Nothnagel's Encyclopedia.

Edited by **ALFRED STENGEL, M.D.,**

Professor of Clinical Medicine in the University of Pennsylvania; Visiting Physician in the Pennsylvania Hospital.

VOLUME I. NOW READY.

Typhoid and Typhus Fevers.

By **Dr. H. CURSCHMANN,**

Professor of Medicine, Leipzig.

Handsome octavo volume of 646 pages, with 72 valuable and instructive text illustrations, and two lithographic plates. Cloth, 21s. net.

Edited, with Additions, by **WILLIAM OSLER, M.D., F.R.C.P.,**

Professor of the Principles and Practice of Medicine, Johns Hopkins University.

IT is universally acknowledged that the Germans lead the world in Internal Medicine; and of all the German works on this subject, Nothnagel's "Specielle Pathologie und Therapie" is conceded by scholars to be without question the **best system of Medicine in existence**. So necessary is this book in the study of Internal Medicine that it comes largely to this country in the original German. In view of these facts, Messrs. W. B. SAUNDERS & COMPANY have arranged with the publishers of the original German edition to issue at once **an Authorised English edition** of this great encyclopedia of medicine.

For the present a set of ten volumes, representing the most practical part and the real essence of this encyclopedia, and selected with especial thought of the **needs of the practical physician** will be published.

The work has been translated by men possessing a thorough knowledge of both English and German and **each volume is edited by a prominent specialist** on the subject to which it is devoted. The English edition, therefore, is more than a mere translation of the German; for, in addition to the matter contained in the original, it represents the **very latest views of the leading English and American specialists** in the various departments of Internal Medicine.

Unlike most encyclopedias, the publication of this work **will not be extended over a number of years**, but five or six volumes will be issued during the coming year, and the remainder of the series at the same rate, each volume being revised to the date of its publication by the English editor.

In purchasing this encyclopedia, physicians will be given the opportunity of subscribing for the entire System at one time; but any single volume or any number of volumes may be obtained by those who do not desire the complete series. This method **offers to the purchaser many advantages** which will be appreciated by those who do not care to subscribe for the entire work at one time.

SAUNDERS' NEWEST BOOKS.

Sollmann's Pharmacology.

A Text-book of Pharmacology: including Therapeutics, Materia Medica, Pharmacy, Prescription-writing, Toxicology, &c. By **TORALD SOLLMANN, M.D.**, Assistant Professor of Pharmacology and Materia Medica, Medical Department of Western Reserve University, Cleveland, Ohio. Handsome octavo volume of 890 pages, fully illustrated. Price 16s. net.

This work aims to furnish, in a manner suited for reference and study, a scientific discussion and definite conception of the action of drugs, as well as their derivation, composition, strength and dose. The author bases the study of therapeutics on a systematic knowledge of the nature and properties of drugs, and thus brings out forcibly the intimate relations between pharmacology and practical medicine. Practitioners and students will find the work an admirable guide in that most important part of their equipment, namely, how to use drugs accurately and efficaciously.

Lockwood's Practice.

A Manual of the Practice of Medicine. By **GEORGE ROE LOCKWOOD, M.D.**, Attending Physician to Bellevue Hospital, New York. *Second Edition, Revised and Enlarged.* Octavo 847 pages, 79 illustrations, and 22 full-page plates. Cloth, 17s. net.

This work presents the essential facts and principles of the practice of medicine in a concise and available form, adapted to meet the requirements of those who heretofore have been obliged to resort to the larger works of reference. The entire book has been subjected to a thorough revision. Many portions have been entirely rewritten and a number of subjects have been introduced. The work gives in a concise manner the points essential to treatment usually enumerated in the most elaborate works.

Dorland's Dictionary.

The Illustrated Medical Dictionary. A New and Complete Dictionary of the Terms used in Medicine, Surgery, Dentistry, Pharmacy, Chemistry, and kindred branches; together with new and elaborate tables and many handsome illustrations. By **W. A. N. DORLAND, M.D.** *Second Edition, Revised.* First Edition exhausted in Eight Months. Large octavo, nearly 800 pages, bound in full flexible leather. Price 19s. net.; with thumb index, 21s. net.

The rapid exhaustion of a large first edition of this book, together with the most outspoken words of approval from leading members of the profession, has encouraged the publishers to feel that the work meets more fully than any other medical dictionary, the varied needs of all classes of medical men. In this new edition the work has been thoroughly revised. The author has also added upward of one hundred important new terms that have appeared in medical literature during the past few months.

McClellan's Regional Anatomy.

Regional Anatomy in its Relations to Medicine and Surgery. By **GEORGE MCCLELLAN, M.D.**, Professor of Anatomy at the Pennsylvania Academy of Fine Arts. *Fourth Edition, Revised.* In two handsome quarto volumes, 884 pages of text, and 97 full page chromolithographic plates, reproducing the author's original dissections. Price, handsomely bound in cloth, 60s. net.

SPECIAL PRICE 60s. NET.

This magnificent work, which stands without a parallel in anatomical literature, has always been sold heretofore at 84s. Now, however, by a special arrangement with the author, Messrs. W. B. Saunders & Co. are enabled to offer a limited number of sets at the remarkably low price of 60s. net.

McClellan's Anatomy in Relation to Art.

Anatomy in its Relation to Art. An Exposition of the Bones and Muscles of the Human Body, with Reference to their Influence upon its Actions and External Form. By **GEORGE MCCLELLAN, M.D.**, Professor of Anatomy, Pennsylvania Academy of Fine Arts. Handsome quarto volume, 9 by 11½ inches. Illustrated with 338 original drawings and photographs. 260 pages of text. Handsomely bound in cloth, 42s. net.

Atlas of Bacteriology.

By Professor **Dr. K. B. LEHMANN**, Director of the Hygienic Institute in Wurzburg; and **R. O. NEWMAN**, Dr. Phil. and Med. Assistant in the Hygienic Institute in Wurzburg. From the Second Revised and Enlarged German Edition. Edited by **GEORGE H. WEAVER, M.D.**, Assistant Professor of Pathology, Rush Medical College, Chicago. In two volumes. Part I., 632 coloured figures on 69 lithographic plates. Part II., 511 pages of text, illustrated. Per set, 21s. net.

This newest addition to the Saunders' Hand-Atlas Series combines the advantages of an Atlas with those of a complete text-book. Part I. contains 632 beautiful lithographic figures illustrating the more important varieties of bacteria in the various forms of culture. The text gives a full and systematic description of all the more important species, pathogenic and non-pathogenic. It also contains a section on bacteriologic technique.

Bergey's Hygiene.

The Principles of Hygiene: A Practical Manual for Students, Physicians, and Health Officers. By **D. H. BERGEY, A.M., M.D.**, First Assistant, Laboratory of Hygiene, University of Pennsylvania. Octavo volume of 495 pages, illustrated. Cloth, 13s. net.

This book is intended to meet the needs of students of medicine in the acquirement of a knowledge of those principles upon which modern hygienic practices are based, and to aid physicians and health officers in familiarising themselves with the advances made in hygiene and sanitation in recent years. The book is based on the most recent discoveries, and represents the practical advances made in the science of hygiene up to date. The rapid strides made in our knowledge of the entire subject have rendered such a book a necessity to physicians and students of medicine.

