SQUIRE'S POCKET COMPANION

To the British Pharmacopœia.

MEDICAL OPINIONS OF THE NEW BOOK.

"The prescribing notes have been largely extended, and should prove of great value; they are thoroughly practical, and have the advantage of having been compiled from the results of experiments instead of from 'armchair' work."—*British Medical Journal*, October 1st, 1904.

"The author is to be congratulated upon the thoroughly practical value of all that relates to dispensing and prescribing."

"The adaptation of material to the smaller setting has been effected with great discrimination. The author has retained just those features for which the 'Companion' was most frequently consulted by medical men."—*The Lancet* August 13th, 1904.

"As an up-to-date book of ready reference for the consulting-room of any medical man, be he consultant or general practitioner, Squire's 'Pocket Companion' would be hard to beat."—*Medical Press and Circular* July 6th, 1904.

SAUNDERS' MEDICAL HAND-ATLASES.

Moderate price.

In planning this series of books, arrangements were made with representative publishers in the chief medical centres of the world for the publication of translations of the Atlases into nine different languages, the lithographic plates for all being made in Germany, where work of this kind has been brought to the greatest perfection. The enormous expense of making the plates being shared by the various publishers, the cost to each one was reduced to practically one-tenth. Thus by reason of their UNIVERSAL TRANSLATION and reproduction, affording international distribution, the publishers have been enabled to secure for these Atlases the BEST ARTISTIC AND PROFESSIONAL TALENT, to produce them in the MOST ELEGANT STYLE, and yet to offer them at a PRICE HERETOFORE UNAPPROACHED IN CHEAPNESS.

"Two specimens submitted to us for examination proved to be good typical Irish Whisky. The analysis of the 'Special Reserve' was as follows:—Extractives, 0.20 per cent.; mineral matter, nil; alcohol, by weight 39.80 per cent., by volume 47.13 per cent., equal to proof spirit 82.59 per cent.; and acidity reckoned as acetic acid, 0.02 per cent. The specimen marked 'V.R.' gave the following results on analysis:—Extractives, 0.12 per cent.; mineral matter, nil; alcohol, by weight 40.30 per cent., by volume 47.67 per cent., equal to proof spirit 83.54 per cent.; acidity reckoned as acetic acid, 0.01 per cent. Both specimens were remarkably free from the ordinary impurities of Whisky, they contained practically speaking, no extractives and no sweetening matter, while they were without any appreciable degree of acidity. The flavour is characteristic of Irish Whisky, 'smooth,' and delicately malty, and the colour somewhat pale."

CONTREXEVILLE SOURCE DU PAVILLON

**DIURETIC, TONIC, DIGESTIBLE - BEFORE AND AT MEALS
GOUT, GRAVEL, ARTHRITISM**

The Contrexéville Mineral Water (Pavillon SPRING) is a diuretic and laxative, a tonic, a stimulant, and aid to digestion. — It acts upon the secret mechanism of nutrition, as is proved by its influence in checking the production of uric acid and glucose: it favourably modifies those morbid processes of biological chemistry which result in the accumulation of uric acid in the blood, inducing the phenomena of gout. — It facilitates the elimination of urinary deposits, by contracting the ducts containing them and increasing the quantity of liquid by which these vessels are flushed. — It assists the cicatrization of the inflamed mucus of the urinary organs, and helps to restore the normal acidity of the urine; facilitates the flow of the bile, by causing contraction of the biliary ducts and the expulsion of calculi; and is invaluable in the treatment of congestion of the liver.

Antitoxine

(Strengthens the Heart's Action)

The only Antipyretic and Antineuralgic which has been demonstrated by the Sphygmograph to be a powerful heart stimulant.

Every physician will prescribe Antitoxine in preference to any other antipyretic when convinced that it is genuinely heart strengthening. Physicians can prove this by using the sphygmograph.

Sphygmographic tracings from female patient, aged 17, suffering from circumscribed pleurisy after influenza. A uniform pressure of two ounces was maintained by the sphygmograph, and a speed of 36 inches per minute for tracings (A) and (B), and 42 inches per minute for tracing (C).

Price to Physicians, Powder or Tablets, ½-oz., 11d. 1-oz., 3s.

THE BRITISH ANTITOXINE MFG. CO. 31, Snow Hill, London.

