Squire's Companion

TO THE BRITISH PHARMACOPEIA.

"At the end of each article there is a more detailed account of all the chief preparations and forms in which the drug is used. Under this last heading is included a large amount of trustworthy information regarding numerous formulæ which is not readily obtainable from any other source. . . . There has been added a short account of therapeutical agents of bacterial origin by Dr. R. T. Hewlett, which deals shortly with antitoxins, tuberculin, vaccines, mallein, and nucleins."—*The British Medical Journal*, March 18th, 1899.

Saunders' Medical Hand-Atlases.

As it is impossible to realise the beauty of these Atlases without an opportunity to examine them, we make the following offer: Any one of these books will be sent, post-paid, upon request. If you want the book, you have merely to remit the price; if not return the book by Mail or Express, prepaid.

THE series of books included under the above title surpass any similar volumes ever published for **scientific accuracy, pictorial beauty, compactness and cheapness.**

Each volume contains from **50 to 100 coloured plates**, executed by the most skilful German lithographers, besides numerous illustrations in text. There is a full and appropriate **description**, and each book contains a condensed but adequate **outline of the subject** to which it is devoted.

One of the most valuable features of these atlases is that they offer a **ready and satisfactory substitute for clinical observation.** Such observation, of course, is available only to the residents in large medical centres; and even then the requisite variety is seen only after long years of routine hospital work.

In planning this series of atlases, arrangements were made with representative publishers in the chief medical centres of the world for the publication of translations into nine different languages the lithographic plates for all the editions being made in Germany, where work of this kind has been brought to the greatest perfection. The enormous expense of making the plates being shared by the various publishers, the cost to each one was materially reduced. Thus by reason of their **universal translation and reproduction**, the publishers have been enabled to secure for these atlases the **best artistic and professional talent** to produce them in the **most elegant style**, and yet to offer them at a **price heretofore unapproached in cheapness.** The great success of the undertaking is demonstrated by the fact that the volumes have already appeared in **thirteen different languages**—German, English, French, Italian, Russian, Spanish, Japanese, Dutch, Danish, Swedish, Roumanian, Bohemian and Hungarian.

Two years ago Mr. Saunders contracted with the original publisher for 100,000 copies of the twenty-six volumes that are to compose this series of books. Of these twenty-six volumes only ten have appeared, and yet **50,000 copies** have already been imported.

The volumes in this series are selling with remarkable rapidity, and there is every indication that over 100,000 copies will be sold of these ten volumes alone. Basing the sale of future numbers on those already issued, the prospects are that the original contract will be exceeded three times over, and that the sale of the complete series will reach at least **300,000 copies.**

On account of the marked favour with which these books have been received by the medical profession, and the enormous sales that they seem destined to reach, the publisher has been enabled to prepare and furnish special additional coloured plates, making the series even **handsomer and more complete** than was originally intended.

As an indication of the great practical value of the atlases and of the immense favour with which they have been received, it should be noted that the **Medical Department of the U.S. Army** has adopted the "Atlas of Operative Surgery" as its standard, and has ordered the book in large quantities.

READY FOR DELIVERY.

THE LANCET, 22nd July, 1899, says:—

"This brandy shows excellent features on analysis while the evidence of taste is distinctly in favour of the description that it is an old matured grape spirit. It possesses that ethereal fragrance due to the peculiar ethers of wine. Our analysis yielded the following results:—
Alcohol, by weight 41.00 per cent., by volume 48.43 per cent., equal to proof spirit 84.87 per cent.; acidity expressed as acetic acid, 0.033 per cent.; extractives 0.69 per cent.; mineral matter, nil; alcohol in volatile ethers, two grammes per 10 litres. The flavour is soft and mellow and the aroma is characteristic of a sound and mature wine-derived spirit. In view of these analytical and general evidences this brandy may be described as particularly suitable for medicinal purposes."

MARTELL'S

THREE STAR

THE MEDICAL PRESS, 2nd August, 1899, says:—

"We have carefully examined a sample of this well-known spirit by the usual tests, and the results obtained by analysis fully warrant our recommending it for medical and dietetic purposes. The analysis gave the following figures:

BRANDY.

| | | | | | | | |
|---------------------------|----|----|----|----|----|----|----------------|
| Alcohol (as proof spirit) | .. | .. | .. | .. | .. | .. | 86.5 per cent. |
| Extractives | .. | .. | .. | .. | .. | .. | .68 " " |
| Ash | .. | .. | .. | .. | .. | .. | Nil. |
| Acidity | .. | .. | .. | .. | .. | .. | .036 " " |
| Ethers (as alcohol) | .. | .. | .. | .. | .. | .. | .028 " " |

"We analysed this product some ten or more years ago, and finding that it still maintains its exceptionally high character, we are consequently in a position to speak highly of it as a genuine old brandy made from wine, well matured, and free from all compounds which might detract from its value as a medicinal agent."

