**Imodium**  
JANSSEN

**stops diarrhoea safely and rapidly**

unique chemical entity... loperamide (R 18 553) is an entirely new molecule, first synthesized by Janssen Research; the compound specifically inhibits hypermotility by a direct effect on the intestinal wall.

highly effective in acute diarrhoea... quickly relieves spasms and cramps; stops diarrhoea due to gastroenteritis, diet, functional causes, etc.; even more effective than diphenoxylate in double-blind studies.<sup>1,2</sup>

no incompatibility... no incompatibility with other therapies has been reported.

remarkably safe... contains no atropine, devoid of CNS activity; no adverse effects noted in long-term safety studies.<sup>3</sup>

patient-controlled dosage schedule... in adults, two capsules to start, one capsule after each unformed stool until bowel function is normalized.

#### Summary of Prescribing Information

Indications : Imodium is indicated for the control of acute diarrhoea regardless of origin.

Side-effects : no specific drug related side-effects have been reported to date.

Precautions : overdosage may lead to constipation. Safety of use in pregnancy has not been established. Imodium should not be used in patients with a known hypersensitivity to the drug and in those in whom inhibition of peristalsis must be avoided (e.g. subobstruction due to a tumour).

Availability : Capsules containing 2 mg of loperamide.

#### Dosage :

Acute diarrhoea	Adults	Children over 5
Initial dose	2 caps.	1 caps.
Subsequently after each loose stool	1 caps.	1 caps.

In acute diarrhoea a 5-day period of treatment should be adequate.

Full information is available on request.

# A doctor can gain a lot from 5 years in the Royal Navy.

As a qualified doctor, you can join the Royal Navy for 3 or 5 years on a Short Service Commission.

In that time, you'll spend up to a year practising medicine in a Naval ship.

You could have the chance of working and living overseas for a time.

And you'll be able to do your General Professional Training in one of the clinical and medical scientific disciplines at a Naval hospital or an RN establishment.

## At sea.

After a short Officers course at the Royal Naval College, Dartmouth, and a basic course in maritime medicine at the Institute of Naval Medicine, Alverstoke, you'll normally go to sea for about 12 months.

You'll be responsible for the medical care of some 250 to 500 men in your ship (and advise the Captain on health and environmental problems).

You won't lose touch with modern medicine, as you can visit local hospitals in ports of call and use the teaching aids provided by your Naval tutor.

## Postgraduate training and specialisation.

After your sea-time, career counselling will determine your postgraduate training programme.

There are opportunities for General Professional Training in preparation for a clinical career in general practice, the hospital specialities, or the medical scientific disciplines such as Aviation, Underwater, Submarine and Nuclear Medicine; or in Occupational and Community Medicine.

If you decide to transfer to a 16-year pensionable Commission, or a permanent Commission, you could move on to recognised higher training programmes which include research training and higher training posts in civilian units.

At Alverstoke, the Dean of Naval Medicine co-ordinates postgraduate medical training and research.

## Naval hospitals.

The two largest are at Haslar (near Portsmouth) and Plymouth.

They undertake the care of Naval personnel, their families and NHS civilians, providing a broad spectrum of clinical material. Both hospitals are recognised for higher training in the major specialities.

There is a full range of modern, technical equipment, and the nursing and paramedical staff are highly skilled.

There are smaller hospitals in Malta and Gibraltar.

## Salary.

If you join us immediately after registration, your salary will be £5,997 as a Surgeon Lieutenant.

You can, however, join at any age up to 39. In that case, your postgraduate experience is taken into account, and you could join as a Surgeon Lieutenant Commander earning £8,015 a year.