(A)—Tracing (A) was taken with patient in bed at 2 p.m. She was suffering pain and was made very nervous by the application of the Sphygmograph. Pulse 117, temperature 100½. Localised pleuritic pain. 10 grains "Antitoxine" were given.

(B).—Tracing (B) was taken at 2.30 p.m., or 30 minutes later. Pain considerably lessened; patient still very nervous. Pulse 117, temperature 100½.

(C).—Tracing (C) taken at 3.10 p.m., or 40 minutes later. Pain and nervousness materially lessened. Pulse 94, temperature 99½. Tracing paper passed 42 inches per minute, instead of 36.

"CYLLIN INHALANT."—It should be noted that the "Cyllin" used in the cases described in the above references was this special preparation which is supplied ready for use in Cyllin Inhalators, and should not be diluted.

"CYLLIN" in a recent report (see *Public Health* June, 1904, and *Lancet*, August 20th, 1904, p. 524) is proved to be 30 times more efficient, as a bactericide, than pure Carbolic Acid, and over 80 times more efficient than "Formalin," when tested on a virulent culture of the plague organism. **"CYLLIN (Medical),"** a refined form of the bactericide, is specially prepared for the use of Surgeons and Physicians.

"CYLLIN" and **"CYLLIN (Medical)"** are by far the most powerful Coal Tar disinfectants known to science, and are guaranteed to be *at least* ten times less toxic than pure Carbolic Acid. They cannot, however, be recommended as Inhalants.

Hall's Wine.

The Marvellous Restorative.

The immense value of Hall's Wine as a marvellous restorative in cases of extreme prostration following parturition, operations, and other serious illnesses is unquestioned. During confinement, Hall's Wine is most valuable for its stimulating effect on the womb and on the muscles concerned in parturition, expediting delivery, easing pain and at the same time assisting nature in the completion of the process. Our signature books from the British Medical Congress are a splendid testimony alone, but the personal communication at these Meetings also confirm all that we have claimed. Hundreds of cases of the wonderful effects of this wine in supporting life in extreme illness, and the rapidity with which it restores, are reported to us.

For Sleeplessness in cases of nervous exhaustion Hall's Wine is often more effective than narcotics. Neuralgia, in the vast majority of cases, yields readily to it.

As a stimulant Hall's Wine is more effective than spirits, and has no unpleasant reaction which often follows the use of alcohol.

At all times we are pleased to forward a bottle free to doctors and nurses on receipt of professional card. Please mention this paper.

GLYCO-HEROIN (Smith).

GLYCO-HEROIN (Smith) is conspicuously valuable in the treatment of Pneumonia, Phthisis, and Chronic Affections of the Lungs, for the reason that it is more prompt and decided in effect than either codeine or morphine, and its prolonged use neither leaves undesirable after-effects nor begets the drug habit. It acts as a reparative in an unsurpassable manner.

It is generally admitted that the first stage in the digestion of fats is an emulsification or breaking-up process.

Hence it follows that the finer the fat globules are when taken into the mouth, the easier will be their digestion.

If this is a factor in normal diet, how much more important it becomes in disease.

We invite your attention to the following micro-photographs.

- (1) A photo of nature's emulsion, human milk, magnified 250 times. Note how well the fats are emulsified.

- (2) An average emulsion of Cod Liver Oil, magnified 250 times.

- (3) A photo of Virol, the new fat food, also magnified 250 times.

(These three photos are taken from the "British Medical Journal.")

The fat globules of Virol are finer than those of human milk. The red bone-marrow is rich in assimilable iron, and every grain of Virol is absorbed. It is practically all food, and somewhat resembles honey.

A Chirurgien of the XVII century opening a vein under the tongue

The veins under the tongue were opened by surgeons in the XVII century in cases of quinsy, and in treatment of various throat ailments. A contemporary writer states: "The two vegnes under the tongue are cutte for the passions of the throte, and chyeftly for the quynce to purge the matter conioncte. It seemeth convenient to cut the vegne the second or thyrde day of the sickness, but it is better to renewe fleshtombe than to let out much blood at ones."

'Saxin'

., Gr. 1/4.

'SAXIN' is harmless in cases where sugar is contra-indicated. It enables the physician to gratify the patient's taste without prejudice to the treatment it is necessary to adopt.

