**Imodium**  
JANSSEN

## stops diarrhoea safely and rapidly

unique chemical entity... loperamide (R 18 553) is an entirely new molecule, first synthesized by Janssen Research; the compound specifically inhibits hypermotility by a direct effect on the intestinal wall.

highly effective in acute diarrhoea... quickly relieves spasms and cramps; stops diarrhoea due to gastroenteritis, diet, functional causes, etc.; even more effective than diphenoxylate in double-blind studies.<sup>1,2</sup>

no incompatibility... no incompatibility with other therapies has been reported.

remarkably safe... contains no atropine, devoid of CNS activity; no adverse effects noted in long-term safety studies.<sup>3</sup>

patient-controlled dosage schedule... in adults, two capsules to start, one capsule after each unformed stool until bowel function is normalized.

### Summary of Prescribing Information

Indications : Imodium is indicated for the control of acute diarrhoea regardless of origin.

Side-effects : no specific drug related side-effects have been reported to date.

Precautions : overdose may lead to constipation. Safety of use in pregnancy has not been established. Imodium should not be used in patients with a known hypersensitivity to the drug and in those in whom inhibition of peristalsis must be avoided (e.g. subobstruction due to a tumour).

Availability : Capsules containing 2 mg of loperamide.

### Dosage :

## Specialist Journals on MICROFICHE

Since January 1976 all the BMA Specialist Journals have been published in a microfiche edition simultaneously with the standard paper editions. Overseas subscribers to the microfiche editions will receive microfiches, by AIR MAIL, within days of publication. The availability of the microfiche editions should have great appeal to libraries and other readers far distant from the United Kingdom.

The microfiche produced for the British Medical Association conform to the international standard as laid down by the National Microfilm Association of America. These microfiches are produced by a step and repeat camera with duplicates produced on silver halide film for archival permanence. Each fiche measures 105 mm × 148 mm and can contain up to 98 images filmed at a reduction ratio of 24× along with an eye readable title for identification. Details of microfiche volume binders are available on request.

The subscription prices for each annual volume on microfiche are as follows:

### **Peugeot 504L diesels. The exclusive facts.**

Peugeot 504 diesels, saloon and estate.  
Exceptional economy, especially for the high-mileage  
motorist, 35 mpg\* with Derv at around 60p a gallon.

So on fuel alone you get the cost-per-mile  
economy of a Mini (think what you'd save in a year!).

And the Peugeot diesel's built-in strength and  
reliability means even further economies in  
maintenance and repairs.

But don't imagine that Peugeot diesel economy  
implies any stark austerity. The superbly-fitted  
saloon carries five in quiet, smooth luxury. Estate  
load capacity is 66 cu. ft. Top speed is a healthy  
87 mph.\* And standard equipment includes reclining  
front seats, heated rear window, power assisted dual-  
circuit brakes, radial tyres, anti-theft steering lock,  
two-speed wipers, laminated windscreen and electric  
screen washers, hazard warning lights and inertia  
reel seatbelts.

### **We've always taken things seriously.**

Why are Peugeot cars famous for strength?

Peugeot is the world's second oldest car  
manufacturer, and the second largest in France,  
making nearly ¾ million cars a year. With sales and  
service throughout the UK. They have a wealth of  
experience in diesels, producing nearly a million  
engines over the last 15 years.

And Peugeot engineers combine old fashioned  
beliefs with modern technology. They say: "if you

can't make it well, don't make  
it at all." Peugeot make all major  
components themselves. Their own  
engines and gearboxes, body panels and  
shock absorbers. Each part designed and  
engineered for strength and safety. And every engine,  
gearbox and completed car given an individual test.

Small wonder you get the lion's share of  
reliability and safety with Peugeot. Because Peugeot  
give you the lion's share of strength.

# ASPECTS OF SEXUAL MEDICINE

**From the British Medical Journal**

Freer discussion of sexual matters on television and in the popular press has led to many more patients approaching their doctors for advice on sexual problems. The articles collected together in this book give practical advice on common problems such as impotence and on the help and guidance that may be given to handicapped patients and others with special difficulties. Few doctors received adequate instruction on sexual medicine at their medical schools: *Aspects of Sexual Medicine* brings them up to date.

# Alternative dosage regimen of Caved-S produces impressive results in chronic duodenal ulcer

Endoscopic examination proved chronic duodenal ulceration in 32 male patients, whose clinical histories ranged from 2 to 30 years.<sup>1</sup>

## ADEQUATE DOSAGE

2 Caved-S tablets 5 times daily for up to 24 weeks

"... the daily dose selected was the median of that advised in a series of patients treated with deglycyrrhizinized liquorice tablets who had failed to respond to other measures and had been referred for surgery . . ."<sup>1</sup>

## THOROUGH CHEWING OF THE TABLETS

mixing Caved-S with the saliva appears to play an important role.