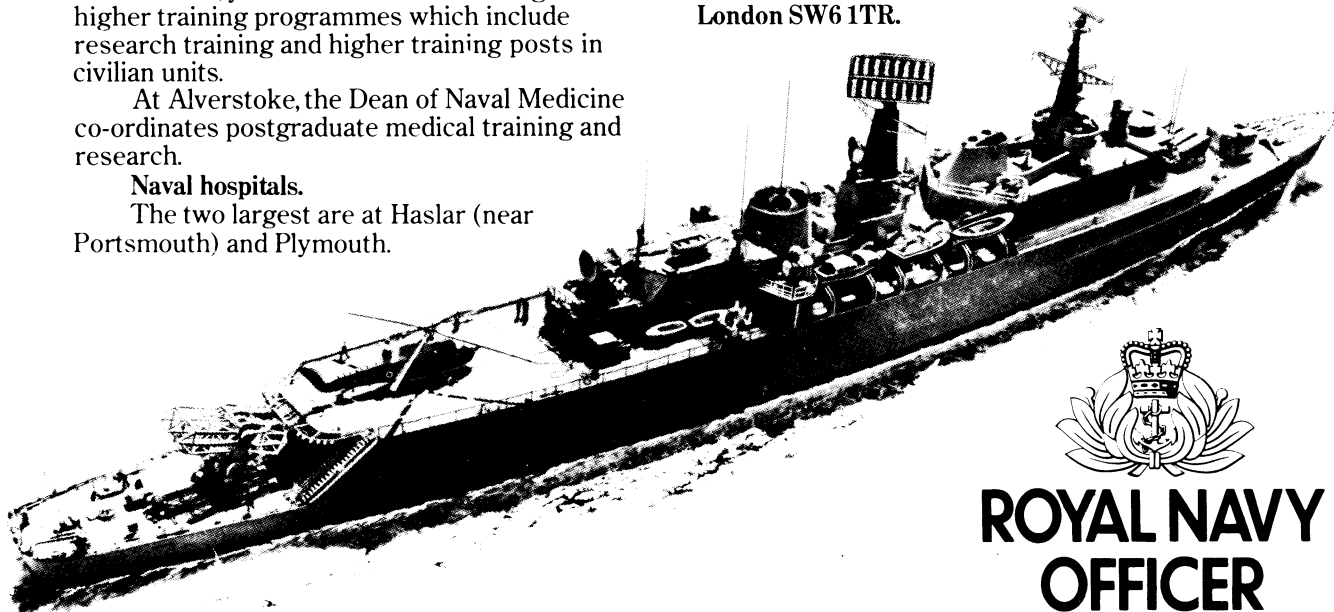

If you leave at the end of your 3 year Commission, you'll receive a tax-free gratuity of £1,500, or, after 5 years, £3,000.

If you decide to stay on, you can apply for a 16-year pensionable Commission or a permanent Commission.

The salary structure is based on an analogue computed from the average earnings of general practitioners in the NHS, with an additional X factor. There is extra pay for recognised postgraduate qualifications and Senior Specialist or Consultant status.

If you're posted overseas, you can, of course, take your family with you. There are, too, generous boarding school allowances for your children, starting at £807 for your first child.

# Your heart risk patients may find it hard to give up smoking, boring to take more exercise, and depressing to stick to a diet.

## But they'll find they like Flora.

Many authorities throughout the world are in no doubt that a causative relationship exists between a raised blood cholesterol level and coronary atherosclerosis.<sup>1,2</sup>

Therefore, to lower blood cholesterol is a sound objective in the management of the patient. This can be achieved by reducing the intake of saturated fats in the diet and by partial substitution by polyunsaturated fats.<sup>3,4,5</sup>

Flora is higher in polyunsaturated fats than any other leading margarine,\* and is low in saturated fats. It is an effective, easy and palatable component of a lipid lowering diet.<sup>6,7</sup>

For the patient with coronary heart disease the recommendation of Flora margarine is logical, clinical advice.

If you would like further information about Flora margarine and recipes in which it may be used by your patients with coronary heart disease, please write to: Flora Information Service, 25 North Row, London W1.

# Alternative dosage regimen of Caved-S produces impressive results in chronic duodenal ulcer

Endoscopic examination proved chronic duodenal ulceration in 32 male patients, whose clinical histories ranged from 2 to 30 years.<sup>1</sup>

## ADEQUATE DOSAGE

2 Caved-S tablets 5 times daily for up to 24 weeks

"... the daily dose selected was the median of that advised in a series of patients treated with deglycyrrhizinized liquorice tablets who had failed to respond to other measures and had been referred for surgery ..."<sup>1</sup>

## THOROUGH CHEWING OF THE TABLETS

mixing Caved-S with the saliva appears to play an important role.

