Concise yet comprehensive summaries of all in periodical literature important to the practitioner. Facts, not mere opinions, characterise the "Review," instead of the usual commonplace remarks and indiscriminate notices of crude and unproved views which constitute many so-called "Epitomes."

THE MEDICAL REVIEW.

(MEDICAL AND SURGICAL REVIEW OF REVIEWS).

AN INDEXED AND ILLUSTRATED MONTHLY RECORD OF ALL THAT IS IMPORTANT TO THE PRACTITIONER
IN THE MEDICAL PERIODICALS OF THE WORLD.

Price 20s. per annum, post free to any part of the world.

PRINTED IN LARGE CLEAR TYPE, ON SUPERFINE PAPER.

By the suppression of all unessential matter, a paper written with any definite object—and such alone is valuable—can generally be compressed into a comparatively brief report, and yet remain a clear and readable account of the subject, so that nothing of importance is lost, and often, in lucidity, much is gained. Merely to mention a few of the leading features of an article serves no useful purpose.

".... The new 'Review of Reviews' will be found extremely useful to the busy practitioner."—*Lancet*.

".... A great boon to the profession all over the world. I applaud not only your scheme, but the manner of its execution...."—JONATHAN HUTCHINSON, LL.D., F.R.S., Ex-President of the Royal College of Surgeons, England.

".... I think you are about to fill a very great want...."—T. CLIFFORD ALLBUTT, M.A., M.D., F.R.C.P., F.R.S., Regius Prof. of Physic, Cambridge University.

".... It would be impossible for such a journal not to take at once a first place...."—*Birmingham Medical Review*.

"As a constant reader of the 'Review,' permit me to express my appreciation.... It will be found most useful by Medical Officers in the Army, Navy, and Colonial Services...."—SIR WILLIAM KYNSEY, C.M.G., late Army Medical Staff, late Inspector-General of Hospitals, Ceylon.

".... Of great value to the general practitioner, and to teachers and authors...."—BYROM BRAMWELL, M.D., F.R.C.P. Edin.

"Destined to the greatest and legitimate success.... Well edited. Giving an exact account of all of importance in science and medical practice."—*Journal des Praticiens*.

".... Quite impossible to estimate its great value to the busy practitioner, who, with so little expenditure of time, will be able to keep up with the medical literature of the day...."—ROBERT BELL, M.D., F.F.P.S.

"In appearance and style the 'Review' is all that could be desired.... The necessity for such a journal is well nigh imperative.... Important facts are shortly told, with neither the prolixity of the clinical lecture nor the padding of the professional journalist."—*Journal of Tropical Medicine*.

".... A great advance.... The articles are not too short to be useful and practical, and the index with each number renders reference easy."—C. M. BRISLEY, M.R.C.S., L.R.C.P.

"A remarkable periodical.... Edited with great taste and luxury of type, and of the very greatest value to all who desire to keep themselves *au courant* with the progress of the medical world...."—*Revista de Medicina y Cirugía Prácticas, Madrid*.

".... Your magazine, dealing with the best, most recent, and determined facts, deserves the support of the entire medical faculty...."—T. ERSKINE MOORE, L.R.C.P., L.R.C.S. Edin., L.M.

".... We cannot conceive a more useful publication than this, which should become one of the most popular medical journals of the age.... In addition to the British, Colonial, and American papers, it epitomises all the foreign Journals, so that nothing of note which is being done or attempted in the civilised world need escape a careful reader."—*Journal of Balneology and Climatology*.

".... I had not thought it possible for concise summaries to give such complete and practical details...."—ROBERT BROWN, M.A., M.B., C.M.

".... I have already found several exceedingly useful, and, to me, new points in practice, by which my patients have benefited.... As an up-to-date work of reference your bound volumes will be invaluable...."—STUART HALLOWS, M.B. Edin.

".... The 'Review' brings me into touch with methods and ideas which I could not possibly have otherwise obtained.... No surgeon can afford to do without such an excellent index to scientific progress...."—J. O'CONNOR, M.A., M.D., Senior Medical Officer, British Hospital, Buenos Ayres.

N.B.—Subscriptions should be sent to:—The SECRETARY, The Medical and Surgical "Review of Reviews," Limited, Connaught Mansions, Victoria Street, London, S.W. WORKS BY DR. JULIUS ALTHAUS,

Consulting Physician to the Hospital for Epilepsy and Paralysis, Regent's Park.

FIFTH EDITION, with Coloured Plate and Engravings, price 5s. net.

ON FAILURE OF BRAIN POWER: ITS NATURE AND TREATMENT.

"Rarely does one see in medical literature so much good matter in so little bulk, such a mastery of facts permeated by thought."—*Edinburgh Medical Journal*.
"Full, clear, interesting, of genuine value."—*Glasgow Medical Journal*.

THIRD EDITION, price 3s. 6d.

THE VALUE OF ELECTRICAL TREATMENT. With an ESSAY ON ELECTRICITY IN GYNÆCOLOGY.

By Dr. APOSTOLI, of Paris.

"This excellent work serves a useful purpose as an able sketch of the applications of electricity to medicine."—*British Medical Journal*.
"Well written and well arranged, and will be read by many who would not attempt a book of larger size."—*Glasgow Medical Journal*.
"This book creates a very pleasing impression, as it gives a thoroughly impartial estimate of the practical value of electro-therapeutics. The translator has deserved well of the medical profession in Germany by making this truly admirable little work accessible to it; and it will soon be in the hands of every practitioner who occupies himself with electro-therapeutics."—*Wiener Med. Presse*.

SECOND EDITION, price 1s.

ON IMPOTENCY AND ITS TREATMENT BY ELECTRICITY.

SEVENTH Edition, crown 8vo, 4s. 6d.

Gout and its Relations to Diseases of the Liver and KIDNEYS. By ROBSON ROOSE, M.D., F.R.C.P.Ed.

"It is one of the clearest and most complete reviews, in a small space, of existing knowledge with regard to this disease which we remember to have read, and it may be strongly recommended to the study of the young practitioner."—*British Medical Journal*.

Published 1899. Price 12s. 6d.

SQUIRE'S COMPANION

TO

THE BRITISH PHARMACOPŒIA.

SEVENTEENTH EDITION.

"At the end of each article there is a more detailed account of all the chief preparations and forms in which the drug is used. Under this last heading is included a large amount of trustworthy information regarding numerous formulæ which is not readily obtainable from any other source. . . . There has been added a short account of therapeutical agents of bacterial origin by Dr. R. T. Hewlett, which deals shortly with antitoxins, tuberculin, vaccines, mallein, and nucleins."—*The British Medical Journal*, March 18th, 1899.

"The volume as a whole not only contains a vast amount of interest for prescribers and dispensers, but it also supplies innumerable references to sources of detailed information. It is obviously the outcome of care and knowledge, and consequently earns a position of authority."—*The Lancet*, March 25th, 1899.

"'Squire's Companion' is virtually a new book every time it is re-published, so important and numerous are the changes in the text of each successive edition."—*Pharmaceutical Journal*, February 25th, 1899.

"It is the cheapest pharmaceutical text-book in the English language, as well as one which physicians and pharmacists could least do without."—*The Chemist and Druggist*, February 25th, 1899.

New Remedies.—Ecthol.

By Dr. P. L. Lectoure.

In a previous article (*Gaz. des Hôp.*, 1899, p. 724), we said that Ecthol was an antipurulent, or better, anti-suppurative remedy, and this we now propose to demonstrate by cases that are beyond question both as to precision and as to their reliable origin.

But there is one point that must first be settled, and that is of capital importance—are there any remedies that are anti-suppurative, that is, that are capable of making the human system absolutely refractory to suppuration?