"Saliva may have a role of its own or a synergistic action with constituent of the liquorice extract. Work in India (Malhotra *et al*, 1965) has suggested that eating foods which do not require chewing results in an increased incidence of duodenal ulceration and that saliva exerts a protective action in peptic ulceration (Malhotra 1967; Malhotra, 1967)."<sup>1</sup>

## SWALLOWING ON AN EMPTY STOMACH

allows the bolus of Caved-S and saliva to reach the prepyloric area of the stomach, where maximum demulcent effect and healing occur.

"The advice that the agent should be taken on an empty stomach in the ambulant patient could be crucial. Simple studies on patients presenting for barium-meal examination have shown that if a small sip of barium is taken while in an upright position when the stomach is empty the bolus of barium rapidly travels down the lesser curve of the stomach and comes to rest in the prepyloric region. This may effectively produce a 'positioned release' preparation, and the bolus of mixed saliva and deglycyrrhizinized liquorice would appear to be strategically placed to exert maximum demulcent or healing effect."<sup>1</sup>

## RESULTS

Endoscopic examination showed that Caved-S had healed the ulceration in ALL 32 patients and in most the mucosa appeared normal.

## GENERAL PRACTICE TRAINING POSTS

### BERKSHIRE AREA HEALTH AUTHORITY West District

#### VOCATIONAL TRAINING FOR GENERAL PRACTICE AT READING Scheme II

Applications are invited for the next two vacancies which will occur in this scheme on the 1st August, 1976. The training posts are for three years and will begin with introductory two months in general practice followed by six months General Medicine (Rheumatology with Neurology); six months Superintendence; six months Obstetrics & Gynaecology; six months Paediatrics; ten months General Practice.

Doctors completing the programme will qualify for the Vocational Training Allowance. The scheme is recognised for the M.R.C.G.P. and the appropriate hospital posts for the D.Obst. R.C.O.G. and D.C.H. The General Practice teaching does not conform to the traditional medical educational pattern. Trainees are involved in the scheme's organisation and management. They contribute to the group teaching process throughout the three years and attend the R.C.G.P. Thames Valley Faculty Day Release course during the general practice period. Hospital accommodation is available for the first two years. Interviews will take place on the 4th May, 1976 and applicants should plan to be present for the whole day. Applications are also invited from doctors who have had at least two years relevant postgraduate hospital experience and are interested in doing a one year traineeship in one of the approved teaching practices associated with the Reading Scheme. Trainees in these practices attend the same meetings as their colleagues on the three year schemes.

For further details and application forms, please write to the District Clinical Tutor, Postgraduate Medical Education Centre, Royal Berkshire Hospital, Reading, Tel: Reading 85111, Ext. 508 or 598 (STD 0734). Applications should be returned by 20th April, 1976. (H10644) 21

**VOCATIONAL TRAINING**  
**FOR GENERAL PRACTICE**

Applications are invited from fully registered doctors for two posts in this three year scheme commencing on 1st September, 1976. An introductory month in General Practice will precede two years to be spent in rotating hospital posts of six months each from the following: Accident and Emergency, Geriatrics, Obstetrics and Gynaecology, Psychiatry. The final 11 months will be spent in an approved training practice. A half day release course will be held in the academic term during the three years. A full programme of meetings is available at the Plymouth Postgraduate Medical Centre. The scheme is recognised for M.R.C.G.P. and D.Obst.R.C.O.G. Single or married accommodation will be available during the hospital period.

Applications and full details available from Miss A. M. Ling, Senior Administrative Assistant, Plymouth General Hospital, North Friary House, Greenbank Terrace, Plymouth, Devon. PL4 8QQ. Applications for the post commencing in September 1976 should be returned by the 26th April, 1976. The short list will be drawn up on the 28th April, and it is hoped to interview on or about the 7th May, 1976. Enquiries about the March, 1977 intake will be welcomed, although interviews will not be held until October, 1976. (25606) 21