'Saxin' is about 600 times sweeter than sugar. Each quarter grain is equivalent to an ordinary lump of sugar. It is so delicately sweet that it pleases the palate of the most fastidious. In these and other respects it is superior to other sweetening agents.

Supplied to the medical profession in bottles of 100, 200 and 500, at 8d., 1/1 and 2/6 per bottle.

Menthol Snuff (B.W. & Co.)

When the local action of menthol, ammonium chloride, camphor and a trace of cocaine (1/6th per cent.) is desired, Menthol Snuff (B. W. & Co.) is the most efficient preparation and at the same time the one which the patient will use with the necessary regularity.

In view of inferior imitations it is necessary to specify "Menthol Snuff (B. W. & Co.)."

‘Kepler’ Solution

Ordinary emulsions might do as much good as ‘KEPLER’ Solution were they so easy to digest. But ‘KEPLER’ Solution stands alone in digestibility as well as in quality of material, in palatability and in nutrient value. It is foremost as a reconstructor of body, bone and brain, and as a warmth-giving food.

‘KEPLER’ SOLUTION is supplied to the medical profession, in two sizes, at 1/8 and 3/- per bottle.

Many attempts are made to imitate it, and it is therefore necessary to take precautions against substitution. Verbal instructions are not safe. To prevent fraud, it is best to write prescriptions for original bottles.

Method of fishing through Ice

From a woodcut of the XV century

The sturdy Scandinavians in early times had largely to rely on fish as an article of diet. Even in the winter when their fjords and rivers were frozen and covered with ice, the fishermen broke holes in the ice with an axe and then let down their lines or nets.

“Fishes are like their element and place wherein they live, both colde and moist a race Of phlegmatic creatures, yet they are meate which dry and choleric tempers well may eate.”

The 'WELLCOME' Brand Diphtheria Antitoxic Serum is prepared at the Wellcome Physiological Research Laboratories, an institution which was a pioneer in the production of Serums in the British Empire, and has ever since maintained a foremost position. Burroughs Wellcome & Co. act as distributing agents and can supply the following strengths and concentrations:—

Diphtheria Antitoxic Serum ('Wellcome'):

		PER PHIAL
„	Phials containing 2,000 (Ehrlich-Behring) units ...	2/6
„	„ „ 1,000 „ „ ...	1/3

„	„ „ 10,000 „ „ 10 c.c.	25/0

Issued in hermetically sealed phials

TELEGRAPHIC CODE WORD adopted by Burroughs Wellcome & Co.

MURES signifies Diphtheria Antitoxic Serum ('Wellcome'), 2,000 units.

Thus a telegram reading "'Tabloid, London,' send six 'Mures'," would be understood to mean "Burroughs Wellcome & Co., London, Send six phials of Diphtheria Antitoxic Serum ('Wellcome'), each phial containing 2,000 (Ehrlich-Behring) units." If the 1,000 units Diphtheria Antitoxic Serum ('Wellcome') be desired, it should be specially indicated as "'Mures', 1,000 units." If a high potency Serum be required, the telegram should read "'Mures', 2,000 in 2 c.c.," or "'Mures', 4,000 in 4 c.c.," etc., as the case may be.

Sealed Phial of Diphtheria Antitoxic Serum ('Wellcome')

The Serum may be obtained through any chemist, or direct from

TRADE
MARK 'TABLOID' Brand PRODUCTS

The following preparations amongst many others in the list of 'Tabloid' products are available for the administration of iron salts. They offer great advantages over fluid preparations, especially in permanence and acceptability.

'TABLOID' EASTON SYRUP (Ferri Phosphas. c. Quininâ et Strychninâ)

Fluid preparations are liable to deposit and to produce acidity. This 'TABLOID' product presents the ingredients of the official syrup without free acid and in the highest state of purity, accuracy and stability.

Supplied to the medical profession in bottles of 25 and 100, dr. 1½, at 6d. and 1s. 2d.; dr. 1, at 9d. and 1s. 8d.