This delicious highly nutritive, and most easily digested Food is specially prepared for Infants, and for those whose digestive powers have been weakened by illness or age.

The following letter addressed to F. B. BENGER & CO., Ltd., is published by special permission of the Russian Court.

"Balmoral Castle, Scotland.

"Sirs,—Please forward to Balmoral Castle one dozen 2/6 Tins of BENGER'S FOOD for H.I.M. THE EMPRESS OF RUSSIA, addressed to Miss Coster. We have received the box ordered from Peterhoff.

"Yours truly, F. COSTER."

N.B.—An important observation.

Dr. R. S— M—, M.B., B.S.(Lond.), F.R.C.S.(Eng.), writes under date May 12th, 1898, and permits us to publish:—

"Ever since you introduced your Food I have been in the habit of prescribing it for infants and invalids, and in my opinion it surpasses and absolutely supersedes all other foods. The laxative effect of your food when the predigestion has been carried pretty far, is one of its most valuable qualities, and can be regulated precisely according to the time of the digestive process. By graduating this a most perfect adjustment of the action of the bowels can be secured."

BENGER'S FOOD is sold in Tins at 1/6, 2/6, and 5/-, by Chemists, &c., everywhere.

LYLE'S GOLDEN SYRUP.

Recent discoveries of Arsenic in Beer having considerably disturbed public confidence in articles of consumption into which Glucose sometimes enters, the Proprietors of the above well-known brand of Syrup think it right to inform the readers of this Journal that Glucose does not enter into its composition, and that it is absolutely free from Arsenic and all other injurious compounds, as the following certificates show:—

"London, December 17, 1900.

"At the request of Messrs. Abram Lyle & Sons, Ltd., I have procured many samples of their Golden Syrup at retail shops in the City of London, and have carefully tested the same.

"The whole of the samples were found to be free from every trace of Arsenic.

"Having on a great number of occasions analysed Messrs. Lyle & Sons' Golden Syrup, I can further state that Glucose does not enter into the composition of the article, that it is perfectly free from anything that might prove harmful, and that it is a sound and wholesome food,"

At the request of the Apenta Company of Budapest, I hereby certify to them that I have for a considerable time repeatedly examined the **Apenta Springs** at Ofen (Budapest) and the filling of the water, which were placed under my scientific supervision, and that I have become convinced that the working is conducted very satisfactorily from a hygienic point of view.

I have also satisfied myself by repeated personal investigations that the **Apenta Water** as despatched is constant in its chemical composition.

Cocoa

"A PERFECT FOOD."

The Editors of THE LANCET, June 16, 1900, say:—

"We are glad to find that Messrs. Cadbury draw attention to the fact that there are strong grounds for objection to the addition to cocoa of certain foreign substances. This resource is quite unnecessary and, indeed, pernicious, especially having regard to the fact that cocoa alone is an excellent food as well as a stimulant, having a salutary action upon the nerve centres."

DUOTAL

(Guaiacol Carbonate)

CREOSOTAL

(Creosote-Carbonate)

XEROFORM

(Tribromphenol-Bismuth)

are now acknowledged to be the most pleasant, safe and effective remedies in the treatment of Tuberculosis and of Pneumonia. They are free from the noxious by-effects of the plain Creosote and Guaiacol and exhibit only the therapeutical properties of these Drugs. Duotal contains over 90 per cent. of pure crystalline Guaiacol, Creosotal contains 92 per cent. of pure Creosote, but these Carbonates are neutral, non-toxic and absolutely free from all caustic and irritant qualities, and can therefore be administered in large doses.

Xeroform has been styled, "The ideal substitute for Iodoform." It is a yellow, non-toxic, non-irritating and non-caustic powder, in praxi—devoid of odour and taste. Xeroform promotes granulation and cicatrization more quickly than any other remedy, it diminishes suppuration, is eminently desiccating and lessens secretion. In use Xeroform is more economical than Iodoform, since its volume for equal weight is double that of Iodoform, and its fine pulverization enables the physician to cover a large surface with a very small quantity.

COLLARGOLUM (Soluble Metallic Silver), UNGUENTUM CREDE (Ointment of Soluble Metallic Silver), ACTOL Crede (Lactate of Silver), ANTISEPTIC CREDE (Citrates of Silver), ACOINE (a new local Anæsthetic), ORPHOL (Betanaphthol—Bismuth von Heyden) HEYDEN'S FOOD.

LISTERINE.

THE STANDARD ANTISEPTIC.

LISTERINE is a non-toxic, non-irritating and non-escharotic antiseptic, composed of ozoniferous essences, vegetable antiseptics and benzo-boracic acid.

