

Ferruginous Fluids.

The undermentioned preparations originated and were perfected in the laboratories of SQUIRE & SONS, who will esteem it a favour if any Medical Practitioner will communicate direct with them in the event of attempted substitution or any other difficulty in obtaining their products.

They are described in the SECOND APPENDIX TO SQUIRE'S POCKET COMPANION, SECTION B., pp. 74 and 88, a copy of which and Samples of the undermentioned preparations, will be presented gratis to any member of the medical profession on application.

FERMANGLOBIN

ORGANIC IRON AND MANGANESE.

A Fluid Preparation containing
HÆMOGLOBIN.

DOSE.—A dessertspoonful to a tablespoonful three or four times a day.

FERMANGLOBIN presents an excellent method of exhibiting IRON in a readily assimilable form, and is specially indicated in the treatment of Anæmia.

FERMANGLOBIN is of great value in all stages of convalescence.

FERMANGLOBIN has been recently experimentally shown to occasion a startling increase in the number of red-blood corpuscles, a count of their number having been made before and after treatment.

FERMANGLOBIN with NUX VOMICA.

Each fl. oz. contains the equivalent of $7\frac{1}{2}$ minims of Tincture of Nux Vomica.

FERMANGLOBIN WITH ARSENIC.

One dessertspoonful = $\frac{1}{10}$ grain Arsenious Acid.

MALTOGLOBIN

THE ORGANIC IRON OF FERMANGLOBIN

WITH

MALT EXTRACT.

DOSE.—A dessertspoonful to a tablespoonful.

Phosphate Preparations.

The undermentioned preparations originated and were perfected in the laboratories of SQUIRE & SONS, who will esteem it a favour if any Medical Practitioner will communicate direct with them in the event of attempted substitution or any other difficulty in obtaining their products.

The favourable results which attended the introduction of the Glycerophosphate salts as represented by the GLYPHOCAL series have been fully confirmed by the more matured experience obtained by their continued use.

The preparations are described in the SECOND APPENDIX to SQUIRE'S POCKET COMPANION, Section B., p. 77, a copy of which and Samples of the undermentioned preparations will be presented gratis to any member of the medical profession on application.

GLYPHOCAL.

SQUIRE'S GLYCEROPHOSPHATE SYRUP.

This syrup is delicately flavoured and palatable, and makes an excellent tonic which will not distress the most delicate stomach.

INVALUABLE IN NEURASTHENIA.

DOSE.—One to two fl. dr. = 3·6 to 7·1 c.c.

GLYPHOCAL WITH STRYCHNINE.

AN INTENSIFIED NERVE TONIC.

Valuable as a reconstructive in all stages of convalescence, especially after influenza.

Each fl. dr. (3·6 c.c.) contains $\frac{1}{100}$ grain (0·0005 gramme) of Strychnine.

DOSE.—One to two fl. dr. = 3·6 to 7·1 c.c.

GLYPHOCAL ELIXIR.

An elegant Elixir of the Glycerophosphates, delicately flavoured, and partaking of the nature of a Glycerophosphate Wine.

DOSE.—One to two fl. dr. = 3·6 to 7·1 c.c.

GLYPHOCAL WITH HÆMOGLOBIN.

HÆMOGLOBIN WITH GLYCEROPHOSPHATES.

A reliable and scientifically prepared solution of the Glycerophosphates with Hæmoglobin. Palatable and permanent.

Invaluable as a nerve-tonic and reconstructive. The value of Hæmoglobin in increasing the number of red blood corpuscles has been fully demonstrated.

DOSE.—One to two fl. dr. = 3·6 to 7·1 c.c.

—THE LANCET.

THE MEDICAL DIRECTORY 1908.

The MEDICAL DIRECTORY contains not only the latest addresses, but also gives ample information regarding the qualifications, appointments, and literary work of each member of the profession. It is also full of statistical information concerning Universities, Colleges, Schools, Hospitals, Asylums, Societies, and the Public Services.

