Gastritis

**If antacids were the complete answer,
would he return to your surgery so often?**

Antacids deal with excess acid. But, in many cases, dyspepsia involves more than this.

Unpleasant symptoms such as dyspepsia, heart-burn and gastritis can frequently be traced back to disturbed gastric motility. Recent research has shown that in many patients food is retained for too long in the stomach, gastric contents enter the oesophagus, and bile refluxes from the duodenum.¹

With Maxolon, you can resolve this underlying problem. Maxolon restores gastric motility to normal, so that symptoms of dyspepsia are prevented.

Prescribe Maxolon (tablets or syrup) for your dyspepsia patients. They—and you—will appreciate the difference.

Full information on Maxolon in gastroduodenal conditions is available on request.

Zaroxolyn has a high success rate in mild to moderate essential hypertension.

"The high frequency of good to excellent response, once a day administration, potentiation of other non-diuretic anti-hypertensive agents and the failure of tolerance to develop in long-term use would seem to be the major advantages of metolazone."

the uncomplicated antibiotic

This is what we call practising medicine.

A career in Naval medicine can be a rewarding experience. Opportunities to specialise abound. And perhaps above all else, there is an immense satisfaction to be gained from the wide variety of work you will be involved in.

At sea, for instance, you could be anywhere from the Mediterranean to the Pacific Ocean. Looking after the health and well being of the company of a modern warship.

And though you could spend as long as the first eighteen months of your five year Short Service Commission on board different ships, you need have no fear of losing contact with mainstream medicine. For no matter where you are, you will be kept informed of current medical opinion.

After this, the choice is yours. Post graduate medical training and a career in the clinical disciplines at one of our naval district general hospitals. Haslar or Plymouth, for instance, with their wide spectrum of clinical material drawn from naval personnel, their dependants and the local civilian population as well. There are also naval hospitals in Malta, Gibraltar and Mauritius, with opportunities for exchange appointments elsewhere.

Or you might prefer occupational medicine in our research orientated naval dockyards. Aviation medicine with its accent on rotary wing support of the Fleet. And for those with an administrative turn of mind, community medicine.

Royal Naval expertise in maritime medicine is recognised world wide and research into underwater medicine, nuclear medicine and the closed submarine environment is centred

at the Institute of Naval Medicine at Alverstoke.

Naval general practice in well staffed and equipped medical centres extend as far afield as Hong Kong and Singapore. And new training schemes are now under way in the United Kingdom.

Should you be moved or sent abroad at any time, all expenses will be paid by us. We will help you with accommodation (at very reasonable rents) and provide allowances for the education of your children, if you have a family.

If you enter the Royal Navy immediately after registration you will be given the rank of Surgeon Lieutenant and a salary of £4,776, rising to £4,929 after four years.

On the other hand, if you are older (up to the age of forty) and more experienced, we can offer you a number of opportunities in general practice and the specialities. And, depending on your post-registration experience, you could enter as a Surgeon Lieutenant Commander at a salary of £5,780, rising to £6,375 after five years.

Then, at the end of your five year Short Service Commission you could leave with a tax free gratuity of £3,000.

But if it is mutually agreeable, you could apply for a Full Career Commission or a 16 year pensionable commission. The choice is yours.

In the meantime if you would like further information, write giving details of your age and qualifications to Surgeon Commander L.C. Banks, R.N., (724 BU17) Department of the Medical Director General (Naval), Empress State Building, Fulham, London SW6.

CARDIOVASCULAR DISEASE IN THE TROPICS

Cardiovascular disease is a major problem in many developing and tropical countries and this collection of essays by 36 members of the *International Society of Cardiology* draws attention to the fascinating and complex situation in the tropical world. The book presents the present state of knowledge regarding many conditions previously thought to be peculiar to the temperate and developed countries and also deals with those disorders peculiar to the tropical situation. The difference in geographic distribution and natural history of many cardiovascular problems between temperate and tropical countries provide unique opportunities for research into the nature of these problems. The book is intended not only for doctors and students in tropical countries but for cardiologists, physicians, pathologists and epidemiologists everywhere, who are concerned with the international problem of cardiovascular disease. It provides an up-to-date review suitable both for clinical and epidemiological work and for further research into these disorders.

