

THE CAVENDISH ELECTRICAL COMPANY, LTD.,

105-107, Great Portland Street, London, W.

beg to announce the publication of a REVISED EDITION of their New Work—

“The Equipment of the Electrical and Mass- age Departments of a Military Hospital, Convalescent Camp, or V.A.D. Hospital.”

In consequence of the very great demand for the First Edition of the above-mentioned publication, the large number of copies printed was rapidly exhausted, and we have been induced by reason of the continued demand to publish this Revised Edition.

The work has been entirely revised and considerably enlarged, many new types and designs of apparatus being illustrated and described, and the whole brought thoroughly up-to-date in view of the ever-widening sphere of operations in which electro-medical apparatus is being employed in the medical and surgical treatment of the wounded.

Consisting of 91 pages of interesting and instructive reading matter, and profusely illustrated, we are sure that the publication of this Revised Edition will meet with the same appreciation as its predecessor.

In conformity with our usual practice, we are issuing this book FREE ON REQUEST to the Medical Officers in Command of Military Hospitals and Camps, Commandants of V.A.D. Hospitals, and others engaged in this branch of medical science, confident that it will prove of exceptional interest and service to them.

SAVORY & MOORE'S PEPTONISED MILK PREPARATIONS

(Awarded **GOLD MEDAL** International Congress of Medicine, 1913)

Savory & Moore's Peptonised Milk Preparations include Cocoa and Milk, Coffee and Milk, condensed Peptonised Milk and Milk Chocolate. They are highly nourishing and extremely easy of digestion, and are thus especially useful in all cases where ordinary nourishment cannot be taken, whether through illness or digestive weakness. They are easily and quickly prepared, as hot water only is required.

COCOA AND MILK

The Cocoa and Milk is made from specially selected cocoa and pure, rich country milk, both of which are treated by a special peptonising process. The result is a preparation of remarkable nutritive value and delicious flavour which can be taken and assimilated even by those who are quite unable to take cocoa in the ordinary form.

The Cocoa and Milk is especially suitable for Invalids, Convalescents, and all whose digestive organs have been weakened by illness, overwork, study or other debilitating causes. In cases of GASTRITIS and GASTRIC ULCER it has proved highly successful. It is also very beneficial in NERVOUS CASES, and it may be taken at night without the least fear of causing digestive disturbance.

It requires only the addition of hot water, and can thus be prepared in a moment at any hour of the day or night.

PEPTONISED MILK

The process of making peptonised milk is one requiring much skill and experience, and it is practically impossible to prepare it properly in the sick room. In Messrs. Savory & Moore's factory the various operations are carried out by a highly skilled and specially trained staff, with the result that their Peptonised Milk may be absolutely relied upon.

The Peptonised Milk is of the greatest value as a food in all cases of INFANTILE MALNUTRITION, also in cases of FEVER and WASTING DISEASE, whether in children or adults. It is retained even when no other kind of food can be taken, and by its nutrient qualities enables the patient to successfully combat disease. In many cases it has been the means of saving life, especially among infants.

Dilution with hot or cold water, as directed, renders it ready for immediate use.

SAMPLES of the above may be obtained on application to:—

SAVORY & MOORE, Ltd., Chemists to THE KING,
143, New Bond Street, London.
