London: SMITH, ELDER, & Co., 15, Waterloo Place.

With Engravings, crown 8vo, 6s. 6d.

Diseases and Injuries of the

EAR. By W. B. DALBY, F.R.C.S., M.B. Cantab., Aural Surgeon to St. George's Hospital.

"It is evidently the work of an accomplished and observant man. The chapter on 'Polypi' contains drawings and descriptions of great value. One of the most valuable chapters is that on 'Deaf Mutism.'—*Brit. For. Med. Chir. Review*.

"This work is happy in conception and pleasantly written; further, it shows that its author is thoroughly *au fait* in his speciality. The subject of which the volume treats is handled in a terse style, and this, if we mistake not, will make it acceptable to the student and practitioner. We cordially recommend it as a trustworthy guide in the treatment of affections of the ear."—*Glasgow Med. Jour.*

"It is evidently the work of a practical surgeon, communicating his experience, as well as that of others, in a brief but very intelligible manner."—*Dublin Jour. of Med. Science*.

"The style is clear and concise, and the English very good. Such a practical course of lectures on so important a subject would be a valuable addition to the course of instruction in any medical school."—*New York Med. Journal*.

"The subject of Aural Polypi is very thoroughly treated. Those parts of the book which relate to mastoid diseases, to the obscure nervous affections of the auditory apparatus—both acquired and inherited—and to deaf mutism, are full of interest. We are glad to acknowledge the addition of such a volume to the literature pertaining to otology."—*Philadelphia Med. Times*.

"This may be considered as the present text-book and the best account of diseases of the ear that has been written since Mr. Hinton's article in 'Holmes's Surgery.'—*Med. and Surg. Rev. (Australasian)*.

J. & A. CHURCHILL, New Burlington Street.

With numerous Lithographic Plates, 8vo, 5s.

Surgical Inquiries.

By FURNEAUX JORDAN, F.R.C.S., Surgeon to the Queen's Hospital, Professor of Surgery at Queen's College, Birmingham.

J. & A. CHURCHILL, New Burlington Street.

Second Edition, Enlarged and Revised, 4to, £1 10s.

Liebreich's Atlas of Ophthalmoscopy:

representing the Normal and Pathological Conditions of the Fundus Oculi as seen with the Ophthalmoscope. Composed of 12 Chromolithographic Plates (containing 59 Figures), accompanied by an Explanatory Text, translated into English by H. ROSBOROUGH SWANZY, M.B. Dub., Ophthalmic Surgeon to the Adelaide Hospital, Dublin.

J. & A. CHURCHILL, New Burlington Street.

8vo, 3s. 6d.

On the Functions of the

SYMPATHETIC SYSTEM OF NERVES, as a Physiological Basis for a Rational System of Therapeutics.

By EDWARD MERYON, M.D., F.R.C.P.

"Very excellent and suggestive."—*Med. Times & G.*
"Dr. Meryon, by careful perusal of antecedent research, and not less careful research, and not less careful research, and not less careful research."—*Lancet*.

J. & A. CHURCHILL, New Burlington Street.

Fcap. 8vo, 5s.

Essays on the Diseases of

CHILDREN. By WILLIAM HENRY DAY, M.D., Physician to the Samaritan Free Hospital for Women and Children.

"The cases recorded prove him to be an intelligent clinical observer."—*Medical Times and Gazette*.

"His chapter on the causes and treatment of headache in children is interesting and instructive."—*Brit. Med. Jour.*

J. & A. CHURCHILL, New Burlington Street.