Such a question a few years ago would have seemed more than strange. Pus was accepted as a necessity, and all that was asked was whether it was of good quality or not. To-day we know not only that suppuration is not obligatory, but that it can be practically avoided. Pasteur's researches have also shown us that there is no suppuration unless the system is penetrated by its micro-agents. In addition, we know that there is no specific microbe of suppuration, but that the faculty of causing suppuration belongs equally to all the staphylococci, to Fehleisen's streptococcus, to the pyocyanic bacillus, to the bacilli of Albarran and of Hallé, &c. A step further was made when it was found out that simple saprophytic microbes are able to cause suppuration under certain condition which are not yet known to us.

These different conditions, however varied, have still one common character in that they weaken the system and predispose it to the development of infection.

This idea, which no one at the present time disputes, leads at least theoretically to the following deduction, "If the conditions which lessen the power of resistance of the system enable different microbes to become pyogenic, or in other terms, render the system a particularly favourable field for suppuration, it is readily conceivable that the system can, on the other hand, under the influence of certain therapeutic agents be made refractory, and no longer to lend itself to the development of the pyogenic function of microbes."

This theoretical view, which is so rational, is over abundantly demonstrated by the action of Ecthol. To prove it, we should only have too many facts to choose from, so numerous and demonstrative are they. Instead of a tiresome enumeration, therefore, it will be preferable to cite some of the conclusions given by Dr. Villard H. Moor in his critical study on Ecthol. In that article he recommends the use of this remedy *intus et extra* at the first appearance of the slightest redness of the skin leading us to fear the beginning of erysipelas or pyæmia.

In erysipelas Ecthol is a most valuable remedy. "It should be spread beyond the red patch on to the healthy skin, and this application should be repeated several times a day, though in light cases one application suffices. At the same time it must be used internally together with stimulating tonics." The dose is then a teaspoonful four times a day.

If pyæmia appears, Ecthol is indicated together with the regular treatment. It should also be prescribed in osteomyelitis after operation, when it can be used as a local application. Relief is often immediate, and its effect, together with the surgical intervention hastens recovery.

This is doubly true in cases of boils. "Ecthol causes them to disappear without coming to a head, and relieves pain rapidly and in a most marked manner. I advise it to be given as early as possible."

In gangrene, local treatment by Ecthol is both prophylactic and curative.

With patients confined to bed for long periods, bedsores can be prevented by rubbing the exposed surfaces once or twice a day with Ecthol.

These quotations are amply sufficient to prove that Ecthol prevents and checks suppuration of the skin. Its action is equally energetic and valuable in suppurative disorders of the mucous membranes, as we shall show in a future article.—*Gazette des Hôpitaux, Paris, July 20th, 1899.*

HOMMEL'S HÆMATOGEN

(English Patent No. 12,504).

Purified and Concentrated HÆMOGLOBIN flavoured with Chemically Pure GLYCERINE and MALAGA WINE, in the proportion of Four Ounces of Glycerine and Two Ounces of Wine in each Pint.

HOMMEL'S HÆMATOGEN contains (1) perfectly pure Hæmoglobin, (2) the whole of the Salts which are found in Fresh Blood, and (3) the highly important Albuminous Constituents of the Serum of the Blood in a Concentrated and Purified form, neither Decomposed nor Predigested.

A MOST EFFICACIOUS REMEDY

in General Debility, Anæmia, Chlorosis, Neurasthenia, Rickets, Scrofula, Weak Heart, Wasting Diseases of Children, Chronic Catarrh of the Stomach and Bowels, Loss of Appetite, Convalescence after Influenza, and Fevers (including Typhoid Fever, &c.), and Over-rapid Growth in Young Persons.

A POWERFUL RESTORATIVE IN DISEASES OF THE LUNGS.

**NEVER PRODUCES VASCULAR EXCITEMENT OR THROBBING OF THE TEMPLES (ORGASMUS).
UNSURPASSED AS A MEDICINE FOR CHILDREN.**

Beware of Imitations of HOMMEL'S HÆMATOGEN which are offered to the public under names similar to that of the genuine preparation. Some of these imitations contain ether, and on that account are positively injurious to children and to nervous or sensitive patients.

SOME RECENT MEDICAL OPINIONS:—

"BIRMINGHAM.

"I am thoroughly convinced that in Dr. Hommel's Hæmatogen a potent and valuable therapeutic agency has been discovered, and it should be used in all cases of anæmia and certainly in all cases that resist the usual treatment."

A. B.——, M.D., D.P.H.Camb.

"LANARK.

"I have pleasure in informing you that Dr. Hommel's Hæmatogen has given me great satisfaction in a case of anæmia with nervous debility in which I gave it. The results were remarkable in building up the system and giving strength to the patient."

S. H.——, L.R.C.P., L.R.C.S.Edin., L.F.P.S.Glasg.

"CROWLE, DONCASTER,

"I tried the samples of Dr. Hommel's Hæmatogen in a case of phthisis, and found it very useful in checking night perspiration and increasing strength of patient."

A. A. H.——, L.R.C.P.Edin., L.R.C.S.Edin. and L.M.

"I have tried Hommel's Hæmatogen in a case of anæmia and in a case of convalescence after typhoid fever. Its action was simply surprising. The patients made remarkably good and quick recoveries, better in fact than I had ever seen under the use of strengthening medicines of that class. I do not hesitate to give your Hæmatogen the first place among Hæmoglobin preparations, and it is my intention in suitable cases to prescribe it only. It is a truly valuable remedy."

Dr. N.——, Specialist for Diseases of Children, Munich.

"The good effects of Hommel's Hæmatogen were very conspicuous in the case of an extremely anæmic woman, who after taking it for eight weeks could scarcely be recognised as the same person. I am quite convinced of the excellence of this remedy and will always employ it in suitable cases."

Dr. J. W.——, Abtenau, Upper Austria.

"I have employed Hommel's Hæmatogen in several cases with the best results. In particular it answered admirably with anæmic children.

Dr. B.——, Charlottenburg.

We shall be happy to forward Samples and Literature of Hommel's Hæmatogen, Gratis and Carriage Paid, to Medical Practitioners who may wish to give it a trial.

It is Important

For the dispensing pharmacist to recognise the right of the physician to dictate, not only what remedy he shall use in a given case, but whose preparation he prefers, for the quality of the medicine is often as much a factor in the cure of disease as a correct diagnosis.

*Most druggists appreciate this fact,
Some are indifferent to it,
A few ignore it,
Specification is therefore a necessity.*

and Tablets.

(Merrell)

The WM. S. MERRELL CHEMICAL CO. offer to the Medical Profession a Salicylic Acid and its Salt of Sodium especially adapted to physicians' prescriptions for internal use.

The investigations of Prof. L—— (Cambridge, England), confirmed by Drs. C—— and McL—— (University, Glasgow) warn the profession against the use (internally) of the artificial acid of commerce and its Sodium Salt.

Please note the following deductions from these investigations—sustained as they are by Prof. G. G. H——, M.A., B.Sc., of the Chemical Laboratory of Glasgow—they conclude that—

COMMERCIAL**SALICYLIC ACID****and its SODIUM SALT**

Are slow but certain poisons.

Produce symptoms closely resembling delirium tremens.

Patients become delirious.

Dangerous to human life.

Have to be watched and not to be trusted.

Retard convalescence.

Should not be administered internally however much they have been dialized or purified.

To the contrary, please note that the same authorities determined by careful experiment that **Salicylic Acid from Oil Wintergreen** in 10 grain doses had no deleterious effect. That **Salicylate Sodium True** from natural acid in 32 grain doses is not lethal, but only causes prostration and lowers the temperature.

The paper of Drs. C—— and McL—— (British Medical Association) reminds physicians that prescriptions of Salicylic Acid and Salicylate Sodium are invariably made up, unless otherwise indicated, from the artificial and not the natural product.

Order and Prescribe**SALICYLIC ACID TRUE (Merrell).** In Crystals only.**SALICYLATE SODIUM TRUE (Merrell).**

LISTERINE.