In confusional states following acute febrile illness or surgery, alcoholic or drug-induced psychoses, and in peripheral neuritis associated with a malabsorption syndrome, patients should benefit from 2 days intensive intravenous administration of Parentrovite high potency B and C vitamins. After which, therapy can be continued by the intravenous or the intramuscular route for 5-7 days. This treatment rapidly assists a return to normal intracellular glucose metabolism, the consequence of which is a significant improvement in the patients condition.

Tetrabid-Organon
so much better for bronchitis.**

HO-CO-CH=CH-CO-OH is the formula of Fumaric Acid, one of the constituents of Tetrabid-Organon, the twice-daily tetracycline. By creating an acid environment at the point of release, Fumaric Acid encourages more complete absorption of Tetracycline from the intestine.

Tetrabid-Organon capsules are specially formulated to allow gradual release of both Tetracycline Hydrochloride and Fumaric Acid. Sustained release and enhanced absorption give Tetrabid-Organon outstanding advantages over conventional q.i.d. tetracycline. Twice-daily dosage. Sustained therapeutic blood levels. Reduced side-effects.

**What would you give
to be able to arrest the progress
of Arthritic Disease?**

New clinical and biochemical evidence has shown that unlike other anti-arthritics Prinalgin capsules effect a significant reduction in the severity of rheumatoid arthritis.^{6,7}

The implications of this in the patient with early inflammatory arthritis is that only Prinalgin can offer