Every year there are about 20,000 important changes, including 6,000 changes of address. The new volume is the 64th annual issue.

The Editors are always endeavouring to make THE MEDICAL DIRECTORY more serviceable to the profession. This year they have sent out the circulars four weeks later and brought out the volume two weeks earlier. The Directory is thus six weeks more up-to-date than has been customary. The printing of the sheets did not commence until November.

A SHORT PRACTICE OF MEDICINE. By R. A. FLEMING, M.D., F.R.C.P.E., F.R.S.E., Lecturer on Practice of Medicine, School of the Royal Colleges, Edinburgh; Assistant Physician, Royal Infirmary, Edinburgh.

"Dr. Fleming's Text-book is most clearly, simply, and carefully written; and pains have obviously been taken to group symptoms systematically and to maintain the same arrangement throughout. All this will make it eminently serviceable to students. . . . A student who thoroughly masters its contents should have little fear of his examiners, and we are confident that it will appeal to, and be found serviceable by, the class of readers for whom it is designed."—EDINBURGH MEDICAL JOURNAL.

KOND'S Euonymised Cocoa

What is it?

A delicious Beverage,
taking the place of
Tea, Cocoa, or Coffee.

Why take it?

Its use is attended with a marked increase of appetite and rapidity of digestion; all feelings of heaviness after meals disappear; and an increase of the natural flow of bile takes place. It is not aperient, except in repeated doses, but the increased activity of the liver is valuable in removing constipation. It is used in stomach or liver disorders, alcoholism, slow digestion, overwork, depression, loss of appetite, in cases where tea and coffee are not desirable, sedentary habit of life, gout, rheumatism, and biliousness.

Euonymised Cocoa can be freely taken by those unable to take ordinary Cocoas.

The Euonymin is taken in the form of a hot infusion in a delicious beverage. Its action in this form is incomparably more direct and powerful than when taken in any other forms.

MARTELL'S

"This brandy shows excellent features on analysis. It possesses that ethereal fragrance due to the peculiar ethers of wine. The flavour is soft and mellow and the aroma is characteristic of a sound and matured wine-derived spirit. In view of these analytical and general evidences, this brandy may be described as particularly suitable for medicinal purposes."

—THE LANCET.

THREE STAR

BRANDY.

"We have carefully examined a sample of this well-known spirit by the usual tests, and the results obtained by analysis fully warrant our recommending it for medical and dietetic purposes. We analysed this product some ten or more years ago, and finding that it still maintains its exceptionally high character, we are consequently in a position to speak highly of it as a genuine old brandy made from wine well matured and free from compounds which might detract from its value as a medicinal agent."—The MEDICAL PRESS.

A MOST
RELIABLE NUTRIENT

MEDICAL EXPERIENCES:

His Excellency Professor von LEYDEN, of Berlin, says: "I am freely and gladly prescribing Sanatogen for weak patients, both in the hospital and in my private practice, and am exceptionally satisfied with the success achieved."

Privy Counsellor Professor EULENBURG, of Berlin University, writes: "I have been using Sanatogen in an ever-increasing degree, because it brings about in the quickest and most definite manner an increase in strength and improvement in general condition, even in the more serious forms of Nervous Weakness and Exhaustion. It is invariably well borne."

"In the most serious of Nutritive disorders—Infantile atrophy—Sanatogen possesses a most marked influence. It is readily absorbed, and increases the value of other food materials."—THE PRACTITIONER, October, 1905.

"Manifestations of Neurasthenia are allayed by feeding with Sanatogen; weight is increased and fatigue removed. 'Borderland' cases are averted from drifting into mental disease."—GENERAL PRACTITIONER, May 20th, 1905.

"Formolyptol" ITS BACTERIOLOGY

The crucial test of the efficacy of an antiseptic fluid is the bacteriological one. When we state that FORMOLYPTOL is equal in germicidal potency to a 1-1000 solution of Corrosive Sublimate, without the irritant or toxic properties of the latter drug, we base our claim upon the results of careful laboratory experimentation with the different varieties of germ life. Complete and conclusive reports from prominent bacteriologists sent upon request.

