Weiss's Illustrated Catalogue,

containing nearly 800 engravings of Surgeons' Instruments
and Apparatus, classified for their various purposes. Price, 3s.
62, Strand, London.

"This catalogue has many and great merits. It is modest, truthful,
carefully arranged, and extremely well illustrated. In the great
majority of cases the name of the surgeon is appended to the mod-
ification which he has introduced, and frequently other makers' names
are honourably attached to instruments which they first originated.
These are large principles of honour which we are glad to see strictly
observed in this catalogue."—*Lancet*, September 12th, 1863.