LISTERINE is sufficiently powerful to make and maintain surgical cleanliness in the antiseptic and prophylactic treatment and care of all parts of the human body.

LISTERINE has ever proven a thoroughly trustworthy antiseptic dressing for operative or accidental wounds.

LISTERINE is invaluable in obstetrics and gynecology as a general cleansing, prophylactic, or antiseptic agent, and is an effective remedy in the treatment of catarrhal conditions of every locality.

LISTERINE is useful in the treatment of the infectious maladies which are attended by inflammation of accessible surfaces—as diphtheria, scarlet fever and pertussis.

LISTERINE diluted with water or glycerine speedily relieves certain fermentative forms of indigestion.

LISTERINE is indispensable for the preservation of the teeth, and for maintaining the mucous membrane of the mouth in a healthy condition.

LISTERINE employed in the sick-room by means of a spray, or saturated cloths hung about, is actively ozonifying and rapidly oxidizing in its effects upon organic matter afloat in the atmosphere.

LISTERINE is of accurately determined and uniform antiseptic power, and of positive originality.

LISTERINE is kept in stock by all worthy pharmacists everywhere

BAYER'S PHARMACEUTICAL SPECIALITIES.

An ideal substitute for the Salicylates, having no irritating effect on the stomach, through which it passes unchanged, decomposing only in the alkaline intestinal fluid. It is free from the unpleasant after-effects so frequently attending the use of Salicylic Acid and its salts.

THE best product yet introduced in the treatment of the uric acid diathesis. Combines the acknowledged uric acid solvent properties of Piperazine with the diuretic properties of Tartaric Acid.

THIS product is a neutral Heroin salt, easily soluble in water, and suitable for subcutaneous injection. The aqueous solution is neutral, and gives no reaction with Perchloride of Iron.

The Dose for subcutaneous injection is $\frac{1}{20}$ th to $\frac{1}{10}$ th of a grain.

An ideal astringent in Infantile Diarrhoea, colic, enteritis, dysentery, &c. An acetic derivative of tannin without taste or smell. Insoluble in water or dilute acids, but easily soluble in the presence of alkalies.

Aspirin

(Acetic Ether of Salicylic Acid).

It has an agreeable, slightly acid taste, favourably contrasting with the repugnant sweet taste of the Salicylates. Extensive clinical trials have proved the value of Aspirin as a perfect substitute for Salicylic Acid and its salts.

Dose.—16 grains three or four times a day.

Lycetol

(Tartrate of Di-methyl Piperazine).

INCREASES considerably the alkalinity of the blood.

Dose.—16 to 32 grains daily. Best administered either in Effervescing form (Effervescing Lycetol, Messrs. Bishop & Sons, Ltd., Spelman St., E.), or in the form of Oxy-carbonated Lycetol Water (Messrs. Cooper & Co., 80, Gloucester Rd., S.W.)

Heroin Hydrochlor.

It may also be administered per os, viz., in the same doses as Heroin.

Doses.—For adults, $\frac{1}{20}$ th to $\frac{1}{12}$ th of a grain, three or four times daily; for children, $\frac{1}{120}$ th to $\frac{1}{24}$ th of a grain, three or four times daily.

Tannigen

(Triacetyl of Tannin).

MAY be prescribed in all cases where it is desired to produce an astringent action on the intestinal mucus. Renders especially valuable service in acute and chronic colic.

Dose.—Children, 2 to 5 grains; Adults, 8 to 12 grains, four to six times a day.

SULFONAL-BAYER, TRIONAL, TETRONAL, PIPERAZINE-BAYER, IODOTHYRINE, ARISTOL, EUROPHEN, LOSOPHAN, PROTARBOOL, SOMATOSE, IRON SOMATOSE, MILK SOMATOSE, TANNOPINE, PHENACETINE-BAYER, SALOPHEN, ANALGEN, SALICYLIC ACID, SALICYLATE OF SODIUM, SALOL-BAYER, DUOTAL, CREOSOTAL, HEROIN, HEDONAL.

BAYER'S PHARMACEUTICAL SPECIALITIES.

HIGHLY RECOMMENDED FOR INFLUENZA. A perfect substitute for Salicylate of Sodium, as it acts quite as promptly, but without producing any of the unpleasant after-effects so frequently attending the use of this drug. Its action is sure and quick.

Salophen

(Acetyl para
Amido-salol)

ABSOLUTELY non-toxic. Specially indicated in Acute Articular Rheumatism, Sciatica, Chorea, Migraine and Neuralgia.

Dose: 16 grains three or four times a day, in powder or in the form of lozenges.

A NEW silver preparation, highly efficacious in the treatment of gonorrhoea (acute: injections of $\frac{1}{4}$ to 2 per cent.; chronic: up to 10 per cent.). Protargol contains 8.3 per cent. of silver, easily soluble in cold or warm water, is non-irritating, and possesses a better penetrating effect on the tissues than any other known silver preparation.