DRY (CRYSTALLINE) EXTRACT OF MALT.

Guaranteed absolutely pure, and prepared from the very fine semi-liquid Extract for which the firm has been known for more than forty years.

It has all the therapeutic features of the ordinary semi-liquid Extract, over which it presents the following material advantages:—(a) It is very palatable; (b) It keeps indefinitely; (c) It melts like sugar upon the tongue, and dissolves readily in water, milk, &c.; (d) It affords a convenient and pleasant form of administration; (e) It has a high diastasic power and is very concentrated; (f) Its concentration is definite and invariable.

In Large Bottles (retalling at 1s. 6d.) and in bulk (22-lb. Tins hermetically sealed).

COMBINED MALT PREPARATIONS (PALATABLE & NON-PERISHABLE)

DRY EXTRACT OF MALT WITH IRON IODIDE.

DRY EXTRACT OF MALT WITH IRON PYROPHOSPHATE.

DRY EXTRACT OF MALT WITH COMPOUND GLYCEROPHOSPHATES

DRY EXTRACT OF MALT WITH CALCIUM PHOSPHATE.

These are most valuable preparations, combining the well-known properties of the above salts with the marked advantages presented by Malt Extract as a food, and in actually assisting digestion and assimilation. They are in powder form, very palatable, and keep indefinitely.

In Large Bottles (retalling at 1s. 9d.) and in bulk (22-lb. Tins hermetically sealed).

Whooping Cough!

Extract from Reports of the British Medical Profession :—

"I tried your Pertussin on three cases and two were much benefitted."

"I consider your preparation of Pertussin to be a very useful and valuable one."

"I consider your Pertussin to be very helpful in some cases of whooping cough where there is much bronchial catarrh."

"I found the samples you sent me very useful in whooping cough."

"I have prescribed your Pertussin with excellent results."

"It is remarkable that my three children took whooping cough soon after you kindly sent me samples of Pertussin which seems to be doing extremely well for them."

"I prescribed Pertussin in several cases of whooping cough and bronchial catarrh with decided benefit."

"The sample of Pertussin you sent me I used for experimental purposes, and found in one case of whooping cough most excellent results, and in a case of almost chronic bronchitis a very considerable improvement."

"The samples of Pertussin you sent me have had good results in children with whooping cough."

Members of the Medical Profession who have not yet had a free sample of Pertussin (E. Taeschner's extractum thymi saccharatum) are requested to write the British Agents as below. The remedy is admittedly invaluable for obstinate and long-standing cases of whooping cough. Pertussin fulfils one of the chief essentials of a children's medicine in that it is pleasant to take.

THE ORIGINAL AND STANDARD
PREPARATION OF PETROLEUM.

ANGIER'S EMULSION

(Petroleum with Hypophosphites)

PULMONARY TUBERCULOSIS.

Angier's Emulsion is a most efficacious remedy in Pulmonary Tuberculosis, because it not only maintains the normal condition of nutrition, but has a well defined specific palliative influence upon the symptoms of the disease. Its beneficial effect upon the disordered digestive organs would alone entitle it to a first place in any course of treatment; but apart from this it is most effective in controlling the cough and reducing the symptoms of systemic infection and exhaustion, hectic fever, night sweats, headache, and diarrhoea.

BRONCHITIS, SUB-ACUTE AND CHRONIC.

Prompt relief is always afforded by Angier's Emulsion in treating all forms of respiratory inflammation. Cough is checked, bronchial irritation allayed, and expectoration facilitated. No other remedy has such sedative, demulcent, and lubricating effects, while its stimulating effect on nutrition overcomes the oft-present element of systemic depression.

PNEUMONIA, PLEURISY, AND SEQUELÆ.