## GENERAL PRACTICE TRAINING POSTS

### Vocational Training for General Practice

# THE NORWICH SCHEME

Applications are invited for the above scheme which consists basically of two years in hospital posts and a year in general practice. The hospital posts will be within the United Norwich Hospitals and will consist of 6 months in General Medicine, 6 months in Obstetrics and Gynaecology (approved for D.Obst.R.C.O.G.). 3 months appointments in Accident and Emergency, Psychiatry and Paediatrics. There is also provision for a 3 month Locum Elective period during which the successful candidate can gain experience in other specialties. Although the rotation starts officially in August 1976, there is provision for a preliminary period in general practice for 3 months commencing May, 1976 for successful candidates who are free at this time. The remaining nine months of general practice would then be completed at the completion of the hospital rotation. A half-day release programme operates for the twelve trainees, within the scheme, for the entire three year training period. Married accommodation will be available throughout the hospital period. Applications and enquiries for further information should be addressed to Dr. P. Leney, N.A.N.I.M.E., Norfolk & Norwich Hospital, Norwich NR1 3SR.

to join the newly created Clinical Division of Glaxo Research Ltd. He or she will be responsible for organising clinical studies of new products and will work closely both with leading physicians in hospital and with the Company's other research staff. The physician will be expected to acquire special knowledge of some interesting fields in medicine including those related to antibiotics and provision will be made for continuation of some personal clinical work in hospital. The preferred age is between 24 and 35. Some post graduate experience in hospital will be required and a knowledge of research principles will be helpful. Previous employment in the pharmaceutical industry is not necessary since the person appointed will be joining a multi-disciplinary team who will give all necessary help and advice initially. However, a keen interest in medical research is essential, coupled with common sense, precision of thought and the ability to work in harmony with colleagues.

The work will be based in Greenford and will involve travel within the UK. Employment conditions are good, with generous salary commensurate with experience and

qualifications. Other benefits include a company car, an attractive pension scheme, and participation in the profitability of the Glaxo organisation. Assistance with relocation will be offered in appropriate cases.

Glaxo Research Limited is one of the two principal research and development subsidiaries of Glaxo Holdings Limited, the largest and most successful British pharmaceuticals organisation with companies or trading links throughout the world.

The various associated companies include Glaxo Laboratories Limited, Allen & Hanburys Limited, Evans Medical Limited and Duncan Flockhart and Company Limited. They produce a wide range of ethical pharmaceuticals (including antibiotics, corticosteroids, vaccines and vitamins) for human and veterinary use. The major customer is the NHS. About 80% of the Group's earnings are achieved overseas through UK exports and local trading.

Written enquiries in confidence will be welcomed and application forms may be obtained from Dr. E. S. Snell, Director Clinical Division, Glaxo Research Ltd., Greenford, Middx. UB6 0HE. Ref. AM.113.

# APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or unreasonably on grounds of sex.

# HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the *Hospital Gazetteer*. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the BMA, an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).

## SENIOR HOUSE OFFICER IN PSYCHIATRY

required in April, 1976. Many young doctors looking for a house job early in their careers would shy away from psychiatry but it could be a good idea, particularly if you want to enter general practice. Surveys of the workload in general practice have shown that up to 30% of patients consulting their practitioners have primary psychiatric problems and that in another 30% emotional difficulties are a prominent secondary factor.

So why not consider working for your D.P.M. or M.R.C. Psych. at a modern Psychiatric Hospital with a big new District General Hospital in its grounds? Besides general clinical psychiatry the hospital (1,100 beds) has a variety of interesting special units: Alcoholism, Motor and Baby Psychiatric, Intensive Care plus a rapidly expanding Community Psychiatric Nursing Service. It shares an active Postgraduate Education Centre with the District General Hospital, runs a regular weekly case conferences and grants generous study leave to doctors attending the Wessex School of Psychiatry for the courses in the D.P.M. & M.R.C. Psych. The hospital also has Category A Approval from the Royal College of Psychiatrists. An active hospital social life exists and besides the usual varied sporting activities it boasts an excellent nine-hole golf course whilst Basingstoke itself has one of the best sports centres in the country. The post is resident and single/married accommodation will be available.

Application forms can be obtained from Personnel Department, Aldermaston Road, Basingstoke, Hants. Tel: Basingstoke 29908. Please quote reference No. BMJ/1276. (25806) 84-8

You **can** use a diuretic which is almost as fast and controlled as Burinex\* K.

But it **is** significantly more expensive!

You **cannot** obtain one with the convenience of built-in slow-release potassium with simple o.d. dosage.

Unless of course you prescribe Burinex K.

And by the way—it's a subtle combination where the diuretic effect is virtually complete within 3 hours, yet the potassium is released over 5 hours just to ensure that any potassium loss is carefully replaced.

Burinex K is recommended for the treatment of C.C.F.

... But of course the decision is yours.

# Burinex K

Starting dose – 2 tablets o.d.

\*Burinex is a trade mark

Tablets contain 0.5 mg bumetanide with a slow release core of 573 mg (7.7mEq) of potassium chloride.