Protargol

PROTARGOL has been used with the greatest success in ocular therapeutics, in solution of 5 to 20 per cent; and in Rhino-Laryngology (brushing with solutions of 5 to 10 per cent.). It has also been recommended as a prophylactic against gonorrhoea (installations of 20 parts Protargol, 10 parts glycerine, mixed with 70 parts water).

THE most reliable of the Hypnotics. Acts quickly and surely, and is not attended by any secondary effects. The sleep produced by TRIONAL is as calm and refreshing as the natural one; it is deep and dreamless, and the patient awakes from it as from a natural sleep, without showing the least sign of drowsiness.

Trional

(Diethylsulphon-
Methylethan)

IN simple Insomnia TRIONAL will produce sleep in from 15 to 20 minutes with absolute certainty.

Dose: 15 to 30 grains, followed by a hot drink. A good method of administration is in the form of Palatinoids (Messrs. Oppenheimer, Son & Co., Ltd., 179, Queen Victoria Street, E.C.), or in the form of oxy-carbonated Trional Water (manufactured by Messrs. Cooper & Co., 80, Gloucester Road, S.W.)

"A perfect combination of Malt Extract
and Cod-liver Oil."—*British Medical Journal.*

BYNOL

The "PERFECTED" Malt and Oil.

BYNOL, though containing a much larger percentage of COD-LIVER OIL than the ordinary preparations of MALT and OIL so widely sold, is, nevertheless, not only free from all unpleasant taste, but has a most agreeable nutty flavour, so that it is relished as a sweetmeat by many children. It can be taken without difficulty by delicate patients, being readily digested and assimilated. This result is due in large measure to the intimate combination of the MALT EXTRACT with the OIL, globules of the latter not being distinguishable even under a microscope.

The Malt Extract employed is exceptionally nutritious and active, while the Cod-liver Oil is of absolute purity, being made at Allen & Hanburys' own factories in Norway, from the fresh and selected livers of the Cod-fish only. *SAMPLES FREE TO MEDICAL MEN.*

The late Sir ANDREW CLARK, in a lecture at the London Hospital, remarked:—

"I have said that these fibroid cases are poor creatures, thin and white, and have what may be called nutritive debility, and the question is, What am I to do with them? You cannot do better than endeavour to make the patient walk in the way of physiological righteousness. But that sometimes will not do. Some people may be physiologically well behaved, and somehow they do not thrive on it. Can you do anything in those cases? There are two remedies which sometimes do succeed where the ordinary diet will not succeed in nourishing the patient—the one is Cod-liver Oil and Malt given with food—a preparation called BYNOL—and the other is the remedy called BYNIN EMULSION, consisting of Hypophosphites, Oil, and Malt; both are prepared by Messrs. ALLEN & HANBURY'S. These are two good nutritive agents in promoting nutrition."

ALLEN & HANBURY'S LTD, Plough Court, Lombard St, LONDON, E.C.

 **An Ideal Tonic in Convalescence.**

Byno-Hypophosphites.

An Active Aid to the Digestion of Farinaceous Foods.

Byno-Hypophosphites may be taken when the digestive organs are weak and impaired and when ordinary tonics cannot be tolerated.

The Constituents of Byno-Hypophosphites ensure the effectual combination required in a perfect tonic. This combination though somewhat complex, is in practice most successful and Byno-Hypophosphites will be found much superior to the official syrup of which it is the analogue. It stimulates the appetite whilst aiding digestion; it conserves and invigorates the nervous system.

COMPOSITION.

Bynin, Liquid Malt, the menstrum employed affords an active digestive agent; and is also a concentrated nutriment in itself.

The Hypophosphites considered as such, are of the utmost value in maintaining the nervous efficiency of the body. They are easily assimilated.

The Metallic Salts each play their particular rôle.

Iron is indispensable in the maintenance of Hæmoglobin.

Calcium is now known to act specifically on the heart muscle, increasing the strength of the beat, besides being a large constituent of bone.

Sodium and Potassium are necessary in the maintenance of the gastric and pancreatic juices; and consequently the efficiency of the digestive apparatus.

Strychnine is the most valuable nerve and digestive stimulant known.

Cinchona affords alkaloids which specifically inhibit the action of malarial, influenzal and allied micro-organisms, and arrest abnormal fermentation processes in the alimentary canal.

The combination of Strychnine and the Cinchona alkaloids with their *natural acids* affords in itself a valuable alimentary tonic and corrective, easy of assimilation, and not irritating to the digestion.

PRACTICAL CLINICAL EXPERIENCE of many years has proved that what theoretically is expected of Byno-Hypophosphites by reason of its composition is fully justified. It is, as the *British Medical Journal* says: "One of the Most Popular Tonics of the Day."