The administration of Angier's Emulsion during and after attacks of Pneumonia and Pleurisy is strongly recommended by the best authorities. It relieves the pulmonary distress, the hacking cough and the difficult expectoration with a rapidity and completeness that are at times surprising. After the attack, when the patient's nutrition and vitality are at the lowest ebb, Angier's Emulsion is especially indicated because of its reinforcing influence upon the normal processes of digestion, assimilation and nutrition, whereby it enables the system to utilise to the full extent all forms of nourishment.

GASTRO-INTESTINAL DISORDERS.

Angier's Emulsion is particularly efficacious in gastro-intestinal disorders of an inflammatory, ulcerative or tubercular nature. Petroleum undergoes no chemical change in the stomach, hence it exercises its sedative, demulcent, lubricant effect throughout the entire intestinal canal from the duodenum to the rectum, and is therefore of value whether the inflammation be seated in the large or small intestine. Either alone or as a vehicle for the administration of intestinal antiseptics or astringents Angier's Emulsion is invaluable in the treatment of enteritis, gastro-intestinal catarrh, dysentery, infantile diarrhoea and enteric fever.

CHRONIC CONSTIPATION.

As a remedy for constipation, Angier's Emulsion removes two of the most potent and constant causes, *i.e.*, an excessively dry condition of the lower intestines and atony of the colon. In these cases the remedy acts not only as a lubricant but generates a mild peristaltic wave; it thus acts as a true tonic to the relaxed muscular coat of the bowel and stimulates Nature in the production of bowel movements. Angier's Emulsion can for these reasons be confidently relied upon as a useful adjunct to the treatment of chronic constipation; furthermore it favours the eradication of the drug habit, the constant recourse to laxatives and aperients.

FREE SAMPLES TO THE MEDICAL PROFESSION.

CAUTION.—When prescribing be careful to specify Angier's Emulsion; otherwise some disappointing imitation made with ordinary petroleum may be substituted.

easy assimilation.

A MOST CONCENTRATED AND NUTRITIOUS FOOD.

IN the preparation of "BEEF PEPTONOIDS" the flesh-forming elements of beef, wheat, and milk are used, constituting a nitrogenous and nutritive food of the highest value.

THE LANCET.—"A most concentrated form of nitrogenous food, easy of digestion, and well adapted and convenient for medical use."

As a concentrated portable food, "BEEF PEPTONOIDS" is of great value to travellers and sportsmen.

"Beef Peptonoids" is put up in hermetically sealed tins, holding 4 ounces.

*Carnrick's
Liquid Peptonoids*

Prepared from Beef, Wheat and Milk; Predigested, Sterilised.

The albuminoids of "LIQUID PEPTONOIDS" are not present as "non-nutritive meat bases," but as completely assimilable proteids, obtained, as are the carbohydrates, from the three standard foods—beef, milk, and wheat. The presence of these food principles and their wholly available condition, explain the characteristic nutrient value of "LIQUID PEPTONOIDS" in Typhoid Fever or other exhausting diseases, when other foods cannot be tolerated, absorbed, or utilised.

The True Cascara Sagrada

'TABLOID' CASCARA SAGRADA contains an accurate dose of true Cascara Sagrada ~~Extract~~.

'TABLOID' Cascara Sagrada produces the full physiological action of the true drug with uniformity and certainty.

'TABLOID' Cascara Sagrada is free from the griping tendency of false or inferior cascara preparations.

'TABLOID' Cascara Sagrada is not merely true cascara; it is true cascara at its best.

MAJOR, 194th.

SPECIAL CAUTION

Serious disappointment to physicians and their patients has been caused in many cases by the substitution of cheap and unreliable preparations for genuine products of True Cascara.

There is no drug the quality of which is more evident in the results obtained—than Cascara, and physicians will serve their own interests and those of their patients by taking every precaution to ensure that their prescriptions are dispensed with genuine 'Tabloid' products. The appearance of some imitations is extremely deceptive.

An Ideal Tonic in Convalescence

"Byno" Hypophosphites

AN ACTIVE AID TO THE
DIGESTION OF FARINACEOUS FOODS.