Senn's Practical Surgery.

Practical Surgery. By **NICHOLAS SENN, M.D., Ph.D., LL.D.**, Professor of Surgery, Rush Medical College, &c. Handsome octavo volume of 1200 pages, with 650 illustrations, many in colours. Price, handsomely bound in cloth, 26s. net.

Dr. Senn's Great Work
Based on his Operative Experience
for a Quarter of a Century.

This book deals with practical subjects, and its contents are devoted to those sections of surgery that are of special interest to the general practitioner. Special attention is paid to emergency surgery. Shock, hemorrhage, and wound treatment are fully considered, and a complete account is given of gunshot wounds and their treatment. All emergency operations that come under the care of the general practitioner are described in detail and fully illustrated.

Raymond's Physiology.

Human Physiology. By **JOSEPH H. RAYMOND, A.M., M.D.**, Professor of Physiology and Hygiene in the Long Island College Hospital. *Second Edition, Revised and greatly Enlarged.* Handsome Octavo, 668 pages, 443 illustrations, many in colours. Cloth, 15s. net.

The favourable reception accorded this work has led the author to produce in this new edition a complete text-book of physiology along lines that made the original work so useful. In its present form the book has been entirely rewritten and very greatly enlarged. The book will be found particularly well adapted to the needs of physicians, since it brings out very fully the application of the science of physiology to practical medicine.

SAUNDERS' STANDARD BOOKS

International Text-book of Surgery.

International Text-book of Surgery. By British and American Authors. Edited by A. PEARCE GOULD, M.S., F.R.C.S. of London, Eng., and J. COLLINS WARREN, M.D., LL.D., F.R.C.S. (Hon.), of Harvard. Vol. I.—General Surgery. Octavo, 947 pages, 458 illustrations, and 9 lithographic plates. Vol. II.—Special or Regional Surgery. Octavo, 1072 pages, 471 illustrations, and 8 lithographic plates. Per volume, cloth, 21s. net.

One of the most timely features of the work is the extended consideration given to **Military, Naval, and Tropical Surgery.** The treatment of these topics is based on the latest experiences of Military and Naval warfare, including that gained during the Spanish-American war and the present war in the Philippines and in South Africa, and bringing the subject absolutely down to date.

Church and Peterson's Nervous and Mental Diseases.

Nervous and Mental Diseases. By ARCHIBALD CHURCH, M.D., Professor of Nervous and Mental Diseases, North-western University Medical School; and FREDERICK PETERSON, M.D., Chief of Clinic, Dept. of Nervous Diseases, College of Physicians and Surgeons, New York. *Third Edition, Revised and Enlarged.* Octavo, 870 pages, 332 illustrated. Cloth, 21s. net.

This work fills a distinct want in medical literature, and is unique in that it furnishes in one volume practical treatises on the two great subjects of Neurology and Psychiatry. The book has been thoroughly revised in every part, both by additions to the subject matter and by rearrangement wherever necessary.

Garrigues' Diseases of Women.

Diseases of Women. By HENRY J. GARRIGUES, A.M., M.D., Gynecologist to St. Mark's Hospital and to the German Dispensary, N.Y. Octavo, 756 pages, 367 illustrations. *Third Edition, Revised.* Cloth 18s. net.

DIAGNOSIS BY MEANS OF THE BLOOD.

By ROBERT LINCOLN WATKINS, M.D., of New York.

PRICE \$3.00.

There has been some delay in getting out this book on account of the increased number of the Illustrations.

Will be ready early in 1902. Advance subscriptions will be received at the wholesale price, \$2.00.

THIS IS THE ONLY WORK IN PRINT ON FRESH BLOOD EXAMINATIONS.

Illustrative cases are given throughout, including the case of President McKINLEY.

It is so plain that it will be of service to the general practitioner as well as the specialist; for it enables him to do his own work quickly at the bedside with an ordinary microscope. A laboratory experience is unnecessary. It also enables him to get at facts in no other way obtainable.

Some of the features are the appearance of the blood in definite diseases like tuberculosis, rheumatism (several forms), syphilis, etc., etc.

After reading the advance sheets Dr. MOORE writes us the following letter:—

"This work is the result of the author's observations for many years. The Illustrations are culled from his several thousand photographs of the blood. His method is destined to meet the approval of practical workers. The laboratory methods of blood examination have thus far been unreliable for both physician and surgeon. This book will aid the medical man in making an accurate diagnosis of the diseases therein illustrated."—JAMES WHITE MOORE, M.D., 45 W. 71st Street, New York.

SAUNDERS' MEDICAL HAND-ATLASES

**Moderate
price.**

In planning this series of books, arrangements were made with representative publishers in the chief medical centres of the world for the publication of translations of the Atlases into nine different languages, the lithographic plates for all being made in Germany, where work of this kind has been brought to the greatest perfection. The enormous expense of making the plates being shared by the various publishers, the cost to each one was reduced to practically one-tenth. Thus by reason of their UNIVERSAL TRANSLATION and reproduction, affording international distribution, the publishers have been enabled to secure for these atlases the BEST ARTISTIC AND PROFESSIONAL TALENT, to produce them in the MOST ELEGANT STYLE, and yet to offer them at a PRICE HERETOFORE UNAPPROACHED IN CHEAPNESS.

J. & A. CHURCHILL.

"There are few recent books more important, there are none more interesting to the surgeon and the general practitioner than Mr. Butlin's new edition of his work on the *Operative Treatment of Malignant Disease*. Every practitioner in the country should consider it his duty (one can answer for it that it will certainly be his pleasure) to read, to study, to remember, to act upon, the teaching conveyed in this work."—BRITISH MEDICAL JOURNAL.

"Comparatively few treatises dealing with this very important subject (tumours) exist, and the two which lie before us are merely re-editions of works which had previously gained an enviable reputation. Mr. Butlin's book on the *Operative Surgery of Malignant Disease* re-appears after an interval of twelve years, and the changes which have occurred in that period are so great that he has been forced to ask the collaboration of several other surgeons to undertake the representation of special organs."—PRACTITIONER.

"The work, taken as a whole, is good, and the advice given is derived from actual experience and observation, the book differing materially in this respect from a number of contemporary works in which conclusions are drawn from a collation derived from numerous works. The book will be found most useful and instructive and well worth adding to one's library."—NEW YORK MEDICAL JOURNAL.

A "SINE QUA NON" OF A PHYSICIAN'S EQUIPMENT. THE "M.D."

A Gold Watch is an absolute necessity to a Medical Man. It suggests a position of solidity which is never quite without effect, and in these days of severe competition none can afford to neglect appearances which suggest prosperity and success. A few pounds spent in the purchase of a watch is money **not spent** but **invested**, as even after years of wear and faithful service, it always represents (if wisely bought) the greater proportion of its original cost. The H. White Manufacturing Company supply a superb Gold Watch—the famous "M.D."—at the same price as an ordinary retail firm charges for a silver one. **SPECIALISTS**, in the widest application of the word, the H. White Manufacturing Company have found their strongest support amongst Medical Men, who—trained experts in observation themselves—have been quick to appreciate their superior construction, their excellent finish, superb appearance, and above all their admirable timekeeping. In addition, they are truly wonderful value, such as a bona-fide firm of manufacturers, possessed of unlimited capital and an immense turnover, can alone extend to its clients.