'TABLOID' FERRIC CHLORIDE, min. 10

Each represents the amount of ferric chloride contained in min. 10 of the official Tinct. Ferri Perchloridi

After a full meal the 'TABLOID' product may be administered whole with a draught of water and thus offers a great advantage over fluid preparations which stain the teeth

Supplied to the medical profession in bottles of 100 at 9d. per bottle

THE CONSTELLATION OF THE BATTLE AXE
AS REPRESENTED BY THE CINGALESE

An Amulet most highly valued by the Cingalese for driving away the evil spirits that give rise to diseases, is one composed of nine precious stones, representing and corresponding somewhat in colour to the planets. The stones are: the Sapphire representing Saturn; the Topaz, Jupiter; the Coral, Mars; and Diamond, Venus; the Emerald, Mercury; the Moonstone, the waxing moon; the Pearl, full moon; and the Cat's-eye, the waning moon. These stones are set round a ruby which symbolises the sun.

the "Allenburys"

Throat Pastilles.

SOFT. DEMULCENT. PALATABLE

IN the medical treatment of most Throat Affections a simple and effective method of local application is a necessity. The exigencies of modern practice demand the employment of a large variety of drugs in a soothing and demulcent form.

THE BASIS of the "ALLENBURYS" THROAT PASTILLES is composed of a special Pâte de Jujube which is soothing and palatable, while the local action of the drug incorporated, is made more certain by the slow rate of solution of the jujube in the saliva, than is the case with ordinary Lozenge or Pastille.

The following Pastilles are largely used, and have been found from long practical experience to be very efficacious:—

The "Allenburys" Pastille

A Peptonised Food that can be made in a minute, the addition of boiling water only being necessary.

The "Allenburys"
MILK & CEREAL
(Pancreatised) **DIET**

By the use of the "Allenburys" Diet all trouble of peptonising milk and farinaceous foods is overcome. For the sick room it is invaluable as the food is easily digested and assimilated, and only the exact quantity required need be prepared at a time.

The "Allenburys" Milk and Cereal Diet is made from pure milk, rich in cream, and whole wheat, both ingredients being pre-digested during manufacture. It can be taken by those who cannot digest cow's milk, and provides a light and very nourishing diet for Invalids, Dyspeptics and the Aged.

For travellers by sea or land this complete food will be found exceedingly valuable.

A Sample with full particulars sent free on request.

An Ideal Tonic in Convalescence.

Byno-Hypophosphites.

As a general tonic when the digestive powers are weak, and for combatting the after effects of severe illness Byno-Hypophosphites has proved invaluable. It stimulates the appetite whilst aiding digestion, and has a special action upon the sympathetic nervous system, the heart, and the secreting glands of the alimentary canal.

"One of the most popular tonics of the day."

—British Medical Journal.

The "ALLENBURYS" COD-LIVER OIL.

(Hitherto known as Allen & Hanburys' "Perfected" Cod-liver Oil.)

I. It is absolutely PURE.

To ensure this, it is prepared at ALLEN & HANBURYS' own factories in Norway, *Absolutely fresh and selected livers of the cod-fish only are used.* Ordinary oil is often made from the livers of ling and other fish, and little or no care is taken to reject stale and decomposing livers, from fish dying in the nets.

II. Being pure, it is readily assimilable, and consequently of full therapeutic value.

It is tolerated by the most fastidious and sensitive stomachs, and is the only oil which does not "repeat."

III. All nauseous and irritating oxidation products which occur in ordinary oil are eliminated.

This is accomplished partly by the fact that the livers used are in perfect condition and partly by the adoption of ALLEN & HANBURYS' special process of manufacture.

III. It is nearly tasteless, and does not cause unpleasant eructations, but has "almost the delicacy of Salad Oil"

British Medical Journal.

The disagreeable taste of the ordinary oil is caused by oxidation and the presence of deleterious impurities.

The "ALLENBURYS" Cod-liver Oil is ONLY supplied in the original capsuled bottles and cartons as figured.

Maltine WITH CASCARA SAGRADA.

The use of "MALTINE" WITH CASCARA SAGRADA is not followed by such ill-effects as griping or nausea, and the bitter, acrid taste of the drug is admirably disguised. The superiority of "MALTINE WITH CASCARA SAGRADA" to the pills, tablets, elixirs, and the ordinary fluid extract of the drug is most noticeable, the "MALTINE WITH CASCARA SAGRADA" maintaining its characteristic action **WITHOUT INCREASE OF DOSE**. The good results obtained from "MALTINE" WITH CASCARA SAGRADA are undoubtedly due in part to the nutritive and digestive properties of "MALTINE," which counteract any tendency of the Cascara Sagrada to deplete and exhaust the system.