THE STANDARD ANTISEPTIC.

LISTERINE is a non-toxic, non-irritating and non-escharotic antiseptic, composed of ozoniferous essences, vegetable antiseptics and benzo-boracic acid.

LISTERINE is sufficiently powerful to make and maintain surgical cleanliness in the antiseptic and prophylactic treatment and care of all parts of the human body.

LISTERINE has ever proven a thoroughly trustworthy antiseptic dressing for operative or accidental wounds.

LISTERINE is invaluable in obstetrics and gynecology as a general cleansing, prophylactic, or antiseptic agent, and is an effective remedy in the treatment of catarrhal conditions of every locality.

LISTERINE is useful in the treatment of the infectious maladies which are attended by inflammation of accessible surfaces—as diphtheria, scarlet fever and pertussis.

LISTERINE diluted with water or glycerine speedily relieves certain fermentative forms of indigestion.

LISTERINE is indispensable for the preservation of the teeth, and for maintaining the mucous membrane of the mouth in a healthy condition.

LISTERINE employed in the sick-room by means of a spray, or saturated cloths hung about, is actively ozonifying and rapidly oxidizing in its effects upon organic matter afloat in the atmosphere.

LISTERINE is of accurately determined and uniform antiseptic power, and of positive originality.

LISTERINE is kept in stock by all worthy pharmacists everywhere.

IODINE-VASOGEN, 6 and 10 %

Produces no irritation. Does not discolour the skin, and is more efficacious than Tincture of Iodine.
On external application it is quickly absorbed (as evidenced by urine analysis).
Its use is attended with great success in Widdidymitis, Inguinal Swellings, Skin Diseases, Syphilitic, and Tuberculosis; in Whooping Cough, as a substitute for the internal application of Iodides.

ODOFORM-VASOGEN, 3 %

ODOFORM dissolved in VASOGEN is more efficacious than
Iodoform as usually applied, and is better adapted
for injections.

CREOSOTE VASOGEN, 20 %

Can be taken *per os* in capsules or dissolved in milk or water
without producing gastric disturbance, even in patients
who cannot take creosote in any other form.

MERCURY VASOGEN, OINTMENT, 33½ & 50 %

Penetrates the skin far more quickly, is more efficacious, and more agreeable to use than the official blue ointment.

N.B.—An important observation.

Dr. R. S—— M——, M.B., B.S.(Lond.), F.R.C.S.(Eng.), writes under date May 12th 1898, and permits us to publish:—

"Ever since you introduced your Food I have been in the habit of prescribing it for infants and invalids, and in my opinion it surpasses and absolutely supersedes all other foods. The laxative effect of your food when the predigestion has been carried pretty far, is one of its most valuable qualities, and can be regulated precisely according to the time of the digestive process. By graduating this a most perfect adjustment of the action of the bowels can be secured."

Viol,

An unique preparation, combining Heat-producers (fat and oils) with Flesh-formers (iron-bearing proteids).

FOR CHILDREN, begin with an egg-spoonful three times a day.

"In children who are fed upon a deficient amount of fat the bony structures are imperfect and slow of growth. In a word, deficiency of fat in the food (of infants) is one of the chief factors in the production of rickets."—CHEADLE.

VIOL is a combination of Red Bone Marrow, highly diastasic Malt Extract, Eggs (with the lime of the shells), and Lemon Juice.

~~~~~  
**IT IS A VALUABLE HÆMATINIC AS WELL AS A FAT FOOD.**  
~~~~~

The BRITISH MEDICAL JOURNAL says:

"Free from the objectionable character of cod-liver oil, and possessing considerable nutritive value."

THE LANCET says:

"From our own analytical observations and experience we are led to regard Viol as of particular value and a complete food, because rich alike in all three classes of repairing material—the NITROGENOUS, HEAT PRODUCING, BONE FORMING—derived from animal, vegetable, and mineral sources. In appearance and consistency it is like honey, and to the taste it resembles excellent toffee."

The taste of VIOL is delicious. In this respect it possesses a surpassing advantage over cod-liver oil and other preparations generally prescribed for Invalids and Children, whilst in nutritive properties VIOL is equal, and, in most cases, superior to such preparations.

# BAYER'S PHARMACEUTICAL SPECIALITIES.

THE most reliable of the hypnotics. Acts quickly and surely, and is not attended by any secondary effects. The sleep produced by Trional is as calm and refreshing as the natural one; it is deep and dreamless, and the patient awakes without showing the least sign of drowsiness. In small doses, Trional prevents the night sweats of Phthisis.

## Trional

(Diethylsulphon  
Methylethan).

IN simple insomnia TRIONAL will produce sleep in from 15 to 30 minutes with absolute certainty.

**DOSE.**—15 to 30 grains, followed by a hot drink. A good method of administration is in the form of Palatinoids (Messrs. Oppenheimer, Son & Co., 179, Queen Victoria Street, E.C.), or in the form of Oxy-Carbonated Trional Water (manufactured by Messrs. Cooper & Co., 80, Gloucester Road, S.W.).

ADMITTEDLY the best product yet introduced in the treatment of the uric acid diathesis. Combines the acknowledged uric acid solvent properties of Piperazine, with the diuretic properties of tartaric acid. In cases of gravel, gout, etc., acts in the same specific manner as Piperazine.

## Lycetol

(Tartrate of Di-Methyl  
Piperazine).

INCREASES considerably the alkalinity of the blood.

**DOSE.**—16 to 32 grains daily. Best administered either in effervescing form (Effervescing Lycetol: Messrs. Bishop & Sons, Ltd., 48, Spelman St., E.) or in the form of Oxy-Carbonated Lycetol Water (Messrs. Cooper & Co 80, Gloucester Rd., S.W.)

### INVALUABLE IN INFLUENZA.

A PERFECT substitute for salicylate of sodium, as it acts quite as promptly, but without producing any of the unpleasant after effects so frequently attending the use of this drug. Its action is sure and quick.

## Salophen

(Acetyl para Amidosalol).

ABSOLUTELY non-toxic. Specially indicated in acute articular rheumatism, sciatica, chorea, migraine, and neuralgia.

**DOSE.**—16 grains, three or four times a day, in powder or in the form of lozenges.

AN excellent substitute for Codeine. In doses of 5 milligrammes Heroin has given excellent results in cases of bronchitis, pharyngitis, catarrh of the lungs, and in asthma bronchiale. In the latter two cases the dose may be increased to 1 centigramme.

## Heroin

(Di-acetic ester of Morphia).

HEROIN does not cause constipation. Its dose is much smaller than that of morphine. Heroin can be administered to patients with a weak heart who cannot tolerate morphine. It is best given in the form of powder, mixed with sugar, or may be dissolved in brandy or water acidulated by the addition of a few drops of acetic acid.

# BAYER'S PHARMACEUTICAL SPECIALITIES.

## PROTARGOL.

A new silver preparation, highly efficacious in the treatment of gonorrhœa (acute: injections of  $\frac{1}{4}$  to 2 per cent.; chronic: injections up to 10 per cent.).

Most strongly recommended as a wound healer (either in powder form, or as an ointment of from 5 to 10 per cent.), especially for suppurating wounds, ulcers, and burns.

PROTARGOL contains 8.3 per cent. silver, and is easily soluble in cold or warm water, is non-irritating, and possesses a better penetrating effect on the tissues than any other known silver preparation.

PROTARGOL is a chemical compound of silver and a protein substance. Its solution is not precipitated by albumen, chloride of sodium, or diluted hydrochloric acid.

PROTARGOL possesses high bactericidal properties. An eminent English surgeon, in *The Practitioner* for March, 1898, confirms, so far as his experiences go, the favourable opinion expressed by Professor Neisser, the discoverer of the gonococcus, especially with reference to the powerful antibacterial properties of Protargol.