THE FAMOUS "M.D."—A Splendid 4-plate Keyless Lever, Centre Seconds, with a fine movement, jewelled in 10 holes and fitted with **Chronometer Balance**, in **Solid 14-ct. Gold Cases** (stamped). Strong and substantial, upon which an Elegant Monogram can be engraved for 5s. extra. The dial indicates time to the 300th part of a minute. Looks like and keeps time like a £20 watch. The Company's price **£4 17 6**, equal in quality to watches sold retail 18-ct. Gold Cases at £7 15 0, ordinary retail price £10 10 0.

The **"SPECIALIST."** A Magnificent Keyless Lever, Centre Seconds, with the H. White Co.'s Higher Grade Movement, fitted into **Massive 18-ct Gold Cases**. Superior quality and finish throughout £10 10 0, or in **Massive 18-ct. Hunting or Half-Hunting Cases** £12 10 0, ordinary retail price £15 15 0.

SENT FOR INSPECTION.—Any of the above watches submitted for inspection upon receipt of bankers or professional references. No obligation to purchase exists whatever. This option rests entirely with our client.

The H. White Manufacturing Company venture to submit two testimonials which are fair examples of the many hundreds which reach the Company during each year:—

W. S. CORSELLIS, Esq., J.P., writing from Portarlington, Ireland, says:—

"GENTLEMEN,—The Field Glasses, etc., etc., I may mention that the "M.D." Watch which I purchased from you some time ago, continues to give the **greatest satisfaction**, proving a **perfect timekeeper**.—Faithfully yours,—"

"HANS CRESCENT HOTEL, LTD.,

"HANS CRESCENT, LONDON, S.W.

"DEAR SIR,—I am sending you my gold watch, and I shall be glad if you will repair it for me. Let me know your charge. I am pleased to say that the watch has **kept accurate** time during the time I have had it (six years) and has given me **every satisfaction**. If you care to send me one of your catalogues I shall place it upon our public drawing-room table.—Yours faithfully,

"Messrs. H. WHITE & Co.,

"ARTHUR E. PASCOE."

FOR A LADY.

The H. White Mfg. Co. supply a charming Keyless Watch with a thoroughly reliable movement, carefully finished, with exquisitely tinted opal dial, fitted into **Solid 14-ct. Gold Cases**, richly chased. The Company's price **£3 10 0**. In **Solid 18-ct. Gold Cases** £3 10 0, or with **high-grade Lever movement**, and specially heavy **18-ct. Gold Cases** £5 5 0.

BISHOP'S LITHIO-PIPERAZINE VARALETTES.

This Combined Salt is of exceptional value in many cases of Uric Acid Diathesis and should be given a trial when other remedies have failed. It is indicated in cases of Gravel, Calculi (especially where there are small concretions in the Kidneys), many forms of Gout, and in all cases where a combined Uric Acid Solvent and diuretic action is desired. This combination is well worth a trial, as the investigations of Berger, Pucinelli and others have shown that remedies given in combination act with much greater intensity and with much better results than do their component parts when administered separately. Lithio-Piperazine Citrate is not a mixture of Lithia and Piperazine but a new definite Salt.

Bishop's Lithio-Piperazine Varalettes are accurate in dose, quick in action, pleasant and convenient for the patient. They dissolve rapidly with brisk effervescence in water or any other liquid, and are put up in bottles shaped for the waistcoat pocket, so that the patient can always carry a supply about with him. The dose is one or two three times a day. Bishop's Lithio-Piperazine Citrate Varalettes are sold in bottles containing 25 in each. The price to the medical profession is 18s. per dozen bottles.

We also make the following Varalettes:—

| | | | |
|-------------------------------|--------------|-------------------------------|--------|
| Piperazine Citrate | 3 gra. | Glycero-Phosphate of Lime ... | 5 gra. |
| Lithio Piperazine Citrate ... | 5 gra. | Potash Citrate | 5 gra. |
| Lithia | 5 gra. | Sodium Bromide | 5 gra. |
| Lithia and Potash | 3 and 5 gra. | Urotropine | 4 gra. |

We put up in this form all the chief Mineral Waters of the Continent.

EMOL (TRADE MARK.) KELEET

A Remarkable Discovery for Skin Treatment.

EMOL-KELEET is a purified, natural emollient, absorbent dusting powder, of impalpable texture, as soft as down to the touch. It in no way resembles the ordinary and unstable compound astringent or starchy absorbent powders.

Chemically, Emol-Keleet may be said to be closely allied to superior qualities of Fuller's Earth, yet it is different in that it contains a considerable percentage of Steatite, Silica, Alumina, traces of Calcium Salts, and an appreciable trace of Ferrous Oxide.

Emol-Keleet has been the subject of investigation by competent hands, both chemico-technologically and therapeutically. It was brought specially to the attention of the profession at the last meeting of the British Medical Association, at Newcastle-on-Tyne, when an exceedingly interesting paper was read during the session of the Dermatological section by the President. The interest aroused by the therapeutic notes given in his paper by this distinguished authority on skin diseases brought Emol-Keleet prominently into view, and a brief recapitulation of the points of the paper referred to may be useful.

It was shown that as *dusting powder* Emol-Keleet—a perfectly innocuous and inoffensive material—is therapeutically superior to any previously known. When placed upon the tongue—one of the simplest and yet most severe tests as to utter impalpability which can be applied to a powdered substance—there was an entire absence of any sensation of grittiness.

It was noticed also, as a remarkable property of this powder, that when a small quantity, say a teaspoonful or so, was added to a basinful of hard water it effected an immediate softening influence. Used in this manner with warm water, Emol-Keleet acts as a natural soap, cleansing the skin thoroughly and at the same time leaving it soft and smooth. *This suggested the idea of incorporating it with a pure neutral soap* and it has met with universal approval. EMOL-KELEET soap is prepared with great care under the highest medical and chemical supervision. It is especially good for children and those with delicate and sensitive skins.

Used as an ordinary dusting powder, Emol-Keleet was found to possess anti-pruritic properties, and relieved very markedly the itching of the skin now and then complained of in urticaria or during the eruptive period of measles. The absorbent qualities of Emol-Keleet, with its mild astringent tendency, stamp it as a perfectly harmless and absolutely unequalled dusting powder.

It is also incorporated with Soap as a Shaving Stick.

"Absolutely Pure, therefore Best."

CADBURY'S

Cocoa

"A PERFECT FOOD."

The Editors of THE LANCET, June 16, 1900, say:—

"We are glad to find that Messrs. Cadbury draw attention to the fact that there are strong grounds for objection to the addition to cocoa of certain foreign substances. This resource is quite unnecessary and, indeed, pernicious, especially having regard to the fact that cocoa alone is an excellent food as well as a stimulant, having a salutary action upon the nerve centres."

CADBURY'S is the PURE Cocoa
Entirely free from Drugs, Kola, Malt, or Hops.