'Allenburys' Milk Foods

(Humanized Milk in Powder Form.)

THE "Allenburys" Milk Foods closely approximate to human milk in composition, as they contain both fat, albumen, and casein in the right proportions.

This is an important point, as a deficiency of fat in infant dietary is a potent cause of marasmus and rickets, whilst an excess of casein, as in cow's milk, forms indigestible curds, with attendant discomfort and trouble to the child.

THE Milk used in the manufacture of the Foods is modified and treated as soon as it comes from the cow, and before any products of decomposition have had time to form.

This must be superior to any home sterilization of cow's milk, for such a process, while it destroys the living bacteria, does not get rid of the acidity and irritating products of decomposition, and naturally does nothing to correct the difference in composition between cow's and human milk.

DIARRHŒA and digestive troubles, caused by a contaminated milk supply, are avoided by the use of these Foods.

THE "Allenburys" Milk Foods are quickly and easily made, as they need the addition of hot water only.

Full directions as to the concurrent use of fresh elements of diet accompany each tin

The "Allenburys" Milk Foods

Compared with Human and Cow's Milk.

The "ALLENBURYS" No. 1 and No. 2 MILK FOODS, when mixed with water according to the directions, have a percentage composition at time of consumption as under:

Compare this with human and diluted cow's milk as usually given.

| | Cow's Milk and Water, equal parts* | Cow's Milk. | Human Milk | No. 1 Food. | No. 2 Food. |
|------------------|------------------------------------|-------------|------------|-------------|-------------|
| Fat per cent. | 1.8 | 3.6 | 3.7 | 3.33 | 3.06 |
| Casein .. | 1.5 | 3.0 | 1.0 | 1.12 | 1.00 |
| Albumen .. | 0.25 | 0.5 | 1.2 | 1.00 | 0.81 |
| Lactose .. | 2.4 | 4.8 | 6.2 | 10.20 | 10.86 |
| Mineral Matters | 0.35 | 0.7 | 0.3 | 0.67 | 0.62 |
| Water, per cent. | 93.7 | 87.4 | 87.6 | 83.68 | 83.65 |

* The strength usually given to a young infant.

NOTE.—It will be seen that the proportion of casein in cow's milk is greatly in excess, whilst the albumen and lactose are deficient. No dilution with water can correct this. When cream is added to diluted milk the proportion of fat may be made correct, but the deficiency of milk-albumen and lactose is still further exaggerated.

BEEF AND IRON WINE

(B. W. & Co.)

A PALATABLE CONCENTRATED
NUTRIENT AND RESTORATIVE.

BEEF AND IRON WINE (B. W. & CO.) contains a readily assimilable organic salt of iron, dissolved in a sound medicinal wine, to which are added the stimulating constituents of choice beef. The wine is carefully de-tannated, the strength of iron is constant, and each tablespoonful dose represents approximately one ounce of beef.

The Lancet reports: "It is a really valuable preparation, and patients who are unable to tolerate any other solution of the kind can take it readily. A very powerful and rapidly acting tonic."

Small and large bottles, 1s. 10d. and 3s. 6d. each.

'HAZELINE' BRAND OF DISTILLED WITCH HAZEL.

THE superiority of 'Hazeline' over ordinary preparations of *Hamamelis Virginica* is due to the original process of manufacture by which the full volatile active principles of the fresh green bark are retained. It is an active, agreeable and dyne, astringent and styptic for internal or external use.

Small and large bottles, 1s. 2d. and 3s. 6d. each.

'HAZELINE' CREAM combines the active principles of the witch hazel with the emollient 'Lanoline.'

Glass pots, 9d.; small and large collapsible tubes, 5d. and 9d.

'HAZELINE' SNOW, a non-greasy preparation for application to the skin. Contains 50 % of 'Hazeline.'

In glass pots, 9d.

ROMAN ZODIAC.—Astrological predictions based upon the solar zodiac spread from Greece to Rome, and then travelled westward about the beginning of our era. A belief in the effect on human destiny produced by the relative positions of the sun, moon and planets, exerted a powerful influence in the Roman Empire. Cities and kingdoms were allotted to their several patronage, and the various symbols were often impressed upon Roman coins.

Dr. NICOLAI, Sanitary Councillor, Creussen (Thuringia):—"I can only repeat that your Hæmatogen, especially in cases of consumption, produced an excellent and surprising effect. I shall gladly recommend it as I can conscientiously do so."

Dr. JOSEF V. NOVAK, Budapest:—"I have great pleasure in informing you that **HOMMEL'S HÆMATOGEN** has proved itself to be a first-rate medicine for delicate persons. I have therefore prescribed it for my patients in place of iron and cod liver oil, and in every instance my opinion was justified."