"Saliva may have a role of its own or a synergistic action with constituent of the liquorice extract. Work in India (Malhotra *et al.*, 1965) has suggested that eating foods which do not require chewing results in an increased incidence of duodenal ulceration and that saliva exerts a protective action in peptic ulceration (Malhotra 1967; Malhotra, 1967)."<sup>1</sup>

## SWALLOWING ON AN EMPTY STOMACH

allows the bolus of Caved-S and saliva to reach the prepyloric area of the stomach, where maximum demulcent effect and healing occur.

"The advice that the agent should be taken on an empty stomach in the ambulant patient could be crucial. Simple studies on patients presenting for barium-meal examination have shown that if a small sip of barium is taken while in an upright position when the stomach is empty the bolus of barium rapidly travels down the lesser curve of the stomach and comes to rest in the prepyloric region. This may effectively produce a 'positioned release' preparation, and the bolus of mixed saliva and deglycyrrhizinized liquorice would appear to be strategically placed to exert maximum demulcent or healing effect."<sup>1</sup>

## RESULTS

Endoscopic examination showed that Caved-S had healed the ulceration in ALL 32 patients and in most the mucosa appeared normal.

# MEET THE CALMURID BROTHERS

Urea is now known to possess antipruritic, keratolytic and antibacterial properties, and can produce a marked rise in the water content of treated dry skin. Until recently, the instability of urea solution prevented other than extemporaneous preparations being used. However, the Calmurid

formulation has overcome the problem. Calmurid Cream rehydrates and softens thickened and dry skin; Calmurid HC is indicated where hydrocortisone is needed additionally to deal with inflammation.

## FOR DRY SKIN

Whether the dry scaling skin in ichthyosis or the horny masses of tylosis of the hands or feet, Calmurid disperses the horny scales and raises the water content of the skin towards normal. In patients with severe ichthyosis Calmurid was the most effective of four preparations tested.<sup>1</sup> In other studies resistant cases showed remarkable clinical improvements in a few days<sup>2</sup> with parallel biochemical improvement<sup>3</sup>.

Calmurid was found most valuable in the treatment of hyperkeratotic feet<sup>4</sup>. Carbamide (urea) B.P. 1968 10% in a stabilising emulsified base; tubes of 50 and 100g.

## FOR ECZEMA

Eczeema characteristically has inflammation and frequently a dry scaly covering. Calmurid HC, by its dispersive and rehydrating actions on the scale allows hydrocortisone to exert its full anti-inflammatory effect. So effective is this combination that Calmurid HC has been found to be as effective as the commonly used fluorinated steroids<sup>5,6</sup> yet it achieves this without the risks of skin damage and systemic effects associated with them.

Hydrocortisone has negligible atrophic action on skin<sup>7</sup>. Carbamide (urea) B.P. 1968 10%, hydrocortisone 1% in a stabilising emulsified base; tubes of 30g.

**There is  
a Sister

Calmurid Solution (20% Urea) represents a step forward in the treatment of psoriasis of the scalp, seborrhoeic eczema and seborrhoea – no tar, no steroids. Data sheet available on request.

# Intal<sup>®</sup> doesn't relieve asthmatic attacks it stops them happening.

Intal is still unique. It provides a prophylactic treatment of asthma. Unlike bronchodilators, which give relief from asthmatic attacks, Intal stops them before they get started. Intal is not a steroid and, therefore, carries no risk of the side-effects associated with steroid therapy.

Intal works by preventing the degranulation of the mast cell and the release of inflammatory agents. It may be used in all kinds of asthma, no matter what triggers the attacks—for example, allergy, exercise, emotional upset.

Regular daily use of Intal gives long-term protection from asthmatic attacks. By preventing the attacks you may stop the progress of the damage they cause.

Intal—established prophylactic therapy in asthma.