THE LANCET, 22nd July, 1899, says:—

"This brandy shows excellent features on analysis while the evidence of taste is distinctly in favour of the description that it is an old matured grape spirit. It possesses that eternal fragrance due to the peculiar ethers of wine. Our analysis yielded the following results:—Alcohol, by weight 41.00 per cent., by volume 48.43 per cent., equal to proof spirit 84.87 per cent.; acidity expressed as acetic acid, 0.033 per cent.; extractives 0.69 per cent.; mineral matter, nil; alcohol in volatile ethers, two grammes per 10 litres. The flavour is soft and mellow and the aroma is characteristic of a sound and mature wine-derived spirit. In view of these analytical and general evidences this brandy may be described as particularly suitable for medicinal purposes."

MARTELL'S

THREE STAR

BRANDY.

THE MEDICAL PRESS, 2nd August, 1899, says —

"We have carefully examined a sample of this well-known spirit by the usual tests, and the results obtained by analysis fully warrant our recommending it for medical and dietetic purposes. The analysis gave the following figures:

| | |
|-----------------------------------|----------------|
| Alcohol (as proof spirit) | 86.5 per cent. |
| Extractives | .68 " " |
| Ash | Nil. |
| Acidity | .036 " " |
| Ethers (as alcohol) | .028 " " |

"We analysed this product some ten or more years ago, and finding that it still maintains its exceptionally high character, we are consequently in a position to speak highly of it as a genuine old brandy made from wine, well matured, and free from all compounds which might detract from its value as a medicinal agent."

Doctors should be aware that

INVALID BOVRIL

is a special preparation, quite distinct from ordinary "Bovril," and more highly concentrated. It is

Unseasoned

and consequently acceptable to the most fastidious palate. For patients who object to "Bovril" on account of its salt flavour, Doctors might order "INVALID BOVRIL," which can be obtained from any Chemist.

THE LANCET, writing of two special analyses, the first an analysis of Special Invalid Bovril and the second one of a good home-made beef-tea, remarks that "in considering the question of relative nutriment, regard must, of course, be paid to the amount of water employed in preparing beef-tea," and says very forcibly, that "all things being equal, the Invalid Bovril yielded, according to the analysis from THE LANCET Laboratory, a much higher proportion of nutrient substance than the ordinary beef-tea."

A Great Authority condemns Beef-Tea.

DR. MILNER FOTHERGILL says:—

"To give beef-tea to a sick person is to give him a stone when he asks for bread."

NOTICE!!

Members of the Medical Profession have sometimes been confused by the variety of Liebig's Extracts there are for sale. They think all come from the Liebig Company. They do not—ONLY one kind, viz., that signed J. v. Liebig in blue, and certified by Justus von Liebig and his successors. This is the original brand—the brand largely advertised. To distinguish it from all others it now bears on the top and bottom and back of each jar a new label with the initials of Liebig's Extract of Meat Company:—

LEMC O

means

LIEBIG COMPANY'S EXTRACT.

CACODYLATE OF SODIUM (CLIN)

(ORGANIC ARSENIC).

Emphatically recommended by Professors GAUTIER, REHAUT, LETULLE, &c. in the treatment of

TUBERCULOSIS (either incipient or declared), **IMPALUDISM**, **ADÆMIA**, **SKIN DISEASES**, and **CANCER**.

GLOBULES.—This special form consists of little Globules, easy to swallow, with a shell of gluten. Each Globule contains $\frac{1}{4}$ th grain of Pure Cacodylate of Sodium.

TUBES (Sterilised for Hypodermic Injection).—Each tube contains a sterilised solution dosed at 1 grain of Pure Cacodylate of Sodium per injection of 16 minims.

DOSAGE.—The medium dose of 1 grain of Cacodylate of Sodium per day suffices in the generality of cases, and corresponds in arsenic to $\frac{1}{4}$ grain of arsenic acid or to 80 grains of Fowler's Solution.

When prescribing, kindly specify "CLIN."

DR. RABUTEAU'S IRON PILLS (DRAGÉES.)

The best ferruginous preparation known in therapeutics. Absorbed in the form of Chloro-albuminate of Iron, therefore very digestible. Considered invaluable for

CHLORO-ANÆMIA.

Causes neither constipation nor diarrhoea.

*385 grain (0.025 gm.) of Protochloride of Iron, chemically pure, in each Pill.

NOURRY'S IODINATED WINE.

Free from Alkaline Iodides. Palatable. Easily assimilated. A perfect substitute for Cod Liver Oil and Iodides.

LYMPHEMIA. ANÆMIA. DYSMENORRHOEA. PULMONARY AFFECTIONS.

*77 grain (0.05 gm.) of Iodine and 1.54 grain (0.10 gm.) of Tannin per tablespoonful.

Children—One to two teaspoonfuls.

Adults—One tablespoonful. To be taken at meals twice a day.

THE LANCET of January 8th, 1894, in its Analytic Report states:—"The above preparation, therefore, which contains no free iodine, but which yields it in full quantity on the slightest provocation, is calculated to lead to more extended application. It certainly deserves trial."

THE BRITISH MEDICAL JOURNAL of August 29th, 1898 in its Analytic Report states:—"The wine contains no free iodine. It is very pleasant to the taste, and no doubt would be very effective in cases where iodine and iodides are indicated."

NOURRY'S IODINATED WINE is not advertised to the public. It owes its success entirely to the Medical Profession.

MEMO. BY THE MANUFACTURERS:—

If after using the Patent Barley awhile with success a change takes place, in all probability this is the fault of the milk, which ought to be perfectly fresh. If "just on the turn" it would naturally upset the delicate digestive system of a baby, and only one day's feeding with such milk would be likely to cause trouble for some little time.

DOUCHE

NASAL CATARRH

An Alkaline, Antiseptic, Non-irritating, Cleansing Solution for the Treatment of Diseased Mucous Membrane, particularly Nasal Catarrh.

“The best representative of its class, in my opinion, is Glyco-Thymoline (Kress), an antiseptic of claret color, pleasant taste, alkaline reaction and non-irritating to raw or mucous surfaces. I have found it a pleasant mouth wash, an effective gargle in pharyngitis and an ideal preparation for the cure of acute and chronic rhinitis. In these conditions Glyco-Thymoline (Kress) will be found to produce the desired result. It seldom fails to cure acute pharyngitis in two days when gargled in full strength or diluted not weaker than 25 per cent. In acute rhinitis it has produced best results when in solution not stronger than 20 per cent. In chronic rhinitis I have used as strong as 50 per cent. solution, gradually increasing the strength from 25 per cent.”—*American Journal of Surgery and Gynaecology* for January, 1897.

In Bilious Attacks and Disorders of the Liver, and in

The Treatment of Gall-Stones.

For these disorders “**Apenta**” stands unrivalled. It favours the excretion of Bile, and removes the hyperæmia of the Liver. Under its influence headache disappears, a normal balance of healthy function is attained, and threatened jaundice may often be averted.

In cases of Gall-Stones, “**Apenta**” has proved of the greatest service. It should be warmed, and about 10 ounces taken daily, early in the morning, or it may be mixed with Apollinaris Water, and it then proves an excellent means for relieving and preventing the painful attacks of Biliary Colic. Four ounces of “**Apenta**” made hot, and mixed with 6 ounces of Apollinaris, should be taken in the morning fasting. This dose may be repeated once or twice in the day, during an attack.