"Byno" Hypophosphites may be taken when the digestive organs are weak and impaired, and when ordinary tonics cannot be tolerated.

THE constituents of 'Byno' Hypophosphites ensures the effectual combination required in a perfect tonic. This combination, though somewhat complex, is in practice most successful, and 'Byno' Hypophosphites will be found much superior to the official syrup of which it is the analogue. It stimulates the appetite whilst aiding digestion; it conserves and invigorates the nervous system.

PRACTICAL CLINICAL EXPERIENCE of many years has proved that what theoretically is expected of 'Byno' Hypophosphites by reason of its composition is fully justified. It is, as the *British Medical Journal* says,

"One of the Most Popular Tonics of the Day."

WRIGHT'S COAL TAR INHALER AND VAPORIZER.

**For Whooping Cough, Croup, Bronchitis, Influenza, and all
Complaints of the Respiratory Tract.**

To successfully employ Coal Tar in the treatment of diseases of the respiratory system the need is felt of some preparation whereby its active principles can be applied in the form of a vapour.

This need has now been met in Wright's Coal Tar Inhaler and Vaporizer.

By means of this simple appliance a carefully regulated stream of **Antiseptic Tar Vapour** can be obtained, combined with pleasantly-scented essences, themselves antiseptic. It affords a ready means of securing a direct contact of the vapour with the air passages and acts as a powerful disinfectant and germicide in all diseases where trouble arises from bacilli, &c. The vapour may also be used for general disinfecting purposes.

INVERNITH LODGE RETREAT, DOLINBURGH FIFE.

(Licensed under the Inebriate Acts).

FOR GENTLEMEN ONLY.

In this Retreat the treatment of the alcohol and drug habits is based on a sound scientific basis, and consists of freedom from temptation, the mental faculties educated to an adverse attitude to the habit, and the will-power and physical health built up. Drugs as a specific are not used, but merely as adjuvants. Experience has proved treatment by drugs to be ineffective to attain a permanent cure.

The house is situated 450 feet above sea-level. There are three smoking rooms, library, billiard room, recreation hall, 45 good bedrooms and every convenience. The grounds are 150 acres in extent, in which there are a nine hole golf course, tennis, badminton, and bowling greens.

References can be given by the leading medical men in the United Kingdom. Terms and particulars on application to JOHN Q. DONALD, L.R.C.P., L.R.O.S. (Edin.) Proprietor and Resident Physician.

An Ideal Private Home for the treatment of ladies and gentlemen of the upper class. Situated on an island where alcoholic drinks are not obtainable, and affording possibility of freedom from all irritating restraints. Rivermere possesses unique advantages over other Homes of a like character. The house is of modern construction, handsomely furnished, beautifully situated and replete with every comfort. The air bracing, water pure and soft. Amusements of all kinds both in- and outdoor provided. For terms and further particulars apply to F. F. MOORE, L.R.C.S.I. & L.R.C.P., Proprietor and Resident Medical Superintendent.

NORWOOD SANATORIUM.

UNDER A COMMITTEE OF WELL-KNOWN MEDICAL MEN whose names will be supplied to any member of the profession on application to the Resident Medical Superintendent.

The object is to apply to the treatment of Alcoholic and Drug Inebriety all available knowledge, and by accurate observation and record of cases to extend that knowledge, and place the therapeutics of Inebriety upon a definite scientific basis. The treatment is of such a nature that the restrictions common to Retreats need not be enforced. In many cases a residence of six weeks is sufficient.

The Sanatorium consists of two detached houses (one for Ladies and one for Gentlemen) situated in beautiful and secluded grounds overlooking the Heath and Surrey Hills.

All information to be obtained from the Resident Medical Superintendent, Norwood Sanatorium, 93, Church Road, Upper Norwood, S.E. Consultations at 14, Stratford Place, W. (opposite Bond Street Tube Station), on Mondays and Thursdays, 3 to 4 p.m.