PROTARGOL has been used with the greatest success in ocular therapeutics (blepharitis, dacryocystitis, etc.), in solutions of 5 to 20 per cent.; and recently in Rhino-Laryngology (brushing with solutions of 5 to 10 per cent.).

PROTARGOL has also been highly recommended as a prophylactic for gonorrhœa (Instillations of a trituration of 20 parts of Protargol, with 10 per cent. of glycerine, mixed with 70 parts of water.)

## ASPIRIN.

(Acetic Ether of Salicylic Acid.)

A perfect substitute for Salicylic Acid and its salts. It does not irritate the mucous membrane of the stomach. In consequence of its slow tendency to decompose it passes through the stomach unchanged, being split up into its component parts only in the intestinal alkaline fluids. It does not cause any disturbances of the stomach or loss of appetite. Moreover, it possesses an agreeable slightly acid taste, which favourably contrasts with the repugnant sweet taste of the Salicylates. Aspirin causes none of the unpleasant after effects which so frequently attend the use of Salicylic Acid and its salts.

Extensive clinical trials have proved that Aspirin is equally effective as a therapeutic agent with Salicylic Acid and its salts, whilst it possesses at the same time the great advantage of having absolutely none of the drawbacks which prohibit at times the use of the latter.

## SCHERING'S UROTOPINE.

### *A valuable Urinary Antiseptic.*

The antiseptic properties of Urotropine are due to the liberation of Formaldehyde. It is highly recommended in all cases of Bacteriuria, Cystitis, &c., and is largely given in cases of Enteric Fever, in order to sterilize the urine and thereby prevent infection.

Sample Bottles, 6d., post-free.

# TANOCOL.

An effective intestinal astringent, insoluble in the gastric juice. Highly recommended for the treatment of acute and chronic enteritis, also especially in intestinal diseases of children. Tanocol is more stable, consistent in action, and cheaper than any other intestinal astringent. It is almost entirely insoluble in the stomach, the full action of the Tannin being developed in the intestinal canal.

## SCHERING'S SANOSE.

## SCHERING'S EKA-IODOFORM.

## SCHERING'S ANTITOXIN.

## SCHERING'S EUPHTHALMINE.

### *A Synthetic Substitute for Atropine.*

Advantages over Atropine—

1. Does *not* cause any change in intraocular pressure.
2. Does *not* affect accommodation.
3. Does *not* cause poisonous symptoms.
4. Does *not* cause irritation of the conjunctiva or cornea.

Its effect disappears in the shortest possible time, and is therefore invaluable for ophthalmoscopic examinations.

## Hæmorrhoids

**Anusol** is a combination of Bismuth with iodo-resorcin-sulphonic acid, having a specific action upon the rectal mucosa. It is a powerful disinfectant and deodorant, an efficient desiccant for suppurating or hyper-secreting surfaces, and an astringent and granulation-promoting agent. It relieves constipation, hastens the removal of hardened and impacted fæces, softens and moistens the excrementitious matters, and causes easy and painless defæcation.

**Anusol** is indicated in hæmorrhoidal disease, causing shrinkage and retrogression of both the superficial and deep-seated veins, diminishing inflammatory action, and markedly increasing the patient's comfort. It has no unpleasant by-effects, contains no narcotic substances, and can be freely used in both sexes, and at all ages, and at any time.

**Anusol** is to be employed in all catarrhal affections of the rectal mucosa, in proctitis, intestinal tuberculosis, fissure of the anus, local ulcerations, and for the relief of constipation, tenesmus, pruritis ani et vaginæ, prostatic hypertrophy, and all pruriginous and painful conditions of the rectum and adjacent organs.

**Anusol** is supplied only in the form of suppositories, each containing about 10 grains of the drug with zinc oxide, balsam of Peru, and the excipient.

# Zymine Peptonising Tubes

## (Fairchild).

*For the Preparation of Peptonised Milk and other Predigested Food for the Sick.*

The nutritive mainstay in all fevers is Peptonised Milk, prepared with Fairchild Peptonising Tubes. In typhoid fever especially, Peptonised Milk promises and proves to be the "ideal food."

*"Without wishing even to question the possible advantages of antiseptic treatment in many cases of excessive intestinal fermentation, I am, however, inclined to lay special stress upon the influence of diet in such disorders. Everything else being equal, it is obvious that the more digestible the food-stuffs ingested, the less tendency there will be to intestinal fermentation. On the other hand, the accumulation of difficultly digestible material in the intestinal tract affords one of the best possible conditions favourable for putrefaction."*

Chittenden—"Intestinal Fermentation."

Peptonised Milk prepared with Fairchild Peptonising Tubes is a perfectly digestible and absorbable food. Its use precludes all accumulation of unassimilable matter in the intestinal tract.

Practical recipes for preparing Peptonised Milk and other Peptonised Foods will be sent upon application.

"Patients unable to tolerate the purest and most carefully prepared Cod Liver Oil can readily digest and assimilate it when combined with 'MALTINE.'"

*British Medical Journal.*

"**MALTINE**" WITH COD LIVER OIL represents a combination of "MALTINE" and 30 per cent. of the best, carefully selected Norwegian Cod Liver Oil. "MALTINE" is eminently adapted for this purpose, its pleasant flavour and odour admirably disguising the disagreeable smell and taste of the oil, and by means of the vacuum process, originated and improved by us, the incorporation of the oil with the "MALTINE" is far more perfect than in any other preparation of Cod Liver Oil.

Unlike emulsions, "Maltine" with Cod Liver Oil contains no inert or therapeutically valueless material.

"MALTINE" with Cod Liver Oil does not disturb digestion nor offend the palate, but has been found to be tolerated by fastidious invalids who rejected all other forms of Cod Liver Oil.

# An Advance in the Treatment of Incipient Phthisis.

FROM the researches of BRISSONNET and BOREAU it would appear that the value of Creosote in Phthisis is largely due to its producing metabolic action, and that this action is much increased when Creosote is combined with Phosphoric Anhydride and also with Tannin. BRISSONNET states that the physiological resistance of the individual to Tubercle bacilli is increased by the agglutinative power of the blood. BOREAU lays stress on the antagonism between "Gouty" and "Tubercular" diatheses, and shows that Creosote, Tannin, and Phosphoric Acid are active agents in increasing the metabolism of the body. Even apart from these considerations, "Phosote" (phosphate of creosote) and "Taphosote" (tannophosphate of creosote) are, pharmaceutically, a great advance on ordinary Creosote or Guaiacol. Both preparations are nearly tasteless and odourless, and are non-caustic to the gastric mucous membranes. "Phosote" and "Taphosote" are both tolerated in large doses.

## Phosote.

Brissonnet.

### (PHOSPHATE OF CREOSOTE.)

|                      |       |              |
|----------------------|-------|--------------|
| Creosote             | - - - | 80 per cent. |
| Phosphoric Anhydride | 20    | ..           |

A bland, limpid liquid, nearly tasteless and odourless, which is not irritating to the gastric mucous membrane. When Creosote is combined with Phosphoric Acid the metabolic action produced is much more marked, and Phosote can be tolerated in larger doses and for a longer continuance than Creosote or Guaiacol.

*DOSE of each preparation, one to two grammes three times a day.*

The best way of administering Phosote and Taphosote is in the form of Capsules (half a gramme in each).

Capsules supplied in boxes at 4/6 each; Phosote and Taphosote (Liquid) in bottles at 4/6 each.

### (TANNOPHOSPHATE OF CREOSOTE.)

|                      |       |              |
|----------------------|-------|--------------|
| Creosote             | - - - | 76 per cent. |
| Phosphoric Anhydride | 19    | ..           |
| Tannin               | - - - | 5 ..         |

A bland, limpid liquid, nearly tasteless and odourless, which is not irritating to the gastric mucous membrane. The presence of Tannin makes the metabolism of the body to be even more pronounced than when Phosote only is taken, whilst the astringent property due to the tannic acid is especially useful if there be any tendency to diarrhoea.