Each fluid ounce of "MALTINE" WITH CASCARA SAGRADA contains the Extract of 60 grains Cascara Sagrada, the equivalent of 66 minims B.P. liquid extract.

HOPKINSON'S LIQ. COLCHICINÆ SALICYLATIS. Lumbago GOUT Rheumatism

"For the treatment of that elusive condition called gout no drug is so uniformly successful as colchicum. Every practitioner knows that success is not invariable, and, we think, for reasons not so obscure as may be imagined. In the first place the corn, or seeds, does not contain a constant proportion of alkaloid, and the method of extraction is not always equally efficient. No doubt standardisation will improve matters in the future, but we think the best means of securing the proper action of the drug is to administer the active principle—the alkaloid-colchicine. Hopkinson's Liquor Colchicinae Salicyl contains $\frac{1}{2}$ of a grain of the salicylate of colchicine in a drachm. This is not a mixture of salicylic acid with the alkaloid, but a definite chemical compound GIVING RESULTS MUCH MORE CERTAIN THAN THOSE OF ANY PREPARATIONS OF COLCHICUM. For gout, chronic rheumatism, and rheumatoid arthritis it is a valuable acquisition, especially as it does not interfere with the action of the kidneys and liver, and does not produce any depressing effect. The liquor is a convenient and elegant preparation.—*Medical Review.*"

It is impossible to get the same results with Colchicum Wine and Salicylic Acid.

Sold in 1-lb., 2-lb., 4-lb. and 2oz. Bottles. Price 16/; 8/6, 4/6 and 2/6 each.

LYSOFORM.

(See LANCET, November 7th, 1903.)

LYSOFORM is a colourless, inodorous, slightly viscid fluid, prepared from Formic Aldehyde. The process of manufacture entirely removes all the disagreeable and dangerous qualities of that potent agent while retaining in full, and, to some degree reinforcing its bactericidal activity.

It is inodorous but instantly destroys all offensive odours. It is non-poisonous to the higher but immediately destroys the lower organisms.

It is pleasant and emollient; will not stain the most delicate fabrics.

It cleanses, without corroding, the most delicate instruments.

It does not coagulate albumen, is miscible with water or alcohol in all proportions and is perfectly adapted for irrigating mucous surfaces. Its slightly viscid character renders it superior to all other antiseptics for this purpose, as it clings to the surface and does its work thoroughly instead of being washed away by mucous secretion as is the case with non-viscid antiseptics.

It has been submitted to the severest independent tests, and the qualities claimed for it are spontaneously endorsed by the highest authorities.

Lysoform lends itself to a great variety of preparations, each perfect for its special purpose, while retaining all the potency of the base. Among these may be mentioned—

LYSOFORM SOAP—the only Soap suitable for the Toilet which forms an Antiseptic Lather;
LYSOFORM OINTMENTS and POMADES; POWDERS for Nursery and Toilet; **LYSOFORM MOUTH-WASH and TOOTH-PASTE; LYSOFORM PESSARIES, SUPPOSITORIES, &c.**

The last four preparations are manufactured for the British Lysoform Co., Ltd., by W. MARTINDALE, 10, New Cavendish St., W.
Free Samples, with full particulars, formulae, and copies of reports and testimonials will be sent on application.

WARD, INVALIDS' COMFORTS.

Invalid Chair Manufacturer,
246 & 247, TOTTENHAM COURT RD., LONDON.

(late of Leicester Square).

TO HIS MAJESTY THE KING. QUEEN ALEXANDRA THE LATE QUEEN AND ROYAL FAMILY.

ESTABLISHED OVER 150 YEARS.

No. 14 is the simplest and best constructed Chair for carrying Invalids up or down stairs.

No. 1. Ward's Self-propelling Chair may be used with ease by a child of eight.