THE ALCOHOL AND DRUG HABITS.

THE GHYLL RETREAT AND SANATORIUM, Near COCKERMOUTH, CUMBERLAND.

(Licensed under the Inebriate Acts).

FOR GENTLEMEN ONLY.

Patients are treated on a sound scientific basis, the treatment consisting of freedom from temptation with very little restriction (the situation of the Retreat making this possible). Strengthening of the will power and building up the general health; such drugs and electrical treatment as may be necessary being used as required. Experience shows that while no drug per se effects a permanent cure of these habits, drugs may be used with great advantage in removing some of the conditions on which the inebriety depends. The Retreat is situated amid charming scenery on the shores of Buttermere Lake. Outdoor and indoor sports and occupations are provided, such as trout fishing, rough shooting, golf (private 9 hole course), bowls, tennis, &c. A trout hatchery is in course of erection and should prove of great interest. There is a billiard room and a good supply of books from a well-known circulating library, and the usual daily papers and magazines are provided.

Terms from £3 3s.

For full particulars apply to Dr. ASTLEY COOPER, or Dr. GEORGE MACILL DOBSON, Medical Superintendents.

NEWMAINS RETREAT, NEWMAINS, LANARKSHIRE.

Licensed under the Inebriate Acts.

The house is devoted to the care of LADIES of the upper classes only, who can be treated either under the Acts, or as Voluntary Patients. The place stands high and the estate is extensive, with bracing air and in good shelter. It is very retired and beautiful, well suited for the treatment of Inebriety, Narcomania and other perversions, Neurasthenia, Hysteria, Epilepsy, and minor Mental Ailments. No Patients under Certificates of Insanity can be received.

MEDICAL PARTNERSHIP AND CONVEYANCING AGENCY.

1, ADAM STREET, ADELPHI, W.C.
The Sale of Practices and Partnerships negotiated. Trustworthy Locum Tenens and Assistants can be had at a few hours' notice.
N.B.—No charge made to purchasers.

Notice.—Mr. J. C. Needes,

with an experience of over a quarter of a century, is in an exceptional position to give intending purchasers independent information concerning most Practices and Partnerships. Those investments in the following List marked with an Asterisk are well known to him, having been purchased through his office by the present Incumbent years ago, and in many other cases, introductions can be given to gentlemen who have taken charge of the practices during the absence of the Incumbents.

North Midlands.—A small but

increasing PRACTICE within a few miles of a favourite Cathedral City. The cash receipts for the present year have been £337, with prospects of increase as the place is developing. Union and other appointments yield £180. No resident opposition. Only a cycle required. Good detached house (6 bedrooms, bathroom, &c.) in thorough repair. Premium £450, to include drugs. Hunting, golf, boating, &c.

London, W.—A partly non-

dispensing PRACTICE held by the present incumbent 10 years and worth £1,500 per annum. The fees for visits or consultations range from 2s. 6d. to £1 1s. Very little midwifery. Expenses light, carriage not kept. The house (rent £100 a year) does not contain sufficient accommodation for a family. A good introduction given.

Partnership.—A junior partner

required in an old established PRACTICE, situated in a town of 50,000 inhabitants, within twenty miles of Manchester. The receipts are nearly £1,500 a year, and the incumbent is confident the practice can be increased to £2,000 per annum in a few years with the help of a suitable partner. The fourth share is for disposal to commence with, and part of the purchase money can be paid by instalments. Incumbent is on the Infirmary Staff.

Southern Suburb (near the

Crystal Palace).—An old-established PRACTICE, averaging £700 per annum. Held by vendor 12 years. Visiting fees 2s. 6d. to 7s. 6d. Midwifery not encouraged. About 20 cases yearly; fees one to five guineas. Good detached house; three reception rooms, five bedrooms, &c. Rent £25 a year. Three to six months' introduction given. The neighbourhood is increasing. Gravel soil.

