means your patient doesn't have to remember to take Amoxil half an hour or whatever before meals.

Couple this with Amoxil's apparently excellent ability to penetrate into bronchial secretions<sup>3,6</sup>, and you've probably explained why Amoxil out-performs other broad spectrums.<sup>1,2,3,4</sup>

## Dyspepsia

**If antacids were the complete answer,  
would he return to your surgery so often?**

Antacids deal with excess acid. But, in many cases, dyspepsia involves more than this.

Unpleasant symptoms such as dyspepsia, heart-burn and gastritis can frequently be traced back to disturbed gastric motility. Recent research has shown that in many patients food is retained for too long in the stomach, gastric contents enter the oesophagus, and bile refluxes from the duodenum.<sup>1</sup>

With Maxolon, you can resolve this underlying problem. Maxolon restores gastric motility to normal, so that symptoms of dyspepsia are prevented.

Prescribe Maxolon (tablets or syrup) for your dyspepsia patients. They—and you—will appreciate the difference.

# Clinical Investigation Medical Adviser - Northern Europe

As an international pharmaceutical company, we believe that clinical investigation of our established drugs and experimental compounds should take place in all major countries of the world. We already have a world-wide team of Medical Advisers, and wish to enlarge this by appointing an additional Medical Adviser, to cover Northern Europe.

The doctor appointed would be responsible for the initiating and progressing of clinical trials, liaison with registration authorities and the provision of a general medical advisory service, not only to the Research Department in Nottingham but also to marketing colleagues in the International Division of the parent company and to our associate companies overseas.

The precise geographical area to be covered, and the location of the post will depend on whom we appoint: it does not necessarily follow he will be required to relocate. Nevertheless, applicants should have fluent English, a second language, and a reasonable knowledge of medicine in the countries of Northern Europe. Previous experience within the pharmaceutical industry would be an advantage, but lack of this will be compensated for by ability, personality, enthusiasm and the wish to establish this new appointment within the company.

Please write, in confidence, to: J. L. Muncey, Head Office,

# Stand up all those not using Betnovate!

Betnovate—the most widely prescribed topical corticosteroid preparation for the treatment of dermatitis and eczema.

More patients with these conditions are successfully treated with Betnovate than any other therapy.

Betnovate acts rapidly and effectively, and usually gives dramatic relief from unpleasant itching.

And when infection is likely to complicate a condition, Betnovate with neomycin is available as Betnovate-N.

Presentation: Betnovate and Betnovate-N are presented as cream or ointment in 15, 30 and 100 gram tubes.

Full details on Betnovate (trade mark) are available on request from Glaxo Laboratories Ltd, Greenford, Middlesex, UB6 0HE **Glaxo** 

After three weeks' treatment with Betnovate

# ***Becotide INHALER*** is indicated for a wide range of patients with *bronchial asthma*

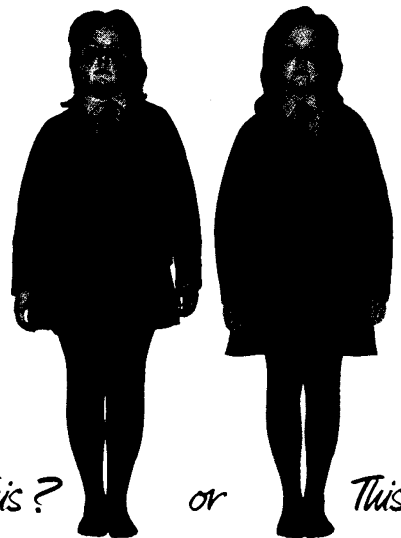

Patients whose asthma is becoming  
worse and whose response to  
bronchodilators is consequently waning;

Patients who are not controlled or are  
inadequately controlled by  
sodium cromoglycate in addition  
to bronchodilators;

Children with severe asthma;  
Severely asthmatic patients who are  
dependent on systemic steroids or  
ACTH for their well being.

# The clinical evidence for Becotide Inhaler is extensive and convincing...

Topical treatment with beclomethasone dipropionate by means of an aerosol (Becotide Inhaler) thus provides excellent control of patients with asthma.

(*Practitioner*, 1973, 211, 86)

Clinically, the steroid aerosol (Becotide Inhaler) provided the expected benefits observed when oral corticosteroids are given to asthmatic patients.

(*Curr. med. Res. Opin.*, 1972, 1, 173)

For those who are poorly controlled on bronchodilators or DSCG, this treatment (Becotide Inhaler) can give complete or comparative freedom from airways obstruction without risk of adrenal suppression or other side effects.

(*Brit. med. J.*, 1973, 3, 161)

Beclomethasone dipropionate (Becotide Inhaler) appears to be an effective drug in the treatment of severe childhood asthma in those patients who need corticosteroid therapy in addition to disodium cromoglycate.

(*Arch. Dis. Childh.*, 1973, 48, 671)

With the addition of this important drug (Becotide Inhaler) to our armamentarium, the long-term treatment of children with oral steroid is no longer desirable.

(*Arch. Dis. Childh.*, 1973, 48, 663)

Patients 13, 16 and 17 were all controlled on prednisolone in excess of 10mg per day and were unable to reduce the dose of prednisolone below that level without clinical deterioration. They now remain as well, if not better, controlled on the steroid aerosol (Becotide Inhaler) in a dose of 100mcg four times a day and all have normal basal plasma-hydrocortisone levels.

# Before you prescribe another bronchodilator, read this.

Asthmatic attacks in older patients can be serious.

They may damage lung tissue and affect the ability to expel pus and phlegm. This can lead to chronic infection.

Bronchodilator aerosols help, but usually only when much of the damage has been done.

Often they don't get through to the affected areas and succeed only in hyperventilating unaffected areas.

The patient may panic, overdose, and this may result in cardiac stimulation.

Only Intal prevents the attack and eliminates these problems.

With Intal, there is no danger of side effects, no risk of misuse and no diminution of therapeutic effect.

Put them on Intal.  
Give them a fighting chance.