Dr. R. KNOTH, Croellwitz, Halle. a. S.:—"In the case of a child 6 months old, suffering from rickets and wasting away, I had splendid success to record after the use of one bottle of **Hommel's Hæmatogen**."

We shall be happy to forward Samples and Literature of Hommel's Hæmatogen, Gratis and Carriage Paid to Medical Practitioners who may wish to give it a trial.

Kept in Stock by all Pharmaceutical Chemists. Special Price to the Profession.

Dose for Young Infants, Half a Tea-spoonful, or One Tea-spoonful, twice a day in Milk, of the proper heat for drinking. **For Children**, One Table-spoonful, either pure or mixed with any convenient liquid. **For Adults**, One Table-spoonful twice a day BEFORE food, so as to secure the full benefit of its powerful appetising effect.

PLASMON COCOA.

For Purity, Digestibility, and Nourishing Properties, PLASMON COCOA excels all other Cocos.

PLASMON COCOA is guaranteed to be absolutely free from added starchy matter, drugs or chemicals of any kind whatsoever, and consists only of the pure Plasmon and Cocoa of the very *highest* and *purest quality only*.

The proportions are:—

| | | | | |
|------------|-----|-----|-----|--------|
| PLASMON | ... | ... | ... | 55·00 |
| PURE COCOA | ... | ... | ... | 45·00 |
| | | | | <hr/> |
| | | | | 100·00 |
| | | | | <hr/> |

The nutrient value of Plasmon is already well known. Mixed with a suitable proportion of Cocoa it forms a complete food, at once nourishing and stimulating. One cup of PLASMON COCOA is equal in nutrient value to a quarter of a pound of the best beef fillet.

PLASMON COCOA being absolutely free from all sugar and starch is a valuable food for *Diabetic Patients*,

PLASMON COCOA is easily digested and assimilated, and is most sustaining. It does not form an undue amount of fat, but strengthens the digestive organs, the muscles, and the nerves. It can be given with perfect safety to those who suffer from indigestion, and is very valuable in cases of *anæmia*.