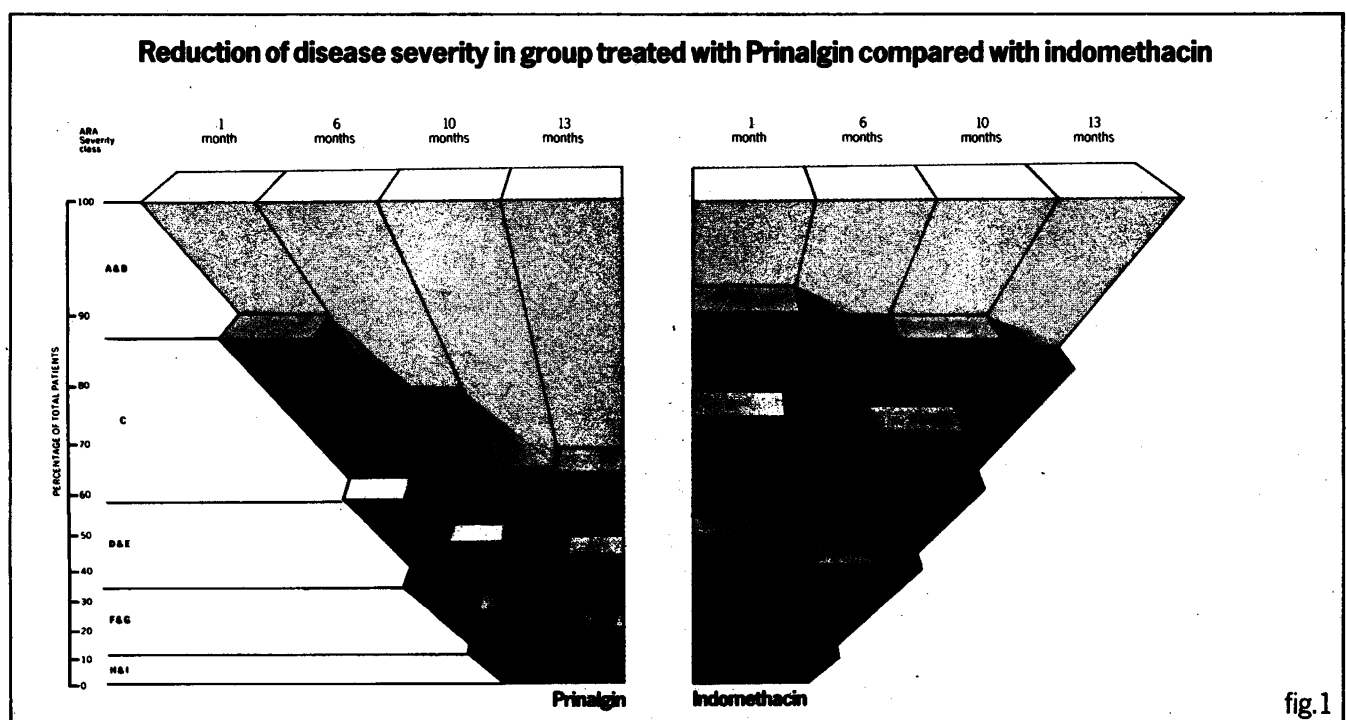

in the short term good control of symptoms...^{1,2,3,4}

Several studies have shown that Prinalgin is either as effective as or superior to other anti-arthritics in providing:

- relief of pain
- easier mornings
- better gripping ability
- less joint swelling
- and fewer inflamed joints

...and in the long term a reduction in the severity of the disease.

Comparative studies of two years or more have shown that patients on Prinalgin migrated to less severe disease categories (A.R.A. rating scale fig. 1) whilst those on indomethacin showed no marked improvement.⁶ Detailed biochemical evidence supports the conclusion that Prinalgin exerted a fundamental effect on the disease process itself.⁷ Furthermore, intolerance, particularly gastro-intestinal, was uncommon.

A.R.A. Severity Classification

The American Rheumatism Association (A.R.A.) severity classification is accepted as providing a standard for the classification of the severity of a patient's rheumatoid arthritis. Measurements are taken of objective physical parameters: grip strength, morning stiffness, joint index and functional capacity, and a score given for each of these. The total score decides the severity of the disease in the individual and hence the A.R.A. class. Therefore a patient with very severe rheumatoid arthritis could on this system be placed in class H or I while one with mild disease would be in class A, B, or C.

"Without doubt the commonest cause
of incontinence in old age is the
uninhibited neurogenic bladder"
Update, 2, 616, (1970)

"In refractory cases and in the older age groups, Cetiprin* (emepronium bromide) in a dose of 200 mg, three times daily is often more effective than Probanthine (propantheline bromide). In patients with nocturnal urgency and early morning incontinence, Cetiprin in a dose of 400mg before retiring at night is usually curative. This drug may be combined with Valium (diazepam) and Librium (chlordiazepoxide) without harmful sequelae".

**'Surmontil' – the short answer to
recurring sleeplessness**

Now from Beecham: an oral penicillin specifically for Urinary Tract Infections.

Urinary tract infections are rarely as simple as they seem. Patients with renal infection may present with no symptoms other than dysuria and frequency. And management is very often complicated by relapse and recurrence.

Now Beecham have introduced Uticillin, a powerful oral penicillin indicated specifically for the treatment of urinary tract infections such as cystitis and pyelonephritis. Uticillin will successfully treat 9 out of 10 patients first time, with a reduced risk of relapse. Uticillin has the inherent safety of penicillin. Unlike many urinary antibacterials, Uticillin can be prescribed both in pregnancy and when the possibility of pregnancy must be considered.

And the dosage is simple to remember—1 tablet three times a day.

Uticillin. The decisive answer to acute and chronic urinary tract infections.

Adult dosage: Simple urinary tract infections, 1 tablet (500 mg) t.i.d. Complicated and recurrent urinary tract infections, 2 tablets (1g) t.i.d.

Contra-indication: Penicillin hypersensitivity.

Side-effects: As with other penicillins.