LISTERINE.

THE STANDARD ANTISEPTIC.

LISTERINE is a non-toxic, non-irritating and non-escharotic antiseptic, composed of ozoniferous essences, vegetable antiseptics and benzo-boracic acid.

LISTERINE is sufficiently powerful to make and maintain surgical cleanliness in the antiseptic and prophylactic treatment and care of all parts of the human body.

LISTERINE has ever proven a thoroughly trustworthy antiseptic dressing for operative or accidental wounds.

LISTERINE is invaluable in obstetrics and gynecology as a general cleansing, prophylactic, or antiseptic agent, and is an effective remedy in the treatment of catarrhal conditions of every locality.

LISTERINE is useful in the treatment of the infectious maladies which are attended by inflammation of accessible surfaces—as diphtheria, scarlet fever and pertussis.

LISTERINE diluted with water or glycerine speedily relieves certain fermentative forms of indigestion.

LISTERINE is indispensable for the preservation of the teeth, and for maintaining the mucous membrane of the mouth in a healthy condition.

LISTERINE employed in the sick-room by means of a spray, or saturated cloths hung about, is actively ozonifying and rapidly oxidizing in its effects upon organic matter afloat in the atmosphere.

LISTERINE is of accurately determined and uniform antiseptic power, and of positive originality.

LISTERINE is kept in stock by all worthy pharmacists everywhere.

Benger's Food

GOLD MEDAL AWARDED Health Exhibition, London.

NOTICE TO THE MEDICAL PROFESSION.

BENGER'S FOOD is *not* a Malted Food, and it does not contain dried milk, which is a very poor substitute for fresh. It consists of a specially finely ground, nitrogenous, wheaten meal, cooked and impregnated with a suitable proportion of the fresh, natural digestive principles of the pancreas. When mixed with warm new milk or milk and water, as directed on each tin, these digestive principles not only render the farinaceous elements of the Food soluble (as in malted foods), but further, reduce the casein of the milk to a condition similar to that in which it exists in human milk, so that hard indigestible masses of curd cannot be formed in the stomach. **BENGER'S FOOD** forms a delicate and delicious cream, rich in all the elements necessary to maintain vigorous health. It is enjoyed by Infants, Invalids, Convalescents, and the Aged.

The Lancet describes it as "Mr. Benger's admirable preparation."

The London Medical Record says:—"It is retained when all other foods are rejected. It is invaluable."

The British Medical Journal says:—"Benger's Food has by its excellence established a reputation of its own."

The Illustrated Medical News says:—"Infants do remarkably well on it. There is certainly a great future before it."

A Government Medical Officer writes:—"I began using your food when my son was only a fortnight old, and now (five months) he is as fine a boy as you could wish to see."

From an eminent Surgeon:—"After a lengthened experience of Foods, both at home and in India, I consider Benger's Food incomparably superior to any I have ever prescribed."

SCOTT'S EMULSION

is the standard emulsion of cod-liver oil. It has been before the medical profession for nearly thirty years and its integrity has never been questioned. It is much more acceptable to the patient than plain cod-liver oil, both on account of its palatability and ease of digestion, and it is undoubtedly the best and most reliable emulsion.

Hypophosphites of Lime and Soda and Glycerine are perfectly blended with the highest grade medicinal oil, and the physician can always rely upon its being in a perfect state of preservation. We believe that all other emulsions have Scott's Emulsion for their standard, and that none has reached that standard.

Maltine

WITH

CASCARA SAGRADA.

Cascara Sagrada, in one form or another, is now very largely used by the Medical Profession. On the whole, its employment has given satisfaction, and it occupies a recognised place in the Medical Armamentarium.

We draw special attention to our "**Maltine**" with **Cascara Sagrada**, as a form in which the drug is free from its disagreeable features and is administered in a reliable and satisfactory manner.

The use of "Maltine" with Cascara Sagrada is not followed by such ill effects as griping or nausea, and the bitter, acrid taste of the drug is admirably disguised.

PROOF A large body of evidence has accumulated in favour of "Maltine"
FROM with Cascara Sagrada, especially in cases where its employment for a
PRACTICE. considerable time is indicated. Its superiority to pills, tablets, elixirs,
 and the ordinary fluid extract, is noteworthy, the preparation maintain-
 ing its characteristic action

WITHOUT INCREASE OF DOSE.

The therapeutic properties of "Maltine" contribute undoubtedly to the good results obtained from the combination "Maltine with Cascara Sagrada." Many of the cases in which Cascara Sagrada is indicated are precisely those that benefit from the administration of a Nourishing Food and an active Starch-Digestant. The concentrated and assimilable nutriment supplied by "Maltine," and its action in promoting nutrition and the digestive processes, counteract any tendency of the drug to deplete and exhaust the system.

Each fluid ounce of "Maltine" with Cascara Sagrada contains the liquid Extract obtained from 60 grains Cascara Sagrada. A tea spoonful of "Maltine with Cascara Sagrada," represents the minimum, a tablespoonful the maximum dose for an adult.

"Maltine" is very palatable, and its semi-fluid consistency is most convenient.

"Clinical experience enables us to recommend it as a nutritive and digestive agent, in virtue of its albuminoid contents and its richness in phosphates and diastase."—

PLASMON

Unaltered, Soluble Caseinogen.

PLASMON is the soluble caseinogen prepared by a special process which retains the original organic characteristics of milk albumen. In this respect PLASMON differs from all other products of the kind, as also by reason of the fact that it comprises the entirety of the original organic salts. These salts constitute an essential feature of living albumen. Without them albumen loses its nutritive properties and becomes practically inert and valueless as a nutrient, a fact long since conclusively demonstrated by physiologists and chemists.

The solubility of PLASMON is not secured at the expense of its alimentary properties as is the case with soluble caseins which are rendered soluble by subjecting them to a high temperature, by the action of caustic alkalies, any one of which is fatal to the life-sustaining qualities of this nitrogenous substance; such, also, impart a disagreeable taste and impair digestion.

PLASMON alone is readily soluble in hot water, while retaining its milk-like appearance and odour. PLASMON alone retains the chemical and physiological properties of the original caseinogen. PLASMON alone comprises the whole of the natural salts of caseinogen (about 8 per cent.), which in natural combination with the albumen form the nutritive properties of fresh milk, in fact, it is milk albumen in its unchanged integrity.

"PLASMON is easily digested and wholly assimilated. The digestibility of PLASMON I found to be 99.4 per cent. PLASMON is the albumen of fresh milk in its original unaltered condition."—C. VIRCHOW.

Professor GAUTIER, of Paris, states that "PLASMON is rich in the assimilable phosphates, having carried down with it the nucleo-albumens, together with the greater part of the phosphates contained in milk. We know that the nucleo-albumens are the very substances which serve to build up the cell-nuclei, and thus ensure the vitality of the tissues and the process of assimilation."

This is not the case with any other milk preparation.

PLASMON is practically free of sugar and fat.

PLASMON COCOA.