and consequently acceptable to the most fastidious palate. For patients who object to "Bovril" on account of its salt flavour, Doctors might order "INVALID BOVRIL," which can be obtained from any Chemist.

~~~~~  
THE LANCET, writing of two Special Analyses published in previous issues,

The first an analysis of Special Invalid Bovril, and the second, one of a good home-made beef-tea, after remarking that in considering the question of relative nutriment, regard must, of course, be paid to the amount of water employed in preparing beef-tea, says very forcibly that "All things being equal, the Invalid Bovril yielded, according to the analysis from *The Lancet* Laboratory, a much higher proportion of nutrient substance than the ordinary beef-tea."

# PAPAIN-FINKLER.

ment of Gastric Ulcer and as an aid in the nutrition of patients suffering from Phthisis. Under the application of a 5% aqueous mixture of Papain, the false membranes in Diphtheria promptly disappear leaving the mucous membrane accessible to the action of suitable antiseptics; the effect of this local treatment is in no wise diminished by the constitutional effects of the Antitoxin Treatment. To ensure obtaining the original preparation it is necessary to prescribe **Papain-Finkler**.

All packages of Papain-Finkler bear the trade mark and signature,

# HELIDON SPA WATER.

This famous effervescent NATURAL LITHIA WATER has obtained celebrity in the Southern Hemisphere. All Australians swear by it, and travellers say there is no Water in the world like it. When taken as a Table Water no restraint is necessary, as no indigestion or oppressive feeling will follow, either from excess of food or liquid. To persons of gouty tendency it is with confidence recommended. Helidon Spa and milk can be taken by the feeblest digestion, and it has proved the corner-stone of recuperation to many.

## JOSEPH TURNER & CO.'S New Synthetic Remedies.

*Synthesised and Manufactured in England.*

### PIPERIDINE TARTRATE. (THE NEW URIC ACID SOLVENT).

PIPERIDINE possesses uric acid solvent powers greatly superior to any other known substance, and, in combination with tartaric acid forms a pleasant salt, which may be taken in 5 to 15 gr. doses in all wines, mineral waters, &c., at or before meals.  
See LANCET, July 28, 1898; BRITISH MEDICAL JOURNAL, February 27, 1897; CENTRALBLATT DER PHYSIOLOGIE Bd. III., p. 434.

### GUAIPEROL (GUAICOLATE OF PIPERIDINE).

THIS REMEDY FOR PHTHISIS which combines the antiseptic properties of Guaiacol with the vascular tonic action of Piperidine has been tried with considerable success at the London and other Chest Hospitals. It has not the irritant properties of Guaiacol, and possesses many advantages over the latter substance and preparations of the same now on the market. Dose from 10 grs. twice a day, preferably in cachets after meals.  
See BRITISH MEDICAL JOURNAL, January 16, 1897, and July 16, 1898, &c.

### ERYTHROL TETRA NITRATE. (TURNER). The New Vaso-Dilator.

The difference between the action of Erythrol Tetra Nitrate and other Vaso-Dilators consists mainly in the fact that the vaso-dilatation produced by it is of a much more permanent nature; the administration of gr. i by the mouth causing a reduction in arterial tension lasting for more than five hours.

## PAVILLON

**DIURETIC, TONIC, DIGESTIBLE — BEFORE AND AT MEALS  
GOUT, GRAVEL, ARTHRITISM**

The Contrexéville Mineral Water (Pavillon SPRING) is a diuretic and laxative, a tonic, a stimulant, and aid to digestion. — It acts upon the secret mechanism of nutrition, as is proved by its influence in checking the production of uric acid and glucose: it favourably modifies those morbid *processus* of biological chemistry which result in the accumulation of uric acid in the blood, inducing the phenomena of gout. — It facilitates the elimination of urinary deposits, by contracting the ducts containing them and increasing the quantity of liquid by which these vessels are flushed. — It assists the cicatrization of the inflamed mucus of the urinary organs, and helps to restore the normal acidity of the urine; facilitates the flow of the bile, by causing contraction of the biliary ducts and the expulsion of calculi; and is invaluable in the treatment of congestion of the liver.

# "THE LEICESTER"

(TRADE MARK)

## PERFECT

# Plaster-of-Paris

(PATENT)

# Bandages.

Are Suitable for any Climate.

Are not affected by age or exposure.

Harden rapidly and firmly when applied.

"The Leicester" Perfect Plaster-of-Paris Bandages are specially valuable to Hospital Authorities, Army and Navy Surgeons, and to all country, colonial, and other practitioners who are at a distance from the source of supply. Being non-absorbent, unaffected by heat or cold, and prevented from shedding,—any quantity of these bandages may be kept in stock without the slightest fear of them becoming useless. They are packed in tin boxes containing six bandages, which saves time in handling, and enables them to be sent safely to any distance, in any climate, and by any means of transit.

"The Leicester" Perfect Plaster-of-Paris Bandages differ from all others, in the fact that the Paris Plaster is thoroughly incorporated with the fabric, and is specially treated in such a manner that its essential quality of firm and rapid hardening is not affected by age or climatic conditions. They are made from the finest Dental Plaster, and may be used from end to end without that "grittiness" which is so objectionable in the ordinary bandages. They are much more cleanly in use than any yet introduced, and are suitable for any climate.

In Tins containing half-a-dozen bandages:—  
 5 yards long—2-in. 2½-in. 3-in. 4-in. wide.  
 6s. 6d. 7s. 6d. 9s. 6d. 12s. 0d. per dozen bandages.  
 If each Bandage in separate Tin, 6d. per dozen extra.

*May be obtained of all Wholesale Houses.*

## BAILEY'S PATENT ABDOMINAL BELTS.

For General Support, Pregnancy, Prolapsus Uteri, Umbilical Hernia, Uterine Support, Laparotomy, Floating Kidney.

Over 17,000 of these Belts have been sold. The only ones which will not ruck up.

No Belt which is cut in one piece can give efficient support to the abdominal walls without undue pressure on the hips.

They are so constructed that the part which surrounds the abdomen is distinct from that which surrounds the hips, so that each part can be adjusted properly, and as the size of the hips varies very much in different persons, this is a matter of the first importance.

