

**Rational Treatment of CONSTIPATION.**  
By the double action of secretions and peristalsis.

## OPOLAXYL

**Opolaxyl** is a combination of the secretions of the liver (biliary), pancreas, and intestines, with vegetable extracts of a non-drastic nature.

It combines all the secretions to correspond to nature's therapy, and promotes a flow of bile and glycogen.

It is a normal regulator of the gastro-intestinal functions, consequently it improves the metabolic changes of the entire organism.

**Opolaxyl** does not lose its efficacy by prolonged use, its effect is gentle and constant, with the least irritation. *It is not merely purgative*, it stimulates the defective organs and revives the normal equilibrium it has a lasting effect by reason of it rebuilding the organs, thus correcting diminutional function.

**Opolaxyl** is put up in small size tabular form and should be swallowed without crunching at bedtime or before breakfast.

**DOSE**—For obstinate constipation 2 or 3 tablets, afterwards 1 tablet every 3 or 4 days for a month.

## STANNOXYL

ROBERT & CARRIÈRE, PARIS.

(An Oxide of Tin and Tin Metal Free from Lead.)

**The treatment of CARBUNCLES, BOILS, ANTHRAX, ACNE, STYES, and Diseases arising from Staphylococcus.**

A scientific production the value of which has been studied very closely. The effect is very prompt; from the second day of treatment the pain is relieved, the carbuncles begin to dry up, and those which are just opening are stopped in their course; the core is not expelled but reabsorbed.

In the majority of cases definite results are obtained within five or six days; it is seldom necessary to take the full ten days' treatment, and relapses are unknown.