No. 61A. Our New Patent Combination Imperceptible Graduating Elastic Ventilating Mechanical Couch. The graduating mechanical actions of this couch are sufficient to meet all cases, no matter whether it is spinal affection, hip disease, fracture, paralysis, heart disease or dropsy. A patient however weighty can be imperceptibly graduated to any position by a small windlass, without being touched by a nurse; at the same time, all pressure is avoided by the patent elastic ventilating mattress, which is a complete preventative of bed sores. The large patent lubricating castors are a great boon, as they enable this couch, with a patient of any weight, to be wheeled about the room with perfect ease. These couches vary in size from 2 feet to 3 feet wide.

No. 11. Ward's Improved Reclining Chair, the most luxurious Invalid Chair made.

PRICE CATALOGUE POST FREE.

No. 19. Ward's Three-wheel Victoria Bath Chair, with hood and glass shutter.

No. 22c. The back of this Chair is made to recline to any angle, and, with leg-rest fitted an Invalid may lie at full length.

THE BEST MILK STERILIZER.

The "AYMARD" Patent Sterilizer.

SOME OF ITS ADVANTAGES:—

1. The product is in the strict sense of the words a sterilized milk, both pathogenic and non-pathogenic organisms being destroyed at the temperature employed.
2. There is no separation of fat, sterilization being accomplished by the action of moist steam passing over the surface of the milk and round the milk chamber; evaporation is therefore reduced to a minimum and the product is not "condensed" but ready for instant use.
3. Milk sterilized by the AYMARD process is easily digested, requiring two hours; although the lactalbumin is coagulated by the temperature employed its digestibility is unaffected and an important change is produced in the Caseinogen, which results in the formation of a very fine Casein clot on the addition of Rennet, very readily acted on by gastric juice. When sterilized milk is used in infant and invalid feeding there is therefore an absence of any gastric irritation such as is produced by uncooked milk.

HOUSEHOLD PATTERN.

INSTITUTION PATTERN.

A "TRIPLE-WICK" CANDLE.

For providing illumination for Ophthalmic, Laryngoscopic and other Examination by a light which will not fall.

Widely Sir Wm. Gowers, *Lancet*, Feb. 27th, 1904.—

"Every efficient portable electric lamp is heavy and uncertain in its action, and the best lamp of all—a paraffin lamp with a broad wick—is not only cumbersome but soils whatever is near it to a degree that is at last unsupportable."

"I have obtained a servicable light by cutting away with a knife one side of two pieces of candle. This suggested the idea of a three candle wick."

"Experiment shows that the light is better without any form of chimney or lantern. The oval candle (as supplied) is enclosed in a tin tube with tubular caps to prevent the wicks being broken."

"The dimensions of the outer case are 5 in. long, 1 1/2 in. wide and 1/2 in. thick."

Price, in tin tube, with hinged lid, 3s. 6d. Re-fills, 1s. 6d. each. Post free on receipt of Postal Order.

KNEE TRUSSES

for Dislocated Internal or External Semilunar Cartilages for Chronic dislocations of the patella, and relaxed internal or lateral ligaments. The best results are obtained by fitting the side plates to the patient's knee, but if this be impracticable send circumference of joint over patella only. State which knee, and short description of the case. Price 33 3 0.

"Used by professional footballers, tennis players, &c. The truss does not interfere with the free action of the knee, on flexion or extension. Has recently been improved to avoid pressure on the ham tendons."

FRACTURED PATELLA

A walking splint for use after union of the upper and lower fragments. The steel joints at the sides are so made that the degree of bending at the knee-joint can be gradually increased. In case of a slip the knee cannot bend more than is allowed by this adjustable stop, and thus prevents over-stretching of the newly-formed ligament. To assist extension of the limb a strong elastic band joins the upper and lower part of the splint. This also is adjustable, and greatly assists the weakened quadriceps muscles in walking; as used at Guy's, the Middlesex, and St. Bartholomew's Hospitals. In the usual form, for twelve months' use, the splint is about 12 inches long. 23 2s. to 25 6s. Directions for measurement forwarded on application.

WHICH IS THE BETTER?