## Intal<sup>®</sup>

Prevention is better than relief.

*The Spinhaler. The unique Spinhaler is used only with Intal therapy. It's easier to use than other inhalers because delivery of the dose is automatically synchronised with the patient's breathing so that an effective dose may be inhaled every time.*

*"The fact that 95.5% of the patients unable to inhale correctly from a pressurised canister could use a Spinhaler efficiently confirms our clinical impression that patients have little difficulty in using the Spinhaler whereas many have problems with the pressurised canister."*

# The 'Carefree' breast prosthesis is being advertised in the National Press.

## Your Mastectomy patients may wish to discuss it with you.

Actual photographs of Ann Raine after a Mastectomy

Ann says 'Carefree is so natural I forget I'm wearing it.'

After excellent post-operative advice, Ann quickly overcame the shock and depression that often follows Mastectomy, and is now enjoying her life with confidence. Her introduction to 'Carefree' by the National Press plays a major part in her complete outlook. 'Carefree' is seamless and undetectable in even the most active day-to-day situations. Skin colour, creases, folds, wash, tow, dry and wear. 'Carefree' is completely against your skin and has a longer guarantee life than any other prosthesis available. Bras need no alteration. 'Carefree' fits most of today's good quality bras naturally, and immediately assumes body shape and temperature.

# BMA Specialist Journals on MICROFICHE

Since January 1976 all the BMA Specialist Journals have been published in a microfiche edition simultaneously with the standard paper editions. Overseas subscribers to the microfiche editions will receive microfiches, by AIR MAIL, within days of publication. The availability of the microfiche editions should have great appeal to libraries and other readers far distant from the United Kingdom.

The microfiche produced for the British Medical Association conform to the international standard as laid down by the National Microfilm Association of America. These microfiches are produced by a step and repeat camera with duplicates produced on silver halide film for archival permanence. Each fiche measures 105 mm × 148 mm and can contain up to 98 images filmed at a reduction ratio of 24 × along with an eye readable title for identification. Details of microfiche volume binders are available on request.

### VOCATIONAL TRAINING SCHEME FOR GENERAL PRACTICE

Applications are invited from Registered Medical Practitioners for further appointments which is intended to make to the Hastings Health District Vocational Training Scheme with effect from 1st September, 1976. This is an established scheme in which the trainees can expect to spend an initial 6 months in selected general practice in either Bexhill, Hastings or Rye. There will then be a period of 2 years in rotating hospital appointments during which the trainee may cover accidents and emergencies, geriatrics, rheumatology and general medicine, obstetrics, otorhinolaryngology, paediatrics and psychiatry. There will also be opportunity for those who are interested to receive instruction in dermatology and ophthalmology. The final 6 months of the 3 year traineeship will again be spent in general practice.

Throughout the whole three year period there will be regular meetings of the trainer/trainee group, plus the usual half-day release course during which topics appropriate to general practice will be considered in depth. There will also be opportunity to attend courses at the Hastings Postgraduate Medical Centre and the University of Sussex. The course is recognised for the D.C.H., M.R.C.G.P. and D.Obst.R.C.O.G. Every effort will be made to provide accommodation suitable to the needs of appointed trainees.

## APPOINTMENTS

Applicants for medical appointments are advised to check whether the post advertised is included in the Important Notice and to scrutinize carefully the remuneration and terms of service offered. Any member who is in doubt about these terms in relation to B.M.A. agreements should consult the Secretary of the Association.

Advertisers are reminded that the Race Relations Board insists that no descriptive term implying racial, national, or ethnic characteristics may be used in any advertisement. Further, readers are advised not to apply for any appointment which discriminates between applicants on grounds of creed or unreasonably on grounds of sex.

## HOSPITAL APPOINTMENTS

Applicants should state names, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy of each of three recent testimonials, with a short statement of experience and appointments held. Applications should be sent at once if no closing date is given: Canvassing disqualifies (Statutory Instrument, 1974, No. 361).

All National Health Service hospital appointments are in accordance with the Terms and Conditions of Service of Hospital Medical Staff.

