Weiss's Illustrated Catalogue,

containing nearly 800 engravings of Surgeons' Instruments and Apparatus, classified for their various purposes. Price, 6s. 6d., Strand, London.

"This catalogue has many and great merits. It is modest, truthful, carefully arranged, and extremely well illustrated. In the great majority of cases the name of the surgeon is appended to the modification which he has introduced, and frequently other makers' names are honourably attached to instruments which they first originated. These are large principles of honour which we are glad to see strictly observed in this catalogue."—*Lancet*, September 12th, 1863.

IS MADE BY

KROHNE AND SESEMANN, 241, WHITECHAPEL ROAD,
LONDON,

Instrument Makers to the London Hospital.

THE ORIGINAL CHLORODYNE,

INVENTED BY RICHARD FREEMAN, PHARMACEUTIST,

Is allowed to be one of the greatest discoveries of the present century, and is largely employed by the most eminent Medical Men, in hospital and private practice, in all parts of the globe, and is justly considered to be a remedy of intrinsic value and of varied adaptability, possessing most valuable properties, and producing curative effects quite unequalled in the whole *materia medica*.

It is the only remedy of any use in EPIDEMIC CHOLERA.—*Vide* EARL RUSSELL'S *Letters to the Royal College of Physicians of London and to the Inventor, Mr. FREEMAN*.

It has effects peculiar to itself, and which are essentially different to those produced by the various deceptive and dangerous compounds bearing the name of Chlorodyne. See the reports in *Manchester Guardian*, Dec. 30, 1865, and the *Shropshire News*, Jan. 4, 1866, of the fatal results from the use of an imitation.

It holds the position as the best and cheapest preparation.

It has been used in careful comparison with Dr. Collis Browne's Chlorodyne, and preferred to his.—*Vide affidavits of eminent Physicians and Surgeons*.