If you must have a motor vehicle—and of course you must—to have one that looks like a locomotive, all engine, with a little seat for the passengers at the back, and which snorts and rattles outside your patient's house and goes off with a shriek and a bang when you leave, or to drive an elegant carriage,—which looks like a carriage—in which all trace of the engine is concealed, in which you have large and comfortable seating accommodation, which makes the minimum of noise and which has no clashing gears to engage when getting under weigh. If the latter is the sort of carriage you require you will find it in the

DURYEA POWER CARRIAGE

which is **not** a common "motor car," but an elegant carriage with engine and machinery concealed, which is **not** cheap foreign construction, but an all British vehicle of the highest quality, and which is **not** an experiment, having been on the markets of the world since 1892, and which has won many valuable prizes in open competition with all other types, in all parts of the world, since 1895.

Mechanical Features:—3 cylinder engines, M.O. valves, large water jacketting with forced circulation, automatic carburetter, automatic lubrication, high-tension ignition, epicyclic gear on engine shaft driving direct by single chain on to one-piece nickel-steel live axle, inclined steering centres with tensile connections with direct lever steering, large wheels on new principle and long springs.

NORDRACH IN WALES

(PENDYFFRYN HALL SANATORIUM)

FOR THE TREATMENT OF PULMONARY CONSUMPTION AND OTHER FORMS OF TUBERCULOSIS

This Sanatorium, which has been opened for over three years, is situated in its own grounds, (over 100 acres) of park land, pine woods, and mountain. Graduated walks rise through pines, gorse, and heather to a height of over 1000 feet above the sea level. It is well sheltered on the E. and S.E. by mountains. The climate is mild but very bracing, and the rainfall is small. The situation combines the peculiar advantage of pure mountain and sea air. As only about twenty patients are received, that special individual attention, which is so necessary to a successful result, is assured. The Sanatorium and outdoor shelters are lit throughout by electricity. The physician has himself been a patient at Nordrach under Dr. Walther, whose principles of treatment are strictly carried out.

DAVOS, SWITZERLAND. SANATORIUM CLAVADEL.

5,525 feet above sea-level, 325 feet higher than Davos, two miles from Davos-Platz.

NEWLY ERECTED FOR THE TREATMENT OF PULMONARY DISEASES.

Situated in the midst of extensive pine woods, with fine views upon the Davos and Sargis Valley. Possesses one of the best climates, the air being very pure, dry, and bracing; fogs and mist extremely rare; long record of sunshine; protected by the mountains from all unfavourable winds; beautiful level walks; dry, gravelly soil. All hygienic conditions perfect.

Every modern appliance—Electric light; central heating; hot and cold water in every room. Excellent food. Trained English Nursing.

TERMS from 3½ to 5½ guineas a week, according to rooms. Illustrated Prospectus free.

Medical Superintendent: DR. H. FRY, formerly in Dr. Turban's Sanatorium, Davos-Platz.

ALTADORE SANATORIUM. CO. WICKLOW.

For the treatment of Diseases of the Lungs on the Nordrach System.

This Sanatorium is delightfully situated among the Wicklow Mountains. The main building, which stands in its own grounds of 630 acres, is 750 ft. above sea level, and is completely sheltered from the north, east and west, while to the south it commands a fine view of the sea, some 5 miles distant. It thus combines the advantages of pure mountain air and pure sea air. There are out-door shelters, verandahs, and sleeping bungalows, and trained nurses are employed. The diet is excellent, the sanitation perfect, and there is a constant supply of pure spring water. Milk from own tuberculin-tested cows. The resident physician, who is also the proprietor of the sanatorium, acquired his knowledge of the treatment at Nordrach, under Dr. Otto Walther, and has met with great success in carrying out Dr. Walther's principles. For prospectus apply to the Resident Physician, J. C. SMYTH, M.R.C.S.-Eng., L.R.C.P. Lond.

Inclusive Terms: 3 guineas weekly.

Notice.—Mr. J. C. Needes

with an experience of over a quarter of a century, is in an exceptional position to give intending purchasers independent information concerning most Practices and Partnerships. Those investments in the following List marked with an Asterisk are well known to him, having been purchased through his office by the present Incumbents years ago, and in many other cases, introductions can be given to gentlemen who have taken charge of the practices during the absence of the Incumbents.

*Midlands.—Country Practice

in a first-class hunting district. Cash receipts for 1904 about £500, including Union and clubs £60 to £70. The connexion includes the best people in the district and the visiting fees are 2s. 6d. to 10s. 6d., and occasionally £1 1s., medicine 2s. 6d. extra. Railway station in place. Very desirable detached residence, with stabling, lawn, garden, etc. Rent moderate. Premium £650.