Further details concerning standards of residential accommodation, telephone charges, removal allowances, study leave and other matters should be obtained from the Hospital Secretary; or by B.M.A. members from the Secretary, British Medical Association.

In particular, they will find full details of facilities provided in most hospitals in the United Kingdom in the current edition of the *Hospital Gazetteer*. If such details are not included members are advised to consult the Secretary of the B.M.A.

Applicants requiring hospital married accommodation are strongly advised to obtain, prior to interview, clarification in writing from the employing authority as to whether such accommodation will be available on appointment.

No advertisement may stipulate that a non-resident must live less than 10 miles from a hospital. Advertisements for post-registration house officers, senior house officers and registrars should state clearly whether the post is resident, i.e. compulsorily resident.

In all advertisements grade should be clearly indicated. Normally a consultant vacancy must be advertised as (a) part-time with the number of sessions clearly stated, or (b) whole-time with the option of maximum part-time.

In the view of the BMA, an advertiser should not insist on possession of English higher qualifications in preference to Scottish or Irish qualifications (or vice versa).

## CENTRAL BIRMINGHAM HEALTH DISTRICT

# Consultant Neurosurgeon

(Whole time or maximum part time)

Vacant January, 1977

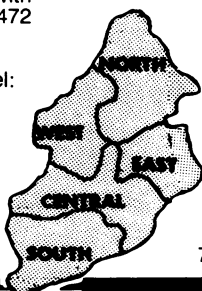

The duties of this post will be primarily at the Queen Elizabeth Hospital, although experience and an interest in paediatric neurosurgery would be an advantage, as there will be a need for further neurosurgical sessions at the Children's Hospital.

In either event the person appointed will be offered a formal association with the Midland Centre for Neurosurgery and Neurology and will have access to many of the facilities of this specialised regional centre. It is the intention of both the Area and the West Midlands Regional Authorities to make an appointment which has a flexibility potential in relation to the sessional commitments, with the objective of developing in the medium term a fully integrated neurosurgical service between the Midland Centre for Neurosurgery and Neurology and the Central Birmingham Health District Hospitals.

The successful candidate must reside within 10 miles of the Central District.

Candidates are welcome to visit the Queen Elizabeth Hospital by arrangement with Professor Brodie Hughes, Tel: 021-472 1311, and the Midland Centre for Neurosurgery and Neurology, by arrangement with Mr Jack Small, Tel: 021-558 2311.

Application form and job description are available from the Personnel Office, Birmingham Area Health Authority (Teaching), Alpha Tower, Birmingham, and closes 5th June, 1976. (54771)

## GOVERNMENTAL

# Occupational Medicine Advisers up to £9560

The Employment Medical Advisory Service is the nucleus of all medical activities in the Health and Safety Executive and is responsible for all aspects of occupational medicine.

There are now vacancies for Advisers within the Service, based in or near the following:

### Full-time Advisers

EMAS Headquarters (London)

North Eastern (Bradford)

Northern (Newcastle and Northumberland)

Vacancies may arise in other areas.

The work of a Medical Adviser is extremely varied in content and in the demands it places on your professional expertise. It ranges from direct medical supervision of people at work, young people not fully fit for employment and people undergoing training or rehabilitation, to investigations and formal surveys, to the provision of guidance on working conditions and other matters affecting occupational health and medicine. You will be in constant contact, on the one hand with workers, their representatives and employers, and on the other, with general practitioners, hospital staff and other medical professionals.

Where possible, Advisers will work in groups and nurses have been appointed to some groups. Full support is available including clerical, laboratory and statistical facilities.

Applicants (men and women) must be fully registered medical practitioners in the United Kingdom. Experience in industrial medicine or in allied subjects, such as toxicology, pulmonary physiology, pathology, rehabilitation or psychiatry, is desirable and the possession of higher qualifications will be an advantage. A current driving licence is essential.

Starting salary between £7,300 and £9,560 (higher in London). For the part-time Adviser the salary will be based pro-rata on the full-time Advisers' salary scale.

There are good prospects of promotion for full-time Advisers as the Service develops, to posts with salaries of £11,000 and beyond. The pension is non-contributory and previous superannuation rights will normally be transferable.