# Allen & Hanburys' 'Perfected' <sup>Cod</sup><sub>Liver</sub> Oil

THIS Oil is called THE "PERFECTED" because :

**I. It is absolutely PURE.**

To ensure this, it is prepared at ALLEN AND HANBURY'S own factories in Norway. *Absolutely fresh and selected livers of the cod-fish only are used.* Ordinary oil is made from the livers of ling and other fish, and little or no care is taken to reject stale and decomposing livers, from fish dying in the nets.

**II. All nauseous and irritating oxidation products which occur in ordinary oil are eliminated.**

This is accomplished partly by the fact that the livers used are in perfect condition and partly by the adoption of ALLEN AND HANBURY'S special process of manufacture.

**III. It is nearly tasteless, and does not cause unpleasant eructations, but has "almost the delicacy of Salad Oil"** (*British Medical Journal*).

The disagreeable taste of the ordinary oil is caused by oxidation and the presence of deleterious impurities.

**IV. Being pure, it is readily assimilable, and consequently of full therapeutic value.**

It is tolerated by the most fastidious and sensitive stomachs, and is the only oil which does not "repeat."

The "PERFECTED" Cod-liver Oil is ONLY supplied in the original capsuled bottles bearing Allen and Hanburys' Signature in white across the label and their Trade Mark—a Plough—as figured.

# The "Allenburys" Foods

## A Progressive Series of Foods. for Infant Feeding.

**THE "Allenburys" Milk Foods** so closely approximate in composition to the natural food as to supply an artificial diet almost identical with, and in practice found, when intelligently used, to be a reliable substitute for the mother's milk. So much so is this the case that an infant can take these Foods and the breast alternately without any disturbance to its digestive organs.

All ordinary substitutes for the mother's milk fail in some important attribute, thus the usual substitute, cow's milk, differs materially in composition, which no amount of mere dilution can correct, being deficient in fat, albumen, and lactose, whilst the casein is in excess. Further, as obtained in towns, cow's milk invariably swarms with bacteria, many of which are pathogenic to the alimentary canal of the infant.

### THE "Allenburys" Milk Food No. 1,

*for use from Birth to Three Months,*

Affords, when prepared for use, a *correct* substitute for human milk. It is manufactured from fresh cow's milk, so modified as to present all the constituents of human milk in their true relative proportions. Being in a desiccated form it keeps perfectly and requires the addition of *boiled* water only to furnish a pure and easily digested food suitable for infants during the first three months of life.

### THE "Allenburys" Milk Food No. 2,

*for use from Three to Six Months.*

This No. 2 Food contains all the elements of human milk in proper proportions. To this is added a small proportion of the soluble products of the action of malt upon wheat, *i.e.* Maltose, Dextrine, and Soluble Phosphates. These ingredients are a valuable adjunct to the increasing needs of the infant economy, yet the Food is readily and easily assimilated, there being no unconverted starch present. The No. 2 Food is designed for children between three and six months of age.

### THE "Allenburys" Malted Food No. 3

*for Infants of Six Months and upwards.*

This is a farinaceous Food, prepared by improved methods after Baron von LIEBIG's formula. The basis is fine wheaten flour which has been thoroughly cooked and partially digested by an active Malt Extract, so that a large proportion, but not all, of the starch has been converted. It is particularly rich in soluble phosphates and albuminoids. Being a farinaceous Food, it requires the addition of fresh milk in its preparation. This Food should be given from six months and upwards.

The "ALLENBURYS" FOODS should be given as directed and not continued beyond the time indicated. Thus the No. 1 Food should only be given during the first three months of life, the No. 2 between the third and the sixth month, and the No. 3 Food after the child is six months of age.

**Note.**—When infants are reared artificially it is strongly advised that some fresh elements of diet be given. Eminent authorities have recommended that a little raw meat-juice, grape, or sweetened orange juice, be given two or three times a week after the first three or four months. Full directions as to this are issued with each tin of Food.

## The "Allenburys" Feeder.

This bottle has the nipple at one end and a valve-stopper at the other, so that, both being removed, it can be readily cleansed under the tap. The valve admits air behind the column of milk, thus avoiding the swallowing of air and the resulting wind-colic; while the rubber nipple is easily detached, and can be turned inside out. The bottle is graduated. Price 1/3 each.

**Formula**—ECTHOL contains the active principles of ECHINACEA and THUJA, and is of uniform strength.

**Indications**—Carbuncles, Boils, Typhoid Fever, Erysipelas, Poisonous Bites, Tumours, ABNORMAL CELL GROWTHS, and PUS FORMATIONS. This preparation is NEITHER ALTERATIVE NOR ANTISEPTIC in the usual acceptance of those terms. It holds a position BETWEEN the two, which may be termed Antipurulent, a corrector of depraved secretions and tissues.

**Dose**—One fluid drachm three times a day, or oftener, as indicated. Also used externally in Ulcers, Bites, &c.

**Price, 12-oz. Bottle, 4s. 6d.**

The usual Discount to Medical Men requiring it for their own use or for dispensing.

***Always Trustworthy.***

IT has been proven by clinical tests that **BROMIDIA** is the best and safest hypnotic yet known to the profession.

It is always of the same strength and, hence, can always be relied on to produce the same results under the same conditions.

It is so well known and so well liked by the Profession everywhere that it can be obtained in almost every drug store in every country in the world.

Avoid substitution. The doctor should always take special care to get the genuine, which is only made by BATTLE. Substitutes not only injure the well-deserved reputation of **BROMIDIA**, and the Chemical House of BATTLE, but it also affects the reputation of the doctor and is often harmful to the patient.

**DOSE.**—One-half to one fluid drachm, repeated as indicated.

**BATTLE & CO. (Chemists Corporation), St. Louis, Mo., U.S.A.**

A Sample Bottle of BROMIDIA and Pamphlet will be forwarded free of charge to Medical Men on application to

Doctors should be aware that

# INVALID BOVRIL

is a special preparation, quite distinct from ordinary "Bovril," and more highly concentrated. It is

