"The publication of the 'London Medical Record' is an important event in the medical literature of Great Britain, and constitutes a great element in progress." — PROFESSOR BURDON SANDERSON, F.R.S., Address to the British Medical Association in 1872.

## THE LONDON MEDICAL RECORD:

A MONTHLY Abstract of the Medical Literature of Great Britain and Ireland, France, Germany, Italy, Spain, Russia, Holland, Scandinavia, America, and the Colonies.

Compiled by a Staff of upwards of Ninety Hospital Medical Officers and others from 250 Serial publications.

The New Sydenham Society has abandoned its Biennial Retrospect in favour of the LONDON MEDICAL RECORD, and since its extensive adoption into professional favour, *The Abstract of Medicine, The Medical-Chirurgical Review, and The Doctor* have been discontinued. To make the LONDON MEDICAL RECORD still more valuable as a *Systematic Summary of the Medical Literature of the World*, extensive Bibliographical Improvements and Additions have been introduced in the present number, and will be carried out throughout the year.

## The London Medical Record.
