MACMILLAN & Co., Cambridge and London.

Now ready, Second Edition, with numerous Engravings and five Coloured Plates, 5s. 6d.

Lessons in Laryngoscopy:

including RHINOSCOPY and the DIAGNOSIS and TREATMENT of DISEASES of the THROAT. By PROSSER JAMES, M.D., M.R.C.P., &c., Lecturer on Materia Medica and Therapeutics at the London Hospital; Physician to the Hospital for Diseases of the Throat.

"We can cordially recommend this little book to the student and practitioner. We know of none better."—*New York Medical Journal.*

"This is a very excellent book; perhaps the best in our language for students of the important and now popular subject of which it treats. It is short and practical, yet sufficiently minute, as well as sufficiently comprehensive, and the text is illustrated by some excellent woodcuts, and admirable coloured plates. One of the most marked features of the work, or rather of its author, is a comparative freedom of the unpleasant fault of egotism. The labours of others in the same department are gracefully recognised, and their merits acknowledged, even those of pre-laryngoscopic times; and thus, not only is the work far removed from the rank of controversial treatises, but it is also raised above such as are obviously written for merely selfish purposes, as puff, in fact, of their authors. Dr. Prosser James does not need anything of this kind, and he was right to avoid even the possibility of such a motive being attributed to him in writing his book."—*Glasgow Medical Journal.*

London: BAILLIÈRE, TINDALL, & Cox, King William Street, Strand, W.C.

Now ready, Second Edition, revised, price 8s. 6d.
