

***"The ideal chemotherapeutic agent...  
should exhibit selective and effective  
antimicrobial activity, and it should  
be bactericidal rather than bacteriostatic."***

Goodman, L.S. and Gilman, A. (eds) (1975). *The Pharmacological Basis of Therapeutics*, 5th Ed, New York; MacMillan.

## ***in vivo Results***

Staphylococcus aureus after 3 days treatment with Erythrocin 500. Intracellular dissolution almost total. Surface defects consistent with protein synthesis inhibition.

After 3 days therapy pneumococcus exhibits marked cellular deformity with secondary cell wall and membrane changes.

Beta-haemolytic streptococcus after 5 days treatment with Erythrocin 500. Dissolution of cellular integrity is almost total and cellular debris can be seen quite clearly.

# **The Bactericidal Potency of ERYTHROCIN *effective · selective* 500**

# The Priory~ Roehampton

We have recently opened an extension at Galsworthy House, on Kingston Hill, which is a specialised unit for the private treatment of alcoholics. Treatment is based upon the basic concept that alcoholism is an illness which impairs all aspects of an individual's life.

The programme is under the direction of Dr Max Glatt, and includes the comprehensive philosophy successfully proved over the years by Alcoholics Anonymous. Patients must recognise their alcohol dependence before they are admitted, and hence the cooperation of the patient's physician or psychiatrist, family, friends and colleagues is actively sought.

The professional staff includes physicians and psychiatrists, a visiting consultant counsellor, therapists, recovered alcoholics, and the back-up of The Priory's experienced psychiatric staff and facilities. A four week residential course is followed by intensive out-patient care and induction to Alcoholics Anonymous.

## TODAY'S TREATMENT/2

The first volume of *Today's Treatment* has proved a best-seller. Doctors clearly welcome its down-to-earth advice on the selection of effective remedies for common disorders. The second volume, just published covers endocrine and metabolic diseases, cardiovascular disorders, and the alimentary system. Again the chapters are based on articles first published in the *BMJ*; and the advice provides busy practitioners with a reliable working manual.

## ADVERTISEMENTS

### PHARMACEUTICAL PRODUCTS

Readers are reminded that prescribers' literature and clinical information are always available from advertisers on request.

# Vibramycin<sup>\*</sup>

Brand of doxycycline

\* Trade Mark

***for fast, powerful penetration<sup>1,2</sup> in sinus cavities and lungs<sup>3</sup>***

**Indications:** sinusitis, bronchitis and other infections caused by susceptible strains of Gram-positive and Gram-negative organisms. **Contra-indications:** hypersensitivity to any of the tetracyclines. **Warnings:** the use of Vibramycin during tooth development may cause discolouration of teeth. Antibiotics including Vibramycin, may occasionally result in overgrowth of non-susceptible organisms. **Side Effects:** nausea and vomiting are the side effects most commonly reported.

Vibramycin is available as opaque green capsules, each containing 100 mg. of doxycycline as the hydrochloride. Vibramycin is also available as a syrup – each 5 ml. spoonful containing the equivalent of 50 mg. of doxycycline as the calcium chelate. **Basic N.H.S. Cost:** Capsules 100 mg. (PL 57/5059), pack of 10. £4.21, pack of 50 also available. Syrup 30 ml. (PL 57/5060), £1.32.