London, S.W.—Increasing

PRACTICE worth £700 to £800 a year, all private work. No clubs or appointments. Held by Vendor 10 years. Visiting fees 1s. 6d. and 2s. 6d. paid in cash; 2s. 6d. and 3s. 6d., &c., if booked. Midwifery 15 guineas first cases, £1 1s. subsequently. Working expenses light, carriage not kept. Very nice house (dining, drawing and consulting rooms, 5 bedrooms, bathroom, &c.). Rent £45. Premium £1,000.

Open-air Treatment.—One of

the oldest-established SANATORIA in the kingdom is for disposal. The gross takings are about £5,000 a year, of which a considerable sum is net profit. Usual fee paid by patients 4 guineas weekly. Premium £3,000, to include furniture and buildings, which have cost £2,000. The Sanatorium is within 3 hours by rail of London. Further particulars on application.

Partnership.—Western

Australia.—Easy terms. A suitable partner required in a practice worth £1,700 to £1,800 a year, with ample scope for increase. Appointments produce over £500 per annum. No dispensing, no long journeys, expenses light. Ordinary visits £1 1s. Midwifery £10 10s. Operations £5 5s. to £25. Price for third share £750. £250 down and balance by instalments. The half share can be purchased in three years. This partnership can be recommended.

In purity "Lemco" stands pre-eminent. It is better and more uniform than home-made beef-tea. Doctors rely on it. They know "Lemco". It is prepared from cattle certified to be free from tuberculosis; that it is untouched by hand and watched by experts at every step of its preparation; and finally, every single batch when finished is analysed by Dr. Voit and Dr. Rubner before being put on sale. It is absolutely pure and safe. Always prescribe it as "Lemco."

Society of Chemical Industry in Basle (Pharm. Dept.), 8, Harp Lane, London, E.C.

GOLD MEDAL, Cape Town International Exhibition, 1904-5.

THE ORIGINAL PREPARATION.

LIQ. SANTAL FLAV. c. BUCHU ET CUBEBA (HEWLETT'S).

Report of "THE PRACTITIONER":—

"Experience has shown this preparation to possess the same efficacy as Santal Oil itself. It mixes perfectly with water, and has a taste by no means disagreeable, in which particular it contrasts very favourably with the ordinary mixture it is intended to replace."

To ensure obtaining this Preparation, please write "LIQ. SANTAL FLAV. c. BUCHU et CUBEBA (HEWLETT'S)" or the title may be conveniently abbreviated to "Liquor Santal Co. (Hewlett)."

CAUTION.—The titles of these Preparations are being closely imitated, and to ensure obtaining the original and genuine Preparations it is necessary to write "HEWLETT'S."

Price 10s. 6d. per lb., packed for dispensing only, in 10, 22, 40, & 90-oz. bottles.

Introduced and Prepared only by C. J. HEWLETT & SON, 35 to 42, Charlotte Street, London, E.C.

In all disorders of the respiratory tract in which inflammation or cough is a conspicuous factor, incomparably beneficial results can be secured by the administration of

Glyco-Heroin (Smith)

The preparation instantly diminishes cough, augments expulsion of secretions, dispels oppressive sense of suffocation, restores regular, pain-free respiration and subdues inflammation of the air passages.

The marked analgesic, antispasmodic, balsamic, expectorant, mucus-modifying and inflammation-allaying properties of GLYCO-HEROIN (SMITH) explain the curative action of the Preparation in the treatment of

**Coughs, Bronchitis, Pneumonia,
Laryngitis, Pulmonary Phthisis,
Asthma, Whooping Cough**

and the various disorders of the breathing passages.

GLYCO-HEROIN (SMITH) is admittedly the ideal heroin product. It is superior to preparations containing codeine or morphine, in that it is vastly more potent and does not beget the bye-effects common to those drugs.

***Dose.**—The adult dose is one teaspoonful, repeated every two or three hours. For Children of more than three years of age, the dose is from five to ten drops.*

Samples and exhaustive literature bearing upon the preparation will be sent, post paid, on request