## Unseasoned

and consequently acceptable to the most fastidious palate. For patients who object to "Bovril" on account of its salt flavour, Doctors might order "INVALID BOVRIL," which can be obtained from any Chemist.

~~~~~  
THE LANCET, writing of two Special Analyses published in previous issues,

The first an analysis of Special Invalid Bovril, and the second, one of a good home-made beef-tea, after remarking that in considering the question of relative nutriment, regard must, of course, be paid to the amount of water employed in preparing beef-tea, says very forcibly that "All things being equal, the Invalid Bovril yielded, according to the analysis from *The Lancet* Laboratory, a much higher proportion of nutrient substance than the ordinary beef-tea."

# WAMPOLE'S PERFECTED AND TASTELESS PREPARATION OF THE EXTRACT OF COD LIVER OIL.

**NUTRITIVE.****TONIC.****STIMULANT.**

**OLEUM MORRHÆ COMP.** (WAMPOLE) is a palatable solution of the Alkaloids, and other medicinal principles of Cod Liver Oil in a menstruum of Malt Extract, to which is added the Compound Syrup of Hypophosphites, and fluid extract of wild cherry bark. These medicinal principles are so combined with choice aromatics as to make an agreeable mixture, entirely free from the nauseating properties of fish-oil. It is readily taken and assimilated by patients who

cannot retain the plain oil or its emulsions. It never disturbs the stomach or produces nausea or eructations as crude Cod Liver Oil does, but on the contrary, produces a marked increase in appetite. Weight is rapidly gained by its use, as the scales will show after taking it a short time. Young and old delight in taking it, as it does not suggest, either in odour or taste, Cod Liver Oil at all. It reminds one of a liquor like Curaçao. For anæmia, chlorosis, hysteria, and nervous diseases due to fatigue and exhaustion it is of great value. For

tonsillitis, bronchitis, phthisis, and the various symptoms of pulmonary disease (insomnia, night sweats, hectic, etc.), it is almost a specific. It is a strictly ethical preparation, a medicine of real merit and worthy in every way of your confidence. It is advertised in medical journals and among the Profession only.

LONG KNOWN AND PRESCRIBED FAVOURABLY THROUGHOUT THE BRITISH COLONIES.

Sold by all Chemists on prescription at 2/6 and 4/6 for six and sixteen oz. bottles, also in eighty oz. bottles at 17/6 for dispensing purposes.

**W. HILL & SON,**

60, BISHOPSGATE STREET, E.C.

**THE LANCET**, 22nd July, 1899, says:—

"This brandy shows excellent features on analysis while the evidence of taste is distinctly in favour of the description that it is an old matured grape spirit. It possesses that ethereal fragrance due to the peculiar ethers of wine. Our analysis yielded the following results:—Alcohol, by weight 41·00 per cent., by volume 48·43 per cent., equal to proof spirit 84·87 per cent.; acidity expressed as acetic acid, 0·033 per cent.; extractives 0·69 per cent.; mineral matter, *nil*; alcohol in volatile ethers, two grammes per 10 litres.

The flavour is soft and mellow and the aroma is characteristic of a sound and mature wine-derived spirit. In view of these analytical and general evidences this brandy may be described as particularly suitable for medicinal purposes."

# MARTELL'S THREE STAR BRANDY.

**THE MEDICAL PRESS**, 9th August, 1899, says:—

"We have carefully examined a sample of this well-known spirit by the usual tests, and the results obtained by analysis fully warrant our recommending it for medical and dietetic purposes. The analysis gave the following figures:

|                           |    |    |    |    |    |    |      |           |
|---------------------------|----|----|----|----|----|----|------|-----------|
| Alcohol (as proof spirit) | .. | .. | .. | .. | .. | .. | 86·5 | per cent. |
| Extractives               | .. | .. | .. | .. | .. | .. | ·68  | " "       |
| Ash                       | .. | .. | .. | .. | .. | .. | Nil. | " "       |
| Acidity                   | .. | .. | .. | .. | .. | .. | ·036 | " "       |
| Ethers (as alcohol)       | .. | .. | .. | .. | .. | .. | ·028 | " "       |

"We analysed this product some ten or more years ago, and finding that it still maintains its exceptionally high character, we are consequently in a position to speak highly of it as a genuine old brandy made from wine, well matured, and free from all compounds which might detract from its value as a medicinal agent."

## MÖLLER'S HYDROXYL-FREE COD-LIVER OIL.

### A NEW ERA IN COD-LIVER OIL MANUFACTURE.

The new product **HYDROXYL-FREE COD-LIVER OIL** is pure oil, entirely free from the decomposed fats or hydroxylated compounds which irritate the gastric mucous membrane and cause nauseous eructations or "repeating."

**THE LANCET**, June 8th, 1895:—"It is now known that Cod-Liver Oil can be prepared not only free from objectionable taste, but also free from tendency to cause unpleasant eructations." This latter very disagreeable property has been removed by Möller's New Process.

**THE CHEMIST AND DRUGGIST** (London), May 1st, 1897:—"Möller's Cod-Liver Oil."—"It would be difficult to speak too highly of this oil; the taste marks the advantage of the hydroxyl-free process, one could not tell it to be an oil. The absence of eructation we have again tested and proved."

## JOSEPH TURNER & CO.S' New Synthetic Remedies.

Synthesized and Manufactured in England.

### PIPERIDINE TARTRATE. (THE NEW URIC ACID SOLVENT).

PIPERIDINE possesses uric acid solvent powers greatly superior to any other known substance, and, in combination with tartaric acid forms a pleasant salt, which may be taken in 5 to 15 gr. doses in all wines, mineral waters, &c., at or before meals.

See LANCET, July 28, 1898; BRITISH MEDICAL JOURNAL, February 27, 1897; CENTRALBLATT DER PHYSIOLOGIE Bd. III., p. 454.

### GUAIPEROL. (GUAIACOLATE OF PIPERIDINE).

THIS REMEDY FOR PHTHISIS which combines the antiseptic properties of Guaiacol with the vascular tonic action of Piperidine has been tried with considerable success at the London and other Chest Hospitals. It has not the irritant properties of Guaiacol, and possesses many advantages over the latter substance and preparations of the same now on the market. Dose from 10 grs. twice a day, preferably in cachets after meals.

See BRITISH MEDICAL JOURNAL, January 16, 1897, and July 16, 1898, &c.

### ERYTHROL TETRA NITRATE. (TURNER). The New Vaso-Dilator.

The difference between the action of Erythrol Tetra Nitrate and other Vaso-Dilators consists mainly in the fact that the vaso-dilatation produced by it is of a much more permanent nature; the administration of gr. 1 by the month causing reduction in arterial tension lasting for more than five hours.

See BRADSHAW LECTURE, 1895; CROONIAN LECTURE, 1896; BRITISH MEDICAL JOURNAL, April 10, 1897, January 1 and January 8, 1898, &c.

# CONTREXÉVILLE

## GOUT, GRAVEL, DIABETES, ARTHRITISM

The Contrexéville Mineral Water (Pavillon SPRING) is a diuretic and laxative, a tonic, a stimulant, and aid to digestion. — It acts upon the secret mechanism of nutrition, as is proved by its influence in checking the production of uric acid and glucose: it favourably modifies those morbid *processus* of biological chemistry which result in the accumulation of uric acid in the blood, inducing the phenomena of gout. — It facilitates the elimination of urinary deposits, by contracting the ducts containing them and increasing the quantity of liquid by which these vessels are flushed. — It assists the cicatrization of the inflamed mucus of the urinary organs, and helps to restore the normal acidity of the urine; facilitates the flow of the bile, by causing contraction of the biliary ducts and the expulsion of calculi; and is invaluable in the treatment of congestion of the liver.

# Bandages.

Are Suitable for any Climate.

Are not affected by age or exposure.

Harden rapidly and firmly when applied.

"The Leicester" Perfect Plaster-of-Paris Bandages are specially valuable to Hospital Authorities Army and Navy Surgeons, and to all country, colonial, and other practitioners who are at a distance from the source of supply. Being non-absorbent, unaffected by heat or cold, and prevented from shedding,—any quantity of these bandages may be kept in stock without the slightest fear of them becoming useless. They are packed in tin boxes containing six bandages, which saves time in handling, and enables them to be sent safely to any distance, in any climate, and by any means of transit.

"The Leicester" Perfect Plaster-of-Paris Bandages differ from all others, in the fact that the Paris Plaster is thoroughly incorporated with the fabric, and is specially treated in such a manner that its essential quality of firm and rapid hardening is not affected by age or climatic conditions. They are made from the finest Dental Plaster, and may be used from end to end without that "grittiness" which is so objectionable in the ordinary bandages. They are much more cleanly in use than any yet introduced, and are suitable for any climate.