Highly nutritious; restorative; absolutely pure; delicious; therefore an ideal beverage and a perfect food for all, especially for Invalids during, and Convalescence after, exhausting diseases.

Recommended by eminent medical authorities at home and abroad. See articles and Analyses of Pure Plasmon, "The Lancet," Aug. 11th, 1900, p. 404, Nov. 24th, 1900, pp. 1494-5; Brit. Med. Journal, June 2nd, pp. 1339-40, Oct. 13th, 1900, pp. 1087-88; and Continental Medical Periodicals.

It is a popular fallacy to believe that Cocoas, even the purest and finest, contain any appreciable quantity of real nutriment (proteid); like tea and coffee, cocoa alone is mainly a stimulant, nearly 60 per cent. being fat and water. Only soluble albumen **proteids** can build up body tissues, nerve, muscle, and bone. The **soluble proteid** in the finest cocoa is almost a negligible quantity; the Inland Revenue Laboratory Analysis gives **6.3 per cent.** of **soluble** proteid in the Finest of all Cocoas, raw Trinidad Cocoa. The highest scientific authorities give these analytical results:—

| | | | | | | | |
|---------------------------|---|---|---|---|----------------------|----------------|--------------------------|
| Finest Cocoa Beans | - | - | - | - | 6.3 per cent. | soluble | proteid |
| Plasmon Cocoa | - | - | - | - | 66.0 | „ | „ soluble proteid |

or more than **ten times** as much as that contained in the best and **purest cocoas** known; thus **one** cup of **Plasmon Cocoa** contains more real, building-up nutriment than **ten** cups of cocoa prepared with the finest and purest cocoa obtainable in the market.

Repeated and long-continued metabolic experiments have proved (see THE LANCET, &c., on Plasmon) that the large quantity of Proteid in **Plasmon Cocoa** is almost wholly assimilated (99 per cent.), whilst even the very small quantity of proteid in the best cocoas is only partly assimilated. This explains the astonishing superiority of **Plasmon Cocoa** over all other cocoas in its flesh-forming qualities and when the blood needs enriching. A Cup of Plasmon Cocoa and a piece of bread furnish a complete meal.

PLASMON COCOA, being absolutely free from all added sugar and starch, is a valuable food for **Diabetic Patients**.

PLASMON COCOA is made in Mild Flavour and Full Flavour to suit all tastes. Mild Flavour (Violet Label); Full Flavour (Red Label). In Tins at 9d., 1s. 4d., and 2s. 6d.

Disinfection by Fumigation. Seabury's Sulphur Candles.

With the Small Pox epidemic in London, the whole subject of disinfection is receiving renewed attention THE IDEAL METHOD of disinfecting is the aerial, because the diffusibility of a disinfectant in the gaseous state permits it to spread and act throughout the space in which it is confined, **permeating every nook and corner**—nothing escapes its contact and germicidal action. **SULPHUROUS ACID GAS** has long been recognised as the most effective, desirable and handy means for fumigating and disinfecting after

**SMALL POX, SCARLET FEVER and DIPHTHERIA,
Etc., Etc.**

SEABURY'S SULPHUR CANDLES used as directed, and generating sulphurous acid gas, present the most convenient method for accomplishing the most thorough and reliable disinfection of all apartments and articles exposed to their action. They control and stop the spread of contagious disease. Recommended and indorsed by Boards of Health throughout the country. Superiority acknowledged by universal use. The ancient Greeks had a distinct partiality for fish as a food and highly esteemed it for its nourishing properties. Of the calling of the fisherman, a Grecian poet thus sang:—

"Now spring your cables, loiterers; spread your sails
O'er the smooth service of the waters roam!"

So shall your vessel glide with friendly gales,
And fraught with silvery fish waft you home."

The "Allenburys"

Throat Pastilles.

SOFT. DEMULCENT. PALATABLE

IN the medical treatment of most Throat Affections a simple and effective method of local application is a necessity. The exigencies of modern practice demand the employment of a large variety of drugs in a soothing and demulcent form.

THE BASIS of the "ALLENBURYS" THROAT PASTILLES is composed of a special Pâte de Jujube which is soothing and palatable, while the local action of the drug incorporated, is made more certain by the slow rate of solution of the jujube in the saliva, than is the case with ordinary Lozenge or Pastille.

The following Pastilles are largely used, and have been found from long practical experience to be very efficacious:—

A perfect combination of Malt Extract and
Cod-liver Oil."—*British Medical Journal*.

BYNOL.

The "PERFECTED" Malt and Oil.

BYNOL has been found very beneficial in the modern form of treatment where super-nutrition, combined with increased capabilities of digestion, plays so important a rôle. It consists of two essential foods in a very concentrated form, viz., soluble nitrogenous elements and fat, the latter being in a very easily assimilable state. There are present also soluble phosphates and an active digestive amylolytic ferment diastase, which promotes the digestion of all starchy foods.

In BYNOL the Malt Extract and Cod-liver Oil are so intimately combined that globules of the Oil are not perceptible even under a microscope, and all taste of Cod-liver Oil is entirely overcome.

BYNOL is one of the few preparations of Cod-liver Oil which may be safely exhibited when the digestive powers are impaired.

BYNOL is of an agreeable nutty flavour, readily taken by invalids, and relished by children as a sweetmeat. It is of great value to the thin and weakly, especially during the winter season.

In white Jars only, as figured.

SAMPLES will be sent FREE to Medical Men on request.

SAFETY EYE IRRIGATOR.

Suggested by Dr. J. Ward Cousins,

Senior Surgeon to the Royal Portsmouth Hospital, and the Portsmouth and South Hants Infirmary.

(Vide BRITISH MEDICAL JOURNAL, November 2, 1901).

The treatment of contagious disorders of the Eye has often proved disastrous to both Surgeons and Nurses, and instances have occurred of serious injury and loss of sight. This apparatus has been designed to give protection to the operator, and also to secure rapid and thorough irrigation of the conjunctival sac. It discharges a double current of lotion with sufficient force to completely cleanse the eye without any risk of splashing or scattering the dangerous secretions.

The **Safety Irrigator** is made in two sizes—for children and adults—and is supplied complete in case, with Glass Douche, Tubing, and a Box of five kinds of Tablets for making a lotion: one tabella being dissolved in the glass reservoir filled with water, it is then of proper strength for use. The Tablets contain: Sulphate of Zinc, Nitrate of Silver, Perchloride of Mercury, Boric Acid, and Sulphate of Alum.

 **An Ideal Tonic in Convalescence.**

Byno-Hypophosphites.

An Active Aid to the Digestion of Farinaceous Foods.

Byno-Hypophosphites may be taken when the digestive organs are weak and impaired and when ordinary tonics cannot be tolerated.

The Constituents of Byno-Hypophosphites ensure the effectual combination required in a perfect tonic. This combination though somewhat complex, is in practice most successful and Byno-Hypophosphites will be found much superior to the official syrup of which it is the analogue. It stimulates the appetite whilst aiding digestion; it conserves and invigorates the nervous system.

COMPOSITION.

Bynin, Liquid Malt, the menstruum employed affords an active digestive agent; and is also a concentrated nutriment in itself.

The Hypophosphites considered as such, are of the utmost value in maintaining the nervous efficiency of the body. They are easily assimilated.