**The Greatest Improvement ever Effectuated.**

Competent Female Assistants attend many of the leading London Hospitals.

**SPECIAL DEPARTMENT FOR LADIES.**

All Belts are made and fitted on the Premises.

**CAUTION.**—T. HAWKSLEY respectfully cautions the profession  
that many Hamacytometers are being sold  
which are a copy of the instrument made by him,  
BUT GROSSLY INEXACT in the depth of the cell and  
in the capacity of the millimetre pipettes. The  
former being frequently from 1/10ths to 1/20ths of a  
millimetre in excess of depth, and the latter  
from 2 to 25 cubic millimetres above or below the  
Standard quantity.

T. H. finds this caution necessary, as many such  
instruments have been sent to him for purpose of  
verification by his standards.

**N.B.**—An excess of 1/10th mm. in the depth of the  
cell alone produces an error of 5 per cent., whilst  
1 cubic millimetre in the blood pipette develops an  
error of 20 per cent. in the observed reading.

# THE BERKEFELD FILTER.

ADOPTED BY H.M.'s, THE INDIAN, THE EGYPTIAN, AND MANY FOREIGN GOVERNMENTS.

These Filters are manufactured in a variety of Patterns, as Pressure, Drip, and Pump Filters, suitable for PRIVATE HOUSES, OFFICES, HOSPITALS, ASYLUMS, SCHOOLS, FACTORIES, &c. For Travellers, Explorers, Officers on Foreign Service.

The attention of the Medical Profession is called to the following distinct advantages of these Filters:—

They are **GERM PROOF** (see Special Report on Water Filters, *British Medical Journal*, Nov., 1894, and Jan. 1898).

They are simple in construction, and can be easily cleaned and sterilized.

They give an abundant supply.

Extract from the Special Report to the *British Medical Journal* on "The Relative Efficiency of Water Filters," by Drs. Sims Woodhead and Cartwright Wood. "Experiments were carried out with the Filter H., an exceedingly good model which seems to subserve the functions of a Filter better than any we have yet seen described. . . . The output is so large that there is no reason why such Filters should not supply sufficient water for all household requirements. These Berkefeld Filters afford complete protection against the communication of waterborne disease."

14-ct. Gold

Keyless  
Lever.

It is just the watch for the busy practitioner who seeks a handsome gold watch at a moderate price. It is an extraordinary Watch.

Consider that it has a thoroughly reliable keyless Lever Movement, fitted with a Chronometer Balance (so that it will keep time in all climates) and a Breguet Hair Spring, rendering the watch impervious to "jolts" or "jars," so that you may ride or jump without fear of disturbing its action, and finally is enclosed in a strong (not egg-shell weight) Solid 14 ct. Gold case. Such in brief is the "M.D." manufactured and supplied direct from the factory by the H. White Watch Manufacturing Co., at the extraordinarily low price of £4 17 6 purchased through the ordinary retail channels it would cost (if procurable) at least £8 8s.

THE "SPECIALIST," a superb watch with higher grade movement and solid Massive 18 ct. Cases is supplied by the Company at £10 10 0. With splendid Hunting or Half Hunting Cases £12 10, worth £16 10 0.

Highly recommended.

"LOUIS 14TH"

LADY'S WATCH.

An Exquisite Watch. Splendid Keyless Lever Movement. Ruby Jewelled. Chronometer Balance. Oval antique glass. Beautifully chased, Heavy 18ct. Gold Cases. Supplied by the H. White Co. for £5 5 0. Truly worth £7 7 0. Supplied also with exquisitely enamelled back 15s. extra. A Certificate of Warranty accompanies each Watch.

YOU ARE INVITED, SIR!

to inspect these watches, or any selected from the Company's Guide Book, to permit of your judging of the quality and value of their famous Specialities. No obligation to purchase whatever. Reference (medical preferred) would oblige.

**HUXLEY'S HYPOGASTRIC CEINTURE, or Uterine Support for Horsewomen.**Dr. R. J. M. C. contributed the following letter to *The Lancet and British Medical Journal*, on October 18th, 1887:

**NEW UTERINE SUPPORT FOR HORSEWOMEN.**—"Shortly after my association with the 'Wild West,' I asked the frontier girls whether the violent riding did not shake them considerably, and was told that at times they suffered a great deal of pain. I advised them to get abdominal belts to keep themselves together whilst riding; they did so, and felt great benefits therefrom. On talking the matter over with Mr. E. HUXLEY, of Old Cavendish Street, he suggested a uterine support, which consists of a peculiar-shaped pad, with two straps which cross over the sacrum, and are brought to the front and fastened with any amount of tightness the wearer may find desirable. I got him to make one for each of the girls, and they say they are such a comfort and support that they will never ride without them. I think the belt will prove a great blessing to ladies in the hunting field, as well as to professional riders. R. J. M. C., F.R.C.P. Ed."

"98, Marl's Court Road."

Measures required—Circumference of pelvis, or lower part of body, as for a truss. Price 25s.

**HUXLEY'S SUPPORT FOR INJURY TO THE LARGE MUSCLE OF THE THIGH—(Rider's Sprain).**

"Sir,—Observing letters on the above in *The Lancet* of July 29th and August 5th, I venture, through your columns, to recommend sufferers from the injury to give a trial to 'Huxley's support for injury to the large muscle of the thigh,' advertised in *The Lancet* of August 5th. I first injured the muscle at polo about four years ago, and suffered off and on from the injury for three years, at times having to give up riding altogether for three weeks or so. The bandage roller ordinarily used in the hunting field gave a certain amount of support, but even with it anything like a hard game of polo made riding the following day almost an impossibility. Last year my attention was drawn to the advertisement of Mr. Huxley, 13, Old Cavendish Street, W., and I sent for one of his supports. Within a week or two after commencing to wear it, my leg was, to all intents and purposes, well, and I have had no return of the injury though I have played polo regularly during the last twelve months. I still wear the support at polo as a precautionary measure, but after using it for a month I was able to discard it for ordinary riding. I cannot too strongly recommend a trial of the support to any suffers from the injury. I remain, Sir, yours faithfully, R. C., Surg.-Maj., Central India Horse."