*An unopposed old-established

PRACTICE, estimated to be worth about £750 per annum, including easily worked appointments yielding £300. Situated in a pretty village 70 miles from London and 7 from a large town. Patients comprise nobility, gentry, clergy, farmers, tradespeople, etc. Visiting fees 2s. 6d. to £1 1s. One horse and cycle sufficient. Convenient modern detached residence standing in its own grounds, with large garden, stabling, etc. Rent under £50 per annum. Good hunting, shooting, etc.

*In a pleasant little town 60

miles from London, a small PRACTICE (capable of increase), worth at present about £300 per annum, including appointments £220. There is a population of 4,000 within two miles radius and the opposition is not formidable. Railway station in place. Excellent house with large garden, etc. Rent £40 a year. Premium £350. Good sporting district.

Partnership (Suburban).—A

suitable gentleman can be admitted as Partner in a large old-established practice in a pleasant London suburb. The share for disposal will yield about £950 per annum. Fees 3s. 6d. to 10s. 6d. Very little midwifery. No appointments. Premium 2 years' purchase. The incoming partner's income will be guaranteed.

South-western District (North

of the Thames), in a rapidly growing district, an increasing Practice worth nearly £400 per annum. Visits 2s. 6d. and 3s. 6d. (occasionally 2s.) Midwifery 1 guinea upwards, 20 cases yearly. Good corner Residence containing dining and drawing rooms, 4 bedrooms, bathroom, etc., with garden attached. Rent £52 10s. a year. Premium £450. 3 months' introduction.

THE SCHOLASTIC, CLERICAL, AND MEDICAL ASSOCIATION, LIMITED.

MEDICAL DEPARTMENT.

This Association was established in 1880 as a Limited Liability Company under the direction of Professional men, its object being the creation of a RESPONSIBLE and THOROUGHLY TRUSTWORTHY Agency. The Medical Department has met with so great success that it has been found necessary for one of the Managing Directors (Mr. G. B. Stocker) to devote his whole attention thereto, and he has the assistance of an experienced Medical Accountant, and large staff of clerks. Further, a Board composed entirely of gentlemen of high standing in the Medical Profession has been appointed, and to them matters of dispute and complaint are referred.

The Association undertakes the SALE of PRACTICES and PARTNERSHIPS; the Introduction of LOCUM TENENS and ASSISTANTS; MEDICAL ACCOUNTANCY (by a duly qualified Medical Accountant); INVESTIGATION and VALUATION of Practices, &c.; POSTING BOOKS and sending out Bills. INSURANCE OF ALL KINDS, &c., &c.

A Pamphlet relating to the Medical Department with the names of the "Directors" and the "Medical Advising Board," and terms will be sent on application to Mr. G. B. STOCKER, MANAGING DIRECTOR, 22, CRAVEN STREET, STRAND, W.C.

PERFECT APPLIANCE.

ADRENALIN

INHALANT.

Consists of one part of Adrenalin Chloride—Takamine—in 1000 parts of aromatised neutral oil with 3% Chloretone.

Indicated in inflammatory affections of the nose and throat, when it may be applied by spraying into the nasal passages from a nebuliser. In pharyngitis, tonsillitis and laryngitis with hoarseness or aphonia, deep inhalations are usually followed by immediate relief. A soothing antiseptic astringent, bland and non-irritating.

Adrenalin Inhalant is best administered by using the

"GLASEPTIC"

NEBULISER.

(P., D. & Co.)

This apparatus is with the exception of the rubber bellows, constructed entirely of glass, and it can therefore be used with every description of liquid. It is effective with solutions of any density or viscosity, whether ethereal, spirituous, oily or aqueous, or with concentrated saline solutions.

Especially adapted for nasal use it may also be employed for the application of a spray to the pharyngeal or laryngeal regions. It produces an effective spray with a few drops of liquid, and can be corked up to prevent oxidation or evaporation, or spilling of the liquid in the event of the apparatus being carried in the pocket.

It is thus specially suitable for those preparations of which it is desirable to use only small quantities, whether on account of their oxidisable nature or their costliness.

Readily cleansed with ether, spirit, water or antiseptic solution, it is thus a perfectly aseptic apparatus.
