Is the ORIGINAL & GENUINE, was ESTABLISHED A.D. 1746,
And is Prescribed, "by the highest authorities," for Fevers, Ague,
Rheumatism, Colds, Influenza, &c. &c.

FRAS. NEWBERY & SONS, 45, ST. PAUL'S CHURCHYARD.

Prices for Dispensing—1 oz., 9s.; $\frac{1}{4}$ oz., 3s. 4d.

CHLORODYNE.

It's use in Fever highly recommended, a case of Sarcinæ CURED,
and other notices of its high remedial value presented, with an especial CAUTION to the Profession.

Caution about Spurious Imitations, etc.

CAUTION.—J. T. DAVENPORT received from Dr. J. COLLIS BROWNE, M.R.C.S.L., Ex-Army Medical Staff, the sole discoverer and inventor, his RECIPE for this invaluable preparation, which has never been published or made known; hence there can be no other maker, and anything compounded as Chlorodyne besides a spurious imitation and deception.

TESTIMONIALS.

"I have now for fifteen months used Dr. J. COLLIS BROWNE'S CHLORODYNE, and am fully persuaded of its value as a remedial agent. In FEVER, to allay restlessness and severe headache, and to procure sleep, its effects have been most satisfactory. It appears to me to be indicated in all cases where there is depression of NERVOUS POWER. In fact, in the hands of a judicious surgeon who has used it a few times, it is capable of being most extensively and usefully prescribed. In a case of obstinate and severe VOMITING, arising from SARCINÆ in the Stomach, associated with an Amyloid Tumour in the Liver, which had resisted treatment for many months, I used Chlorodyne most successfully. The first dose stopped the Vomiting. Small doses were continued, at intervals of a few hours, for six weeks. The vomiting having entirely ceased, it was then discontinued, and although six months have elapsed there has been no return of the symptoms. The Tumour has somewhat diminished in size and gives no uneasiness. I have also given it in some cases of Phthisis, with marked relief especially in the early stages. I spontaneously offer my opinion as to its merits, for I think it has only to be tested and it will be used by all medical men."

"HENRY J. STORMONT, Esq., Surgeon, Chesham."

"Having ordered from our Druggists 'CHLORODYNE,' I was not only disappointed in its EFFECTS, but annoyed when I received a SPURIOUS Compound. I have been in the habit of using your CHLORODYNE with great advantage to my patients and satisfaction to myself. I have just discharged, well, out of this Hospital, a woman who had pæmia after hour-glass contraction of the uterus; I feel quite certain that her recovery was caused by taking a dose of CHLORODYNE three times daily, or when the rigors were severe. I have had several cases where inflammation set in after instrumental delivery or extraction of the placenta, and never had a recovery before when the cases were so severe as the case mentioned: but I did not know the value of your medicine."

(Signed)

"JAS. ATKIN, M.D., Medical Officer, Fever Hospital, Oldcastle, Co. Meath."

Sole Agent and Manufacturer,

J. T. DAVENPORT, Pharmaceutical Chemist, 33, Great Russell Street, Bloomsbury Sq., London.

Twinberrow's Patent Double-Action Reservoir Injection Apparatus

Complete with Additional Pipes for all purposes, and suitable for every Climate.

W. TWINBERROW has no hesitation in offering his Patent Reservoir Injection Apparatus as the most simple and perfect yet produced. The Piston or Pump, which so frequently gets out of order, is not introduced into this Apparatus; there is therefore an absence of

OILY GREASY MATTER and BLACK LEAD (which are absolutely necessary to lubricate the piston in the usual syringes), which soon become rancid and green, some portion of which inevitably passes with the fluid injected from an ordinary syringe.

TWINBERROW'S PATENT DOUBLE-ACTION SYPHON SYRINGE,

With Additional Pipes for all purposes, including the most perfect Eye Douche and Ear Syringe.

The great advantage of this Syringe over others of a like description is its having a double action, thereby producing an uninterrupted stream, consequently discharging double the quantity of fluid in half the usual time and with much less exertion.

From J. E. ERICHSEN, Esq.

6, Cavendish Place, Cavendish Square, Oct. 1st, 1861.

Twinberrow's "Double Action (Syphon) Syringe" is the most generally useful Instrument of the kind with which I am acquainted. For the more ordinary purposes it is specially well fitted, being compact, portable, and NOT LIABLE TO GET OUT OF ORDER. By a very simple arrangement the Instrument may be rendered available

as an Eye Douche, an Ear Syringe, and for washing out the Bladder. For these purposes it is peculiarly well adapted, being continuous in its action.

JOHN ERICHSEN,
Professor of Surgery at University College, and Surgeon to the Hospital.

From W. FERGUSSON, Esq.,

Professor of Surgery at King's College, and Surgeon to the Hospital, 18, George Street, Hanover Square, Oct. 14th, 1861.

SIR.—I have seen and made use of your Double Action Syringe, and think very highly of it. Yours faithfully,
Mr. Twinberrow, Edwards Street. W. FERGUSSON.

W. TWINBERROW, SOLE PATENTEE, PHARMACEUTICAL CHEMIST, 2, EDWARDS STREET, PORTMAN SQ., LONDON.
To be had of all Chemists, Druggists, and Surgical Instrument Sellers in the United Kingdom.