Precaution: In mild and moderate degrees of renal impairment the normal dosage recommendations should be followed. In patients with severe renal failure (creatinine clearance of 10 ml/min or less) carficillin is not recommended; in such patients urine levels may be insufficient for therapeutic efficacy.

WIDELY ACCEPTED BY PATIENTS

- * Most patients taking 'Aldomet' feel well and improve symptomatically.
- * Symptomatic exercise or postural hypotension rarely occur—patients report 'dizziness' only rarely.
- * A sedating effect (beneficial for some anxious patients) usually disappears on continued treatment.

By overcoming many of the disadvantages of other types of therapy, 'Aldomet' permits effective antihypertensive treatment of most patients. In contrast to some other antihypertensive agents, 'Aldomet' is not necessarily contra-indicated in hypertensive patients with asthma, obstructive pulmonary disease, or congestive heart failure, provided caution and appropriate additional specific therapy is used.

Patients' acceptance and physicians' confidence together mean that, apart from diuretics, 'Aldomet' is the most widely used antihypertensive in Britain today.

COMMERCIAL APPOINTMENTS

Director of Clinical Research

Edinburgh capital and festival city of Scotland

An opportunity exists to play a major part in the development of Syntex Research Centre, a new pharmaceutical R and D unit to be constructed on the unique Research Park of Heriot-Watt University Campus in a highly attractive country location close to Edinburgh.

The Director of Clinical Research will be responsible for the development of new compounds, initially in the cardio-vascular area, through Phases I and II of study. He will work closely with Universities and Hospitals mainly in the European area. His future Department will include two further doctors, biostatistics and other assistance, and ancillary services (Library etc.) will be available. Close collaboration with the toxicology, pharmacology and pharmaceutical development units will be expected and personal research or clinical work on one day per week will be encouraged.

A number of compounds are already in development, and their medical progress will occupy the Director at an early stage. Temporary office accommodation will be available on site in February.

The ideal candidate will:-

- * have a medical degree and higher medical or scientific degree
- * have experience of Phase I and II clinical work particularly with cardio-vascular compounds
- * be young in mind, active and enquiring
- * speak one or more European languages (as well as English)
- * be prepared to travel
- * like working in a congenial, co-operative environment
- * expect, and get, rewards which recognise his efforts.

This is a vital position within the new Centre, and an attractive remuneration package will be offered, including a company car, free BUPA membership and a non-contributory pension (after a qualifying period).

If you feel you are the right candidate for this position please contact: Dr. G. A. Christie, Managing Director, Syntex Research Centre, St. Ives Road, Maidenhead, Berkshire SL6 1RD (Tel. 28424)

OCCUPATIONAL HEALTH (See also p. xvi)

Industrial Medical Officer

A large Public Group with interests in different industries requires a whole-time Doctor aged about 35-40 to take charge of Occupational Health within its manufacturing business in the South Wales and Herefordshire area employing approximately 4,000 people. This is a new appointment to replace a number of existing part-time medical officers. It will be permanent, pensionable, carry a number of other fringe benefits including the provision of a car. Experience in Occupational Medicine in the British Isles is necessary but an Occupational Health qualification, although desirable, is not essential.

The Group is progressive in its outlook and the man envisaged would be required to take an active part in innovation and to build up sound working relations with management. He must have administrative competence as well as a strong interest in Industrial Medicine. He will

be provided with secretarial and nursing assistance and with well equipped surgeries.

He will be expected to set up and operate a comprehensive range of health screening and to be actively concerned in all aspects of safety, accident prevention, and treatment. He will advise on absenteeism, environment and other related matters.

Salary will be dependent on age/experience but will not be less than B.M.A. scales.

Candidates should apply to D. G. Wright, quoting ref. 355. All applications, which may be in writing or by telephone, will be treated in the strictest confidence and will not be disclosed without the individual's permission. Local interviews can be arranged where candidates' commitments demand it.