The Metallic Salts each play their particular rôle.

Iron is indispensable in the maintenance of Hæmoglobin.

Calcium is now known to act specifically on the heart muscle, increasing the strength of the beat, besides being a large constituent of bone.

Sodium and Potassium are necessary in the maintenance of the gastric and pancreatic juices; and consequently the efficiency of the digestive apparatus.

Strychnine is the most valuable nerve and digestive stimulant known.

Cinchona affords alkaloids which specifically inhibit the action of malarial, influenzal and allied micro-organisms, and arrest abnormal fermentation processes in the alimentary canal.

The combination of Strychnine and the Cinchona alkaloids with their *natural acids* affords in itself a valuable alimentary tonic and corrective, easy of assimilation, and not irritating to the digestion.

PRACTICAL CLINICAL EXPERIENCE of many years has proved that what theoretically is expected of Byno-Hypophosphites by reason of its composition is fully justified. It is, as the *British Medical Journal* says: "One of the Most Popular Tonics of the Day."

## BONE MARROW

**In Tuberculosis.**

"Of late I have been using Red Bone Marrow (ARMOUR & COMPANY) in place of the Malt and Cod Liver Oil. It is pleasanter to take and of easy assimilation, and its effects are quickly apparent. All tuberculosis patients soon suffer from anæmia, and by promoting the development of red blood corpuscles, cell resistance to the tubercular organism is increased. It is by nutrition and oxidation that the progress of disease is arrested, our aim being to improve the resisting force of the body. The importance of this remedy was first impressed upon me while treating some soldiers suffering from malarial cachexia. Where tissue changes and waste, with their resulting anæmia progressing rapidly, **RED BONE MARROW** is a valuable remedy, due to the ease with which it is assimilated and its retention by delicate stomachs."

A careful analysis has been made of this sample of Beamish's Stout, as a result of which I am able to state that it is an excellent one. It is good in flavour, high in extractive matters, rich in albuminoids, yet contains only a very moderate amount of alcohol, and is very low in acidity. Although I understand the sample which I have received has been in bottle for two years, no active fermentation is taking place.

Xeroform has been styled, "The ideal substitute for Iodoform." It is a yellow, non-toxic, non-irritating and non-caustic powder, in praxi—devoid of odour and taste. Xeroform promotes granulation and cicatrization more quickly than any other remedy, it diminishes suppuration, is eminently desiccating and lessens secretion. In use Xeroform is more economical than Iodoform, since its volume for equal weight is double that of Iodoform, and its fine pulverization enables the physician to cover a large surface with a very small quantity.

# CONTREXEVILLE SOURCE DU PAVILLON

**DIURETIC, TONIC, DIGESTIBLE - BEFORE AND AT MEALS**  
**GOUT, GRAVEL, ARTHRITISM**

The Contrexéville Mineral Water (Pavillon SPRING) is a diuretic and laxative, a tonic, a stimulant, and aid to digestion. — It acts upon the secret mechanism of nutrition, as is proved by its influence in checking the production of uric acid and glucose: it favourably modifies those morbid processes of biological chemistry which result in the accumulation of uric acid in the blood, inducing the phenomena of gout. — It facilitates the elimination of urinary deposits, by contracting the ducts containing them and increasing the quantity of liquid by which these vessels are flushed. — It assists the cicatrization of the inflamed mucus of the urinary organs, and helps to restore the normal acidity of the urine; facilitates the flow of the bile, by causing contraction of the biliary ducts and the expulsion of calculi; and is invaluable in the treatment of congestion of the liver.

## IMPROVED INSTEP ARCH SOCK

HOLLAND'S PATENT.

"Most valuable for Flat-Foot."

*British Medical Journal*, November 10th, 1893:—"The INSTEP ARCH SOCK has been long and widely used, and the new form appears to embody a distinct improvement."

*The Lancet*, June 11th, 1898:—"The INSTEP ARCH SOCK introduced by Mr. Thomas Holland is a useful appliance."

The Sock is worn inside the Boot. A tracing of the foot is the best guide for size.

Price 4s. single. 6s. 6d. per pair. Children's 5s. 6d. per pair.

HOLLAND, 40, South Audley Street, London, W.

## SALMON'S ABDOMINAL BELT. SALMON'S OBSTETRIC BINDER.

For use before and after accouchement, and for all cases of abdominal weakness, affords a more complete lifting support than any hitherto made, as it effectually raises the lower part of the abdomen. Airpads are fitted to it, for cases of hernia, prolapsus, and moveable kidney when required. Prices from 25s. to 50s. Ladies can address to Mrs. SALMON.

For immediate use after accouchement (6s. 6d., 10s. 6d., and 13s. 6d.) is invaluable for preserving the figure, and entirely dispenses with the ordinary pinning. Exhibited before the Obstetrical Society and recommended by the leading Physician-Accoucheurs. Measurement required, ordinary size of the waist. Each one stamped with name and address; all others are imitations.

Superior Trusses, Knee Caps, and Elastic Stockings are manufactured and carefully fitted.

HENRY R. SALMON,

42, Beaumont St., Upper Wimpole St., London, W. [Est. 1861.]

## DR. FISHER'S PATENT FLEXIBLE KNEE-CAP.

The above is considered the only Knee-Cap made which allows free action of the joints, while at the same time keeping up the requisite pressure.

The front is constructed of nickel-plated fine steel wire, and meshed in a manner to contract and extend with the motion of the knee, but fixed from side to side. It is lined with soft felt. The top and bottom straps are merely for the purpose of keeping the knee-cap in position, but the middle portion is made of soft buckskin, divided into two straps which buckle on the outside. It is cool and light, adding scarcely any size to the joint, and it is calculated to wear for a considerable time.

In ordering, give circumference of centre of knee, also four inches above and below the same, AND STATE FOR WHICH KNEE.

PRICE 30s

## DR FISHER'S (IMPROVED) BOW-LEG SPLINTS.

These Splints have been in use during the last nine years with very great success. Directions for measurement and application: Give height from ground to centre of knee, and state age of child.

Should the Splints not fit well below the knee, calf, or ankle, warm the part gently before the fire, till it bends freely, then mould it on the leg and hold it in position until it has set. The success of these Splints depends a good deal on keeping the centre strap as tight as possible without causing inconvenience. They may also be worn as a support for weak ankles only, in which case it should be stated on which side of the foot the child is inclined to walk. Light boots should always be worn.

## THE "EXCELSIOR" MOTOR BICYCLE

### TESTIMONIAL.

GOLSPF, SUTHERLAND, N.B., Oct. 17th, 1901.

J. B. S. writes:—"If an unsolicited testimonial to the merits of your "Excelsior" Motor Bicycle is of any use to you in recommending the machine to the Medical Profession, I shall be glad. I have now ridden my machine over 1,260 miles, and I must say it goes excellently. At first I was afraid of muddy roads and side slip, but with a little care I find the Motor easier and safer on a slippery surface, than an ordinary machine. I have had no trouble with the Driving Belt, which even in wet weather can be easily adjusted, so as not to slip. The Engine has required no attention whatever, except regular oiling, and an occasional wash out with paraffin."

(Late BUSTON ROAD).

