London: SMITH, ELDER, & Co., 15, Waterloo Place.

8vo, 7s. 6d.

ON ASTHMA:

ITS PATHOLOGY AND TREATMENT.

By J. B. BERKART, M.D.,

Senior Assistant Physician to the City of London Hospital for Diseases of the Chest, etc.

"A good honest piece of work. In every page we find evidence of extensive reading.... The author has, with great ability and with no small success, striven to place the pathology of the disease upon a more material and secure basis, and to render its treatment less hap-hazard and fanciful."—*British Medical Journal*.

"The book is clearly and forcibly written, and is one which will repay careful and complete perusal."—*Dublin Medical Journal*.

"...The work is a very valuable addition to the literature of asthma. Every one who reads it will be led to examine most narrowly every case of urgent dyspnoea which comes under his notice before he dismisses it as a purely nervous asthma."—*Lancet*.

"Une monographie... qui mérite d'attirer l'attention à plusieurs points de vue...." — *Bulletin de l'Académie de Médecine*.

"This work of Dr. Berkart is carefully and well done. Dr. Berkart's thoughtful work unquestionably throws some additional light upon the questions...." — *Med. Times & Gaz.*

"In jedem Capitel ist die Literatur in sehr anerkennenswerther Weise benutzt worden.... Die meisten deutschen Aerzte werden mit ihm übereinstimmen...." — *SCHMIDT'S Jahrbücher*.

"This work will probably lead to a 'new departure' in the treatment of Asthma in England.... It is highly suggestive and instructive, and should be read by all who are called upon to treat these peculiar phenomena." — *Medical Examiner*.

London: J. & A. CHURCHILL.

Obstetrical Journal of Great BRITAIN and IRELAND.