**HOLLAND, 40, South Audley Street, London, W.****SALMON'S ABDOMINAL BELT.**

For use before and after accouchement, and for all cases of abdominal weakness, affords a more complete lifting support than any hitherto made, as it effectually raises the lower part of the abdomen. Airpads are fitted to it, for cases of hernia, prolapsus, and moveable kidney when required. Prices from 25s. to 50s. Ladies can address to Mrs. SALMON.

ESTABLISHED 1861.

**SALMON'S OBSTETRICAL BINDER.**

For immediate use after accouchement (6s. 6d., 10s. 6d. and 18s. 6d.) is invaluable for preserving the figure, and entirely dispenses with the ordinary pinning. Exhibited before the Obstetrical Society and recommended by the leading Physician-Accoucheurs. Measurement required, ordinary size of the waist. Each one stamped with name and address; all others are imitations.

# BAILEY'S PATENT ABDOMINAL BELTS.

For General Support, Pregnancy, Prolapsus Uteri, Umbilical Hernia, Uterine Support, Laparotomy, Floating Kidney.

Over 16,000 of these Belts have been sold. The only ones which will not ruck up.

No Belt which is cut in one piece can give efficient support to the abdominal walls without undue pressure on the hips.

They are so constructed that the part which surrounds the abdomen is distinct from that which surrounds the hips, so that each part can be adjusted properly, and as the size of the hips varies very much in different persons, this is a matter of the first importance.

**The Greatest Improvement ever Effected.**

Competent Female Assistants attend many of the leading London Hospitals.

**SPECIAL DEPARTMENT FOR LADIES.**

All Belts are made and fitted on the Premises.

## BRADY & MARTIN.

Established in 1855 by the late HENRY BOWMAN BRADY, F.R.S., LL.D.

## BRADY & MARTIN'S VACCINATION SET.

IN arranging this set the aim has been to provide a cheap, portable case which would contain the essentials for the performance of aseptic vaccination. It is assumed that the doctor will have provided himself with whatever dressings he is in the habit of using. The case is strongly made of wood, polished inside and out, and is very compact, measuring 6½ in. × 2½ in. × 2½ in. The contents which are carefully fitted so that nothing can get broken in carrying are as follows:—

- Apparatus for sterilisation by boiling water.
- Two Vaccinators forged out of solid steel.
- Three Glass Tubes, numbered, for carrying Vaccine Tubes.
- Blower for ejecting the Lymph.
- Glass Plate.
- One Tube of Soda Carbonate Tablets.
- One Tube of Perchloride of Mercury Tablets.

The arrangement of the Vaccinators for Sterilisation is shown in the figure. The hole through which the arm of the support passes is also convenient for breaking the Vaccine Tube.

Price 21/- post free.

# THE BERKEFELD FILTER.

ADOPTED BY H.M.'s, THE INDIAN, THE EGYPTIAN, AND MANY FOREIGN GOVERNMENTS.

These Filters are manufactured in a variety of Patterns, as Pressure, Drip, and Pump Filters, suitable for PRIVATE HOUSES, OFFICES, HOSPITALS, ASYLUMS, SCHOOLS, FACTORIES, &c. For Travellers, Explorers, Officers on Foreign Service.

The attention of the Medical Profession is called to the following distinct advantages of these Filters:—

They are GERM PROOF (see Special Report on Water Filters, *British Medical Journal*, Nov., 1894, and Jan. 1898).

They are simple in construction, and can be easily cleaned and sterilized.

They give an abundant supply.

Extract from the Special Report to the *British Medical Journal* on "The Relative Efficiency of Water Filters," by Drs. Sims Woodhead and Cartwright Wood. "Experiments were carried out with the Filter H., an exceedingly good model which seems to subserve the functions of a Filter better than any we have yet seen described. . . . The output is so large that there is no reason why such Filters should not supply sufficient water for all household requirements. These Berkefeld Filters afford complete protection against the communication of waterborne disease."

## HAMILTON'S "CAPOTE" ULSTER.

In Harris Tweed, Scotch Cheviots and  
Homespun, lined throughout ith  
Tattersall Check, from

# £3.18.6

Two Measures only required—Chest & Height.

Forwarded against remittance to any part  
of the world.

Patterns sent by Return.

All orders executed in rotation.

### DESCRIPTION:

The Coats are made either single or double  
breasted, and by a special arrangement of the belt  
at back, can be worn as an ulster or ordinary loose  
overcoat at will.

With the belt attachment not in use it is a very  
comfortable walking coat, whilst with the belt,  
which can be arranged for medium or tight  
buttoning, for travelling or driving it has no equal,  
for the latter purpose any material can be made  
waterproof by a new process.

Above is in addition, not in place of our

sent on receipt of remittance to any part of the  
world. Made in blacks, greys and drabs. Patterns  
sent by return.

## FUR-LINED OVERCOATS.

Having during the summer months (when the  
furriers have very little to do) entered into a con-  
tract with an eminent firm to make us a number of  
Fur-lined Overcoats, now so fashionable, at a speci-  
ally low price, to be delivered in November. We  
have now received the first consignment of same,  
and our customers in the Medical Profession will  
find it an exceptional opportunity if they are re-  
quiring anything of the sort this winter. They are  
of various sizes and descriptions, and are much  
below the price charged by so-called Fur Stores.

We can supply a genuine well-made Coat in every  
way from

# £8.8.0

which will with ordinary care last for a long time  
No more comfortable garment for night or brougham  
work could be obtained. We do not recommend  
them for walking so much.

In cases where we have accounts open with  
customers we shall be happy to forward a couple  
on approval, or in other cases upon satisfactory  
reference.

## T. HAWKSLEY,

CORPUSCLE, BACTERIA AND  
SPORE ENUMERATORS.—

**CAUTION.**—T. HAWKSLEY respect-  
fully cautions the profes-  
sion that many Hæmacytometers are being sold  
which are a copy of the instrument made by him,  
BUT GROSSLY INEXACT in the depth of the cell and  
in the capacity of the millimetre pipettes. The  
former being frequently from  $\frac{1}{16}$ ths to  $\frac{1}{8}$ ths of a  
millimetre in excess of depth, and the latter  
from 2 to 25 cubic millimetres above or below the  
Standard quantity.

T. H. finds this caution necessary, as many such  
instruments have been sent to him for purpose of  
verification by his standards.

N.B.—An excess of  $\frac{1}{16}$ th mm. in the depth of the  
cell alone produces an error of 5 per cent., whilst  
1 cubic millimetre in the blood pipette develops an  
error of 20 per cent. in the observed reading.

### HOT-AIR LAMP AND CLOAK.—

For taking a hot-air bath at home or when travelling.  
This apparatus has been successfully used for 30  
years past in the treatment of Arthritis and other  
rheumatic affections. Vide *British Medical Journal*,  
28th Nov., 1898, and 10th Dec., 1898, for the advan-  
tages of Hot-air Treatment of Disease.—Descriptive  
pamphlet post free.

### KNEE TRUSSES FOR DISLOCATED

Semilunar Cartilages.—Made in three sizes for  
right and left knees. The same principle speci-  
ally adapted for chronic dislocations of the patella.  
The truss does not interfere with the free use of the  
joint in kneeling, or cycling, football or tennis.

### FRACTURED PATELLA.—A WALK

ing splint for use after union of the upper  
lower fragments. The steel joints at the sides  
so made that the degree of bending at the knee  
joint can be gradually increased. In case of a slip  
the knee cannot bend more than is allowed by this  
adjustable stop, and thus prevents over-stretching of  
the newly-formed ligament. To assist extension of  
the limb a strong elastic band joins the upper and  
lower parts of the splint. This also is adjustable,  
and greatly assists the weakened quadriceps muscles  
in walking, as used at Guy's, the Middlesex, and  
St. Bartholomew's Hospitals. In the usual form,  
for twelve months' use, the splint is about 12 inches  
long, but for permanent disablement it is better  
to carry a light support to the heel of the boot.

### RIDER'S SPRAIN OR RIDER'S

Thigh is a sprain or injury to the tendons of the  
adductor muscles of the thigh, rendering a safe grip  
of the saddle painful or impossible, and is well  
known to hunting men. The remedy is a wide-  
padded webbing strap encircling the upper part of  
the thigh, crossing on the outer side and fastening  
round the pelvis (not the waist), after the manner  