**Mr. Herbert Needes (who**  
has had over 21 years' experience in this well-known Agency) negotiates the TRANSFER of PRACTICES and PARTNERSHIPS and the adjustment of all matters connected therewith. No charge to PURCHASERS.  
**ASSISTANT MANAGER.—MR. F. C. NEEDES, B.A.**  
TO PRINCIPALS.—Reliable LOCUM TENENS available at the shortest notice. Office fee, 10s. 6d.  
Telegrams: "CURANDUS, LONDON."

## MEDICAL PARTNERSHIP AND CONVEYANCING AGENCY.

1, ADAM STREET, ADELPHI, W.C.

The Sale of Practices and Partnerships negotiated. Trustworthy Locum Tenens and Assistants can be had at a few hours' notice.

N.B.—No charge made to Purchasers.

**Notice.—Mr. J. C. Needes**  
with an experience of over a quarter of a century, is in an exceptional position to give intending purchasers independent information concerning most practices and partnerships. Those investments in the following List marked with an Asterisk are well known to him, having been purchased through his office by the present Incumbents years ago, and in many other cases, introductions can be given to gentlemen who have taken charge of the practices during the absence of the Incumbents.

### Sussex—Country town Practice

the receipts of which last year were between £400 and £500 per annum and capable of considerable increase as vendor has taken matters very easily. One pony or cycle sufficient for the work. Commodious house (8 bedrooms, etc.) with large garden, tennis lawn, stabling, etc. Rent 50 guineas a year. Introduction to meet wishes of purchaser.

### Death Vacancy.—London, W.

(one mile from the Marble Arch), an old-established PRACTICE (in the same hands many years) for immediate disposal. Income last year about £700. Fees usually 2s. 6d. and 3s. 6d. Midwifery has been entirely relinquished. Rent of house £80 a year. An efficient Locum Tenens in charge. A moderate premium accepted.

### In a very pretty watering

place in the West of England a good class easily worked PRACTICE, the cash receipts of which are over £800 per annum and increasing yearly. Visiting fees 3s. 6d. (very few), 5s., 7s., and 10s. 6d. Midwifery has not been encouraged and there are only a few cases yearly. Lowest fee three guineas. Commodious family residence, with coach-house and stabling. Six months' partnership introduction. Good society and excellent prospects of increase. The practice is believed to be very transferable.

### \*London, N.—Moderate

premium. An old-established principally cash PRACTICE, producing last year £800 (including club appointments nearly £400) can be purchased for the moderate sum of £600, some portion of which would probably be accepted by instalments. Sixty to seventy midwifery cases yearly. Drug bill £40 a year. Convenient house in good position. Rent £80 on lease. Vendor has held the practice for 12 years.

### West.—An old-established

country town PRACTICE, the cash receipts of which average £750 per annum for the past three years. The town contains 6,000 inhabitants, and is only a few miles from the sea. Patients—county families, farmers, tradespeople, etc. Visits 3s. 6d. to £1 1s. Midwifery one to ten guineas. Large family residence, with garden, tennis lawn, stabling, etc. Cottage hospital in the town.

### South Coast.—In a favourite

town (population nearly 10,000) an old-established PRACTICE, the cash receipts of which last year amounted to £1,000. Practically no appointments. Only 20 cases of midwifery yearly. The practice is easily worked, one horse being sufficient. House contains ample accommodation for a family, with stabling, lawn, &c., attached. Incumbent (who has held the practice many years) will give a partnership introduction of six months.

APPLY TO J. C. NEEDES, 1, Adam Street, Adelphi, W.C.

### Locum Tenens and Temporary

ASSISTANTS.—Practitioners requiring the above can immediately obtain thoroughly reliable qualified gentlemen upon application to 1, Adam Street, Adelphi, W.C. Every gentleman engaged by the office in either of the above capacities is personally known to Mr. J. C. NEEDES. An office fee of half a guinea is payable by the principal.

Telegraphic Address: "Acquirement, London."

## MEDICAL TRANSFER AND PARTNERSHIP. 56, LUDGATE HILL.

### Messrs. Orridge & Co.,

Medical Transfer Agents, Referees, and Valuers, in offering their services to the Profession, have pleasure in referring to the fact, that for about HALF A CENTURY the name of Mr. Orridge has been known in the advertising columns of the leading Medical Journals, and that a very large proportion of the Medical men throughout the Kingdom have confided their interests in the adjustment of Partnerships and Transfers to their care.

Purchasers who will communicate (confidentially) the nature and extent of their wishes regarding investments can be apprised of appropriate opportunities as they occur.

On occasions where advice is required in forming a correct conclusion as to the worth or eligibility of a Practice, Messrs. Orridge & Co. trust that their familiarity with the various contingencies that govern value will be found of considerable service to those by whom they may be employed.

**SPECIAL NOTICE.—Commission on Sales 5 per cent. on £100, and 2½ per cent. on any additional amount.**

N.B.—No charge is made if unsuccessful. No charge to purchasers.

# THE SCHOLASTIC, CLERICAL, AND MEDICAL ASSOCIATION, LIMITED.

## MEDICAL DEPARTMENT.

This Association was established in 1880 as a Limited Liability Company under the direction of Professional men, its object being the creation of a RESPONSIBLE and THOROUGHLY TRUSTWORTHY Agency. The Medical Department has met with so great success that it has been found necessary for one of the Managing Directors (Mr. G. B. Stocker) to devote his whole attention thereto, and he has the assistance of an experienced Medical Accountant and large staff of clerks. Further a Board composed entirely of gentlemen of high standing in the Medical Profession has been appointed, and to them matters of dispute and complaint are referred.

The Association undertakes the SALE of PRACTICES and PARTNERSHIPS; the introduction of LOCUM TENENS and ASSISTANTS; MEDICAL ACCOUNTANCY (by a duly qualified Medical Accountant); INVESTIGATION and VALUATION of Practices, &c.; POSTING BOOKS and sending out Bills, &c., &c.

A Pamphlet relating to the Medical Department with the names of the "Directors" and the "Medical Advising Board," and terms will be sent on application to Mr. G. B. STOCKER, \* MANAGING DIRECTOR, 22, GRAVEN STREET, STRAND, W.C.

**A**DRENALIN (Takamine), the Active Principle of the Suprarenal Gland is, undoubtedly, the most successful Astringent, Hæmostatic, Cardiac and Vasomotor Stimulant yet placed at the disposal of physicians. Reports are unanimous as to its remarkable physiological properties. Full particulars promptly posted on request.

---

ADRENALIN causes a contraction of the arterioles, rendering the parts bloodless. When applied to mucous membranes they are immediately blanched. This is particularly noticeable when a 1:10,000 solution is instilled into the eye, as it effects a most speedy whitening of the conjunctivæ. Taken internally, it quickly increases the blood-pressure; retards the pulse-rate, and exerts the same influence on the muscles of the heart as does Digitalis, but much more powerfully. It is non-irritating, non-poisonous, non-cumulative and without injurious properties.

---

As it is difficult to make a solution of ADRENALIN by methods ordinarily available, we have issued

## SOLUTION ADRENALIN CHLORIDE (1:1000)

ready for immediate use, and stable for all practical purposes.
