On Diseases of the Chest: Second Edition, Revised and Enlarged. By A. T. H. WATERS, M.D., F.R.C.P., Physician to the Liverpool Royal Infirmary.

"We are glad to welcome a second edition of the thoughtful and practical lectures and papers which are collected in Dr. Waters's volume. Comprising the result of many years' careful observation on the subjects to which they refer, they have a special value to the pathologist and to the practitioner. The new edition contains many additional illustrative cases and sphygmographic tracings; and new chapters have been added on hæmoptysis, hay-fever, aortic regurgitation, mitral constriction, thoracic aneurism, and the use of chloral in diseases of the chest. These new chapters in Dr. Waters's book constitute a considerable addition to its value, and we can strongly recommend its useful matter and lucid style to the attention of the profession."—*The Lancet*.

J. and A. CHURCHILL New Burlington Street.

Just published, in fcap. 8vo, price 12s. 6d.

Practical Medicine;

with a Sketch of Physiology and Therapeutics. By ALEXANDER SILVER, M.A., M.D., M.R.C.P., Physician to, and Lecturer on Physiology at, Charing-cross Hospital.

"We are satisfied that the student will find it a safe and very useful guide and helper."—*Med. Times & Gaz.*

"We know of no work on medicine that contains so much that is practical in so small a compass."—*The Students' Journal*.