of a spica bandage. A long, round, soft pad sup-  
ports the injured tendons, and a stout leather strap  
and buckle adjust the tightness. There is no waist-  
band, no supporting strap, and no elastic used in its  
construction. It may be worn under or over the  
leathers (better over), and does not interfere with  
walking, but should be tightened when the run  
begins. Measurement required (if for right or left  
leg) circumference round top of thigh and pelvis (hips).

## ST. ANDREW'S HOSPITAL FOR MENTAL DISEASES, NORTHAMPTON.

FOR THE UPPER AND MIDDLE CLASSES ONLY.

President—The Right Hon. The EARL SPENCER, K.G.

The Institution is pleasantly situated in a healthy locality, one mile from the London and North Western or Midland lines, and 1½ hours only from London.

It is surrounded by more than 100 acres of pleasure grounds.

Great care is exercised in the classification of the patients according to their habits and different degrees of mental aberration, so that those who are quiet or convalescent may not associate with those whose minds are more affected.

Ample means of occupation and amusement are provided, including Cricket, Croquet, Lawn Tennis, and Archery. There are also Billiard Rooms, and a large Recreation Hall and Theatre.

The terms vary from 25s. to £4 4s. a week according to the requirements of the case.

Patients paying higher rates can have Special Attendants, Horses and Carriages; and Private Rooms in the Hospital, or in detached Villas in the grounds of the Hospital; or at Moulton Park, a branch establishment, two miles from the Hospital.

There is also a Seaside House, to which Patients may be sent.

For further information apply to the Medical Superintendent.

## "South Beacon," Hadlow

Down, Buxted, Sussex.

A HOME for the care of ten Mental Invalids (gentlemen only), requiring treatment away from their own homes, but who are not ill enough to be certified. Individual supervision, thirteen acres of garden and recreation grounds, suitable gentleman companions and men servants provided. Mr. Harmer has had 15 years' experience in mental cases.—For full particulars apply to PHILIP H. HARMER.

## St. Luke's Hospital,

London, E.C.

ESTABLISHED 1781.

This Hospital was established for the treatment of mental diseases of the middle classes. Preference is given to acute cases, and these are admitted either gratuitously or on payment of a weekly sum varying from 14s. to 30s., according to the circumstances of each. Patients are eligible for admission from any part of the United Kingdom. Forms of application may be had from, and enquiries addressed to, the Secretary, at the Hospital.

The Convalescent Establishment in connection with the Hospital is at St. Lawrence, near Ramsgate.

W. H. BAIRD,  
Secretary.

## Exeter City Asylum

PRIVATE PATIENTS are admitted into the Asylum at a uniform rate of 25s. a week. This sum includes everything except clothing. For further information, printed forms of certificates, etc., apply to E. L. RUTHERFORD, M.D., Medical Superintendent. "The wards are in excellent order, bright and cheerful, and those occupied by the patients of the private class should attract many, whose means are limited, from all parts of England."—Extract from the Forty-eighth Report of the Commissioners in London.

## Barnwood House Hospital for MENTAL DISEASES, Barnwood, near Gloucester.

Exclusively for PRIVATE PATIENTS of the UPPER and MIDDLE CLASSES.

This Institution is devoted to the care and treatment of persons of both sexes at moderate rates of payment.

The terms vary according to the requirements of the patients, who can have private rooms and special attendants, or be accommodated in detached villas and in the branch convalescent establishment on the hills.

Under special circumstances the rates of payment may be greatly reduced by the Committee.

For further information apply to JAMES GREIG SEWAN, M.B., the Medical Superintendent.

## THE MOAT HOUSE,

Tamworth, Staffordshire.

### A HOME FOR NERVOUS AND MENTAL CASES.

## MEDICAL PARTNERSHIP AND CONVEYANCING AGENCY,

1, ADAM STREET, ADELPHI, W.C.

The Sale of Practices and Partnerships negotiated. Trustworthy Locum Tenens and Assistants can be had at a few hours' notice.

N.B.—No charge made to Purchasers.

## Notice.—Mr. J. C. Needes,

with an experience of over a quarter of a century, is in an exceptional position to give intending purchasers independent information concerning most practices and partnerships. Those Investments in the following List marked with an Asterisk are well known to him, having been purchased through his office by the present Incumbents years ago, and in many other cases, introduction can be given to gentlemen who have taken charge of the practices during the absence of the Incumbents.

## Partnership (North Midlands).

—In consequence of the retirement of one of the partners the HALF SHARE of an increasing PRACTICE yielding £1,400 to £1,500 per annum is for negotiation, situated in a town about 20,000 inhabitants. Patients: clergy, farmers, tradespeople, &c. Fees, mainly 3s. visit and medicine. About 150 cases of m'd-wifery yearly. The retiring partner's excellent family residence (with large walled in garden) is available for the purchaser. Premium for share, two years' purchase.

## £1,500 a year (London).—A

mixed, private and cash PRACTICE yielding the above amount and capable of increase as a great deal of work is refused at present. Situated in a northern suburb. Convenient private residence with stabling and large garden attached. Rent £45 per annum. Premium £1,000 down, and balance by instalments.

## Death Vacancy.—Western

Suburb.—A well-established PRACTICE for disposal owing to incumbent's sudden death. Cash receipts from private practice (exclusive of appointment) £550 last year. Visits 2s. 6d. to 10s. 6d. Midwifery 1 to 5 guineas. Horse not kept. Commodious detached Family Residence in main road. Rent £90. A very moderate premium accepted. The practice was formerly larger and can be increased with proper attention.

## Western County.—An old-

established and easily-worked PRACTICE, in a pretty country town; first-class hunting, trout fishing, and shooting. The practice is worth at present £350 per annum, but the income was formerly nearly three times this amount, and there is every reason to believe it could be greatly increased. Union, vaccination, etc., yield £100; visits, 2s. 6d. to 10s. 6d., exclusive of medicine; very little midwifery; well situated family residence, with garden, stabling, etc., attached.

## Cheap Investment.—£12 per

week cash. A well-established Cash PRACTICE in London, S.E. The total cash receipts last year were £615, and they will amount to about £700 for the present year. Premium only £500; house rent, £30; drug bill, £50; and as these are the only expenses, money can be saved out of the Practice. In present hands a considerable time.

## Partnership with succession

in 2 years to an old-established PRACTICE in a pleasant country town about 100 miles from London. The receipts amount to £900 per annum, including union and club appointments. Patients: clergy, professional men, farmers, tradespeople, &c. Railway Station 2 miles distant. Vendor's excellent family residence, with garden, tennis court, stabling and meadow attached, can be had on the termination of the partnership. Golf, hunting, shooting, &c. Further particulars on application.

APPLY TO J. C. NEEDES, 1, Adam Street, Adelphi, W.C.

## Locum Tenens and Temporary

ASSISTANTS.—Practitioners requiring the above can immediately obtain thoroughly qualified gentlemen upon application to 1, Adam Street, Adelphi, W.C. Every gentleman engaged by the office in either of the above capacities is personally known to Mr. J. C. NEEDES. An office fee of half a guinea is payable by the principal.

Telegraphic Address: "Acquirement London."

## MEDICAL TRANSFER AND PARTNERSHIP.

56, LUDGATE HILL.

## Messrs. Orridge & Co.,

Medical Transfer Agents, Referees, and Valuers, in offering their services to the Profession, have pleasure in referring to the fact, that for about HALF A CENTURY the name of Mr. Orridge has been known in the advertising columns of the leading Medical Journals, and that a very large proportion of the Medical men throughout the Kingdom have confided their interests in the adjustment of Partnerships and Transfers to their care.

Purchasers who will communicate (confidentially) the nature and extent of their wishes regarding investments can be apprised of appropriate opportunities as they occur.

On occasions where advice is required in forming a correct conclusion as to the worth or eligibility of a Practice, Messrs. Orridge & Co. trust that their familiarity with the various contingencies that govern value will be found of considerable service to those by whom they may be employed.

N.B.—No charge is made to purchasers.