IMPERIAL CANCER RESEARCH FUND

CLINICAL RESEARCH FELLOWSHIPS

Two Fellowships are available each year to physicians, surgeons, or other medical graduates of registrar status having M.R.C.P., F.R.C.S. or higher medical qualification. The Fellowships will be for 2 years starting in October 1975, or earlier, with an optional third year. They are suitable for those intending a career in clinical medicine with an emphasis on cancer. The Fellows will participate in the Fund's research programmes spending the first year in the laboratories in Lincoln's Inn Fields and the second year at one of the two extra-mural clinical units: the Medical Oncology Unit, St. Bartholomew's Hospital or the Breast Cancer Unit, Guy's Hospital. A third year, which will be at the discretion of the Fund, will involve clinical or experimental work as appropriate. Fellows may wish to use the research to obtain an M.D. degree. Alternatively a Fellow may choose to work for a Ph.D. entirely in the Fund's laboratories.

Superannuable salaries will be appropriate to the qualifications and experience of the Fellows.

Applications from British subjects normally resident in the UK should reach The Secretary, Imperial Cancer Research Fund, P.O. Box 123, Lincoln's Inn Fields, London WC2A 3P (from whom application forms are obtainable) not later than 28th February, 1975. (H13895) 25

APPOINTMENTS

Applicants should state name, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the *Hospital Gazette*. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. A consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the B.M.A., an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish higher qualifications (or vice versa).

Down House, Bexhill (45 beds) and Mount
Pleasant Hospital, Hastings (77 beds), plus
occasional visits to Loughton Lodge Hospital.

An active rehabilitation policy is being
pursued within the District and there is a
close association with the Social Services and
Education Departments of the Local
Authority, and the Multi-Disciplinary Team
also includes psychologists and social worker
working in the hospital and community from a
hospital base. At Hill House Hospital, Rye,
there is a modern school for the children who
are resident at that hospital and particular
emphasis is being put on the development of
special care units for disturbed children.

Acute and chronic mental disorders are
treated by visiting local general practitioners
and lack of recent hospital experience should
be no bar; experience in a school, community
or social service might be an advantage.
Facilities to proceed to higher qualifications
are available.

The salary would be at the rate of £460 per
annum per notional half-day session weekly
up to a maximum of £4,140 per annum for nine
sessions weekly.

Further information can be given if
required, and written application should be
made giving an indication as to the number of
sessions required together with full details of
qualifications, experience, etc., and the names
and addresses of two referees to: The District
Administrator, Hastings Health District, 9
White Rock Road, Hastings, Sussex, TN34 1LP.

SENIOR HOUSE OFFICER

IN THE PSYCHIATRIC DIVISION OF THE BASINGSTOKE DISTRICT HOSPITAL

IS REQUIRED from 1st January, 1975. Many young doctors looking for a house job early in their careers would shy away from psychiatry, but it could be a good idea, particularly if you want to enter general practice.

SURVEYS OF the workload in general practice have shown that up to 30% of patients consulting their practitioners have primary psychiatric problems and that in another 30% emotional difficulties are a prominent secondary factor.

SO WHY NOT consider working for your D.P.M. or M.R.C.Psych. at a modern psychiatric hospital with a big new District General Hospital in its grounds? Set in the beautiful Hampshire countryside on the outskirts of Basingstoke New Town (2 miles) it is served by a frequent bus service, an excellent fast train service to Waterloo (45 minutes) and is only 50 miles to London on the new M3 motorway.

BESIDES GENERAL clinical psychiatry the hospital (1,100 beds) has a variety of interesting special units: Alcoholic, Mother and Baby, Psychiatric, Intensive Care plus a rapidly expanding Community Psychiatric Nursing Service. It shares an active Postgraduate Education Centre with the District General Hospital, runs regular weekly Case Conferences and grants generous Study Leave to doctors attending the Wessex School of Psychiatry for the courses in the D.P.M. and M.R.C.Psych. The hospital also has its own Social Club and besides the usual varied sporting activities boasts an excellent nine-hole Golf Course whilst Basingstoke itself has one of the best sports centres in the country.