For further details and an application form (to be returned by 1 June 1976) write to Civil Service Commission, Alencon Link, Basingstoke, Hants, RG21 1JB, or telephone Basingstoke (0256) 68551 (answering service operates outside office hours) or London 01-839 1992 (24 hour answering service). # A Revolution in Medicine?

Well hardly, but it could certainly be *your* chance to give your career a turn for the better! Ask yourself – how does your present position score on the following:

- ☐ Intellectual interest & satisfaction?
- ☐ Worthwhile medical goals to strive for?
- ☐ Professional working environment with stimulating colleagues?
- ☐ Opportunity to probe unusual medical problems in depth?
- ☐ Opportunity for advanced medical study and specialist training?
- ☐ Regular hours of work with weekends off?
- ☐ Travel and internationality of outlook?
- ☐ Meaningful opportunities for rewarding initiative and merit?
- ☐ A salary ladder that reaches to £20,000+ even in the UK?
- ☐ A varied career with exciting prospects?

If you haven't scored 10 out of 10, a medical career in the pharmaceutical industry could provide you with *all* these advantages.

We are currently handling a wide range of assignments – some at very senior levels – for a good spread of leading pharmaceutical companies in the UK, Continental Europe and North America.

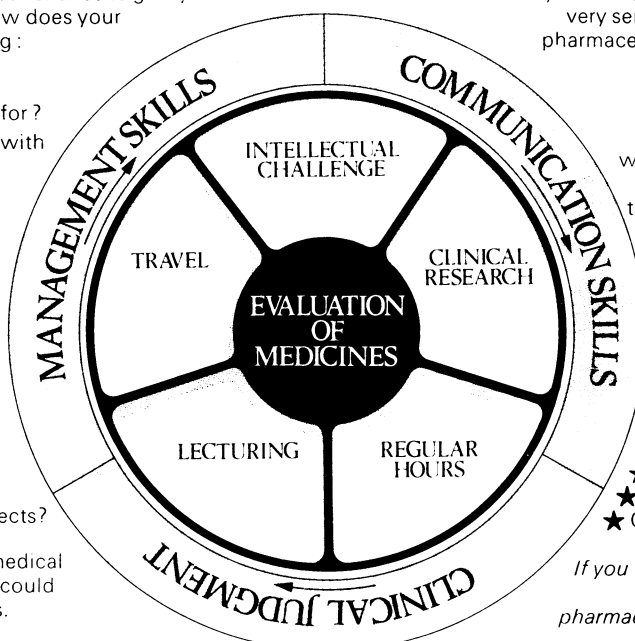

We should be pleased to hear from any physicians within the age range 28-45 who have *at least* 2 years' general medical experience, a positive interest in therapeutics and an outgoing personality.

Some of our present appointments call for more specialised experience or geographical interests.

These include:

- |                         |               |
|-------------------------|---------------|
| ★ Cardiology            | ★ U.S.A.      |

## Locum Medical Officer - Surgical

Société Minière de Tenke-Fungurume is a company formed to develop a large copper mining project in the south-east of the Republic of Zaire.

Although considerable development of the plant and township areas has been achieved already, it was decided early in 1976 to defer further development of the project temporarily and place it on a care and maintenance basis. The Company still has over 60 expatriates and their families on site as well as several hundred local employees for whom medical and surgical services are provided. The Company urgently requires a Locum Medical Officer with special interest in surgical work for a period of 3-6 months. The surgical work will be mainly in orthopaedics although there may be some general surgery of an emergency nature. When surgical duties permit, the person appointed will be called upon to carry out general medical duties in one of the Company's clinics.

Applicants should be suitably qualified and should have had surgical experience at registrar level. A working knowledge of French is desirable, and previous overseas experience and a knowledge of Swahili would be added advantages. An attractive salary will be offered and other benefits include fully furnished accommodation and return passages. Fungurume, at 4000 ft, enjoys a pleasant tropical climate and provides the usual range of sporting and recreational facilities.

Applicants are invited to write in confidence to:-
