EXTRACT FROM PREFACE.—"The book being written especially for the use of those engaged in the active practice of their profession, prominence is given to all matters tending to render diagnosis more accurate and treatment more successful, but no attempt has been made to discuss at length questions of purely pathological interest. . . . The illustrations have all been taken from nature, and have been placed on stone by the author himself. Being intended as types of the various diseases described in the text, all accidental differences of portraiture are, for the sake of simplicity, omitted."