RESIDENT POSTS with single or married accommodation available. Application forms can be obtained from Personnel Department, 'Uplands', Aldermaston Road, Basingstoke, Hants. Tel: 29908. (20036) 84-8

Medical Officers

£7,300

 You are offered the prospect of a tour of duty — for as little as one year — in Zambia, one which will give you both a wide range of professional experience and early responsibility. It is with the nation's major mining organisation, Nchanga Consolidated Copper Mines Ltd, with an international staff of technical specialists.

The company is responsible for providing full medical care to its employees — over 30,000 — and their families; the total of persons to be looked after is about 150,000.

There is a senior doctor staff of over 40, together with a full complement of specialists and 150 fully qualified nurses. The modern facilities include 5 well-equipped hospitals (814 beds), 16 clinics and 8 main first aid dressing stations.

General Duty Medical Officers will be involved in preventive and curative medicine, surgery, anaesthetics, gynaecology/obstetrics, public health and nutrition; and although the mines have a strict safety code an amount of accident work can be expected.

Contracts may be negotiated for periods of one to three years. Locums can also often be arranged.

Salaries will depend on experience, but the minimum is K11,275 gross per annum (£7,320 based on an exchange rate of K1.=65p). In addition there is a tax free settling-in allowance; subsidised Company private primary schools; a detached, furnished house with garden is provided for £3 per week; and children receiving secondary education overseas are granted up to £780 per child per year, tax free, towards school fees and two free return passages to visit their parents during holidays; interest free car loan available. Study leave is available, and there are 60 days standard annual leave.

Up to 33⅓% of gross income can be sent home each month.

Please send for details to:

much better to go
to bed with a couple of

Safapryn-Co*

brand of enteric-coated aspirin
with paracetamol and codeine

*Trade Mark

The usual advice is to go to bed with a couple of aspirin. But aspirin can cause a problem – *gastric irritation*. Much better to go to bed with a couple of Safapryn-Co tablets. This formulation provides all the benefits of aspirin *without* the risk of gastric irritation. In Safapryn-Co, the aspirin is enteric-coated to pass intact through the stomach and dissolve in the alkaline fluid of the small intestine. Hence, there is no direct contact between the aspirin and the gastric mucosa to cause irritation.

But good toleration is only half the story. Each tablet contains:

enteric-coated aspirin/ paracetamol/codeine	to relieve the aches and pains
codeine	to reduce the cough

(Each sugar-coated tablet contains 300 mg. aspirin as an enteric-coated core, 250 mg. paracetamol and 8 mg. codeine phosphate).

PFIZER LIMITED
SANDWICH, KENT

Adverse circumstances, such as too many children and too little money, are recognised causes of neurotic depression or anxiety neurosis in persons with a low resistance to stress. These neuroses usually respond best to therapy with . . .

Triptafen-DA or Triptafen-Minor

Because "Since anxiety and depression are nearly always intermingled, it is often necessary to treat patients with a tranquilliser and antidepressant of proven efficacy." (*Practitioner*, 1972, 208, 511)

And Triptafen-DA and Triptafen-Minor provide:

amitriptyline hydrochloride BP – to elevate the mood – plus perphenazine BP – to relieve the anxiety.

For Comprehensive Treatment of Depression and Anxiety

PRESCRIBE TRIPTAFEN-DA WHEN DEPRESSION IS PREDOMINANT

TRIPTAFEN-MINOR WHEN ANXIETY IS MORE OBVIOUS

A NEW LOOK AT INFECTIOUS DISEASES

(ISBN 0 900221 88 7)

from the British Medical Journal

Infectious diseases remain as much a medical challenge as ever, and the articles collected in book form under the title *A New Look at Infectious Diseases* cover many aspects of diagnosis and treatment. The widespread use of newer antibiotics, and increased risk of spread by travel are all dealt with, as well as the problems of diagnosis produced by present day doctors' unfamiliarity with many diseases, which were formerly so common and widespread.
